b. The U.S. markets for Tanner crab are in an early stage of development with exports accounting for a substantial portion of U.S. production. Industry representatives have repeatedly drawn attention to the volatility of markets for shellfish and repeatedly stated that increases in foreign allocations of tanner crab will weaken U.S. domestic and export markets. Not enough is currently known about the elasticities of the markets for crabs of various species, the degree of overlap between species, frozen products as opposed to canned, and the affect of fluctuating supplies on world markets to accurately define the precise level at which foreign allocations will adversely impact the U.S. fishing industry. Testimony and evidence on these questions that was considered in arriving at OY and TALFF figures is summarized in Appendix 11.6.

c. The domestic market for Tanner crab has discouraged the delivery of crab less than 5 inches in carapace width. In 1976, a minimum carapace size limit of 5.5 inches was imposed on the domestic Tanner crab fishery in the eastern Bering Sea for *C. bairdi* only. Since only a small portion of the *C. opilio* population exceeds domestic industry size requirements, the U.S. fishery for Tanner crab is therefore primarily for *C. bairdi*.

d. The tanner crab fishery is conducted by heavily capitalized vessels originally constructed for the offshore king crab fishery. Public testimony has revealed that the catch per unit effort (CPUE) must be held fairly high, dependent on price structure, to enable U.S. fishermen to engage in the fishery. The U.S. CPUE in the eastern Bering Sea in 1976 was 63 crab per pot. This criterion would suggest that populations must be maintained at near present abundance to produce an economically acceptable catch per unit effort for U.S. fishermen. Since *C. bairdi* Tanner crab are dispersed over a broad geographic area in the eastern Bering Sea, density levels throughout much of this area are (probably) below that which can be

V 43 | 95

profitably harvested. Therefore, setting OY at ABC may be optimistic from the standpoint of actually being able to recover that full amount from the stock under the economic parameters within which all commercial fishermen work.

Given the restrictions on the foreign fleet, the availability of the resource south of 58° N latitude, and the intent, desire and capacity of the domestic fleet to develop a fishery on *C. opilio* crab, the harvest which may be realized by the domestic fleet during the 1977/78 season, south of 58° N latitude in the Bering Sea, is expected to be as high as 10,000 Mt (22,000,000 lbs), well within the limits of the acceptable biological catch. Although there is a surplus of *C. opilio* south of 58° N latitude over DAH, allocation to a foreign nation would unavoidably damage the stocks of *C. bairdi*, all of which are expected to be taken by U.S. fishermen.

e. Rational management concerns other than MSY must be taken into consideration in specifying optimum yield. Stability of the fishery should be ensured by maintaining a stock base of various age classes of marketable crab, rather than creating an industry of dependency on a single year class resource. By maintaining a fishery on a broad age group, the variations associated with strong and weak year classes would be reduced.

f. The ecological importance of Tanner crab stocks is not well understood. The rich eastern Bering Sea is inhabited by the largest concentration of sea birds and marine mammals in the world. Millions of seals, important populations of whales, sea otters and other marine mammals, as well as hundred of million of sea birds and other forms of marine life are currently being impacted by the annual removal of more than 5 billion pounds (2,268,600 mt) from the eastern Bering Sea biomass. Optimum yield considerations indicate a cautious approach to additional removals.

Optimum yield for Tanner crab for 1978 are prescribed as follows:

C. bairdi, 89 million pounds (40,381 mt).
C. opilio:
North of 58°, 36.06–38.06 million pounds (16,360–17,268 mt).
South of 58°, 22 million pounds (10,000 mt).

F.7.0 Total Allowable Level of Foreign Fishery

The North Pacific Fisheries Council has determined that the U.S. domestic Tanner crab fishing fleet has the intent, desire, and capacity to fully harvest the OY of *C. bairdi* crab in the eastern Bering Sea. NMFS and OCS surveys show that the vast majority, all but about two percent (2 percent), of the *C. bairdi* stocks are found below 58° N latitude (Fig. F3, page 250). For this reason, and in order to prevent gear conflicts and a foreign by-catch of *C. bairdi* crab, any foreign harvest of Tanner crab has been restricted to the area north of 58° N latitude and west of 164° W longitude.

Approximately half of the *C. opilio* crab stocks found in the eastern Bering Sea are located south of 58° N latitude and have a similar and overlapping distribution with *C. bairdi* (Fig. F3, Page 250). The U.S. Tanner crab fleet has expressed a relatively strong interest in the development of a directed *C. opilio* crab fishery, however, the rate at which this fishery might develop can not be projected at this time with any degree of accuracy. Development of a directed domestic *C. opilio* fishery is considered to be both desirable and beneficial should market conditions and technological advancements make it feasible for domestic fishermen to economically harvest this resource.

About half of the *C. opilio* population would be available north of 58° N latitude for an ABC of approximately 225,000,000 pounds (102,000 mt). Testimony received during the development of this plan and the available evidence[1] indicates that TALFF exceeding 33,000,000 lbs (15,000 mt) will have an adverse effect on the developing U.S. Tanner crab fishery. Though 2,500 mt more than the TALFF set by the PMP for 1977 it is felt the increase is permissible in light of world market conditions and the fact that it will contain a smaller amount of the more desirable *C. bairdi* species than has been taken by foreign nations in the past. Therefore, the TALFF is equal to the OY minus the expected domestic annual catch. (TALFF=33,000,000 pounds, 15,000 mt)

F.8.0 Management Regime

F.8.1. Management Objectives

See statewide section 8.1. The management plan for the Bering Sea seeks to encourage the development of the U.S. fishery in this area by:

1. Ensuring concentrations of crab capable of supporting CPUE levels necessary to support U.S. fishery development are reserved for U.S. fishermen.
2. Preventing gear conflicts between U.S. and foreign fishermen.
3. Reserving crab for the U.S. fishery above the minimum size required by the U.S. industry for market development.

F.8.2. Areas, Fisheries and Stocks Involved

Refer to section 3.1.

F.8.3. Management Measures and Rationale

F.8.3.1. Domestic

See statewide section 8.3.1.

F.8.3.2. Foreign

See statewide section 8.3.2. Regulations governing foreign fishing in the FEDERAL REGISTER of February 11, 1977 part IV, relative to Tanner crab are retained unchanged except:

1. Subpart G, 611.90, crabs, section (b) Area quotas is changed to read: "No more than 15,000 mt of snow (Tanner) crab may be taken by foreign fishing vessels from that portion of the Bering Sea area over which the United States exercises fishing jurisdiction."
2. Eliminate categories I and II from the above Section.
3. Section (d)(2) is changed to read: "It shall be unlawful for any foreign fishing vessel to fish for crab at any time east of 164° W. longitude and south of 58°00' N. latitude in the Bering Sea, throughout the Northeastern Pacific Ocean and within 12 miles of the baselines used to measure the U.S. Territorial Sea.
4. Section (F)(2) is changed by eliminating the reference to reporting by area.

F.8.3.3. Relationship of the Recommended Measures to Existing Applicable Laws and Policies

See statewide section 8.3.3.

[1]A summary of testimony and evidence considered to arrive at an FAC of 15,000 MT is contained in Appendix 11.6.

F.8.4. Enforcement Requirements

See statewide section 8.4.

F.8.5. Reporting Requirements

See statewide section 8.5.

F.8.6. Cooperative Research Requirements

See statewide section 8.6.

F.8.7. Permit Requirements

See statewide section 8.7. for domestic licensing and foreign permits required.

F.8.8. Financing Requirements

See statewide section 8.8.

9.0 Statement of Council Intentions to Review this Plan After Approval by the Secretary

The North Pacific Fishery Management Council will, after approval and implementation of this plan by the Secretary, maintain a continuing review of the fisheries managed under this plan by the following methods:

1. Maintain close liaison with the management agencies involved, usually the Alaska Department of Fish and Game and the National Marine Fisheries Service, to monitor the development of the fisheries and the activity in the fisheries.
2. Promote research to increase their knowledge of the fishery and the resource, either through Council funding or by recommending research projects to other agencies.
3. Conduct public hearings at appropriate times and in appropriate locations, usually at the close of a fishing season and in those areas where the fishery is concentrated, to hear testimony on the effectiveness of the management plans and requests for changes.
4. Consideration of all of the information gained from the first three activities and development, if necessary, of amendments to the management plan. Hold public hearings on the amendments prior to sending them to the Secretary for adoption.

Forest Service

FOREST SERVICE NEPA PROCESS

Pursuant to the guidelines of the Council on Environmental Quality (CEQ), as published in the FEDERAL REGISTER on August 1, 1973 (38 FR 20549), the guidelines of the Department of Agriculture, appearing in the FEDERAL REGISTER on May 29, 1974, and the proposed guidelines of the Forest Service, appearing in the FEDERAL REGISTER November 29, 1977, the Forest Service herewith publishes as final the following guidelines for compliance with the National Environmental Policy Act of 1969 (Pub. L. 91-190, 183 Stat. 853, U.S.C. (2)(C)).

Comments received on the proposed Forest Service guidelines, published in the FEDERAL REGISTER, November 29, 1977, were given full consideration in developing these final guidelines. Forest Service also consulted with CEQ, the Department of Agriculture, and other agencies in finalizing the guidelines. The full test of all comments received are on file and available for public inspection in Room 3210 South Building, U.S. Department of Agriculture, Washington, D.C. 20013.

Most suggestions made for clarification were accepted. Following are the more substantive comments received and the consideration given them.

Respondents who addressed items outside the scope of FSM 1950 will receive individual responses to their concerns.

Contact. For further information, contact: Roy W. Feuchter, Environmental Coordinator, USDA, Forest Service, P.O. Box 2417, Washington, D.C. 20013, phone 202-447-4708.

JOHN R. MCGUIRE,
Chief, Forest Service.

GENERAL COMMENTS

Comment. the proposed manual suffers from an excess of words and is difficult to understand.

Response. Other ccmments received indicated that the manual was not specific enough and more material should be added. The majority, however, felt, as we, that the revised manual is of appropriate length and clarity. We have made some small revisions to try to address this comment.

Comment. Certain provisions tend to limit the dissemination of information to interested parties.

Response. Agree. The guidelines have been revised to include more dissemination opportunities. See notice of intent, FSM1952.23; finding of no significant effect, FSM 1952.24, 1952.52; record of decision, FSM 1953.3; and distribution, FSM 1952.54b.

Comment. The proposed guidelines will further complicate the system and lead to more inefficiency in the application of NEPA. Also the guidelines should be coordinated with NFMA and the Committee of Scientists.

Response. Although it is true that some additional documentation has been specified, the process itself has actually been streamlined, and is in line with CEQ present thinking in the developent of their new regulations. This should lead to more uniformity and efficiency in agency planning and decisionmaking. Coordination with NFMA and the Committee of Scientists in development of regulations has occurred throughout the development of these guidelines.

Comment. The process is to cumbersome in the event of emergency situations such as damaged timber, flood damage, fire, etc.

Response. Agree. The text has been changed (FSM 1952.1, item 5) to cover specific situations requiring immediate action to prevent or reduce risks or serious resource losses.

Comment. Environmental analysis of oil and gas wells should be reflected in the guidelines.

Response. Disagree. This manual material deals with the overall process and does not cover the specifics of proposals to use national forest lands. It would be impossible in manual guidance to cite specific emphasis covering every use. With proper application of this manual, oil and gas wells will be included as appropriate.

Comment. The environmental review process as outlined in Forest Service guidelines makes no provision for integration with responsibilities under section 106 of the National Historic Preservation Act.

Response. We have added language in the introduction to FSM 1950, last paragraph, "* * * and recognizes that the objectives of NEPA correspond to a great extent with the objectives of the Forest Service under other basic laws * * *." However, there are so many laws under with the Forest Service operates that it would be counterproductive to list them all and the requirements for each in this chapter of the Forest Service Manual. Requirements for compliance with various laws are covered in appropriate functional chapters of the Forest Service Manual and those laws and executive orders that require special coordination with NEPA are referenced in chapter 500 of FSH 1909.15, the NEPA Process Handbook.

Requirements for compliance with section 106 of the National Historic Preservation Act are provided in FSM 2300 (see 2361.31).

Comment. Every effort should be made to minimize the paperwork burden on all parties involved.

Response. Agree. The manual has been structured to eliminate duplication of effort while at the same time require documentation in keeping with the magnitude of issues and decisions being addressed. Direction toward reducting paperwork is specifically covered in FSM 1950.2, 1950.3, paragraphs 6 and 8 and 1952.4.

Comment. Early notification of State and local agencies should be given prior to the preparation of an environmental analysis.

Response. Agree. This direction is stated in FSM 1950.3—Policies and provided for in FSM 1951.

Comment. The outline for the environmental analysis has been oversimplified.

Response. Disagree. The new outline is based on 5 years of experience in working under the requirements of NEPA. We feel the change is an improvement over previous guidelines in that it allows for the documentation to be prepared in the same sequential steps as the environmental assessment which itself is designed to insure that required information is considered in a logical manner. The logical steps lead to identification of a preferred alternative and thereby makes the decision process clearly visible.

SPECIFIC COMMENTS

1950.1—AUTHORITIES

Comment. Reimbursement regulations under the Public Land Administration Act do not allow the Bureau of Land Management to require holders of rights-of-way across government land to reimburse the Bureau for expenses incurred in preparation of environmental statements or analyses of right-of-way applications.

Response. Agree. This has been deleted from the text.

1950.2—OBJECTIVES

Comment. Deemphasis on the environmental statement and emphasis on the process will result in dilution of the National Environmental Policy Act.

Response. Disagree. The emphasis on the process strengthens the application of the NEPA. Emphasis is not only on those actions which may require environmental statements but rather on the broad spectrum of Forest Service activities. It places emphasis on the "means." This does not discount the importance of the statement, the "end." It assures that NEPA concepts are appled to almost all Forest Service actions, not only those requiring environmental statements. (See FSM 1950.2 No. 7.)

1950.3—POLICIES

Comment. (1) State field offices should be contacted directly rather than through the A-95 procedures.

Response. Dealing directly with state departments and local officials is not precluded in FSM 1952.54b, Contacts with State departments and bureaus would be in accordance with arrangements between individual States and the Forest Service.

Comment. (2) Appropriate agencies involved in or having expertise or responsibility for development of compensation measures for affected resources should be consulted when preparing environmental assessments.

Response. Agree. Covered in FSM 1951.5

Comment. (3) Environmental analyses serve as a basis for decision. All economic, social effects, and other statutory factors may be equally important and should be considered in the decision.

Response. Agree. The definition of environmental assessment includes physical, biological, economic, and social factors which means that environmental assessment is comprehensive in nature. It includes factors other than just natural and biological considerations.

Comment. (4) Strongly urge that a preferred alternative be a requirement in every draft environmental statement.

Response. We expect most draft statements will indicate a preferred alternative. However, in some cases such as RPA or some land management plans, the preferred alternative is not clearly apparent and it would be misleading to artificially select an alternative as "preferred."

1950.4—RESPONSIBILITIES

Comment. (1) The Forest Service should take the lead role or at least a role equal to the extent that national forest lands are involved.

Response. Agree. This has been included in FSM 1950.4

Comment. (2) The preparation of an ES should precede any irreversible action that would limit the choice of reasonable alternatives.

Response. Agree. So provided.

Comment. (3) The environmentally preferred alternative should also be identified.

Response. The environmentally preferred alternatve would be the same as the Forest Service preferred alternative since the Forest Service includes social and economic as well as physical and biological in carrying out the mandates of NEPA. (See FSM 1950.1.)

1951.1—PUBLIC PARTICIPATION

Comment. Public participation *may* be involved in each step of the environmental analysis process. [Emphasis added.]

Response. Agree. The may refers to a decision on the part of the public to become involved. The chart in section 1951 provides for such participation in the process. (See also FSM 1950.2(3).) The public, along with other agencies, will be notified that an ES will be prepared by the "Notice of Intent." (See section 1952.23.)

1951.2—IDENTIFY ISSUES, CONCERNS, AND NEED FOR A DECISION

Comment. (1) Need a "grandfather clause" for projects underway.

Response. The new guidelines approximate that of the previous guidelines. Generally, a new start will not be required but rather an adjustment to comply. Provision is made for special approval in the few cases where it may be necessary.

Comment. (2) The material on alternative development is sparse.

Response. This section has been rewritten (See FSM 1951.5 through 1951.8.)

1951.3—GATHER RELATED INFORMATION

Comment. The Forest Service should include cultural with the other components of the environment.

Response. Cultural components are considered as part of the physical and social factors.

1951.4—DEVELOP EVALUATION CRITERIA

Comment. (1) Some flexibility can be injected by adding two more criteria to evaluation criteria (was 1951.4; now 1951.31).

Response. Agree. We have added the recommendations. Other Federal agency recommendations have been added as well as test of legal feasibility and judicial direction. Ecological has also been included by incorporating physical and biological factors.

Comment. (2) Pre-ES liaison with other Federal agencies needs more emphasis.

Response. Agree. FSM 1950 now emphasizes early involvement, and sections 1950.2, 1951.4, 1951.5, and 1952.4, paragraph 12, all emphasize early involvement.

1951.5—FORMULATE ALTERNATIVES

Comment. (1) The preferred alternative should clearly distinguish between those mitigation measures available and those that will be undertaken.

Response. The intent of section 1951.5 is to insure that any "mitigation measures needed to avoid adverse environmental effects" will be included in alternatives so that the effects of those measures will also be analyzed. Including a list of other possible measures that were not planned to be used would simply add length and confusion.

Comment. (2) Objectives from national programs and policies should be "accomplished" rather than merely "responding to."

Response. Disagree. National policies may conflict with one another, such as objectives in rural area development and energy conservation policy. Objectives are addressed or "responded to" as stated in FSM 1951.3 and 1951.5.

1951.6—ANALYZE IMPLEMENTATION EFFECTS

Comment. (1) Adverse environmental effects should call for estimated duration of the adverse effect.

Response. Agree. Section 1951.6 states "changes are usually described in terms of their magnitude, duration, and significance."

Comment. (2) Costs should include environmental losses which are difficult to quantify financially.

Response. Agree. Section 1951.6 states "effects are expressed in terms of future outputs, expenditure costs, and changes in the physicial, biological, economic, and social components of the environment for each alternative."

Comment. (3) Effects upon wetlands and flood plains should be added to No. 5 under section 1951.6.

Response. Agree. Item 5, 1951.6 now states "if the plan, program, or project is located in, or may affect flood plains or wetlands, special consideration of effects is necessary to comply with E.O. 11988 and E.O. 11990."

Comments. (4) Historic properties must be given consideration in environmental assessment.

Response. Agree. We consider historic properties as a vital segment of both the physical and social segment of the environment.

1952.12—ENVIRONMENTAL STATEMENT(S)

Comment. There is a limited list of actions requiring environmental statements.

Response. Agree. Decisions concerning the need for a statement should be made with the benefit of a systematic assessment process at that level of the organization that is best able to recognize and deal with the situation. We believe this approach is superior to an arbitrary listing.

1952.12a—CHANGES IN INVENTORIED ROADLESS AREA WILDERNESS CHARACTER

Comment. Delays are excessively long between submission of a draft environmental statement and implementation of a decision, particularly if a roadless area is involved.

Response. The 90-day period between submission of draft statements and implementation of decisions is required by current CEQ guidelines. (See 40 CFR 1500.11(b).)

The 90-day delay for implementation of decisions involving roadless areas after the FES is filed is consistent with the Chief's agreement with the Senate and House Subcommittees to provide for a 90-day congressional review period in such cases. (FSM 8260, Interim Directive No. 1, dated March 1, 1977.)

V 4 3 5 M Y 1 6 7 8 UMI

1952.12b—ALL OTHER SITUATIONS

Comment. The "controversial" provision should not have been dropped as a criteria for the need for an ES.

Response. Disagree. Current CEQ guidelines state in 40 CFR, 1500.6(a), proposed major actions, the environmental impact of which is likely to be highly controversial, should be covered in all cases. The controversy provision has been misinterpreted by many to mean that any action involving any degree of "controversy" would require an ES.

We do not view "controversy," per se, as a criteria for judging whether or not an ES is required. The need for an ES should be determined on the basis of whether it is a major Federal action significantly affecting the quality of the human environment as required by NEPA.

The degree of controversy is an important factor to consider in determining the public involvement necessary on sensitive issues. The requirement for early participation by affected Federal, State, and local agencies and other interested persons to determine scope of issues, etc., to be addressed will help responsible officials in arriving at what is necessary and appropriate. (See FSM 1951.2 which includes issues to be addressed through public involvement.)

1952.3—CONCEPTS

Comment. Should include references in the FES as to consideration given to review comments and all public comments should be included in the appendix.

Response. Agree. Change made in text. All substantive comments will be included in the appendix unless the response is exceptionally voluminous. (See FSM 1952.4, Item 12.)

1952.61—FINAL ENVIRONMENTAL STATEMENTS

Comment. The 30-day waiting period before decisions are implemented should not begin until the FES is made public and also received by appropriate clearinghouses.

Response. This will generally be the case. The 30-day waiting period is in conformance with CEQ guidelines. EPA computes the 30-day timeframe for final environmental statements from the date the FES is made available to EPA and the public.

TITLE 1900—PLANNING

CHAPTER 1950—THE FOREST SERVICE NEPA PROCESS

CONTENTS

1950.1 Authorities.
1950.2 Objectives.
1950.3 Policies.
1950.4 Responsibilities.
1950.5 Definitions.
1951 Environmental assessment.
1951.1 Public involvement.
1951.2 Identify issues, concerns, opportunities, and the need for a decision.
1951.3 Select criteria.
1951.31 Evaluation criteria.
1951.4 Gather related information.
1951.5 Formulate alternatives.
1951.6 Analyze effects.
1951.7 Evaluates alternatives.
1951.8 Identification of Forest Service preferred alternative.
1952 Environmental assessment documentation.
1952.1 When not required (categorical exclusions).
1952.2 When required.
1952.21 Environmental assessment report (EAR).
1952.22 Environmental statement (ES).
1952.22a Actions requiring environmental statements.
1952.22b Actions for which the need for an ES is determined by the environmental assessment.
1952.23 Notice of intent.
1952.24 Finding of no significant effect.
1952.3 Outline.
1952.4 Contents.
1952.5 Processing.
1952.51 Environmental assessment reports.
1952.52 Finding of no significant effect.
1952.53 Notice of intent.
1952.54 Environmental Statements.
1952.54a Filing.
1952.54b Distribution.
1952.6 Corrections.
1952.61 Environmental assessment reports.
1952.62 Draft environmental statements.
1952.63 Final environmental statements.
1952.7 Review.
1952.71 Forest Service environmental statements.
1952.71a Draft environmental statements.
1952.71b Final environmental statements.
1952.72 Review of other agency environmental statements.
1953 Recording the decision.
1953.1 Environmental assessment reports.
1953.2 Environmental statements.
1953.3 Record of decision.
1954 Implementation, monitoring, and control.
1954.1 Implementation.
1954.2 Monitoring.
1954.3 Control.

The Forest Service "NEPA process" includes all measures necessary for compliance with Title I of the National Environmental Policy Act of 1969 (Pub. L. 91-190) (NEPA). It recognizes that environmental assessment is an integral part of the Forest Service planning/decisionmaking/NEPA process and that it is used to insure that decisions conform to other applicable laws under which the Forest Service operates. This chapter describes the assessment/decision process and the environmental documents resulting from this process.

This chapter constitutes Forest Service direction for implementing the National Environmental Policy Act and subsequent regulations.

It is based upon: Legislation, Executive orders, Council on Environmental Quality guidelines, and Secretary of Agriculture memoranda and guidelines and recognizes that the objectives of NEPA correspond to a great extent with the objectives of the Forest Service under other basic laws.

1950.1—Authorities. The Forest Service is authorized and directed by the NEPA to carry out its programs in ways that will create and maintain conditions under which man and nature can exist in productive harmony, and fulfill social and economic needs of present and future generations of Americans.

Several laws require a systematic, interdisciplinary approach to planning and decisionmaking. These include the National Environmental Policy Act, Forest and Rangeland Renewable Resources Planning Act, and the National Forest Management Act. The NEPA requires detailed statements on proposed major Federal actions significantly affecting the quality of the human environment (section 102(2)(C)).

1950.2—Objectives. The purposes of the Forest Service NEPA Process are to:

1. Merge the NEPA requirements and the decisionmaking process.
2. Provide careful and appropriate consideration of environmental concerns in planning and decisionmaking.
3. Provide for early and continuing participation of other agencies, organizations, and individuals having environmental responsibilities, expertise, or interest.
4. Determine if there is a need for an Environmental Statement.
5. Assure that the planning/decisionmaking/NEPA/Process is open and available for public review. Make the sequence of planning and decision steps visible.
6. Emphasize the decisionmaking process rather than the environmental documents.
7. Identify a preferred alternative from a reasonable range of alternative policies, plans, programs, or projects.
8. Document the rationale of the decisionmaker.
9. Provide a basis for determining management requirements, mitigation measures, contract provisions, or stipulations and documentation as appropriate.

1950.3—Policies. An environmental (assessment) will be made for decisions about actions affecting resources, other land uses, or the quality of the physical, biological, economic and social environment. (New regulations and policy changes are included.) Assessments for emergency situations do not need to be documented. The responsible official may also determine that documentation is not needed in certain other specific situations (See FSM 1952.1.).

Assessments will impartially consider a reasonable range of alternatives and the anticipated environmental effects associated with each alternative.

A systematic interdisciplinary approach shall be used to integrate the natural and social sciences, and the environmental design arts in planning and decisionmaking.

The assessment is the decisionmaking process used to determine the significance of environmental effects. This determines which environmental documents are appropriate.

Assessments are documented in either (1) An Environmental Assessement Report (EAR) including a Finding of No Significant Effect or (2) An Environmental Statement (ES), (See FSM 1952). The length and detail of documented assessments varies according to the type of decisions being made and to the judgment of the responsible official. Documents must present a clear, concise, and logical explanation of: (a) The need for the action; (b) the criteria for evaluation of alternatives; (c) the alternatives; (d) the anticipated effects of implementing the alternatives; and, (e) in some cases, the Forest Service preferred alternative.

Environmental documents such as EAR's, ES's, Notices of Intent, and Findings of No

Significant Effect should replace, and not duplicate, other reports that previously were used to serve similar purposes.

Assessments will be conducted as early as possible and will be used for decisions and recommendations. EAR's or ES's will document the assessment, and identify the line officer responsible for the decision.

Environmental Statements should not be prepared for activities whose effects, although of a permanent nature, would not be of serious consequence to the human environment. These activities are more properly addressed in an EAR. (See FSM 1951.31).

Other agencies, organizations, and individuals having environmental responsibilities, expertise, or expressed interest will be consulted as appropriate at the beginning of the assessment activity. The A-95 project notification process shall be used, when appropriate, to notify state and local agencies (FSM 1565). Consultations will be documented.

Costs of environmental assessments and documents for in-service originated programs projects are a part of the regular budgetary process for the program or project. Costs will be borne by the benefiting activity(ies) unless special provision is made at the Washington Office level.

1950.4—Responsibilities. When more than one agency shares the responsibility for the decision, a "lead agency" is identified. The lead agency is the Federal agency having primary authority for committing the Federal Government to an action. The lead agency is responsible for documenting the assessment when more than one agency is involved. (See CEQ Guidelines 1500.7(B)). If the question of lead agency cannot be resolved at field levels, the Chief will work with the Department and the Council on Environmental Quality to resolve the question. When agencies have separate responsibilities but related decisions, a single interagency environmental assessment may be conducted and documented. When this is done, the document will name the responsible official for each agency and will identify their separate responsibilities. Where National Forest System lands are involved, the Forest Service should exert a strong role in the environmental assessment. If the Forest Service is not the lead agency in these cases, it should request to be a "cooperating agency."

Project proponents may be requested to provide data and documentation.

The Chief is responsible for environmental assessment documentation relating to legislation and selected national policies and programs.

The Regional Forester, or Area Director, or Station Director, or Forest Supervisor, or District Ranger, or Research Project Leader is the responsible official for determining the need for environmental assessment, preparation of environmental documents, and making this decision within their areas of responsibility.

Delegations of authority are specified in FSM 1230. Officials delegated responsibility for proposed actions are responsible for environmental assessments. (Also see FSM 1952.54a).

1950.5—Definitions. In addition to the definitions in this section, also see the Council on Environmental Quality Guidelines.

Activity: Work processes that are conducated to produce, enhance, or maintain outputs or achieve administrative and environmental quality objectives.

Categorical Exclusion: A category of actions which do not individually or cumulatively have a significant effect upon the human environment, and which do not require documentation.

Cooperating Agency: Any Federal agency other than the lead agency which has jurisdiction by law or special expertise with respect to any environmental effect involved in a proposal.

Effects: Changes in environmental conditions, directly or indirectly associated with implementation of alternatives (synonyms "consequences" or "impacts").

Environment: The aggregate interaction of physical, biological, economic, and social factors affecting all organisms in an area. (See also human environment).

Environmental Assessment: All activities related to assessing or analyzing alternatives and their environmental effects. When the term "assessment" is used in FSM 1950, it refers to the environmental assessment. It should not be confused with the "national assessment" required by the RPA (Pub. L. 93-378).

Environmental Assessment Report (EAR): A document prepared by a Federal agency which serves to (1) provide concise but sufficient evidence and analysis for the determination whether to prepare an Environmental Statement or Finding of No Significant Effect; (2) aid in compliance with the NEPA when no Environmental Statement is necessary; and, (3) facilitate preparation of a statement when one is necessary.

Environmental Design Arts: Those disciplines such as architecture, civil and environmental engineering, and landscape architecture which directly influence the physical environment as a result of the design of projects of all kinds.

Environmental Documents: Includes (a) Environmental Assessment Reports, (b) Environmental Statements, (c) Notices of Intent, and, (d) Finding of No Significant Effect.

Environmental Statement (ES): A detailed written statement as required by Section 102(2)(C) of the NEPA.

Evaluation Criteria: Predetermined rules for appraising alternatives.

Finding of No Significant Effect: A statement by a Federal agency briefly presenting the reasons why an action, not otherwise excluded (categorical exclusions) will not have a significant effect on the human environment and for which an Environmental Statement will not be prepared.

Flood Plains: Lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including as a minimum, that area subject to a one percent or greater chance of flooding in any given year. Floodprone wetlands and sinkholes, and sheet flow or shallow flooding areas such as debris cones or alluvial fans built up by material carried by mountain streams, are special flood plain areas.

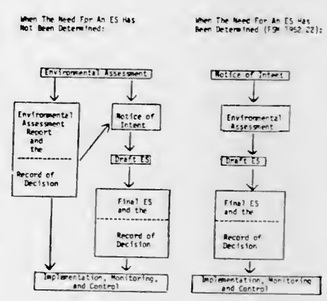
Goal: A broad but concise statement of the desired state or condition that land and resource management policy and programs are designed to achieve. It is not always quantifiable and is timeless in that it may not have a specific date by which it is to be completed. Goals are the principle statements from which objectives are developed.

Human Environment: The natural and physical environment and the interaction of people with that environment. (See also environment).

Implementation: Those activities necessary to respond to the decision.

Interdisciplinary Approach: The utilization of individuals representing two or more areas of knowledge and skills focusing on the same subject. The participants develop solutions through frequent interaction so that each discipline may provide insights to any stage of the problems and disciplines may combine to provide new solutions. This is different from a multidisciplinary team where each specialist is assigned a portion of the problem and their partial solutions are linked together at the end to provide the final solution.

Issue: A point, matter, or question to be resolved.



Notice of Intent: A notice that an Environmental Statement will be prepared and considered.

Objective: A clear and specific statement of planned results to be achieved within a stated time period. Objectives are subordinate to goals, are narrower and shorter in range and have an increased probability of attainment, specify time periods for completion and resources and achievements that are measurable and quantifiable.

Record of Decision: A concise public Record of Decision stating how the EAR or ES was considered and used by the agency in its decisionmaking.

Wetlands: Areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction.

The relationships between the environmental assessment, the environmental documents and implementation defined above are shown in diagrams below.

*The Record of Decision is attached to the FES and filed with EPA.

1951—Environmental Assessment (See FSM 1950.3). An assessment must be completed systematically to help insure that required information is considered in a logical manner leading to identification of a preferred alternative. The assessment may be thought of as being carried out in separate, but interrelated steps. The process is iterative with information feeding back through the completed steps. Steps may be combined or expanded depending on the situation.

A systematic, interdisciplinary approach is used because no single scientific discipline is sufficient to adequately identify and address issues, problems, and opportunities. Team member interaction provides the necessary insights in all steps of the process. In each assessment step, use should be made of

V 43 95

earlier document assessment information to avoid duplication of previous effort and to maximize use of available information.

The major steps of assessment and the decision process and usual roles of participants in the NEPA process are shown in the following chart:

USUAL ROLE OF PARTICIPANTS

The NEPA process	The responsible official (See FSM 1950.4)	Interdisciplinary team	Agencies, organizations, and individuals
1. Environmental assessment and decision process:			
A. Identify issues, concerns, and the need for a decision.	Responsible	Recommend	Recommend.
B. Select criteria	do	do	Do.
C. Gather related information	Review	Responsible	Provide information.
D. Formulate alternatives	do	do	Recommend.
E. Analyze effects	do	do	Provide information.
F. Evaluate alternatives	Responsible	Assist	Provide information.
G. Identify the FS preferred alternative.	do	Recommend	Recommend.
2. Documentation*	Review	Responsible	Review.
3. Establish decision date**	Responsible	Recommend	Do.
4. Implementation, monitoring and control.	do	Assist	Assist.

*Documentation refers to preparing the required environmental documents. (See FSH 1909.15, sec. 310, for sample Record of Decision).

**Refers to the action of completing the Record of Decision and not that of identifying the preferred alternative. (See FSM 1953). The Record of Decision establishes the legal date of decision.

1951.1—Public Involvement. Public involvement is an integral part of the planning/decision-making/NEPA Process. Public participation may be involved in each step of the assessment. See FSM 1626 and Inform and Involve Handbook. See Section 111, of FSH 1909. 15, the NEPA Process Handbook for a list of agencies with legal jurisdiction or expertise.

Where flood plains or wetlands are involved, there must be sufficient public participation to satisfy the requirements for early public review as shown in Section 2(A)(4) of E.O. 11988, and Section 2(B) of E.O. 11990. (See FSM 2530).

1951.2—Identify issues, concerns, opportunities, and the need for a decision. The environmental assessment begins by identifying the major issues, concerns, or opportunities and the need for a decision.

Interested or affected agencies, organizations, and individuals often assist in identifying issues, according to their importance, and scope. Public issues and management concerns may originate at national, regional or local levels, or in the implementation of higher-order plans. Forest Service policies, plans, programs, or projects are responses to major issues, concerns, and opportunities.

Early involvement by interested or affected agencies, organizations and individuals may be important in this step to assure that significant issues, concerns, and opportunities are described. Initial descriptions may be changed, modified, or dropped as the assessment proceeds.

See section 141 of FSH 1909.15, the NEPA Process Handbook, for a list of environmental factors that might be involved.

When the action is such that an Environmental Statement is required (FSM 1952.22a), or is highly probable, there shall be an early and open process to facilitate free and open communication with the public.

Through public involvement the responsible official shall:

1. Invite the participation of affected Federal, state, and local agencies, the proponent of the action, and other interested persons (including those might not be in accord with the action).

2. Determine the scope and the signficant issues to be analyzed in depth during the assessment.

3. Identify and eliminate from detailed study issues concerns, and opportunites which are not significant or which have been covered by prior environmental review.

4. Narrow the scope of the assessment to appropriate limits and discuss the information to be included in the statement.

5. Allocate responsibilities for the assessment and statement among the lead and cooperating agencies.

6. Indicate any Environmental Assessment Reports and other Environmental Statements which are being or will be prepared that are related, but are not part of the scope of the statement which is the subject of the public involvement.

7. Indicate the relationship between the timing of the preparation of environmental assessments and the agency's tentative Planning and decisionmaking schedule.

During the public involvement the responsible official may set page and time limits on Environmental Statements.

1951.3—Select criteria. Criteria are standards on which a judgment or decision may be based. These standards must be agreed upon early in the assessment process, as they guide the subsequent steps of the process. As used here, standards and criteria do not refer to the policy type of standards, criteria, and guidelines discussed in section 11 of NFMA. Criteria are frequently needed in regard to the following items:

1. Information collection standards such as: The kind, amount, intensity, and accuracy desired.

2. Alternative fromulation standards such as the kinds of alternatives the responsible official considers to be included in the "reasonable range of alternatives" and monitoring requirements.

3. Analysis standards such as: Time periods to be covered by the analysis, techniques to be used. Discount rates to be applied.

4. Evaluation standards such as: Goals of management, program objectives, and tests of feasibility that will be used to compare alternatives.

5. Documentation standards such as those that will be used in the writing and processing of the EAR or ES.

1951.31-Evaluation criteria. Whereas most of the kinds of criteria lised above are used by the interdisciplinary team in the conduct of their responsibilities, evaluation criteria are used by the responsible official and the team in evaluting the alternatives and identifying preferred alternatives. Evaluation criteria should be developed from sources external to the assessment process. Otherwise, decisions may appear to be made on evaluation criteria which were selected to justify the selection of the preferred alternative.

Develop evaluation criteria on the basis of:

1. Laws, Executive Orders, regulations, and judicial direction.

2. Goals and objectives from higher-order Forest Service plans and policy statements.

3. Program objectives.

4. Test of legal, technical, financial, economic, and political feasibility.

5. Public and other agency recommendations.

Sources of evaluation criteria should be documented.

Evaluation criteria established early in the assessment are subject to revision as the analysis proceeds. Early identification of evaluation criteria assists in formulation of alternatives and analysis of implementation effects. It also provides and opportunity for others to comment, suggest modifications, and recommend criteria that might have been omitted.

Evaluation criteria should not restrict alternative fromulation by prematurely ruling out realistic alternatives. However, they should help elminate development of infeasible alternatives.

When the need for an ES has not already been established (FSM 1952.22a) the following criteria should be considered in terms of magnitude, duration, and significance of effects in evaluating the need for an ES:

1. Degree of ecosystem disturbance, both onsite and offsite should be recognized.

2. Irreversible or irretrievable commitments of physical and biological resources which preclude future options.

3. Cumulative effects of many small actions.

4. Chain reactions or seconday effects of interrelated activities.

5. Context in terms of global, national, regional or local importance.

6. Uniqueness or rareness of resource.

1951.4—Gather related information. After the issues, concerns, and opportunities are identified, appropriate data must be gathered to provide information relating to them. The type and amount of information depends on the situation, the issues, concerns, opportunities and the scope of anticipated effects. Data collection should focus on the present and expected future conditions of those physical, biological, economic and social factors affecting and affected by the decision. Future environmental conditions will frequently be different than present conditions. Estimates of future conditions should be made without regard to changes in Forest Service direction. The steps that follow will consider Forest Service changes. Sources of information should be documented.

MY 16 78 UMI

1951.5—Formulate alternatives. A reasonable range of alternatives is developed to provide different ways to address major issues, concerns, and opportunities. These are developed consistent with goals, and objectives from legislation or higher-order FS plans, programs, and policies.

The range of alternatives must be broad enough to respond to major issues, concerns, and opportunities. Alternatives should be fully and impartially developed. Care should be taken to insure that the range of alternatives does not prematurely foreclose options which might enhance environmental quality or have fewer detrimental effects. The alternative of taking no action (continuing present course of action or no change) must always be considered.

Public involvement is important in formulating alternatives. The extent of involvement depends on the issues, concerns, opportunities involved, and the kind and magnitude of the decision.

Alternatives are often modified and new alternatives developed as the assessment proceeds.

Alternatives should be formulated to include management requirements and mitigation measures needed to avoid adverse environmental effects and conform to all other applicable laws relating to Forest Service activities. In the development of mitigation measures, it may be desirable to contact other Federal, state, or local agencies responsible for, and with special expertise regarding specific environmental values.

If the plan, program, or project is located in, or may affect, flood plains or wetlands, alternatives must be responsive to E.O. 11988 and E.O. 11990. See FSM 2530.

1951.6—Analyze effects. In this step, the effects of implementing each alternative are estimated. Direct, indirect, and cumulative effects should all be considered. Effects are expressed in terms of future outputs, expenditures, costs, and changes in the physical, biological, economic, and social components of the environment for each alternative. The changes should be those associated with implementation of the alternative, and expressed, when possible, in terms of differences from the expected future condition associated with the "no change" or "no action" alternative. Changes are usually described in terms of their magnitude, duration, and significance.

It is not always necessary to deal with all factors and components of the environment. The effects considered in analysis should be only those of significance to the issues, concerns opportunities and the evaluation criteria.

The following effects should be analyzed for alternatives; although not necessarily under separate headings:

1. The relationship between local, short-term uses of the human environment and maintenance or enhancement of long-term productivity (Section 102 NEPA).

2.Environmental Effects. Adverse effects which cannot be avoided will be identified in evaluation (Section 102 NEPA).

3. Resource commitments that are irreversible and irretrievable (Section 102 NEPA).

The term "irreversible" applies primarily to the use of nonrenewable resources, such as minerals or to those factors which are renewable only over long time spans, such as soil productivity. "Irreversible" also includes loss of future options.

The term "irretrievable" applies to losses of production, harvest or use of renewable natural resources. For example, some or all of the timber production from an area is irretrievably lost while an area is used as a winter sports site. If the use is changed, timber production can be resumed. The production lost is "irretrievable," but the action is not irreversible.

4. Effects upon minority groups and civil rights. (Secretary's memorandum 1662, Supplement 8 and OMB Circular A-19) (See also FSM 1730).

5. Effects upon prime farmland, range, and forest lands.

If the plan, program, or project is located in, or may affect flood plains or wetlands, special considerations of effects are necessary to comply with E.O. 11988 and E.O. 11990. (See FSM 2530).

1951.7—Evaluate alternatives. This step compares current and future outputs, costs and physical, biological, economic, and social changes for each alternative with goals, objectives, and other evaluation criteria. Adverse effects which cannot be avoided will be identified. The rationale for the judgment that an effect is adverse is usually based on generally accepted standards such as those for air, water, endangered species, visual, noise, etc.

This evaluation becomes a basis for identification of the Forest Service preferred alternative. If the need for an ES has not been determined, this step also includes determining if an ES should be prepared (FSM 1952.22b). Because evaluation involves judgment, the line officer is usually responsible for this step. A clear and concise record of the evaluation is necessary.

1951.8—Identification of Forest Service preferred alternative. Based on a comparison of the alternatives, the responsible official identifies a selected alternative in an EAR or FES. A preferred alternative is identified in a DES whenever a clear preference has actually been identified as a result of the assessment process. Chief's approval is required for other situations. The rationale used in identification of preferred alternative must be documented.

1952—Environmental assessment documentation. This section discusses environmental assessment reports, environmental statements, notices of intent, and findings of no significant effect. These documents describe the results of the environmental assessment, and are most often prepared from interim records developed during the various steps of the assessment process.

Environmental assessment reports are prepared in final form to document the rationale of the decisionmaker. They may be supplemented or revised as necessary.

Environmental statements are prepared first in draft form, the draft environmental statement (DES), and are filed with the EPA and distributed for public review and comment. Following the review period, a final environmental statement (FES) is prepared to document the rationale of the decisionmaker. Both draft and final environmental statements may be supplemented or revised.

Both environmental assessment reports and environmental statements should clearly, concisely, and logically describe: (1) Alternative policies, plans, programs, projects, or proposals being considered, (2) their anticipated environmental effects, (3) consultation with others, and (4) the rationale used in the identification of the Forest Service preferred alternative.

When an EA deals with the establishment of standards, criteria, and guidelines as discussed in section 11 of NFMA, the documentation step will record the determinations made and accompanying rationale, regarding the degree of public participation.

1952.1—When not required (categorical exclusions). The following categories of actions normally do not require environmental assessment documents.

1. Organizational changes, personnel actions, and other similar or related types of administrative decisions.

2. Annual budget proposals.

3. Individual actions for which the environmental effect is adequately covered by a timely assessment by a Federal agency on programs or plans which include the individual action.

4. Forest Service data collection or field surveys, not significantly affecting the quality of the human environment.

5. Situations requiring immediate action to prevent or reduce risks to public health, safety, and welfare, or serious resource losses including, but not limited to, wildland fire suppression, search and rescue, reduction of flood loss.

6. Routine operation and maintenance of existing transportation, administrative, fire management, and resource improvements which were constructed prior to the requirement that an environmental assessment be made under the NEPA. If such improvements have been constructed after the NEPA, operation and maintenance will normally be considered in the project EAR or ES.

The responsible official should recognize that there may be extraordinary circumstances when the actions listed above may have a significant environmental effect. When this situation occurs, an environmental assessment should be made to determine if the environmental effect is significant.

1952.2—When required. Whenever an assessment is conducted, it will be documented in either an EAR, or ES, except as provided in FSM 1952.1 (categorical exclusions).

1952.21—Environmental assessment report (EAR). When the assessment determines that an ES is not necessary, the assessment will be documented in an EAR.

1952.22—Environmental statements (ES). Environmental statements shall be prepared on proposals for legislation significantly affecting the quality of the human environment, and for other major Federal actions significantly affecting the quality of the human environment. When emergency circumstances make is necessary to take actions with significant environmental effect before an ES can be prepared, and processed, the Chief will request a waiver from the CEQ.

"Major" actions and "significant" effects are difficult to define precisely and uniformly because of the great variation in social, economic, physical, and biological conditions. The official responsible for taking action must use good judgment in determining when environmental statements are appropriate. (See FSM 1951.31.)

1952.22a—Actions requiring environmental statements. Environmental statements shall be prepared for the following actions:

1. Legislation recommended by Forest Service that would significantly affect the quality of the human environment.

2. Any action that is discretionary on the part of the Forest Service that will permanently change the existing character of inventoried roadless areas—except for those

V 4 3 | 9 5

areas which have been removed from the inventory by an action covered by an environmental statement. (Roadless area review and evaluation environmental statement—1973, and Forest Service stipulation in *Sierra Club v. Butz*, Ninth District Court).

3. The national program required by the forest and Rangeland Renewable Resource Planning Act (Pub. L. 93-378).

4. National Forest land and resource management plans as required by regulations issued pursuant to section 6 of the National Forest Management Act of 1976, (Pub. L. 94-588). (See FSM 1920.)

1952.22b—Actions for which the need for an ES is determined by the environmental assessment. The need for an ES for other situations will be determined through an assessment. The assessment should determine if it is a major Federal action having a significant effect upon the quality of the human environment, that has not been adequately addressed in another environmental statement. (Also see FSM 1951.31.)

1952.23—Notice of intent. When it is determined that an ES is needed, the responsible official will publish a notice of intent in a newspaper of general circulation in the area affected by the decision and in the FEDERAL REGISTER. The appropriate State clearinghouse should be notified. A copy of the notice of intent shall be sent to the Washington office when the notice is sent to the FEDERAL REGISTER for publication.

The notice shall briefly: 1. Describe the proposed action.

2. Summarize the determinations made through the public involvement to identify issues and concerns. (FSM 1951.2.)

3. State the name and address of the official responsible for preparing the environmental statement.

Notices of intent will be used to develop lists of environmental statements under preparation by administrative units. A composite list will be maintained by the Washington office. It will be updated to coincide with the management attainment reporting system schedule. See section 231, the NEPA Process Handbook.

1952.24—Finding of no significant effect. If the responsible official determines (based on the environmental assessment) not to prepare a statement, a finding of no significant effect will be prepared.

The finding of no significant effect shall briefly describe the plan, program, or project, its location, and the factors that were considered in making the determination that an ES was not required.

When: (1) the proposed action is, or is closely similar to, one which normally requires preparation of an ES (FSM 1942.22a), (2) the nature of the proposed action is without precedent, or (3) flood plains or wetland are involved, the finding of no significant effect shall be made available for a 30-day public review before the determination not to prepare an ES is effective. In all other situations, the finding of no significant effect will be included as an integral part of the EAR. See section 220, FSH 1909.15, the NEPA Process Handbook, for additional information.

1952.3—Outline. Environmental assessment reports and environmental statements generally will conform to the following outline. The outline follows the sequence of steps in the assessment (FSM 1951).

Sections of the outline may be combined or rearranged in the interest of clarity and conciseness.

EAR OR ES OUTLINE

TITLE PAGE

1. Cover sheet.
2. Summary (optional for EAR).
3. Table of contents.
4. Introduction.
5. Affected environment.
6. Evaluation criteria.
7. Alternatives considered.
8. Effects of implementation.
9. Evaluation of alternatives.
10. Identification of the Forest Service preferred alternative.
11. Management requirements, constraints, and mitigation measures (optional for ES).
12. Consultation with others.
13. Finding of no significant effect (EAR only).
14. Index (optional for EAR).
15. Appendix.

1952.4—Contents. Writers of environmental assessment reports or environmental statements should use section 1.11 of FSH 1109.12 Directives Preparation Handbook as a guide. Writers should be concerned with content, clarity, and brevity. Inclusion by reference should be freely used to reduce size and length of documents. In final environmental statements, the material listed in items 4 through 11 in FSM 1952.3 shall normally not exceed 150 pages (and preferably shorter) or 300 pages for proposals of unusual scope or complexity.

1. Cover sheet (optional for EAR). See section 232.1, FSH 1909.15, the NEPA Process Handbook for a sample cover sheet.

The cover sheet shall not exceed one page. It shall state:

a. The name of the responsible agencies including the lead agency, and cooperating agencies, and responsible official.

b. The name of the proposed action that is the subject of the statement, together with the State(s) or county(ies) where the action is located.

c. The name, address, and telephone number of the person at the agency who can supply further information.

d. A designation of the statement as a draft, final, or draft or final supplement.

e. A one paragraph abstract of the statement.

f. The date by which comments must be received.

2. Summary. A summary is desirable for lengthy and detailed environmental assessment reports. It is required for environmental statements. The responsible official will determine the need for an EAR summary. See section 232.2, FSH 1909.15, the NEPA Process Handbook, for a sample summary. An environmental statement summary will normally be 5 to 15 pages in length.

3. Table of contents. Self-explanatory.

4. Introduction. The introduction briefly describes the nature of the decision to be made. A map showing the general location of the plan or project should be included. Major issues, concerns, and essential background information are presented only if important to understanding the decision.

5. Affected environment. This section describes the current and expected future condition of physical, biological, economic, and social factors in the area affected by the decision.

The description should be limited to information directly related to major issues, concerns, and opportunities. When other published material adequately describes the factors, refer to the publication and summarize, but do not repeat the description in the EAR or ES. The section should clarify, not obscure, understanding. (Also see FSM 1951.2.)

6. Evaluation criteria. This section describes the goals, objectives, and tests of feasibility used to evaluate alternatives. The sources of these criteria should be shown. (Also see FSM 1951.3.)

7. Alternatives considered. This section is usually in two parts: The first briefly describes the process used in formulating the alternatives; and the second describes each alternative. (Also see FSM 1951.5.)

The detail of description should be similar for all alternatives.

8. Effects of Implementation. This section describes consequences of implementing each alternative in terms of outputs, expenditures, costs, and environmental changes. Objectivity is important. Significant differences of opinion should be discussed. (Also see FSM 1951.6.)

The description should:

a. Identify the assumptions used in estimating the effects of implementation.

b. Make use of appropriate analyses, data, and information. Cite sources used instead of including lengthy analyses in EAR's or ES's.

c. Express expected environmental changes in quantitative or qualitative terms as applicable, and as necessary to indicate relative differences between the alternatives in terms of significance, duration, and magnitude of the changes.

d. Indicate the expected outputs, in terms of goods and services, that will result from implementing each alternative. Express the outputs in service-wide standard terminology. See FSH 1309.11 Management Information Handbook. Use RPA program planning time periods.

e. Indicate estimated Forest Service expenditures for implementing each alternative by one or more RPA program planning periods. Other public and private expenditures may be shown, as appropriate.

f. Discuss significant changes in physical, biological, economic, and social components of the environment (effects) associated with implementation of each alternative. This includes direct, indirect, cumulative, and unavoidable effects, long- and short-term relationships, and irreversible and irretrievable resource commitments. It is not mandatory to use separate headings for these items.

9. Evaluation of alternatives. This section discusses how the alternatives compare with each other in terms of the evaluation criteria. This provides the basis for identification of a preferred alternative. (Also see FSM 1951.7.)

10. Identification of the Forest Service preferred alternative. This section identifies the preferred alternative is not identified in the DES, explain why. (Also see FSM 1951.8.)

11. Management requirements and constraints (optional for ES). This section summarizes management requirements and mitigation measures of the preferred alternative for use in project design and permit or contract requirements.

12. Consultation with others. Indicate the methods used to obtain public involvement and list the agencies and groups consulted during the assessment. Individuals may be listed when appropriate. This discussion should relate to substantive information received and used and not be directed solely to responses and rebuttals.

Copies of all substantive comments received on a DES should be included in the

M Y 1 6 7 8 UMI

appendix of the FES. If response has been exceptionally voluminous, it may be summarized. Copies, or summaries of all substantive comments should be included in the appendix, regardless of whether or not the comment is thought to merit individual attention in the text of the ES. Copies of all review comments should be available for public review and in-service use, in the office of the responsible official of the administrative unit affected by the policy, plan, program, or project.

Final statements should identify changes in the DES content as a result of substantive review comments. Possible changes are to: (1) modify the proposed action; (2) formulate, analyze, and evaluate alternatives not previously considered; (3) supplement, improve, or modify analyses, or (4) make factual corrections. In addition, it may be desirable to explain why some comments did not warrant changes in the DSES content.

13. Finding of no significant effect (EAR only). When an environmental assessment report documents the determination that an environmental statement is not necessary, the rationale for this finding will be described. See section 220, FSH 1909.15, the NEPA process Handbook, for a sample finding of no significant effect.

14. Index (optional in EAR). Environmental statements should include an index. See section 245, FSH 1909.15, the NEPA Process Handbook.

15. Appendix material should be brief and include only items pertinent to understanding the report or statement. Locations of reference materials or lenghty or detailed analyses referred to in the EAR or ES text but not included in the appendix should be shown in appropriate locations in the text. The appendix of an ES must include a list of people who contributed substantially to the assessment or to the ES, along with a brief description of their disciplines and qualifications. This list will normally not exceed two pages. See item 12 above regarding copies of summaries of comments on the DES.

1952.5—Processing.

1952.51—Environmental Assessment Reports. Regional Foresters, Area and Station Directors shall develop procedures as necessary for processing Envrionmental Assessment Reports. These procedures may include public distribution.

1952.52—Finding of no Significant Effect. See FSM 1952.24 and Section 220, FSH 1909.15, the NEPA Process Handbook, for instructions reguading processing of the Finding Of No Significant Effect.

1952.53—Notice of Intent. See FSM 1952.23 and Section 231 of FSH 1909.15, the NEPA Process Handbook.

1952.54—Environmental Statements. The following steps are taken after a DES has been prepared:

1. File the DES with EPA. Distribute it to agencies and the public.

2. Schedule public participation sessions if necessary.

3. Review, analyze, evaluate, and respond to substantive comments on the DES.

4. Prepare a FES and Record of Decision (FSM 1953.3) and attach to FES. See Section 310, FSH 1909.15, the NEPA Process Handbook for a sample Record of Decision.

5. File the FES with EPA. Distribute it to other agencies and the public.

6. Impement the plan, program, or project. Monitor the effects of implementation.

1952.54a—Filing. Regional Foresters, Station Directors, and Area Directors are authorized to file statements directly with the EPA for actions within their authority.

In cases where the Forest Supervisor or Research Project Leader is the responsible official and has demonstrated competency in the preparation of statements, Regional Foresters and Station Directors may delegate the authority to file statements directly with the EPA.

Statements involving legislation, regulations, multi-agency actions at the national level, and service-wide policy will be filed with the EPA by the Chief's office.

If the Chief is the responsible official, copies of both draft and final statements will be submitted to the Chief for approval before printing.

If the FES deals with plans, programs, or projects which involve inventoried roadless areas, the Chief will file the FES with the EPA. Public distribution will be delayed until the Chief has notified the responsible official that the FES has been filed. Final statements on plans, programs, or projects affecting areas involved in pending legislation for wilderness designation or study are to be approved by the Chief before filing with the EPA or public distribution. See Section 233 of FSH 1909.15, the NEPA Process Handbook for instructions regarding filing procedures.

1952.54b—Distribution. When the DES is filed with the EPA, the responsible official will make a reasonable number of copies of the statement available free of charge. They are sent to appropriate Federal, state, and local agencies, organizations and individuals. State and local agencies should be contacted as described in OMB Circular A-95 (FSM 1565).

Copies of statements will be available for public review at the Washington Office, the office of the responsible official, selected forest, region, area, station offices, and other appropriate locations.

When the FES is sent to the EPA, copies should be sent to other agencies, organizations, and individuals who submitted substantive comments on the DES.

Responsible officials should maintain lists of individuals, groups, organizations, and governmental agencies which may be interested in reviewing Forest Service Environmental Statements. Regions are encouraged to develop specific distribution lists. The Washington Office maintains a list of individuals, groups, organizations, and governmental agencies which may be interested in reviewing Environmental Statements on issues of national importance.

The A-95 Clearinghouses should be used, by mutual agreement, for securing reviews for the DES. The responsible official may also deal directly with appropriate state or local officials or agencies if clearinghouses are unwilling or unable to handle this phase of the process. However, clearinghouses should always receive copies of Environmental Statements.

Section 234 of FSH 1909.15, the NEPA Process Handbook, shows addresses of Federal agencies and the number of ES copies requested by that agency. Statements should be distributed as shown in that Section.

1952.6—Corrections. Either Environmental Assessment Reports or Environmental Statements may be corrected through use of errata sheets, supplements, or revisions. Supplements or revisions are prepared, circulated, filed and reviewed the same as the document being corrected.

1952.61—Environmental Assessment Reports. Additional information may emerge after an EAR has been prepared. If the new information involves minor changes, such as typographical corrections, that would not affect public response or the decision, the corrections should be noted in the file copy of the EAR.

If the new information may change the public response or the decision, the EAR should be supplemented or revised.

1952.62—Draft Environmental Statements. Errata sheets should be used when minor corrections are necessary that will not materially change the public response or the decision. Typical items include terminology and typographical corrections.

Supplements to the DES are used when new or more accurate information may significantly change the public response or the decision. Supplements add substantive information to the original DES.

If it is determined that a DES is so inadequate as to preclude meaningful analysis, a revised DES, or portion thereof, should be prepared, filed, and circulated.

When a supplement or revision is circulated the transmittal letter should establish a review period of at least 60 days from the date of filing the supplement or revision.

1952.63—Final Environmental Statements. Additional information may emerge after a FES has been prepared and circulated. If the new information involves minor changes such as typographical corrections, that would not affect public reaction or the decision, the corrections should be noted in the file copy of the FES.

If the new information might change the decision, a revised DES, a supplement, or revision to the FES should be prepared and circulated.

When the revised DES, supplement, or revision is circulated, the transmittal letter should:

1. Rescind the Record of Decision attached to the original FES.

2. Establish a review period of at least 60 days from the date of filing a revised DES, and notify reviewers that:

a. After review, a revised FES or a final supplement to the FES will be prepared and circulated, and

b. A new Record of Decision will be prepared and circulated.

1952.7—Review.

1952.71—Forest Service Environmental Statements.

1952.71a—Draft Environmental Statements. When the DES has been filed with the EPA, the responsible official should distribute copies of the statement to individuals, organizations, and other Federal, state, and local agencies with expertise and regulatory authority in environmental matters. A time period of not less than 60 days from the date of transmittal to the EPA will be allowed for comment. Extensions of time may be granted by the responsible official.

1952.71b—Final Environmental Statements. A period of not less than 30 days from the date the FES is made available to the EPA and the public will be allowed before decisions are implemented.

In rare cases, emergencies may require that a decision be implemented in a shorter time period. Before taking such action, the Washington Office will consult the CEQ.

Comments received after the FES is filed should be answered on an individual basis.

1952.72—Review of Other Agency Environmental Statements. When requested to do so or prime timber lands are involved, the Forest Service will review and comment on Environmental Statements prepared by

V 4 3 9 5

other agencies, as appropriate, because of special expertise. When another agency proposal involves or affects National Forest System lands, the Forest Service will review the Environmental Statement.

Unless otherwise assigned by the Chief, review and comment on legislative or other major policies, regulations, or national program proposals, will be made by the Washington Office. The Regional Forester or Area Director in whose region or area a proposal is located will review other Environmental Statements and submit comments. Where appropriate, statements should be sent to Station Directors or other Forest Service officials for comment.

Comments should be specific, substantive, and factual. It may be appropriate for reviewers to indicate the need for additional information about the proposed action. When unfavorable views or a recommendation against a proposed action is indicated, these will first be discussed with the agency proposing the action before a formal reply is prepared. If an unfavorable recommendation is still indicated, the CEQ referral procedures will be followed.

In some instances, review time may be insufficient because of the absence of key personnel or other unforeseen circumstances. In such cases, additional time for Forest Service review should be requested. The Washington Office Environmental Coordinator should request the extension of time for statements involving more than one region.

A review of other agency Final Environmental Statements should determine whether they are responsive to Forest Service comments on the Draft Environmental Statement. If they are not, the agency should be notified.

Copies of Forest Service comments on other agency Environmental Statements should be sent to the Washington Office Environmental Coordinator and to the EPA.

If the Forest Service review of another agency's ES indicates that the proposed Federal actions will be environmentally unsatisfactory, the Chief will refer the matter to the CEQ.

1953—Recording the Decision.

1953.1—Environmental Assessment Reports. The decision of the responsible official is recorded in the Record of Decision which will be attached to the EAR. This legally establishes the date of the decision. (See FSM 1953.3.)

The responsible official should notify the public of the decision, as appropriate.

When (1) the proposed action is, or is closely similar to one which normally requires preparation of an ES (FSM 1952.22a), (2) the nature of the proposed action is without precedent, or (3) flood plains or wetlands are involved, the Record of Decision shall be made available to the public prior to implementation.

1953.2—Environmental Statements. The decision of the responsible official is recorded in the Record of Decision which will be attached to the FES. This legally establishes the date of the decision. (See FSM 1952.3.)

The decision will not be made or implemented until the conditions in the following chart are met.

EXHIBIT 1

If an ES is required then these conditions must be met— Prior to record of decision		Prior to implementation
Plans, programs, or projects other than land management plans or decisions affecting the wilderness character of inventoried roadless areas.	1. A 60-day period has elapsed since the DES was transmitted to EPA, distributed to the public, and timely comments have been considered.	1. A decision has been announced to approve the plan, program, or project. 2. 30 days have elapsed since the FES was made available to the EPA and the public. 3. A 90-day period has elapsed since the DES was transmitted to EPA and distributed to the public.
Land management or other plans, programs, or projects affecting the wilderness character of inventoried roadless areas.	1. Same as above. 2. If the action is a land management plan, the alternative plans under consideration have been available to the public for a period of at least 3 months before adoption.	1. Same as above. 2. Same as above. 3. Same as above. 4. 90 days while Congress is in session have elapsed since the FES was transmitted to the EPA. 5. An extension of time has not been requested by the appropriate congressional committee chairman. 6. The Washington office has notified the responsible official that conditions 4 and 5 above have been met.
Land management or other plans, programs, or projects affecting areas involved in pending legislation for wilderness designation or study.	1. Same as above. 2. Approval has been received from the Chief.	1. Same as above. 2. Same as above. 3. Same as above. 4. Same as above. 5. Same as above.
Land management plans	1. Same as above. 2. The alternative land management plans under consideration have been available to the public for a period of at least 3 months.	1. Same as above. 2. Same as above. 3. Same as above.

1953.3—Record of Decision.

A Record of Decision should be attached to Environmental Assessment Reports and Final Environmental Statements. The Record of Decision should include what the decision was and how the EAR or ES was used in decisionmaking and the rationale for the decision.

The signed and dated Record of Decision should clearly identify the action or proposal and the decision of the responsible official.

The Record of Decision should also state whether all practicable means to avoid or minimize environmental harm have been adoped. When mitigation measures are decided upon, a monitoring or enforcement program shall be adopted and specified.

The Record of Decision for actions requiring an Environmental Statement should state that implementation will not take place until at least 30 days from the date the FES is made available to EPA and the public.

The Record of Decision should be sent to:

1. Individuals, organizations, or agencies affected by the decision.

2. Others who have requested in writing, such notice, if they have not otherwise been sent a copy of the FES.

In addition, the public may be notified by publishing the Record of Decision in a newspaper of general circulation in the area affected by the decision (36 CFR 211.19d).

See Section 310 of FSH 1909.15. The NEPA Process Handbook, for a sample Record of Decision.

1954—Implementation, Monitoring, and Control.

1954.1—Implementation. See FSM 1953.2 for conditions that must be met prior to implementation of the plan, program, or project when an ES has been prepared.

If flood plains or wetlands are involved, and an EAR has been prepared instead of an ES, the EAR should be available for public review for at least 20 days before the plan, program, or projects is implemented.

Implementation specifically includes any commitments for mitigation or monitoring included in the EAR, FES, or Record of Decision.

1954.2—Monitoring. Actions will be monitored to insure that (1) environmental safeguards are executed according to plan, (2) necessary adjustments are made to achieve desired environmental effects, and (3) anticipated results and projections are reviewed. The monitoring costs are a part of project costs.

Monitoring includes making progress reporst to cooperating or commenting agencies on mitigation measures adoped by the Forest Service. The results of monitoring should be made available to the public.

1954.3—Control. Management reviewers (FSM 1410) will discuss the results and environmental effects of plans, projects, and programs as part of activity, program, and general management reviews at all organizational levels. Such a review should compare the actual on-the-ground results with anticipated effects described in the EAR or FES.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[888-3]

PART 124—STATE PROGRAM ELEMENTS NECESSARY FOR PARTICIPATION IN THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

PART 125—NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

Interim Final Rule

AGENCY: Environmental Protection Agency.

ACTION: Interim final rule.

SUMMARY: Under sections 301(i) (1) and (2) of the Federal Water Pollution Control Act (commonly referred to as the Clean Water Act), extensions of the 1977 statutory deadline for compliance with certain treatment requirements may be granted by EPA or, if appropriate, the States through permit issuance or modification. These regulations establish criteria for granting these extensions and the method for incorporating these extensions into national pollutant discharge elimination system permits.

DATES: These regulations will become effective May 16, 1978. Comments received on or before July 17, 1978, will be considered before promulgation of these regulations in final form. Because of their importance for permits being issued in the near future, EPA finds good cause exists to make these regulations effective without the 30 day waiting period prescribed under 5 U.S.C. 553(d)(3).

ADDRESS: Interested persons may participate in this rulemaking by submitting written comments or suggestions to Edward Kramer, Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Please cite this FEDERAL REGISTER notice when making comments. A copy of all public comments will be available for inspection and copying at EPA Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. The EPA information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT:

Edward Kramer (EN-336), Office of Water Enforcement, Environmental Protection Agency, Washington, D.C. 20460, 202-755-0750.

SUPPLEMENTARY INFORMATION:

(1) BACKGROUND: THE CLEAN WATER ACT

Under section 301(i) of the Clean Water Act, 33 U.S.C. §1251 et seq., Pub. L. 92-500, 95-217 (also known as the Federal Water Pollution Control Act), the Administrator or the Director of an approved NPDES State may extend the 1977 deadline for the achievement of required treatment under section 301(b)(1) up to July 1, 1983. These time extensions are potentially available only to publicly owned treatment works (POTWs) that require construction to meet 1977 treatment levels and to certain dischargers which have planned to discharge into a presently unavailable POTW ("tie-in"). Section 301(i) extensions are not available if a discharger will not achieve compliance with the statutory treatment requirements by July 1, 1983.

The decision to grant a discharger's request for a time extension under section 301(i) is in the discretion of the permit issuing authority, provided that the discharger satisfies certain threshold criteria. For a POTW to be granted a time extension under this section it must require construction to achieve secondary or more stringent treatment limitations and: (1) Construction could not be completed by the 1977 deadline, or (2) Federal financial assistance in the form of a construction grant was not available in sufficient time to allow compliance by the 1977 deadline.

Similarly, a discharger other than a POTW may be granted a time extension only where it demonstrates that it intended prior to July 1, 1977, to "tie-in" to a POTW in one of four specified ways and where: (1) The POTW cannot accept the discharge without construction; (2) if the discharge is to an existing POTW, the POTW has an extension under 301(i)(1); (3) the discharger has acted in good faith; (4) the POTW will be in operation and available by July 1, 1983, and will meet any applicable treatment requirements after receiving the discharge; and (5) the POTW and the discharger have entered into an enforceable contract which meets certain criteria.

Time extensions under this section are implemented through permit issuance or modification. As with any permit issuance or modification, all the NPDES procedures (e.g., public notice and opportunity to comment, right to request an adjudicatory hearing) are in effect. However, in response to questions and comments raised in the prepublication comment period, these regulations revise existing NPDES procedural regulations to provide that there will be no delay in the effectiveness of a denial of a section 301(i) extension when that denial is contested in an adjudicatory hearing. The processes of State certification for EPA issued permits and EPA opportunity to object to State issued permits are also applicable to permits issued or modified under this section. It is suggested that whenever possible, a new 5-year permit be issued in lieu of modification to the existing permit.

Permits issued or modified under this section must contain certain terms and conditions. In the case of a POTW, the issued or modified permit must contain: (1) A schedule of compliance based on the earliest date by which Federal financial assistance will be available and construction can be completed (no later than July 1, 1983); (2) terms and conditions necessary to carry out sections 201 (b) through (g) of the act (e.g., best practicable waste treatment technology); (3) those terms and conditions necessary to carry out section 307 of the act (toxic effluent standards and prohibitions, pretreatment standards); and (4) interim effluent limitations determined to be necessary by the Regional Administrator or the Director of the State NPDES permitting agency, hereinafter "the Director."

For a discharger other than a publicly owned treatment works the issued or modified permit must contain a schedule of compliance, pretreatment standards, interim effluent limitations, water conservation requirements, and other specified terms and conditions.

(2) WHY ARE THESE REGULATIONS IN INTERIM FINAL FORM?

These regulations are being published in interim final form and take effect immediately upon publication. The usual Agency rulemaking practice is to propose regulations. In this situation EPA believes that there are two reasons it is in the public interest to issue these regulations in interim final form and have them take effect immediately.

Section 301(i)(1) of the amended Clean Water Act requires a request for an extension to be filed within 180 days after enactment of the Clean Water Act Amendments of 1977 (by June 26, 1978). Requests for 301(i)(2) extensions must be filed within 180 days after enactment of the act or the date of filing a 301(i)(1) request, whichever is later. It is in the public interest for these regulations to become effective as soon as possible so that interested persons will have adequate notice as to what constitutes a timely and sufficient request and so that delays associated with incomplete and untimely filed requests may be avoided or minimized. Moreover, because pending or ongoing enforcement actions against dischargers which may qualify for this new time extension may be affected, early publication of these regulations will clarify the status of these dischargers.

Publishing these regulations in proposed form and allowing a comment period followed by final promulgation would delay the effective date of these regulations. Accordingly, EPA finds, pursuant to 5 U.S.C. section 553(b), that notice and comment on proposed regulations would be impracticable and contrary to the public interest and that there exists cause for promulgation of these regulations in interim final form. However, even though these regulations take effect immediately, all comments received on or before July 17, 1978, will be considered before issuance of final regulations.

Because these regulations are being promulgated in interim final form, significant input from interested parties was solicited by EPA prior to this publication. Draft copies of the regulations were circulated for comment to State, regional, and local officials, as well as to the public and other interested organizations. In response, over 30 written comments were received. Additionally, EPA held numerous meetings in which section 301(i) was presented, issues were raised and comments were received. These included open public meetings in Washington, D.C., several briefings for State officials held at EPA regional offices and a meeting with representatives of the National Governors Association. The regulations were also discussed in depth with representatives from municipal associations and environmental groups in meetings held on March 9 and 14, 1978. All comments received and questions raised were considered before the publication of these interim final regulations.

(3) EFFECT ON EPA POLICY TO THE CLEAR WATER ACT

Because the majority of municipal dischargers could not be expected to meet the 1977 statutory deadline as a result of delays in the Federal construction grant process, EPA established the enforcement compliance schedule letter (ECSL) policy for municipal dischargers in a June 3, 1976, memorandum of the Assistant Administrator for Enforcement. This policy authorized the issuance of an ECSL to certain "good faith" dischargers in lieu of enforcement action. In the ECSL itself, EPA agreed not to prosecute violations of the 1977 deadline as long as the discharger adhered to a specified compliance schedule extending beyond July 1, 1977. The ECSL was an exercise of prosecutorial discretion and could not be issued except in conjunction with a permit requiring compliance by July 1, 1977. The use of ECSLs was closely circumscribed to ensure equitable treatment of noncomplying dischargers, i.e., relief from enforcement action for the deserving, and none for the recalcitrant. Many NPDES States also adopted the substance of the ECSL policy, utilizing either ECSLs or other available procedural mechanisms (all of which are referred to here as ECSLs). Over 2,000 municipal ECSLs have been issued by EPA or issued by NPDES States and approved by EPA in the past. In the future no new municipal ECSLs will be issued or approved by EPA because section 301(i) in general was intended by Congress to replace EPA's ECSL policy. Further, all existing ECSLs expire when the underlying permit expires.

In enacting the amendments to the Federal Water Pollution Control Act, Congress dealt with the legitimate needs of municipalities for extensions of the 1977 treatment deadline. Although these amendments largely replace EPA's ECSL policy they do not automatically revoke existing ECSLs. Existing ECSLs continue in effect until a final section 301(i) determination is made, at which time the ECSL is terminated. Thus, if a discharger decides to seek a section 301(i) extension, it must ultimately give up the protection of its ECSL. Since section 301(i) and the ECSL are different solutions to the same noncompliance problem, the discharger currently holding an ECSL must select one as its remedy and abide by its terms. This opportunity to select a remedy for noncompliance has been provided by Congress; a discharger cannot have "two chances" to have its compliance extended, i.e., it cannot request a section 301(i) extension, have it denied, and then retain the alternative protection of an ECSL. In this manner, existing ECSLs ultimately will be replaced whenever a section 301(i) extension is requested.

EPA wants to assist dischargers in requesting section 301(i) extensions and avoid situations where the discharger unintentionally fails to file a request in time. Therefore, if a discharger has an existing ECSL, or has a request for an ECSL outstanding, the permit issuing authority is encouraged to send the discharger a letter informing it that it may request an extension by checking a box marked "request" and returning the letter. The permit issuing authority is also encouraged to inform other dischargers of this section by a similar letter.

A discharger that does not want to be considered for a section 301(i) extension may retain its ECSL. However, it should be noted that such a decision means that the municipal discharger cannot request a section 301(i)(1) extension after June 26, 1978, and if the discharger violates the terms of its ECSL or the ECSL expires before compliance is achieved, the discharger may be subject to enforcement action.

(4) WHO IS ELIGIBLE FOR A TIME EXTENSION?

A. WHAT IS A POTW FOR PURPOSES OF THIS SECTION?

For purposes of section 301(i) a publicly owned treatment works (POTW) is a treatment works as defined in section 212 of the act, owned or operated by a State or municipality. However, since construction must be required to achieve statutory treatment limitations, the term POTW in effect, does not include collector sewers, admiknistration buildings, or equipment for operation and maintenance, but only the essential parts of the treatment system itself. This ensures that the construction required by the POTW is construction that will lead directly to achievement of the statutory treatment requirements.

B. SECTION 301(i)(1)

As indicated in the background discussion of the Clean Water Act, a POTW may be eligible for a section 301(i)(1) extension if it requires construction to achieve statutory treatment limitations and it meets one of two other threshold criteria. The legislative history indicates that section 301(i)(1) was not to be a broad exemption but rather, it was to be limited to those POTWs which were not in compliance through no fault of their own. This interpretation of section 301(i)(1) is consistent with the Agency's past enforcement policies regarding noncomplying municipalities, e.g., the ECSL policy.

The first statutory criteria necessary for a section 301(i)(1) extension is that construction must be required to comply with the treatment limitations. If optimum operation and maintenance of the treatment processes of the POTW would result in achievement of the limitations in the POTW's permit, the POTW fails to meet the threshold requirement and is not eligible for an extension.

The other statutory criterion is in the alternative. There are two criteria listed in the act and the POTW must satisfy only one of them. EPA interprets these two criteria consistently with the legislative history to allow eligibility for an extension only in the following circumstances. First, a POTW would be eligible if construction was underway prior to July 1, 1977, and the POTW had made all efforts to start and complete construction as expeditiously as possible, but construction could not physically be completed by July 1, 1977.

Second, a POTW would be eligible if the POTW did not receive Federal financial assistance or did not receive it in time (e.g., step 3 funding) to complete construction necessary to achieve the statutory limitations by July 1, 1977, and the POTW did not

V 4 3 9 5

significantly contribute to this unavailability or delay. Insignificant errors may have resulted in some minor delay; however, if in the absence of such errors compliance could still not have been achieved by July 1, 1977, the POTW should not be considered to have significantly contributed to the delay. If a POTW received Federal funding in time and completed planned construction, but is not meeting its permit limitations because of poor operation and maintenance or because it needs to further upgrade its facilities to treat unplanned "tie-ins," it would not be eligible for an extension under this criterion. However, availability of a section 301(i)(1) extension should not be determined by the unilateral actions of the municipality, such as when the municipality was unwilling to take the necessary steps to receive funding. In some cases it will be a close question to decide whether a municipality significantly caused or contributed to the delay in funding. A decision in such a case would be a factual determination to be made by the Director or Regional Administrator.

Municipalities that have requested a modification of the secondary treatment requirement under section 301(h) of the act are encouraged to request section 301(i)(1) extensions if they meet these criteria. However, determinations on these section 301(i)(1) requests will not be made until a final determination on the section 301(h) request has been made.

Because dischargers under section 301(i)(2) must request time extensions within 180 days of the date that its POTW requests an extension, the POTW, as part of its 301(i)(1) request must notify all expected users of the fact and the date of its request. In order to provide flexibility to accommodate both single industry towns and major metropolitan areas, this may be done by placing notice in a local newspaper of general circulation or direct notification by certified mail.

C. SECTION 301(i)(2)

Dischargers which have already "tied-in" to a POTW and thus are not discharging directly into the waters of the United States are not eligible for, and do not need a section 301(i)(2) extension. Dischargers which divert none or only part of their discharge into a POTW, and are therefore still subject to the terms and conditions of an effective NPDES permit, would be eligible for this extension if the criteria discussed below are met.

As indicated in the background discussion on the Clean Water Act, a discharger must demonstrate a preexisting intent to "tie-in" to a POTW to be eligible for a 301(i)(2) extension. The statutory language states that this intent may be indicated in one of the following ways: (1) The discharger was issued a permit before July 1, 1977, based upon a discharge into a POTW; (2) the discharger had a contract before July 1, 1977 (enforceable against the discharger) to discharge into a POTW; (3) a construction grant application made by the POTW before July 1, 1977, clearly demonstrated the discharger was to discharge into the POTW; or (4) engineering or architectural plans or working drawings prepared for the POTW before July 1, 1977, clearly demonstrated that the discharger was to discharge into the POTW.

A demonstration in one of these four ways must be sufficient to show an actual and binding decision to "tie-in" to the POTW; mere intent without further steps toward "tie-in" on the part of the discharger is insufficient. Otherwise, any discharger could formulate an "expression of intent to 'tie-in'" once it became apparent that it might not achieve best practicable control technology currently available by the statutory deadline. The discharger could, in effect, "hedge its bets" by providing itself a way to avoid enforcement for failure to achieve the statutory requirements while at the same time not binding itself to any future action should it somehow manage to achieve these requirements. This is inconsistent with the intent of the act, the legislative history, and Agency policy.

Some further clarification of the necessary intent is warranted. First, if the discharger was issued a permit before July 1, 1977, based upon a discharge into a POTW, or if a construction grant application made by the POTW before July 1, 1977, clearly demonstrated that the discharger was to discharge into the POTW, this is sufficient to demonstrate an actual and binding decision to "tie-in" to a POTW.

Second, "contract" as used in section 301(i)(2)(A)(ii) does not include documents labeled "contract" that impose only nominal or insignificant obligations on the discharger or contracts terminable at the will of either party. The document should accurately represent an actual and binding decision to discharge into the POTW; any contract that the discharger could breach with few or no consequences would not indicate such a decision.

Third, EPA has interpreted "engineering plans, architectural plans or working drawings," to cover plans and drawings, such as those accompanying a bona fide application for Federal construction grants, only to the extent that they were truly representative of the intent of the discharger and the POTW. Such plans may also include approved facility plans which are being implemented or submitted proposed user charge systems or industrial cost recovery systems that clearly demonstrate that the discharger was to "tie-in". Both the documents and the intent to "tie-in" must have been in existence before July 1, 1977, and could not have been created after that date.

(5) Additional Requirements for a Section 301(i)(2) Extension

The act specifically requires that several other criteria be met before a discharger can be considered for a section 301(i)(2) extension. These criteria are discussed below.

A. GOOD FAITH

As indicted in the legislative history, the section 301(i)(2) extension is available only to those dischargers which have made all possible good faith efforts to meet the statutory deadline; business as usual may not be enough. Prompt, vigorous, and in many cases, expensive pollution control measures must have been initiated and completed as soon as possible. The permit issuing authority must find good faith on the part of the discharger before an extension may be granted. Such a finding shall include the following: (1) Failure to meet the July 1, 1977, deadline was for reasons beyond the discharger's control; (2) a history of a high degree of commitment to meet the statutory mandate as manifested by cooperation with EPA or the State by the discharger in attempting to resolve disputed issues; (3) no history of unjustified delay (the discharger should have attempted, and continued to attempt to minimize delays, for example, by working to encourage the POTW to complete construction, soliciting support from a board of directors, or taking extraordinary measures to comply with pollution control laws); (4) no past serious or intentional violations of the act; and (5) all reasonable measures are or have been taken to expedite compliance despite pursuit of administrative or judicial appeals.

Clearly, good faith may be lacking if the discharger has made no attempt to minimize pollution prior to 'tie-in" or has not tried to expedite actual "tie-in". Therefore, a finding of good faith may also include consideration of: Whether the discharger has met the requirements of its existing permit; whether the discharger has operated its limited facilities competently and responsibly; and the extent to which the discharger has completed the necessary prerequisites to having its waste treated by the POTW.

B. REQUIREMENTS RELATING TO THE POTW WHICH IS THE INTENDED RECIPIENT OF THE DISCHARGER'S WASTE

The requirements discussed above are contained in paragraph (A) of section 301(i)(2). Paragraphs (A) and (B)

M Y 1 6 7 8

UMI

of section 301(i)(2) state that no time modification may be granted unless certain other specific requirements relating to the intended recipient POTW are met. They are: (1) If the discharge is to an existing POTW, such POTW must have an extension pursuant to section 301(i)(1) of the Act; (2) the POTW must be in operation and available to the discharger by July 1, 1983; (3) the POTW must be able to meet statutory treatment requirements after receiving the waste from the discharger; and (4) the POTW and the discharger must have entered into an enforceable contract that requires the discharger to discharge into the POTW, the POTW to accept that discharge and the dixcharger to pay user charges and industrial cost recovery changes required by the Act.

(6) Permit Terms and Conditions

As indicated in the background discussion of the Clean Water Act, permits incorporating time extensions must contain specified terms and conditions. There are similar requirements for both sections 301(i)(1) and 301(i)(2), such as schedules of compliance, operation and maintenance requirements, and pretreatment requirements. Nevertheless, these requirements differ as to how they are specified in permits. Therefore, permit terms and conditions for each section are discussed separately.

A. SECTION 301(i)(1)

1. *Schedule of Compliance.* For an extension under section 301(i)(1), the permitting agency must specify in the permit that final compliance with the requirements of secondary treatment or more stringent treatment requirements will be achieved at the earliest date by which Federal financial assistance under Title II of the Act will be available and construction can be completed; it may also be based on additional information available to the State or submitted by the POTW.

When Federal financial assistance has been made available, the schedule of compliance should contain specific milestones with dates certain for achieving those milestones. When the dates for Federal funding are not known, the schedule must contain definite dates to the extent that they can be determined from the construction grant process. A trigger-date elapsed-time schedule or "ratchet" schedule may be used if neccessary. A "ratchet" schedule is one which contains an initial action date or series of dates insofar as they are known at the time the schedule is developed. Other dates are contingent. The balance of the schedule contains specified periods of time for the discharger to complete certain actions which are started or triggered by a specified event or change in the discharger's circumstances. When such a schedule is used, the following is required: (a) certification by the State that funding will be available in time to assure compliance by July 1, 1983; and (b) reporting once a year by the POTW as to its progress in obtaining Federal funding. Once a construction grant is awarded, the permit should be modified to eliminate the "ratchet" schedule and incorporate a date-certain schedule. On the other hand, if it later becomes apparent that Federal funding will not be available in time, the extension granted under this section should be terminated.

2. *Requirements under Section 201 (b) through (g) of the Act.* Sections 201 (b) through (g) of the Act are requirements imposed on all permittees receiving construction grants. Any permit issued under section 301(i)(1) should be consistent with and assure compliance with sections 201 (b) through (g) of the Act.

3. *Interim Effluent Limitations.* The permit must contain any other requirements necessary to carry out the Act. These include interim effluent limitations to be achieved by the application of optimum operations and maintenance practices and other noncapital intensive measures (e.g., minor facility modifications which will result in increased pollution control.) These requirements are designed to provide maximum pollution abatement pending completion of the necessary treatment facilities. Operation and maintenance related effluent limitations may be derived from in-depth on-site evaluations performed by the municipality's consulting engineers, which clearly demonstrate the treatment capability of the particular facility if determined to be necessary by the Regional Administrator or Director. However, in most cases sufficient information should already be available to determine these effluent limitations (e.g., operation and maintenance inspections or other available guidance). In some circumstances chemical treatment may be a cost-effective method of improving the quality of the discharge. When the Regional Administrator or the Director determines that this is the case, she or he is encouraged to include in the issued or modified permit the interim effluent limitations that result from chemical treatment. In general, the facility should be required to treat its waste efficiently, leading to the achievement of effluent limitations as close as possible to those required to be met by July 1, 1977.

4. *Pretreatment program for POTWs having industrial users.* When a POTW has industrial contributors, any permit issued or modified under section 301(i)(1) must contain pretreatment requirements. The pretreatment requirements imposed will vary depending on whether new pretreatment regulations have been promulgated in 40 CFR Part 403. It is anticipated that pretreatment regulations will be promulgated in 40 CFR Part 403 before the majority of permits extending the 1977 treatment deadline are issued or modified. Once promulgated, the pretreatment regulations will specify the pretreatment requirements applicable to permits issued or modified under section 301(i)(1) of the Act. There will be a small category of permits issued or modified before the pretreatment regulations are promulgated in 40 CFR Part 403. Permits falling into this category should ensure compliance with existing pretreatment regulations contained in 40 CFR Part 128.

B. SECTION 301(i)(2)

1. *Schedule of Compliance.* The permit must contain a schedule of compliance pending "tie-in". This schedule must contain interim dates for completion of necessary construction, and a final date by which the contributor will cease discharge to waters of the United States and discharge to the POTW. This final date must be as soon as possible but not later than July 1, 1983. In most cases this date should not extend beyond any extension granted to a POTW under section 301(i)(1). The permit must also require the achievement of Best Practicable Control Technology Currently Available (BPT) by the same final date in the schedule of compliance pending "tie-in" in the event that the "tie-in" is not acceptable by that date. Thus, the permit must specify effluent limitations based on BPT as well as a schedule of compliance leading toward "tie-in." These two requirements will ensure that no discharger will be authorized to discharge without complying with the statutory deadline requirements.

2. *Interim Effluent Limitations.* Some conditions are necessary to protect the public interest pending "tie-in". While dischargers should not be forced to build duplicative treatment facilities due to a short delay in the completion of a sewage treatment plant, it is only reasonable that those dischargers which can utilize noncapital intensive measures to improve the quality of their waste should be required to do so as an interim step (e.g., optimum operation and maintenance).

3. *Toxic Effluent Standards and Prohibitions.* Permits presently contain a clause requiring modification to conform to toxic effluent standards and prohibitions after they are promulgated under section 307(a). Permits issued with extended compliance dates must also have a similar clause.

4. *Pretreatment.* There are three pretreatment related requirements that must be included in permits granting section 301(i)(2) extensions: (1) Com-

V 4 3 1 9 5

pliance with any promulgated pretreatment standards under section 307(b); (2) compliance with any requirements imposed by the POTW under the pretreatment program that a POTW must have pursuant to section 124.104(b) of these regulations; and (3) compliance with any other State or local pretreatment requirements.

5. *Water Conservation Requirements.* Water conservation requirements allow the permit issuing authority to encourage the use of technologies or unit operations which use less water, recycle water or replace water with other solvents which can be recycled. This includes any water conservation requirements contained in a contract between the discharger and the POTW executed pursuant to the granting of a request for a section 301(i)(2) extension (see earlier discussion of Requirements relating to the POTW which is the intended recipient of the discharger's waste). Specific examples of water conservation practices includes: (1) Recycle of non-contact cooling water in acid manufacturing plants, (2) partial recycle (multiple use) of water in quenching for metallurgical operations or countercurrent rinsing in electroplating, and (3) in the food industry, replacement of "wet-caustic" processes for peeling vegetables with the "infrared dry-caustic" process.

Generally, dischargers should be required to undertake all in-process adjustments which reduce the volume of water to the POTW, consistent with the maximum concentration of pollutants acceptable by the POTW. It must be emphasized that water conservation measures which are found to disturb the efficient operation of the POTW should not be imposed.

NOTE.—The Environmental Protection Agency has determined that this document does not constitute a major regulation requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and under OMB Circular A-107.

Dated: May 10, 1978.

DOUGLAS M. COSTLE,
Administrator.

1. Part 124 is amended by adding a new Subpart L as follows:

Subpart L—Criteria for Extending Compliance Under Section 301(i) of the Act

Sec.
124.100 Purpose and scope.
124.101 Definitions.
124.102 Requests for permit modification and issuance under Section 301(i)(1) of the Act.
124.103 Criteria for permit modification and issuance under Section 301(i)(1) of the Act.
124.104 Permit terms and conditions under Section 301(i)(1) of the Act.
124.105 Requests for permit modification and issuance under Section 301(i)(2) of the Act.
124.106 Criteria for permit modification and issuance under Section 301(i)(2) of the Act.
124.107 Permit terms and conditions under Section 301(i)(2) of the Act.
124.108 Effect of noncompliance with this Subpart.

AUTHORITY: Sec. 301: (1) and (2) of the Clean Water Act (Dec. 1977), 33 USC 1251 et seq.

Subpart L—Criteria for Extending Compliance Under Section 301(i) of the Act

§ 124.100 Purpose and scope.

Under sections 301(i) (1) and (2) of the Clean Water Act, extensions of the 1977 statutory deadline for compliance with certain treatment requirements may be granted by EPA or, if appropriate the State, through permit issuance or modification. This Subpart establishes criteria for granting these extensions and the method for incorporating these extensions into State issued NPDES permits.

§ 124.101 Definitions.

For purposes of this Subpart:

(a) "Construction" means actual construction or activities so closely related to actual construction that completion of the facility no later than July 1, 1983, is a reasonable expectation. This shall include any placement, assembly, or installation of facilities or equipment (including contractual obligations to purchase such facilities or equipment) at the premises where such equipment will be used, including preparation work at such premises. This shall not include actions which have been abandoned or are so insignificant that they do not lead to the completion of the facility.

(b) "ECSL" means any extension of the July 1, 1977 treatment deadline issued by EPA or an NPDES State, in conjunction with an NPDES permit which requires compliance by July 1, 1977. This term shall include any procedural mechanisms used by the State which are consistent with EPA's Enforcement Compliance Schedule Letter policy.

§ 124.102 Requests for permit modification and issuance under section 301(i)(1) of the act.

(a) Any owner or operator of a publicly owned treatment works (POTW) that requires construction to achieve limitations under sections 301(b)(1)(B) or 301(b)(1)(C) of the Act may request modification or issuance of a permit extending the date for compliance with these limitations:

(1) This request must be made to the Director on or before June 26, 1978;

(2) A request will be deemed made before June 26, 1978 if:

(i) The owner or operator of a POTW holds a ECSL or has an outstanding request for a ECSL, and has informed the Director by letter before June 26, 1978, that it wishes to request a section 301(i)(1) extension; or

(ii) The owner or operator of a POTW has informed the Director by letter before June 26, 1978, that it wishes to request a section 301(i)(1) extension and briefly states which criteria in § 124.103 it believes it meets.

(3) For a request under this paragraph to be considered, a POTW shall notify all point sources committed to discharge into the POTW by July 1, 1983, of the date of the request and that they have 180 days from that date in which to file requests for section 301(i)(2) extensions. Such notifications shall be made within 30 days from the date of the POTWs request.

(b) The burden is on the POTW to demonstrate that an extension should be granted—

(1) If the POTW does not submit arguments or factual grounds supporting the request within thirty days of such request, a section 301(i)(1) determination shall be based on existing information in EPA and/or State files.

(2) The POTW may submit arguments or factual grounds supporting the request which are relevant to the criteria listed in § 124.103. Any such arguments or factual grounds, including all supporting documentation, must be submitted within thirty days (non-extendable) from the date of the request.

§ 124.103 Criteria for permit modification and issuance under section 301(i)(1) of the act.

No request for a permit modification or issuance under section 301(i)(1) of the Act shall be granted unless the Director finds that the POTW requires construction to achieve limitations under sections 301(b)(1)(B) or 301(b)(1)(C) of the Act and did not complete construction for either of the following reasons:

(a) Actual construction was underway before July 1, 1977, but construction could not physically be completed by July 1, 1977, despite all expeditious efforts of the POTW; or

(b) Federal financial assistance was not available, or was not available in time for construction required to achieve these limitations, and the POTW did not in any significant way contribute to this unavailability or delay.

§ 124.104 Permit terms and conditions under section 301(i)(1) of the act.

(a) All permits modified or issued by the Director under section 301(i)(1) of the Act shall contain at a minimum the following permit terms and conditions:

(1) The shortest reasonable schedule of compliance for achievement of limitations under sections 301(b)(1) (B) and (C) but in no event later than July 1, 1983. This schedule shall be based upon the earliest date that Federal financial assistance will be available and construction can be completed and any additional information submitted by the POTW or otherwise available to the State.

(i) When the availability of Federal financial assistance is certain, this schedule shall contain dates certain for the completion of actions leading toward the attainment of statutory treatment limitations.

(ii) When the availability of Federal funding is uncertain, this schedule may require the completion of actions leading toward the attainment of statutory treatment limitations within stated periods of time after the occurrence of events related to the unavailability of Federal financial assistance, e.g., notification that Federal financial assistance is available and that a grant application should be filed, the offering of a grant of Federal financial assistance, etc. The following are requirements for the use of such a schedule:

(A) Certification by the State that funding will be available in time to ensure compliance by July 1, 1983;

(B) Reporting once a year by the POTW as to its progress in obtaining Federal funding and modification of the permit to incorporate a date certain schedule once Federal funding is available; and

(C) A condition in the permit requiring termination of any extension granted if it subsequently is determined that Federal funding will not be available in time to ensure compliance by July 1, 1983.

(2) A statement ensuring compliance with requirements under sections 201 (b) through (g) of the Act consistent with the terms of the POTW's construction grant.

(3) Abatement practices and interim effluent limitations reflecting optimum operation and maintenance of the existing facilities. These shall include:

(i) Adequate operator staffing and training;

(ii) Adequate laboratory and process controls; and

(iii) Effluent limitations derived from reports of operation and maintenance inspections conducted by EPA or the State, reports of in-depth plant evaluations conducted to determine the treatment capabilities of the particular plant being permitted or other available guidance.

(*Comment:* Only in exceptional circumstances should in-depth plant evaluations be conducted, e.g., when existing information does not represent the true capabilities of the plant.)

(4) Interim effluent limitations reflecting other non-capital intensive measures for increased pollution control. This shall include any possible minor facility modifications such as piping changes, additional metering and instrumentation or the use of skimming and vacuuming equipment. When an existing POTW is currently violating limitations imposed under section 301(b)(1)(C) of the Act, interim effluent limitations shall be established to minimize adverse water quality impact; these limitations shall not be made less stringent or allow more pollutants to be discharged than are currently being discharged during the term of an extension granted under section 301(i)(1) of the Act.

(b) If a POTW has industrial users, any permit issued or modified by the Director under section 301(i)(1) of the Act shall contain terms and conditions necessary to ensure compliance with pretreatment regulations promulgated under section 307(b) of the Act.

(1) Permits issued or modified after pretreatment regulations are promulgated at 40 CFR Part 403 shall be consistent with those pretreatment regulations.

(2) Permits issued or modified before pretreatment regulations are promulgated at 40 CFR Part 403 shall be consistent with pretreatment regulations promulgated in 40 CFR Part 128.

§ 124.105 Requests for permit modification or issuance under Section 301(i)(2).

(a) Any owner or operator of a point source other than a POTW that will not achieve the requirements of sections 301(b)(1)(A) and 301(b)(1)(C) of the Act because it was committed to discharge into a POTW that is presently unable to accept the discharge without construction, may request modification or issuance of a permit extending the date of compliance with these limitations. This request must be made to the Director on or before June 26, 1978 or not later than 180 days after the filing of a request under section 301(i)(1) of the Act by the POTW into which the point source is committed to discharge.

(b) The burden is on the discharger to demonstrate that an extension should be granted—

(1) If the discharger does not submit arguments or factual grounds supporting the request within thirty days of such request, a section 301(i)(2) determination shall be based upon information in EPA and/or State files.

(2) The discharger may submit arguments or factual grounds supporting the request which are relevant to the criteria listed in section 124.106. Any such arguments or factual grounds, including all supporting documentation, must be submitted within thirty days (non-extendable) from the date of the request.

§ 124.106 Criteria for permit modification and issuance under Section 301(i)(2).

No request for a permit modification or issuance under section 301(i)(2) of the Act shall be granted unless the Director finds that the discharger has failed to achieve the requirements of sections 301(b)(1)(A) and 301(b)(1)(C) of the Act because it was scheduled to discharge into a POTW that is presently unable to accept the discharge without construction, and:

(a) The discharger has indicated an intent to discharge into the POTW before July 1, 1977 in one of the following ways:

(1) The discharger was issued a permit before July 1, 1977 based upon a discharge into a POTW;

(2) The discharger had a contract before July 1, 1977 (enforceable against the discharger) to discharge into a POTW.

This does not include a document labelled as a "contract" that imposes only nominal or insignificant obligations on the discharger;

(3) A construction grant application made by the POTW before July 1, 1977 clearly demonstrated that the discharger was to discharge into the POTW; or

(4) Engineering plans, architectural plans or working drawings prepared for the POTW before July 1, 1977 clearly demonstrated the discharger was to discharge into the POTW. Plans and drawings, such as those accompanying a bona fide application for a Federal construction grant, are sufficient only to the extent that they were truly representative of the intent of the discharger and the POTW;

(b) The Director finds that the discharger has acted in good faith in both its efforts to effectuate discharge into the POTW and its efforts to minimize or abate pollution prior to discharge into the POTW. This shall include the following findings:

(1) Failure to meet the July 1, 1977 deadline was for reasons beyond the discharger's control;

(2) A history of a high degree of commitment to meet the requirements of the Act as manifested by cooperation with the State or EPA in attempting to resolve disputed issues;

(3) No history of unjustified delay;

(4) No past serious or intentional violations of the Act; and

(5) All reasonable measures are being taken to expedite compliance.

(*Comment:* The Director may also consider whether the discharger has operated its facilities competently and responsibly and the extent to which the discharger has completed the necessary prerequisites to having its waste treated by the POTW.)

(c) The POTW will be in operation and available to the discharger by July 1, 1983;

(d) The POTW will be able to meet secondary treatment and water quality standard effluent limitations by July 1, 1983 after receiving the waste from the discharger;

MAY 16 1978 UMI

V 4 3 | 9 5

(e) The discharger and the POTW have entered into an enforceable contract providing that:
(1) The discharger agrees to discharge its waste to the POTW;
(2) The POTW agrees to accept and treat that waste by a date certain; and
(3) The discharger agrees to pay all user charges and industrial cost recovery charges required under section 204 of the Act; and
(f) In the case of a discharge into an existing POTW, such POTW has been granted an extension under section 301(i)(1) of the Act.

§ 124.107 Permit terms and conditions under section 301(i)(2) of the Act.

All permits modified or issued by the Director under section 301(i)(2) of the Act shall contain at a minimum the following permit terms and conditions:
(a) The shortest reasonable schedule of compliance leading to discharge into the POTW, not to extend beyond the earliest date practicable for compliance, or beyond the final compliance date of any extension granted to the appropriate POTW under section 301(i)(1) of the Act, but in no event later than July 1, 1983. This schedule shall be based upon the earliest date by which the appropriate POTW can receive the waste from the discharger and the discharger can complete the necessary prerequisites to having its waste treated by that POTW;
(b) Achievement of effluent limitations and standards under sections 301(b)(1)(A) and 301(b)(1)(C) of the Act by the same final date in the schedule established in subparagraph (a) in the event that the permittee does not discharge its wastes to the POTW by the date established under subparagraph (a);
(c) Abatement practices and interim effluent limitations reflecting optimum operation and maintenance of the discharger's existing facilities. These shall include:
(1) Effective performance of facility design removals;
(2) Adequate operator staffing and training; and
(3) Adequate laboratory and process control;
(d) Interim effluent limitations reflecting other non-capital intensive measures for increased pollution control;
(e) Requirements to meet applicable toxic effluent standards and prohibitions after they are promulgated under section 307(a) of the Act;
(f) Requirements to ensure compliance with:
(1) Pretreatment requirements imposed by the POTW pursuant to any extension granted to the POTW under section 301(i)(1) of the Act;
(2) Any State or local pretreatment requirements; and
(3) Pretreatment standards as promulgated under section 307(b) of the Act;

(*Comment:* The legislative history cites the following example: "[I]f an industry is planning on participating in a municipal system which will not be available until January 1983, that industry would still have to install and operate pretreatment facilities within the time specified for compliance at the time the applicable pretreatment standard was promulgated and in no event later than three years from the date of said promulgation. Thus, if the pretreatment regulations are promulgated March 1, 1979 and require compliance within two years, that industry would be required to comply by March 1, 1981," H.R. Rep. No. 95-830, 95th Cong., 1st Sess., 12712 (daily ed. Dec. 6, 1977).)

(g) Any water conservation requirements necessary to carry out the provisions of the Act or imposed by the POTW pursuant to the contract executed between the discharger and the POTW.

(*Comment:* The existence of such a contract is a prerequisite to granting an extension under section 301(i)(2)(B) of the act and § 124.106(e) of this Subpart.)

§ 124.108 Effect of noncompliance with this subpart.

Failure of the State to comply with any of the requirements of this subpart shall be grounds for EPA objection to a proposed State permit under section 402(d)(2) of the Act.

Part 125 National Pollutant Discharge Elimination System, is amended as follows:

2. Section 125.5(a) is amended by adding new paragraph (5) as follows:

§ 125.5 Delegation of authority.

* * * * *

(a)(5) The authority to issue or modify permits pursuant to section 301(i) of the Act.

3. Section 125.26 is amended by adding new paragraph (c) as follows:

§ 125.26 Special categories of permits.

* * * * *

(c) *Time extensions under section 301(i) of the Act.* The Regional Administrator may issue or modify permits containing time extensions under section 301(i) of the Act. Such permits shall be issued or modified in accordance with the regulations in Subpart L of part 124 of this chapter, except that references to "State" or "Director" shall be interpreted to mean "EPA" or "Regional Administrator."

4. Section 125.35 is amended by adding a new sentence to the end of Subparagraph (d)(2) to read as follows:

§ 125.35 Issuance and effective date of permit.

* * * * *

(d)(2) * * * This subparagraph shall not apply to an adjudicatory hearing granted on a permit determination to contest the denial of a permit modification or issuance made pursuant to section 301(i) of the Act.

[42 CFR Parts 122, 123]

HEALTH SYSTEMS AGENCY AND STATE AGENCY REVIEWS OF THE APPROPRIATENESS OF EXISTING INSTITUTIONAL HEALTH SERVICES AND OF PROPOSED NEW INSTITUTIONAL HEALTH SERVICES

AGENCY: Public Health Service, HEW.

ACTION: Notice of proposed rulemaking. Extension of comment period and corrections for a previously published proposed rule.

SUMMARY: This Notice sets forth proposed regulations governing health systems agency and State health planning and development agency reviews of the appropriateness of existing institutional health services. These reviews are required by sections 1513(g) and 1523(a)(6) of the Public Health Service Act and are intended to result in careful reviews by these agencies of all existing institutional health services, public findings as to the appropriateness of each service, and recommendations for remedial action when a service is found inapprpriate.

In addition, the period of public comment is extended and certain corrections are made for previously published Notice of Proposed Rulemaking, regarding HSA and State Agency reviews of proposed new institutional health services (43 FR 11229-41, March 17, 1978).

DATES: Comments regarding reviews of existing institutional health services for appropriateness must be recieved on or before June 30, 1978. In addition, the period of public comment on the Notice of Proposed Rulemaking regarding HSA and State Agency reviews of proposed new institutional health services (43 FR 11229-41, March 17, 1978) is hereby extended to May 31, 1978.

ADDRESS: Written comments and recommendations should be submitted to: Director, Office of Policy Coordination, Bureau of Health Planning and Resources Development, Center Building, Room 6-22, 3700 East-West Highway, Hyattsville, Md. 20782. All materials received in response to this Notice will be available for public inspection and copying at the above location on weekdays (Federal holidays excepted) between the hours of 9 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT:

Harry P. Cain II, Ph. D., Director, Bureau of Health Planning and Resources Development, Center Building, Room 6-22, 3700 East-West Highway, Hyattsville, Md. 20782, 301-436-6850.

SUPPLEMENTARY INFORMATION: The National Health Planning and Resources Development Act of 1974 (Pub. L. 93-641, January 4, 1975) added to the Public Health Service Act (hereinafter referred to as "the Act") a new Title XV, "National Health Planning and Development", and a new Title XVI, "Health Resources Development". Among other things, the new Title XV authorizes the Secretary to designate and provide grant assistance to a State health planning and development agency (State Agency) for each State and to a health systems agency (HSA) for each health service area established pursuant to section 1511 of the Act. Among the duties required of State Agencies and HSA's is the periodic review of the appropriateness of all existing institutional health services.

Section 1513(g) of the Act requires that on a periodic basis (but at least every five years) each HSA must review all existing institutional health services in its health service area, and make recommendations regarding the appropriateness of those services to the State Agency. This section also requires that an HSA complete the first review of all the existing institutional health services within three years after the date of its full designation under section 1515(c) of the Act. Section 1523(a)(6) of the Act requires each State Agency to review, on a periodic basis (but not less often than every five years), all existing institutional health services in the State and, after considering the recommendations submitted to it by the HSA's in the State, to make public findings as to the appropriateness of the services. Section 1523(b)(3) of the Act further requires State Agencies to complete their findings with respect to the appropriateness at an existing institutional health service within one year of the receipt of the HSA recommendations. The purposes of the proposed 42 CFR Part 122, Subpart F and Part 123, Subpart G, are to set forth minimum procedures and criteria for HSA and State Agency reviews of the appropriateness of existing institutional health services (hereinafter referred to as "appropriateness reviews"); to describe the manner in which these procedures and criteria must be developed and published; to identify the types of health services subject to appropriateness review; and to establish requirements for coordination between HSA's and State Agencies in the conduct of appropriateness reviews.

The Secretary wishes to note that the development of regulations for appropriateness reviews posed unusually difficult problems due to a number of factors. Notable among these are: (1) The wide divergence of views regarding the nature of the function, (2) the lack of specificity regarding many important aspects of this function in the Act and the legislative history, (3) the absence of pertinent experience upon which to base the proposed rules, (4) the potentially enromous agency workload associated with the function, and (5) the possible impact of the reviews on providers of services, and on the relationships between health planning agencies and providers. While each review function mandated by the Act is affected by some of these factors, in no other case do so many apply. Therefore, in development of these rules, the Secretary has allowed considerable flexibility in the way HSA's and State Agencies conduct appropriateness reviews and relate these reviews to their other health planning responsibilities. Because of the difficulties encountered in developing these regulations, the Secretary wishes to initiate broad public dialogue on the issues associated with this function.

In soliciting public comment, the Secretary wishes to draw attention to certain aspects of the appropriateness review function and the proposed regulations. While all the reviews mandated by the Act are means for implementating State and local health plans, appropriateness review differs in two major respects from other such reviews (e.g., certificate of need reviews). First, the Act does not require the application of sanctions in cases where a finding of inappropriateness has been made by the State Agency. Although publicity surrounding findings of inappropriateness could have an adverse effect on providers, this is at most an indirect sanction. Second, appropriateness review begins at the planning agency's initiative rather than with an applicant's petition for permission to proceed with some activity; thus, the usual role of the planning agency relative to providers of health services is reversed.

These fundamental differences are reflected in the legislative history. The record reveals an evolution of "appropriateness review" from an original concept of periodic recertification of facilities, to periodic determination as to the continuing need for a service (with sanctions not required), to the present requirement for periodic review of services as to their "appropriateness." The reasons for omission of recertification authority included concerns about the possible adverse effect of appropriateness review findings on the outstanding debts of health care facilities and on the future capital market for health facilities. Unfortunately, the substitution of "appropriateness review" for reviews of "continued need" occurred so late in the legislative process that the record indicates what appropriateness review is meant not to be, but provides virtually no guidance regarding what it is meant to be.

What is clear is that appropriateness review bridges the gap between planning and regulation, embracing elements of both. For this reason it is a tool with unusual potential. It can be used as one step in developing State and local health plans and providing opportunities for specific and productive cooperative planning between providers and planning agencies. It can also be, even without official sanctions, an effective regulatory function. In both cases, appropriateness reviews should be viewed as a positive tool for improving the local or State health care system, either by highlighting areas of excess and duplication or by identifying areas needing additional or improved services.

These proposed regulations place on the function only those restrictions which the Secretary considers necessary to fulfill the statutory requirements and to ensure an adequate level of coordination between HSAs and State Agencies in the performance of the function. The proposed regulations do not require an agency to treat appropriateness review primarily as either a regulatory or a planning function; that determination is left to the agency's discretion. They do, however, require the agency to conduct the function in a manner consistent with its general planning and resource development activities, and outline some specific requirements for inclusion in the appropriateness review portion of the agency work program. The work programs will be used by the Secretary to determine both the agency's readiness to perform appropriateness reviews in an acceptable manner, and how it will carry out the function from year to year.

Of particular concern to the Secretary is the potentially enormous work load involved in this function. While there is very little relevant experience, there is little question that the appropriateness review function could severely tax the resources of a given agency and, therefore, weaken its entire program. Therefore, these regulations permit the gradual assumption of this function in accordance with agency capabilities.

The Secretary also wishes to call attention to the proposed definition of "appropriateness" which has been included in the regulations to give specific definition to the function and to reduce confusion in the performance of the function. The definition requires that the finding of appropriateness be made in accordance with the criteria developed under § 123.607. Further, these criteria focus on six characteristics of services (availability, accessibility, cost, continuity, quality, and acceptability) which have been drawn from sections 1513(a) and (b)(2)(A) and 1535(c) and (d) of the Act where they are cited as primary concerns of the health planning agencies and important aspects of the Secretary's reviews of the performance of the planning agencies. Therefore, since the finding of appropriateness is tied to these characteristics of services which are also contained in the guidelines for health systems plans and State health plans, this definition is consistent with the analytical framework contained in these guidelines. Consequently, this definition should facilitate utilization of these plans in conducting appropriateness reviews and using the results of appropriateness reviews in the development of future plans.

Particular attention is also invited to proposed § 122.503(a), and § 123.603(a) which concern appropriateness review work programs. Appropriateness reviews can result in findings or recommendations as to the appropriateness of a specific service in the aggregate, as it is provided by all institutions in the area or State, or can result in findings or recommendations regarding the appropriateness of that service in a particular institution. The Secretary recognizes that these two levels of reviews have different implications. Reviews which result in institution-specific findings are likely to require substantially more agency manpower, more time (both for analysis of data and for consultation with providers) and, perhaps, more sophisticated and specific data.

Therefore, at this time, the Secretary has chosen to require only that HSAs and State Agencies perform areawide appropriateness reviews (those resulting in findings and recommendations regarding the appropriateness of a service in the aggregate). The conduct of institution-specific reviews, therefore, is left to the option of the agencies. Nevertheless, the Secretary anticipates that the agencies will phase in institution-specific reviews as they become more proficient in appropriateness reviews and as their resources permit. Areawide reviews of all existing institutional health services must be completed within 3 years of full designation for the HSAs and within 5 years of full designation for the State Agencies, as required by the statute. The State Agency also must comply with the statutory requirement to take action within 1 year of its receipt of an appropriateness review recommendation from an HSA. This approach will still allow for successively more detailed reviews, beginning with a screening effort to identify services which may be inappropriate and followed by intensive areawide reviews and, in some cases, institution-specific reviews.

Another important feature is the degree of coordination between the HSA and State Agency required in the conduct of appropriateness reviews. Appropriateness review follows the basic approach of certificate of need review—the HSA makes recommendations and the State Agency is responsible for the final findings. However, stronger provisions for coordination seem necessary for appropriateness reviews than were required for certificate of need reviews, since there is neither a common understanding of the nature of appropriateness review, nor an application around which State Agency and HSA review activities naturally coalesce. It is also clear that the appropriateness review function should be performed in an integrated, coordinated and consistent manner so that the work of the HSAs and State Agencies is complementary. Therefore, the proposed regulations require that the State Agency, after consultation with the HSAs in the State and with the Statewide Health Coordinating Council, establish definitions of services to be reviewed, priorities among those services to be reviewed, and schedules for reviews. The Secretary has not required that the review procedures and criteria used by the HSAs and State Agencies be identical, although consultation on these matters between the HSAs, State Agencies, and SHCCs is required. The Secretary is requiring statewide coordination in order to insure cooperative action by the agencies, and to allow for the development of statewide profiles of health services and comparisons among health service areas within a State. Further, by requiring a leadership role for the State Agency in establishing the review schedules and service priorities a greater measure of accountability for achieving coordination is possible.

The Secretary has selected the State Agency to provide the necessary leadership for several reasons. It is the State Agency which is ultimately responsible for making the findings regarding the appropriateness of services, and it is important that these findings be based on comparable recommendations from the HSAs in the State. In addition, the State Agency has the responsibility to recommend remedial action whenever a service is determined to be inappropriate. Finally, it is the State Agency which is required under the Act to obtain the provider data needed for performance of its health planning responsibilities, including the appropriateness review, and these proposed regulations would require that the State Agency in turn make that data available to the HSA. The Secretary recognizes that the Statewide Health Coordinating Council is an alternative location for all or part of this coordination responsibility

MAY 16 1978

UMI

V 4 3 | 9 5

and invites comment on the desirability of using the Statewide Health Coordinating Council as a mediator when the State Agency and HSAs cannot agree.

Although the Secretary has placed the responsibility for establishing the schedule of and priority for reviews with the State Agency, he has required that there be advance consultation with the HSAs and the Statewide Health Coordinating Council. He recognizes that this approach may result in some concern over the pre-emption of local prerogatives or the possibility that a leadership role for one agency could allow a relatively less advanced agency to impede the progress of others. In that light, he is concerned that the consultation process not be a pro forma process: the needs and concerns of the HSAs must be addressed in the determination of the State's priorities and schedule. He, therefore, expects that the work programs submitted by both the HSAs and the State Agencies will reflect an adequate consultation process and he will be monitoring that process to insure that this expectation is met. The statutory emphasis on the independence of the three organizational entities established under this Act is important and the sensitive balance between State and local area prerogatives must be maintained.

The Secretary also wishes to note that to provide the agencies with considerable flexibility in conducting these reviews, the procedural and criteria-related provisions of the proposed regulations generally repeat the language in section 1532 of the Act. In two areas in which the proposed regulations elaborate on the statutory language, adoption of review procedures (§ 122.504 and 123.604) and exceptions to the required procedures (§ 122.506 and 123.606), the agencies are to conform with the requirements of the pertinent sections of the regulations for reviews of new institutional health services (including certificate of need reviews). With respect to the procedures themselves, (§§ 122.505 and 123.605), three statutory provisions not applicable to appropriateness reviews (sections 1532(b)(4), (b)(5), and (b)(11), which concern the submission of applications for Federal financial assistance, provider reports on the development of proposals subject to review and letters of intent for construction projects), have been omitted. In addition, while the Act requires time limits for all reviews which, to the extent practicable, do not exceed 90 days, these time periods seem insufficient for appropriateness review; in their place, the Secretary is requiring that, to the extent practicable, areawide reviews take no longer than 180 days.

With respect to criteria, one statutory provision not applicable to appropriateness review (section 1532(c)(9), dealing with construction projects) has been omitted, and the criterion referring to the relationship of the health service being reviewed to the applicable health systems plans and annual implementation plans now would include reference to the State health plan and State medical facilities plan. In addition, the proposed regulations require that two additional considerations be included in the development of criteria: (1) the special needs and circumstances of national biomedical and behavioral research efforts, and (2) the contribution of the existing institutional health service in meeting the health related needs of minorities, women, and handicapped individuals residing in the health service area in which the service is provided.

With regard to the second of these considerations, the Secretary calls attention to the Notice of Proposed Rulemaking regarding HSA and State Agency reviews of proposed new institutional health services (43 FR 11229-41, March 17, 1978). In addition to the amendments proposed in that document, the Secretary also proposes to amend these regulations by requiring that HSA and State Agency criteria for review of proposed new institutional health services must also include consideration of the contribution of the proposed services in meeting the health related needs of minorities, women, and handicapped individuals residing in the health services area in which the service will be provided. Moreover, the Secretary proposes to expand another review consideration (§ 122.308(a)(3) and 123.409(a)(3)) to require HSAs and State Agencies to consider not only whether services to be added or expanded are needed, but also whether a project would, through relocation of a health care facility or reduction or termination of existing services, result in the removal of services from a population which is in need of them. Because of these changes, the public comment period for that Notice of Proposed Rulemaking is hereby extended to May 31, 1978. A longer extension is not needed in this case because these same provisions are included in the Notice of Proposed Rulemaking for health systems agency reviews of certain proposed uses of Federal health funds (published in the FEDERAL REGISTER on May 9), and the public will have opportunity to comment on them in that context as well. Comments received on these provisions will be considered in preparing both final regulations.

In addition, an error was made in this March 17 Notice of Proposed Rulemaking at § 122.304, § 122.309, § 123.404, and § 123.410. These sections, which deal with the coverage of certificate of need programs and required findings for new inpatient facilities, had been amended on April 8, 1977, subsequent to the issuance of the certificate of need regulations on January 21, 1977. These April 8, 1977, amendments inadvertently were not incorporated into the March 17 Notice of Proposed Rulemaking. Thus, that Notice of Proposed Rulemaking reads as if the Secretary were proposing to revert to the original January 21, 1977, provisions in these sections. This was not intended; rather, the April 8, 1977, amendments to these regulations were intended to be included in the Notice of Proposed Rulemaking. Accordingly, the April 8, 1977, amendments are reprinted below as a correction to the March 17 Notice of Proposed Rulemaking.

To insure that the agencies obtain the data needed to conduct appropriateness reviews, HSAs and State Agencies are required to notify providers of the types of data the agencies need, as is the case in the regulations for certificate of need. In addition, these proposed regulations mandate that State Agencies require that providers submit the data necessary to perform the reviews to the State Agency and to the appropriate HSAs. This latter requirement will be phased in, to allow sufficient time for the identification (and later collection) of the data, starting with hospitals and nursing homes in the first and second years, respectively, of the agency's reviews of appropriateness. As always, the agencies must fully utilize existing data sources before collecting new data, and their data collection efforts should be coordinated with Cooperative Health Statistic System efforts. In addition, to avoid any duplicative data collection requirements, the Department will coordinate the implementation of these data provisions with that of the Medicare-Medicaid Anti-Fraud and Abuse Amendments (Pub. L. 95-142) data requirements.

The Secretary also calls attention to the issue of appropriateness reviews of services provided by health maintenance organizations (HMOs). The Secretary wants to insure that appropriateness reviews of such services do not impair the development of these organizations. While Title XV of the Act requires that existing HMO services be subject to appropriateness reviews, the Secretary wants to insure that HMOs receive the encouragement and special consideration Congress intended in enacting Title XIII of the Act ("Health Maintenance Organizations"), and when it made the development of group practices and HMOs a national priority in section 1502 of the Act, and when it included at section 1532(c)(8) of the Act the requirement that their special needs and circumstances be considered in the criteria developed for any type of review. However, he also respects the State and local planning process which calls upon health planning agencies to assess the total health needs and resources of their area or State.

The Secretary does not anticipate that appropriateness reviews of a service on an areawide basis will have an impact on HMOs, since findings and recommendations in those reviews will only address the appropriateness of a service as it is delivered in the aggregate by all the health institutions providing the service in the health service area or State. However, when they conduct institution-specific reviews, planning agencies will be making findings and recommendations regarding the appropriateness of a service in individual institutions. It is only in these reviews, resulting in institution-specific findings regarding appropriateness, that HMOs could be affected adversely by HSA and State Agency actions.

Accordingly, §§ 122.507 and 123.607(a)(8) of these proposed regulations elaborate on the language of section 1532(c)(8) of the Act regarding the "special needs and circumstances of health maintenance organizations for which assistance may be provided under Title XIII." These sections include a limited set of specific criteria which HSAs and State Agencies must employ in any institution-specific appropriateness reviews of HMO services and a description of the process to be followed by agencies wishing to obtain the Secretary's approval to use additional criteria.

Sections 122.508(c) and 123.608(c) of these proposed regulations provide that, in an institution-specific review of a service provided by or through an HMO, an HSA may not recommend that a State Agency find an institutional health service to be inappropriate, and a State Agency may not find that an institutional health service is inappropriate, solely because there is an HMO of the same type in the health service area, or solely because the services being reviewed are not discussed in the applicable health systems plan, annual implementation plan, State health plan, or State medical facilities plan.

Moreover, §§ 122.508(d) and 123.608(d) of these proposed regulations provide that an HSA or State Agency in conducting an institution-specific review, may not find a service of an HMO which is eligible for Title XIII assistance inappropriate unless it determines (1) that the service is not needed by the enrolled or reasonably anticipated new members of the HMO, or (2) that the service is available from non-HMO providers in a reasonable and cost-effective manner which is consistent with the basic method of operation of the HMO, or (3) that the service is inappropriate under criteria based on factors approved by the Secretary.

Furthermore, in the case of an institution-specific review of an existing institutional health service which is provided by or through an HMO and which consists of (or includes) an inpatient health care facility, these proposed regulations provide that, if in addition to making one of the determinations listed in §§ 122.508(d) and 123.608(d) and discussed above, the agency also determines that utilization of the facility by members of the HMO does not account for at least 75 percent of the facility's annual inpatient days, a recommendation or finding of inappropriateness may be made.

It should also be noted that proposed amendments to regulations governing reviews of new institutional health services (42 CFR part 122, Subpart D, and Part 123, Subpart E), recently published in the FEDERAL REGISTER, include, in addition to special provisions regarding criteria and review findings, special procedural requirements for reviews of HMOs. These provisions have not been included in these proposed regulations because reviews of existing services are fundamentally different from reviews of proposed services and these procedural requirements are either not applicable or not necessary for appropriateness reviews of existing institutional health services.

The Secretary wishes to note that the importance of this appropriateness review function is underscored by the fact that the Congress, in its deliberations of the major health care cost containment bills, is considering a much more significant role for appropriateness reviews as a tool for containing costs. Appropriateness reviews might, for example, be used to determine the hospital revenue base or to determine what exceptions to that base might be allowed. In addition, two versions of the legislation have proposed that appropriateness review be utilized as one factor in determining each State's overall capital expenditure limit for certificate of need reviews (and/or under section 1122 of the Social Security Act). Accordingly, the issuance of these regulations, which will allow planning agencies to gain experience with reviews of existing health services, is timely.

However, the pending cost containment bills reflect the variance in the interpretation of the concept of appropriateness review. Some proposals for cost containment legislation would greatly increase the impact of appropriateness reviews; one, for example, would require that the sanctions utilized in certificate of need programs be applied to existing institutional health services which have undergone appropriateness review and been found inappropriate. This same bill would also establish a moratorium on certain capital expenditures from which some exemptions (e.g., for meeting life/safety standards) would be permitted if the expenditures and the facilities which are proposing them have successfully undergone certificate of need and appropriateness reviews. Other bills would provide incentives for the closure of facilities found to be inappropriate; one would give the Secretary authority to make grants for retirement of the outstanding debt of institutions which had discontinued health services after a determination of inappropriateness, and another would provide for a reduction by 5 percent of the Federal reimbursement under Titles V, XVIII, and XIX of the Social Security Act to hospitals designated as having excess services. Since the future role of appropriateness reviews is indeterminate at this time, the Secretary has attempted in these regulations to provide for the establishment of a comprehensive review which will be feasible for the health planning agencies to undertake in the near future and will develop their capacity to perform progressively more sophisticated reviews.

It is therefore proposed to amend Title 42, Code of Federal Regulations, as set forth below.

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

Dated: February 9, 1978.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: May 8, 1978.

HALE CHAMPION,
Acting Secretary.

PART 122—HEALTH SYSTEMS AGENCIES

1. Section 122.304 of Part 122 of Title 42, proposed at 43 FR 11232, March 17, 1978, is amended by revising paragraph (a)(3) to read as follows:

§ 122.304 New institutional health services subject to review.

(a) • • •

(3) A change in the bed capacity of a health care facility or health maintenance organization which increased the total number of beds (or distributes beds among various categories, or relocates such beds from one physical facility or site to another) by more than 10 beds or more than 10 percent of total bed capacity as defined by the State, whichever is less, over a 2-year period.

• • • • • •

2. Section 122.308 of Part 122 of Title 42, proposed at 43 FR 11231, March 17, 1978, is amended by revising paragraph (a)(3) and by adding paragraph (a)(13) to read as follows:

MY 16 78
UMI

V 43 | 95

§ 122.308 Criteria for health systems agency review.

(a) • • •

(3) The need that the population served or to be served by such services has for the services to be offered, expanded, reduced, relocated, or eliminated.

• • • • • •

(13) The contribution of the proposed new institutional health service in meeting the health related needs of minorities, women, and handicapped individuals residing in the health service area in which the service will be provided.

3. Section 122.309 of Part 122 of Title 42, proposed at 43 FR 11235, March 17, 1978, is revised to read as follows:

§ 122.309 Inpatient facilities; required findings.

In the case of any proposed new institutional health service for the provision of health services to inpatients, a health systems agency shall not recommend that a State grant a certificate of need under its certificate of need program, or otherwise make a finding that such proposed new institutional health service is needed, unless:

(a) The health systems agency makes written findings as to:

(1) The efficiency and appropriateness of the use of existing inpatient facilities providing inpatient services similar to those proposed; and

(2) The capital and operating costs (and their potential impact on patient charges), efficiency, and appropriateness of the proposed new institutional health service; and

(b) The health systems agency makes each of the following findings in writing:

(1) That superior alternatives to such inpatient services in terms of cost, efficiency, and appropriateness do not exist and that the development of such alternatives is not practicable;

(2) That in the case of new construction, alternatives to new construction (e.g., modernization or sharing arrangements) have been considered and have been implemented to the maximum extent practicable;

(3) That patients will experience serious problems in terms of cost, availability, or accessibility, or such other problems as may be identified by the reviewing agency, in obtaining inpatient care of the type proposed in the absence of the proposed new service; and

(4) That in the case of a proposal for the addition of beds for the provision of skilled nursing or intermediate care, the relationship of the addition of the plans of agencies of the State responsible for providing and financing long-term care (including home health services) has been considered.

(Sec. 215, 58 Stat. 690 (42 U.S.C. 216); sec. 1532 of the Public Health Service Act, 88 Stat. 2251-53 (42 U.S.C. 300n-1).)

4. Part 122 of Title 42, is proposed to be amended by adding thereto a new Subpart F, to read as follows:

Subpart F—Health Systems Agency Reviews of Existing Institutional Health Services for Appropriateness

Sec.
122.501 Definitions.
122.502 Purpose and applicability.
122.503 Appropriateness review work program.
122.504 Adoption and public notice of review procedures and criteria.
122.505 Procedures for health systems agency review.
122.506 Exceptions to use of procedures.
122.507 Criteria for health systems agency review.
122.508 Required recommendations.

AUTHORITY: Sec. 215 of the Public Health Service Act, 58 Stat. 690 (42 U.S.C. 216); sec. 1513 of the Public Health Service Act, 88 Stat. 2235 (42 U.S.C. 300l-2); sec. 1532 of the Public Health Service Act, 88 Stat. 2251-53 (42 U.S.C. 300n-1).

Subpart F—Health Systems Agency Reviews of Existing Institutional Health Services for Appropriateness

§ 122.501 Definitions.

Terms used in this subpart shall have the meaning given them in Subparts A (Definitions) and D (Procedures and Criteria for Review of New Institutional Health Services) of this Part. In addition, as used in this subpart:

(a) The term "existing institutional health services" or "services" means institutional health services:

(1) Being offered in the health service area at the time of review for appropriateness, or

(2) Offered at any time in the 12 months prior to the review and also planned to be offered at any time in the 12 months following the review.

(b) A finding of "appropriateness" means a finding that a service meets the needs of a population, in accordance with the criteria developed and published under § 122.507.

(c) The term "areawide review" means the review of a specific institutional health service as delivered by all the institutions providing the service in the health service area, which culminates in recommendations regarding the appropriateness of that service over the entire health service area.

(d) The term "institution-specific review" means the review of a specific institutional health service as provided by each institution in the area providing the service which culminates in recommendations regarding the appropriateness of that service in each such institution in the area.

§ 122.502 Purpose and applicability.

Section 1513(g) of the Act requires each health systems agency to review on a periodic basis, but at least every 5 years, all institutional health services offered in its health service area and to make recommendations to the State Agency for each State in which any part of the health systems agency's health service area is located respecting the appropriateness in the area of such services (hereinafter referred to as an appropriateness review). Section 1532(a) of the Act requires that in performing its review functions under section 1513(g) of the Act or in conducting any other reviews of existing health services, each health systems agency shall follow procedures and apply criteria developed and published by the health systems agency in accordance with regulations of the Secretary. This subpart sets forth minimum procedures and criteria to be utilized by health systems agencies in conducting such reviews and the requirements respecting the assumption, conduct, and timing of the appropriateness review function by health systems agencies; requirements respecting the coordination with the State Agency and the Statewide Health Coordinating Council; and such administrative steps as are necessary for the effective performance of the appropriateness reviews.

NOTE.—Under 42 CFR 122.106(c), a health systems agency may not perform the appropriateness review function during its first year of conditional designation, and may not in any event perform such function during its period of conditional designation until such agency has established a health systems plan and annual implementation plan in accordance with sections 1513(b) (2) and (3) of the Act, and the Secretary has in writing authorized the agency to perform such function.

§ 122.503 Appropriateness review work program.

The work program submitted by each health systems agency in accordance with 42 CFR 122.104(a)(3) or (b)(9), whichever is applicable, shall with respect to the assumption and continuing performance of the appropriateness review function:

(a) Provide for the development of procedures and criteria to be applied in performance of appropriateness reviews, in consultation with the Statewide Health Coordinating Council and State Agency of each State in which any part of the health systems agency's health service area is located;

(b) Include an assurance that the health systems agency will abide by the decision of the State Agency with respect to the definitions of services, priorities among services, and the schedule for reviews of such services;

(c) Provide for the establishment of administrative procedures governing the transmittal of appropriateness review recommendations to the State Agency in accordance with procedural requirements established by the State Agency; and

(d) Provide for the development of plans for completing areawide appropriateness reviews of all existing institutional health services within 3 years of the date of the health systems agency's initial full designation and during each succeeding 5-year period. Review schedule priorities may be established, but such review priority setting shall not result in the exclusion from review of any existing institutional health service during any applicable time period.

§ 122.504 Adoption and public notice of review procedures and criteria.

The provisions of 42 CFR 122.305 apply to the adoption and public notice of review procedures and criteria under this subpart.

§ 122.505 Procedures for health systems agency review.

(a) The procedures adopted and utilized by a health systems agency conducting the reviews covered by this subpart shall include at least the following:

(1) Written notification to affected persons of the beginning of a review.

(2) Schedules for review which provide that no review shall, to the extent practicable, take longer than 180 days from the date of notification to affected persons made in accordance with paragraph (a)(1) of this section to the date of submission of the health systems agency's recommendations to the State Agency.

(3) Provision for persons subject to a review to submit to the health systems agency such information as the health systems agency may require concerning the subject of such review, in such form and manner and containing such information as the health systems agency shall prescribe and publish.

(4) Provision for written findings which state the basis for any findings made by the health systems agency.

(5) Notification of providers of health services and other persons subject to the health systems agency review of the status of the health systems agency's review of the institutional health services, findings made in the course of such review, and other appropriate information respecting such review.

(6) Provision for public hearings in the course of the health systems agency review if requested by persons directly affected by the review.

(7) Preparation and publication of regular reports by the health systems agency of the reviews being conducted (including a statement concerning the status of each such review), and of the reviews completed by the health systems agency (including a general statement of the findings made in the course of such reviews and the recommendations made to the State agency) since the publication of the last such report.

(8) Access by the general public to all written materials pertinent to any health systems agency review.

(b) Procedures adopted for reviews in accordance with paragraph (a) of this section may vary according to the type of health service being reviewed.

(c) The procedures adopted for reviews may provide that the requirements of subparagraphs (1), (3), and (6) of paragraph (a) of this section shall be deemed satisfied for any health service area within the State if the State Agency has provided for a corresponding procedure.

§ 1122.506 Exceptions to use of procedures.

A health systems agency may, with respect to any type or group of reviews, request from the Secretary an exception to the requirement that it utilize review procedures which meet the requirements of § 122.505. The requirements of 42 CFR 122.307 apply to such a request for an exception.

§ 122.507 Criteria for health systems agency review.

The provisions of 42 CFR 123.607 apply to the adoption and utilization of review criteria under this subpart.

§ 122.508 Required recommendations.

(a) After completing its review of an existing institutional health service a health systems agency shall make recommendations respecting the appropriateness of the service in its health service area to the State agency of each State in which all or any part of the health systems agency's health service area is located.

(b) A health systems agency may not recommend that a State agency find an existing institutional health service to be inappropriate unless the health systems agency has stated in writing that the service has not met one or more of the established criteria of the health systems agency and the ways in which the service failed to meet the criteria, including any that are beyond the control of the person(s) providing that service.

(c) A health systems agency, in an institution-specific review, may not recommend that an existing institutional health service provided by or through a health maintenance organization be found inappropriate solely because there is a health maintenance organization of the same type, as specified in section 1310(b) of the act, in the same health service area, or solely because the services being reviewed are not discussed in the applicable health systems plan, annual implementation plan, State health plan, or State medical facilities plan.

(d) In the case of an existing institutional health service provided by or through a health maintenance organization for which assistance is or may be provided under title XIII of the act, a health systems agency is an institution-specific review, shall not recommend that the service be found inappropriate.

(1) Unless the health systems agency determines that the service is:

(i) Not needed by the enrolled or reasonably anticipated new members of the health maintenance organization, or

(ii) Available from nonhealth maintenance organization providers in a reasonable and cost-effective manner which is consistent with the basic method of operation of the health maintenance organization, in accordance with § 123.607(a)(8)(ii), or

(2) Unless the health systems agency determines that the service is inappropriate under criteria based on factors which the Secretary has approved in accordance with § 123.607(c).

(e) In the case of an existing institutional health service which is provided by or through a health maintenance organization for which assistance is or may be provided under title XIII of the act and which consists of (or includes) an inpatient health care facility, the health systems agency in an institution-specific review, may recommend that such service be found inappropriate if, in addition to making one of the determinations set forth in paragraph (d) of this section, it determines that utilization of the facility by members of the health maintenance organization does not account for at least 75 percent of the annual inpatient days of the facility.

(f) When a health systems agency recommends to a State agency that a service be found inappropriate, the health systems agency shall, to the extent practicable, suggest to the State agency a plan for remedial action.

PART 123—STATE HEALTH PLANNING AND DEVELOPMENT AGENCIES

1. Section 123.404 of part 123 of title 42, proposed at 43 FR 11237, March 17, 1978, is amended by revising paragraph (a)(3) to read as follows:

§ 123.404 New institutional health services subject to review.

(a) • • •

(3) A change in bed capacity of a health care facility or health maintenance organization which increases the total number of beds (or distributes beds among various categories, or relocates such beds from one physical facility or site to another) by more than 10 beds or more than 10 percent of total bed capacity as defined by the

MY 16 78
UMI

V 43 | 95

State, whichever is less, over a 2-year period.

• • • • •

2. Section 122.409 of part 123 of title 42, proposed at 43 FR 11240, March 17, 1978, is amended by revising paragraph (a)(3) and adding paragraph (a)(13) to read as follows:

§ 123.409 Criteria for State agency review.

(a) • • •

(3) The need that the population served or to be served by such services has for the services to be offered, expanded, reduced, relocated, or eliminated.

• • • • •

(13) the contribution of the proposed new institutional health service in meeting the health related needs of minorities, women, and handicapped individuals residing in the health service area in which the service will be provided.

3. Section 123.410 of part 123 of title 42, proposed at 43 FR 11240, March 17, 1978, is revised to read as follows:

§ 123.410 Inpatient facilities, required findings.

In the case of any proposed new institutional health service for the provision of health services to inpatients, a State agency shall not grant a certificate of need under its certificate of need program, or otherwise make a finding that such proposed new institutional health service is needed, unless:

(a) The State agency makes written findings as to:

(1) The efficiency and appropriateness of the use of existing inpatient facilities providing inpatient services similar to those proposed; and

(2) The capital and operating costs (and their potential impact on patient charges), efficiency, and appropriateness of the proposed new institutional health service; and

(b) The State agency makes each of the following findings in writing:

(1) That superior alternatives to such inpatient services in terms of cost, efficiency, and appropriateness do not exist and that the development of such alternatives is not practicable;

(2) That in the case of new construction, alternatives to new construction (e.g., modernization or sharing arrangements) have been considered and have been implemented to the maximum extent practicable;

(3) That patients will experience serious problems in terms of costs, availability, or accessibility, or such other problems as may be identified by the reviewing agency, in obtaining inpatient care of the type proposed in the absence of the proposed new service; and

(4) That in the case of a proposal for the addition of beds for the provision of skilled nursing or intermediate care the relationship of the addition to the plans of other agencies of the State responsible for providing and financing long-term care (including home health services) has been considered.

(Sec. 215, 58 Stat. 690 (42 U.S.C. 216); secs. 1523, 1532 of the Public Health Service Act, 88 Stat. 2246, 2251.)

4. Part 123 of Title 42, is proposed to be amended by adding thereto a new Subpart G, to read as follows:

Subpart G—State Agency Reviews of Existing Institutional Health Services for Appropriateness

Sec.
123.601 Definitions.
123.602 Purpose and applicability.
123.603 Appropriateness review work program.
123.604 Adoption and public notice of review procedures and criteria.
123.605 Procedures for State agency review.
123.606 Exceptions to use of procedures.
123.607 Criteria for State agency review.
123.608 Required findings.

AUTHORITY: Sec. 215 of the Public Health Service Act, 58 Stat. 690 (42 U.S.C. 216); sec. 1523 of the Public Health Service Act, 88 Stat. 2246 (42 U.S.C. 300m-2); sec. 1532 of the Public Health Service Act, 88 Stat. 2251-53 (42 U.S.C. 300n-1).

Subpart G—State Agency Reviews of Existing Institutional Health Services for Appropriateness

§ 123.601 Definitions.

Terms used in this subpart shall have the meaning given them in subparts A (definitions) and E (certificate of need and review of new institutional health services) of this part. In addition, as used in this subpart:

(a) The term "existing institutional health services" or "services" means institutional health services:

(1) Being offered in the State at the time of review for appropriateness, or

(2) Offered at any time in the 12 months prior to the review and also planned to be offered at any time in the 12 months following the review.

(b) A finding of "appropriateness" means a finding that the service meets the needs of a population in accordance with the criteria developed and published under § 123.607.

(c) The term "areawide review" means the review of a specific institutional health service as delivered by all the institutions providing the service in a health service area or State which culminates in findings regarding the appropriateness of that service over the entire health service area or State.

(d) The term "institution-specific review" means the review of a specific insititutional health service as provided by each institution in a health service area or State which culminates in findings and recommendations regarding the appropriateness of that service in each such institution.

§ 123.602 Purpose and applicability.

Section 1523(a)(6) of the act requires each State health planning and development agency to review on a periodic basis (but not less often than every 5 years) all institutional health services being offered in the State (hereinafter referred to as an appropriateness review) and, after consideration of the recommendations submitted by health systems agencies under section 1513(g) of the act and 42 CFR Part 122, Subpart F, to make public its findings as to the appropriateness of such services. Section 1523(b)(3) of the act requires the State agency to complete its findings as to the appropriateness of any existing insitutional health service within one year after the date a health systems agency has made its recommendation with respect to the appropriateness of the service under section 1513(g) of the act and 42 CFR Part 122, Subpart F. Section 1532(a) of the act requires that in performing its review functions under section 1523 of the act (which includes reviews conducted under section 1523(a)(6)), each State agency shall (except to the extent approved by the Secretary) follow procedures and apply criteria developed and published by the State agency in accordance with regulations of the Secretary. This subpart sets forth minimum procedures and criteria to be utilized by State agencies in conducting such reviews; requirements respecting the assumption, conduct, and timing of the appropriateness review function; requirements respecting the coordination with health systems agencies and statewide health coordinating councils and such administrative steps as are necessary for the effective performance of appropriateness reviews.

§ 123.603 Appropriateness review work program.

Each State agency must develop and submit to the Secretary a work program for the orderly assumption and/or continued performance of appropriateness reviews. This work program will be used in the Secretary's determination of the State agency's capability of assuming and performing the appropriateness review function in a satisfactory manner as required by sections 1521(b)(1) (B), (B)(2)(A), and (B)(4) of the act, and shall provide for:

(a) The development of the review procedures and criteria to be applied in the performance of appropriateness reviews, in consultation with the statewide health coordinating council and all the health systems agencies in the State, and the State agency(s) and statewide health coordinating council(s) of any contiguous State(s) where a health service area is shared by both States.

(b) The establishment of the definitions of services to be reviewed, priorities among services, and the schedule for reviews of such services, after consultation with the statewide health coordinating council and all the health systems agencies in the State, and the State agency(s) and statewide health coordinating council(s) of any contiguous States where a health service area is shared by both States. In establishment of these definitions, priorities, and schedules, the State agency must take into account the statutory time limits applicable to appropriateness reviews by health systems agencies.

(c) The establishment of requirements for submission by providers of data to be used in performance of appropriateness reviews to the State agency and to the health systems agencies, after consultation with the statewide health coordinating council and all the health systems agencies in the State, and the State agency(s) and statewide health coordinating council(s) of any contiguous States where a health service area is shared by both States. At a minimum, the State agency shall establish such data requirements for hospitals and nursing homes during the first and second years, respectively, of its reviews of appropriateness.

(d) Plans for initiating appropriateness reviews:

(1) No later than 6 months after the effective date of these regulations if: (i) The State agency is fully designated prior to the date of publication of these regulations, or (ii) the State agency is conditionally designated and the Secretary has determined that the State agency is capable of performing appropriateness reviews (see 42 CFR 123.105) prior to the effective date of these regulations; or

(2) In the case of a State agency not covered by subparagraph (1) of this paragraph, no later than 6 months after: (i) The date of full designation, or (ii) the date the Secretary determines that the State agency, although conditionally designated, is capable of performing appropriateness reviews, whichever is earlier.

(e) Plans for completing areawide reviews of all existing institutional health services within 5 years of the date of the State agency's initial full designation and during each succeeding 5-year period, but in any event within 1 year of receipt of an appropriate health system agency recommendation. Review schedule priorities may be established, but such review priority setting shall not result in the exclusion from review of any existing institutional health service during any applicable time period.

§ 123.604 Adoption and public notice of review procedures and criteria.

The provisions of 42 CFR 123.406 apply to the adoption and public notice of review procedures and criteria under this subpart.

§ 123.605 Procedures for State agency review.

(a) The procedures adopted and utilized by a State agency for conducting the reviews covered by this subpart shall include at least the following:

(1) Written notification to affected persons of the beginning of a review.

(2) Schedules for review which provide that no review shall, to the extent practicable, take longer than 180 days from the date of notification to affected persons made in accordance with paragraph (a)(1) of this section to the date of the written findings made in accordance with paragraph (a)(4) of this section.

(3) Provision for persons subject to a review to submit to the State agency such information as the State agency may require in accordance with their work program under § 123.603(c) concerning the subject of such review, in such form and manner and containing such information as the State agency shall prescribe and publish.

(4) Provisions for written findings which state the basis for any findings made by the State agency.

(5) Notification of providers of health services and other persons subject to the State agency review of the status of the State agency's review of the institutional health services, findings made in the course of such review, and other appropriate information respecting such review.

(6) Provision for (i) public hearings in the course of the State agency review if requested by persons directly affected by the review; and for (ii) public hearings, for good cause shown, respecting the State agency finding.

(7) Preparation and publication of regular reports by the State agency of the reviews being conducted (including a statement concerning the status of each such review), and of the reviews completed by the State agency (including a general statement of the findings made in the course of such reviews) since the publication of the last such report.

(8) Access by the general public to all written materials pertinent to any State agency review.

(9) Provision that if the State agency makes a finding regarding the appropriateness of an existing insitutional health service which is inconsistent with a recommendation made with respect thereto by the health systems agency making such recommendation pursuant to 42 CFR 122.508: (1) such finding (and the record upon which it was made) shall, upon request of the health systems agency, be reviewed, under an appeals mechanism consistent with State law governing the practices and procedures of administrative agencies, by an agency of the State (other than the State health planning and development agency) designated by the Governor, and (ii) the finding of the reviewing agency shall be considered the final finding of the State agency.

(10) If a State agency (or a reviewing agency, under paragraph (a)(9) of this section) makes a finding regarding an existing institutional health service which the State agency determines is not consistent with the goals of the applicable health systems plan (established under section 1513(b)(2) of the act) or the priorities of the applicable annual implementation plan (established under section 1513(b)(3) of the act, the State agency (or the reviewing agency, as appropriate) shall submit to the appropriate health systems agency a detailed statement of the reasons for the inconsistency.

(b) Procedures adopted for reviews in accordance with paragraph (a) of this section may vary according to the type of health service being reviewed.

(c) The procedures adopted for reviews may provide that the requirements of subparagraphs (1), (3), and (6)(i) of paragraph (a) of this section shall be deemed satisfied for any health service area within the State if the health systems agency has provided for a corresponding procedure.

§ 123.606 Exceptions to use of procedures.

A State agency may, with respect to any type or group of reviews, request from the Secretary an exception to the requirement that it utilize review procedures which meet the requirements of § 123.605. The requirements of 42 CFR 123.408 apply to such a request for an exception.

§ 123.607 Criteria for State agency review.

(a) The State agency shall adopt, and utilize as appropriate, specific criteria for conducting the reviews covered by this subpart. These criteria shall relate to availability, accessibility, acceptability, continuity, cost, and quality and shall include at least the general considerations listed below, but in the case of institution-specific reviews of health maintenance organizations for which assistance may be provided under title XIII, the considerations shall be limited to those set forth in subparagraph (8) of this paragraph.

(1) The relationship of the health services being reviewed to the applicable health systems plans and annual implementation plans, State health plan (or preliminary State health plan prior to adoption of the State health plan) and State medical facilities plan adopted pursuant to sections 1513(b)(2), 1513(b)(3), 1524(c)(2), and 1602(a), respectively, of the act.

MY 16 78
UMI

V 4 3 5 9 5

(2) The relationship of the services reviewed to the long-range development plan (if any) of the person providing such services.

(3) The need that the population served by such services has for such services.

(4) The availability of less costly or more effective alternative methods of providing such services.

(5) The relationship of the services reviewed to the existing health care system of the area in which such services are provided.

(6) The availability of resources (including health manpower, management personnel, and funds for capital and operating needs) for the provi ion of the services reviewed and the availability of alternative uses of such resources for the provision of other health services.

(7) The special needs and circumstances of those entities which provide a substantial portion of their services or resources or both, to individuals not residing in the health service areas in which the entities are located or in adjacent health service areas. Such entities may include medical and other health professions schools, multidisciplinary clinics, and specialty centers.

(8) The special needs and circumstances of health maintenance organizations for which assistance is provided under title XIII of the act. In the case of an institution-specific review of a health maintenance organization, such needs and circumstances shall be limited to:

(i) The needs of enrolled members and reasonably anticipated new members of the health maintenance organization for the existing institutional health services provided by the organization.

(ii) The availability of the health services from nonhealth maintenance organization providers in a reasonable and cost-effective manner which is consistent with the basic method of operation of the health maintenance organization. In assessing the availability of these health services from nonhealth maintenance organization providers, the State agency shall consider only whether the services from these providers:

(A) Are available under a contract of at least 5 years duration with a nonhealth maintenance organization provider;

(B) Are available and conveniently accessible through physicians and other health professionals associated with the health maintenance organization. (For example—Whether physicians associated with the health maintenance organization have full staff privileges at a nonhealth maintenance organization hospital);

(C) Cost no more than when the services are provided by the health maintenance organization; and

(D) Are available in a manner which is administratively feasible to the health maintenance organization.

(iii) Any other factors which the State agency may propose and the Secretary may, in accordance with paragraph (c) of this section, find to be consistent with the purpose of title XIII of the act.

(9) The specials needs and circumstances of biomedical and behavorial research projects which are designed to meet a national need and for which local conditions offer special advantages.

(10) The contribution of the institutional health service in meeting the health related needs of minorities, women, and handicapped individuals residing in the health service area in which the service is provided.

(b) Criteria adopted for reviews in accordance with paragraph (a) of this section may vary according to the type of health service being reviewed and the purpose of the review. Furthermore, the criteria used in the review of a particular service need not address all six of the characteristics of appropriateness (availability, accessibility, acceptability, continuity, cost, and quality).

(c) Where a State agency proposes under paragraph (a)(8)(iii) of this section that it be permitted to base institution-specific reviews of health maintenance organizations on criteria which consider factors not set forth in paragraph (a)(8) of this section, it shall do so in a written request to the Secretary, specifying the reasons for the proposal. The Secretary will approve the request if he finds the additional factors to be consistent with the purpose of title XIII of the act. Unless the Secretary has approved the additional factors, the State agency shall base its review solely on the factors set forth in paragraph (a)(8) of this section.

§ 123.608 Required findings.

(a) A State agency shall, in accordance with the requirements of this subpart, make findings with respect to the appropriateness of existing institutional health services.

(b) A State agency may not make a finding that an existing institutional health service is inappropriate unless it has stated in writing that the service has not met one or more of the established criteria of the State agency and the ways in which the service failed to meet the criteria, including any that are beyond the control of the person(s) providing that service.

(c) A State agency, is an institution-specific review, may not make a finding that an existing institutional health service provided by or through a health maintenance organization is inappropriate soley because there is a health maintenance organization of the same type, as specified in section 1310(b) of the act, in the same health service area, or solely because the services being reviewed are not discussed in the applicable health systems plan, annual implementation plan, State health plan, or State medical facilities plan.

(d) In the case of an existing institutional health service provided by or through a health maintenance organization for which assistance is or may be provided under title XIII of the act, a State agency in an institution-specific review shall not make a finding that the service is inappropriate.

(1) Unless the State agency determines that the service is:

(i) Not needed by the enrolled or reasonably anticipated new members of the health maintenance organization; or

(ii) Available from nonhealth maintenance organization providers in a reasonable and cost-effective manner which is consistent with the basic method of operation of the health maintenance organization, in accordance with § 123.607(a)(8)(ii), or

(2) Unless the State agency determines that the service is inappropriate under criteria based on factors which the Secretary has approved in accordance with § 123.607(c).

(e) In the case of an institution-specific review of an existing institutional health service which is provided by or through a health maintenance organization for which assistance is or may be provided under title XIII of the act and which consists of (or includes) an inpatient health care facility, the State agency may make a finding that such service is inappropriate if, in addition to making one of the determinations set forth in paragraph (d) of this section, it determines that utilization of the facility by members of the health maintenance organization does not account for at least 75 percent of the annual inpatient days of the facility.

(f) Where a State agency has made a finding that a service is inappropriate, the State agency shall, at the same time, make recommendations for remedial action.

OFFICE OF MANAGEMENT AND BUDGET

Rescissions and Deferrals

CUMULATIVE REPORT MAY 1978

V 4 3 | 9 5

[3110-01]

OFFICE OF MANAGEMENT AND BUDGET

CUMULATIVE REPORT ON RESCISSIONS AND DEFERRALS, MAY 1978

This report is in fulfillment of the requirements of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of May 1, 1978, of four rescissions contained in the fourteenth, fifteenth, and seventeenth special messages of fiscal year 1977 and four rescissions and 59 deferrals contained in the first seven special messages for fiscal year 1978. These messages were transmitted to the Congress on July 19 (both the fourteenth and fifteenth messages), July 26, September 23, October 3, November 10, December 15, 1977, January 27, February 23, and March 10, 1978.

RESCISSIONS (TABLE A AND ATTACHMENT A)

As of May 1, there were no rescissions pending before the Congress. Table A summarizes the status of rescissions proposed by the President as of May 1, 1978, while Attachment A shows the history and status of each rescission proposed for fiscal year 1978. Also included are four rescission proposals totalling $643.4 million made in fiscal year 1977 but carried into fiscal year 1978 and a single fiscal year 1978 rescission for $2.7 million which has been reclassified as a deferral.

DEFERRALS (TABLE B AND ATTACHMENT B)

As of May 1, 1978, $3,678.5 million in 1978 budget authority was being deferred from obligation and another $2.3 million in 1978 obligations was being deferred from expenditure. Table B summarizes that status of deferrals reported by the President, and Attachment B shows the history and status of each deferral reported during fiscal year 1978.

INFORMATION FROM SPECIAL MESSAGES

The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the FEDERAL REGISTERS of:

Friday, July 22, 1977 (Vol. 42, No. 141, Part V (both the fourteenth and fifteenth 1977 special messages)
Friday, July 29, 1977 (Vol. 42, No. 146, Part VIII) (seventeenth 1977 special message)
Thursday, September 29, 1977 (Vol. 42, No. 189, Part IX)
Friday, October 7, 1977 (Vol. 42, No. 195, Part IV)
Thursday, November 15, 1977 (Vol. 42, No. 220, Part IV)
Wednesday, December 21, 1977 (Vol. 42, No. 245, Part IV)
Wednesday, February 1, 1978 (Vol. 43, No. 22, Part VII)
Wednesday, March 1, 1978 (Vol. 43, No. 41, Part VII)
Thursday, March 16, 1978 (Vol. 43, No. 52, Part VII)

JAMES T. MCINTYRE, JR.,
Director.

TABLE A—STATUS OF 1978 RESCISSION PROPOSALS

	Amount (in millions of dollars) *
Rescissions proposed by the President	(a) $701.3
Reclassified (from R78-1 to D78-54) (b)	−2.7
Rescinded by the Congress (R77-17, R77-18, R77-19, R78-2, R78-3, and R78-4)	(c) −593.7
Rejected by the Congress (R77-20)	−105.0
Pending before the Congress	0

(a) This amount includes $643.4 million in rescission proposals for fiscal year 1977 which were still pending in fiscal year 1978.

(b) This rescission proposal, originally transmitted in conjunction with a request for transfer for the Department of Justice, was superseded by a deferral (D78-54) submitted to report the extension of this withholding pending final action on the transfer. The transfer was approved in the Supplemental Appropriations Act, 1978, and the deferred funds were made available.

(c) Of this amount, $463.4 million, for B-1 Bomber and SRAM missile procurement, was originally proposed for rescission on July 19, 1977. These funds were made available for obligation on October 5, 1977, following the 45-day Congressional consideration period. Subsequently, the funds were rescinded by the Supplemental Appropriations Act, 1978, (Pub. L. 95-240).

* Detail does not add to total due to rounding.

TABLE B—STATUS OF 1978 DEFERRALS

	Amount (in millions of dollars)
Deferrals proposed by the President	$4,902.6
Routine Executive releases (−$1,144.6 M) and adjustments (−$38.4 M) through May 1, 1977	−1,183.0
Overturned by the Congress	−38.8
Currently before the Congress	*$3,680.8

*This amount includes $2.3 million in outlays for a Department of the Treasury deferral, (D78-283).

FOOTNOTES

a. This amount was initially deferred (D78-47) in a special message transmitted to the Congress on December 15, 1977.

b. P.L. 95-254

c. These funds, originally proposed for rescission on July 19, 1977, were made available for obligation on October 5, 1977, following the 45-day Congressional consideration period. Subsequently, the funds were rescinded by the Supplemental Appropriations Act, 1978, (P.L. 95-240).

d. This rescission proposal was transmitted in conjunction with a request for transfer of the same funds within the Department of Justice (contained in the Supplemental Appropriations Act, 1978, P.L. 95-240). The proposal was superseded by a deferral (D78-54) submitted to report the extension of this withholding pending final action on the transfer. The President signed the Act on March 7, approving the transfer.

e. An opinion issued by the Comptroller General on October 28, 1977, holds that this proposal should have been classified as a deferral.

f. Public Law 95-186.

g. Of this amount $643,400,000 was proposed for rescission in FY 1977.

FOOTNOTES

a. This amount is included in a rescission proposal (R78-2) transmitted to the Congress on January 27, 1978.

b. See also Energy Research and Development Administration.

c. The supplementary report changed the deferral from the Energy Research and Development Administration to the Department of Energy.

d. The supplementary report changed the budget account title under which this deferral had been previously reported from the Limitation on construction to the Limitation on salaries and expenses.

e. This account, previously displayed in the Funds Appropriated to the President section of this report, was moved to the Department of State section to reflect a corresponding change in its location in the President's budget.

f. Impoundment resolution S. Res. 282 passed the Senate on November 1, 1977, rejecting this deferral. The funds, however,

V 43 95

were made available for obligation on October 31, 1977.

g. This amount is net of a release of $40,000 that was made prior to the transmittal of this supplementary report.

h. See also Department of Energy.

j. Impoundment resolution H. Res. 851 passed the House on November 2, 1977, rejecting this deferral.

k. Impoundment resolution H. Res. 852 passed the House on November 2, 1977, rejecting this deferral.

m. Impoundment resolution H. Res. 853 passed the House on November 2, 1977, rejecting this deferral.

p. Impoundment resolution H. Res. 854 passed the House on November 2, 1977, rejecting this deferral.

q. On April 1, 1978, the functions and budgetary resources of the United States Information Agency were transferred to the International Communication Agency, pursuant to Reorganization Plan No. 2 of 1977 and Executive Order No. 12048 of March 27, 1978. A supplementary report reflecting this change will be transmitted to the Congress shortly.

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This delineates procedures for making the July 1, 1978 adjustments in the Food Stamp Program maximum allowable income standards and basis of coupon issuance. Adjustments will be made for the 48 States and D.C., Alaska, Hawaii, Puerto Rico, the Virgin Islands, and Guam, appearing in Appendices A through F to Part 271.

Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator, Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8982.

SUPPLEMENTARY INFORMATION: This rule lists (1) the Consumer Price Index (CPI) used to make the adjustments in the coupon allotments and the poverty lines, (2) the base month for which the coupon allotment adjustments will be computed, and (3) the appropriate income poverty guidelines.

Consumer Price Index. The Bureau of Labor Statistics (BLS) recently changed its method of computing the Consumer Price Index (CPI). Beginning in January 1978 and ending in June 1978, there will be three CPI's—(1) A new CPI for All Urban Consumers, covering about 80 percent of the noninstitutionalized, civilian U.S. population, (2) a revised CPI for Urban Wage Earners and Clerical Workers, covering about 40 percent of the population, and (3) the unrevised CPI for Urban Wage Earners and Clerical Workers, covering about 40 percent of the population. Beginning in July 1978, only the first two CPI's will be computed.

There are several technical differences between the three CPI's as shown in the BLS fact sheet which appears as Appendix G to this rule. As noted in that comparision, "[t]he CPI revision (1) updates the weights to be assigned to the expenditure groups; (2) updates the sample of items priced; (3) updates the sample of places where the pricing takes place; (4) modernizes the statistical methods employed in calculation of the CPI; and (5) provides for the first time an index which represents the experience of nearly all consumers in contrast to having only one index represent urban wage and clerical workers." [1]

USDA chose the revised CPI for Urban Wage Earners and Clerical Workers for use in the July 1, 1978 adjustments for the 48 States and D.C.[2] The Thrifty Food Plan computations based on the revised CPI are not currently available concerning the outlying areas so the unrevised CPI will continue to be used for Alaska, Hawaii, Puerto Rico, the Virgin Islands, and Guam. The revised CPI for Urban Wage Earners and Clerical Workers is basically a routine updating of the unrevised CPI for Urban Wage Earners and Clerical Workers.[3]

Base month for adjustment. Section 7(a) of the Food Stamp Act of 1964, as amended, requires that the value of the coupon allotment be adjusted to reflect changes in the prices of food published by the Bureau of Labor Statistics. The 1973 amendments to the Act provided for semi-annual adjustments beginning with the allotments of January 1974, which incorporated the changes in the prices of food through August 1973.

Subsequently, the Department made a decision to similarly adjust future coupon allotments. Thereafter, July adjustments were based upon the cost of the Thrifty Food Plan in February, and January adjustments on the cost of the Thrifty Food Plan in August. Generally, February Thrifty Food Plan data are available during late March, and August Thrifty Food Plan data are available in late September.

In preparing for the July 1978 allotment adjustments, the necessity of adjusting the data base to the revised CPI caused a delay in the computation of February 1978 Thrifty Food Plan costs. Those costs were available approximately a month later than usual, at about the same time that March Thrifty Food Plan data were made available. The Department will use the more recent data from March rather than the older February data for this update.[4]

Poverty line. Under the 1970-71 food stamp amendments (P.L. 91-671), income eligibility limits are set at dollar levels where the cost of a nutritionally adequate diet, as defined by the Thrifty Food Plan, equals 30 percent (0.3) of a household's net available income or at the poverty level for that size household, if that poverty level is higher than the dollar level.

In accord with current policy the USDA Poverty Guideline rather than the OMB Poverty Guideline will be used as the net income eligibility cut off for some of the smaller household sizes because the numbers obtained by dividing their coupon allotments by 0.3 are less than the poverty guideline for those household sizes. However, the USDA Poverty Guideline will be modified to avoid publication of two sets of regulations, the first set using the 1977 USDA Poverty Guideline ($262 for the one-person household and $344 for the two-person household in the 48 States and D.C.), and the second set using the 1978 USDA Poverty Guideline which will be higher but not available until early June. To provide State agencies with adequate lead time USDA could not delay publication of the new basis of issuance tables until June. At the same time USDA did not want to make the State agencies reprogram their computers in June to make the adjustment in the eligibility standards and purchase requirements for the one- and two-person households which would have been necessitated by the revision of the USDA Poverty Guideline. To avoid needlessly burdening State agencies, FNS has developed a variant of the USDA Poverty Guideline called the 1978 USDA Adjusted Poverty Guideline, which is updated through March 1978. The 1978 Adjusted Guideline is based on the April unrevised CPI for all items in 1977 and adjusted by the March revised CPI for all items in 1978. The 1978 USDA Adjusted Poverty Guideline for Hawaii and Guam is based on the March unrevised CPI for all items in 1977 and adjusted by the February revised CPI for all items in 1978. Data are not reported for March for Hawaii and Guam. The new maximum allowable monthly income standards for the 48 States and D.C. are $277 for the one-person household and $363 for the two-person household; for other areas see Appendices B through F.

The 1978 USDA Adjusted Poverty Guideline will likely be a few dollars lower for the one- and two-person households than the 1978 USDA Poverty Guideline which will be published in June or July for use in the Child Nutrition Programs. The 1978 Adjusted Poverty Guideline will only be employed until the Food Stamp Act of 1977 is implemented and represents a practical and efficient interim methodology. The Food Stamp Act of 1977 also requires that the Department adjust the income poverty guideline each year based on March data. Use of the Adjusted Guideline will not lower coupon allotment levels for participating food stamp households.

In view of the need for placing this notice into effect on July 1, 1978, and the lead time needed by State agencies for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to the notice.

Assistant Secretary.

APPENDIX G—FACTS ABOUT THE REVISED CONSUMER PRICE INDEX

[FR Doc. 78-13461 Filed 5-15-78; 8:45 am]

[1] BLS has routinely updated their CPI's over the years. The old index is based on the Consumer Expenditure Survey of 1960-61 and the new indices are based on the 1972-73 Consumer Expenditure Survey.

[2] For the 48 States and D.C. there was no difference in the cost of the Thrifty Food Plan for March 1978 between the unrevised CPI and the revised CPI.

[3] OMB, in a letter dated February 23, 1978, to the Speaker of the House and the President of the Senate proposing legislation to require all Federal agencies to use the All Urban Consumer CPI after July 1, when the unrevised CPI is no longer available, stated: "In the absence of legislation, the revised version of the current CPI for wage earners and clerical workers would apply."

[4] The decision to use the most up-to-date data is consistent with the intent of Congress. One purpose of the 1973 amendments was to base the food stamp allotments on more recent data than had been used in the past; and given the time frame for preparation of the changes, the interpretation that the July allotments should be based upon February data was reasonable. During this transitional phase from the Food Stamp Act of 1964 to implementation of the Food Stamp Act of 1977, which requires the use of March data for adjusting the cost of the Thrifty Food Plan for the July allotments, it is appropriate to use March data.

The Consumer Price Index Revision-1978

U.S. Department of Labor
Bureau of Labor Statistics
1978

Facts About the Revised Consumer Price Index

The Consumer Price Index (CPI) is a statistical measure of change, over time, in the prices of goods and services in major expenditure groups—such as food, housing, apparel, transportation, and health and recreation—typically purchased by urban consumers. Essentially it measures the purchasing power of consumers' dollars by comparing what a sample "market" basket of goods and services costs today with what the same sample market basket cost at an earlier date.

The CPI revision (1) updates the weights assigned to the expenditure groups; (2) updates the sample of items priced; (3) updates the sample of places where the pricing takes place; (4) modernizes the statistical methods employed in calculation of the CPI; and (5) provides for the first time an index which represents the experience of nearly all consumers in contrast to having only one index representing urban wage and clerical workers. The results of the most recent revision are scheduled for publication in early 1978. The preceding comprehensive revision took place in 1963. The following fact sheet compares aspects of the revised and unrevised CPI.

M Y 1 6 7 8

UMI

Comparison of old and new Consumer Price Index series

Item	Old index	New indexes
Title	Consumer Price Index for Urban Wage Earners and Clerical Workers (old series).	1. Consumer Price Index for All Urban Consumers (CPI-U). 2. Consumer Price Index for Urban Wage Earners and Clerical Workers (Revised series) (CPI-W).
Population covered	Urban wage and clerical worker families and single individuals living alone. At least one family member must have been employed for 37 weeks or more during the survey year in wage or clerical worker occupations. More than half of the total family income had to be earned from wage earner or clerical worker occupations. Excludes farm families, military personnel and persons in institutions.	CPI-U—All urban residents, including salaried workers, self-employed workers, retirees, and unemployed persons, as well as urban wage earners and clerical workers. No length of employment required and no criteria as to family income. CPI-W—Same as old index. Same for CPI-U and CPI-W.
Formula (modified Laspeyres)	$I_t = I_{t-1}\left[\frac{\Sigma(p_{i,t}q_s)(p_{i,t}/p_{i,t-1})}{\Sigma(p_{i,t}q_s)}\right]$	Same.
Standard reference base	1967=100. Selected series are also published on the 1957-59=100 base.	1967=100, for both the CPI-U and CPI-W.
Duration	Introduced January 1964, replaced with revised CPI series after December 1977. Available for 6-month overlap period.	CPI-U and CPI-W introduced as official indexes with the publication of the January 1978 index. Available indefinitely until next revision.
Expenditure weights reference period	Average annual expenditures of urban wage earner and clerical worker families and single persons, derived from the *1960-61* Consumer Expenditure Survey in 66 areas, adjusted for price change between the survey dates and *December 1963*, except for six cities added in 1966.	CPI-U—Average annual expenditures for all urban residents derived from the *1972-73* Consumer Expenditure Survey in 216 areas, adjusted for price change between the survey date and *December 1977*. CPI-W—Average annual expenditures for urban wage earners and clerical worker families and single persons from 1972-73 Consumer Expenditure Survey in 216 areas, adjusted for price change between the survey date and December 1977. (See BLS Report 448-1, 2, 3,; 455-1, 3.)
City coverage		
Geographic coverage	*56* urban areas; 50 metropolitan areas and cities selected to represent all urban places in the United States, with 2,500 inhabitants or more in 1960, Alaska, and Hawaii; six additional areas were added in 1966.	*85* urban areas selected to represent all urban places in the United States, with 2,500 inhabitants or more in 1970, including Alaska and Hawaii. (See table on page 51.
Pricing cycle	Prices of food, fuels, and a few other items collected every month in all cities. Prices of most other commodities and services collected monthly in the five largest cities and every *3 months* in the remaining cities. Pricing of foods done early in each month on 3 consecutive days.	Prices of food, fuels, and a few other items collected monthly in all cities. Prices of most other commodities and services collected monthly in the five largest cities and *bimonthly* in the remaining cities. Pricing of foods done throughout the month.
Published indexes	U.S. index and 5 largest metropolitan areas published monthly; 18 other large metropolitan areas published *quarterly*. Regional and city-size class indexes also published *quarterly* since 1967.	U.S. index and 5 largest metropolitan areas published monthly; 23 other large metropolitan areas published *bimonthly*. Regional and city-size class indexes published *bimonthly*. Regional indexes cross-classified by population size will be published *bimonthly*.

V 4 3 9 5

Comparison of old and new Consumer Price Index series—Continued

Item	Old index	New indexes
Item sample		
Item coverage	All goods and services purchased for consumption, including both necessities and luxuries. Excludes personal life insurance, income and personal property taxes, but includes real estate taxes and sales and excise taxes.	Same.
Sample of items priced	Consumer Expenditure Survey (1960-61) data classified into 52 expenditure classes. About 400 items represented in U.S. index and in published city indexes. Certainty items priced in all published cities, other items in one or two sub-samples of other unpublished cities.	Consumer Expenditure Survey (1972-73) data classified into 68 expenditure classes. Expenditure classes contain approximately 265 classes or sets of items, called item strata, represented in the U.S. index and in published city indexes. Item strata further divided into a total of 382 lower level categories called entry-level items. Two samples of item strata priced in each published area except New York which has six samples; each unpublished area has one sample of item strata priced.
Basis of item selection	Probability proportionate to importance in family spending of group covered.	Same.
Reporter samples		
Outlet selection	Selected proportionate to type of ownership, type of outlet, geographic location within area, and in a few instances, sales volume.	A full probability sample of retail stores and other outlets was selected from the results of the Point-of-Purchase Survey. About 23,000 families across the country provided information on the specific retail stores in which they shopped. Data provided from the point-of-purchase survey were used to develop, for the first time, a consistent, objective, and probability-based sample of retail stores and service establishments for the CPI. A number of auxiliary sources used to construct an outlet sampling frame for categories not included in the Point-of-Purchase survey.
Location	In central cities and urbanized places of 56 metropolitan areas (50 areas in 1964 and 1965).	In 85 primary sampling units which include central cities, suburbs, and urbanized places within 25 miles of a selected county or selected group of contiguous counties. Prices also collected outside of the primary sampling units to represent out-of-town purchases.
Number of reporters	About 1,775 food stores. About 40,000 rental units. About 16,000 other reporters of all kinds. About 13,000 housing units for property taxes.	About 2,300 food store outlets. About 18,000 rental units. About 18,500 other reporters as determined from the Point of Purchase Survey. About 18,000 housing units for property taxes. About 3,000 reporters selected from a number of auxiliary sources.
Number of price quotations obtained	Over 1 million food prices per year. About 80,000 rent charges per year. About 362,000 quotations per year for items other than food and rent. About 13,000 property taxes per year.	About 650,000 food prices per year. Over 70,000 rent charges per year. About 350,000 quotations per year for items other than food, rent, and property taxes. About 28,000 property tax quotations per year.
Pricing technique	Personal visit or telephone call by BLS data collector, except for some items collected by mail or from some secondary source.	Same.

Comparison of old and new Consumer Price Index series—Continued

Item	Old Index	New indexes
Reporter Samples—Continued		
	Specification pricing, but agent is permitted to price deviations from specification under prescribed conditions.	Store-specific pricing. The data collector enters a store with exhaustive definition of a fairly broad category of goods and services called an entry level item and then proceeds systematically through successive stages to select items for pricing on the basis of sales information provided by the respondent at each stage. A specific-in-detail item is thus selected for pricing over time in the retail outlet. Data collector continues to collect price quotations for specific item or similar substitute item until it is no longer available.
Uses	Formulation and evaluation of economic policy measures.	Same.
	Escalator of income payments.	Same.
	Deflator of earnings to provide measures of real earnings.	Same.
	Measure of purchasing power of consumer dollar.	Same.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: 48 States and District of Columbia

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for the 48 States and the District of Columbia appearing in appendix A to part 271 which were effective January 1, 1978. Semiannual adjustments in the coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1978

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8982.

SUPPLEMENTARY INFORMATION:

APPENDIX A—48 STATES AND DISTRICT OF COLUMBIA

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semiannually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in March 1978 has been made in the coupon allotments for all households.

Prior to the amendment to the act requiring semiannual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semiannual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semiannual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August. It is now possible to base this semiannual adjustment on more current data—the cost of the food plan for March. Therefore, the income standards and coupon allotments to become effective on July 1, 1978, are based on the cost of the Thrifty Food Plan in March 1978.

Households in which all members are included in the federally aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally aided public assistance, general assistance, or supplemental security income benefit, in any State (other than Alaska, Hawaii, Puerto Rico, Guam, or the Virgin Islands) or in the District of Columbia shall be as follows:

Household size:	Maximum allowable monthly income standards
1	[1]$277
2	[1]363
3	480
4	607
5	720
6	867
7	953
8	1,093
Each additional member	+140

[1] 48 States and District of Columbia.
[2] 1978 USDA adjusted poverty guideline.

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to sections 7 (a) and (b) of the Food Stamp Act, as amended (7 U.S.C. 2016, Pub. L. 91-671), the face value of the monthly coupon allotment which State agencies are authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in the 48 States and the District of Columbia shall be:

MONTHLY COUPON ALLOTMENTS AND PURCHASE REQUIREMENTS—48 STATES AND DISTRICT OF COLUMBIA

M Y 16 78 UMI

FOR ISSUANCE TO HOUSEHOLDS OF MORE THAN EIGHT PERSONS USE THE FOLLOWING FORMULA

A. *Value of the Total Allotment.* For each person in excess of eight, add $42 to the monthly coupon allotment for an eight-person household.

B. *Purchase Requirement.* 1. Use the purchase requirement shown for the eight-person household for households with incomes of $989.99 or less per month.

2. For households with monthly incomes of $990 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $989.99 add $9 to the monthly purchase requirement for an eight-person household with an income of $989.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $38 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107

In view of the need for placing this notice into effect July 1, 1978, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: Alaska

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Alaska appearing in Appendix B to Part 271 which were effective January 1, 1978. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8982.

SUPPLEMENTARY INFORMATION:

APPENDIX B—ALASKA

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in March 1978 has been made in the coupon allotment for all households.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustments, the law specified that the first adjustment be made in January 1974 to reflect changes in the food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August. It is now possible to base this semi-annual adjustment on more current data—the cost of the food plan for March. Therefore, the income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Alaska in March 1978.

Households in which all members are included in the federally aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally aided public assistance, general assistance, or supplemental security income benefit, in Alaska, shall be as follows:

Household size	Maximum allowable monthly income standards—Alaska
1	[1]$343

$1,440 to $1,469.99								410
$1,470 to $1,499.99								410
$1,500 to $1,529.99								410

FOR ISSUANCE TO HOUSEHOLDS OF MORE THAN EIGHT PERSONS USE THE FOLLOWING FORMULA

A. VALUE OF THE TOTAL ALLOTMENT

For each person in excess of eight, add $58 to the monthly coupon allotment for an eight-person household.

B. PURCHASE REQUIREMENT

1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,379.99 or less per month.

2. For households with monthly incomes of $1,380 or more, use the following formula: For each $30 worth of monthly income (or portion thereof) over $1,379.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,379.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $54 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

In view of the need for placing this notice into effect on July 1, 1978, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: Hawaii

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Hawaii appearing in Appendix C to Part 271 which were effective January 1, 1978. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8289.

SUPPLEMENTARY INFORMATION:

APPENDIX C—HAWAII

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in March 1978 has been made in the coupon allotment for all households.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustments, the law specified that the first adjustment be made in January 1974 to reflect changes in the food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August. It is now possible to base this semi-annual adjustment on more current data—the cost of the food plan for March. Therefore, the income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Hawaii in March 1978.

Households in which all members are included in the federally-aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Hawaii, shall be as follows:

Household size	Maximum allowable monthly income standards—Hawaii
1	[1]$301
2	440
3	633
4	800
5	953
6	1,140
7	1,260
8	1,440

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: Puerto Rico

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Puerto Rico appearing in Appendix D to Part 271 which were effective January 1, 1978. Semiannual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adquate diets.

EFFECTIVE DATE: July 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8982.

SUPPLEMENTARY INFORMATION:

APPENDIX D—PUERTO RICO

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the 50 States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in Puerto Rico.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semiannually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the thrifty food plan in March 1978 has been made in the coupon allotment for all except the one-person households. The cost of food did not increase enough for a change in the coupon allotment for the one-person household. Section 7(a) specifies that no such adjustment shall be made unless the increase in the coupon allotment is a minimum of $2.

Prior to the amendment to the Act requiring semiannual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semiannual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in the food prices through August 1973. Similar procedures have been used for subsequent semiannual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August. It is now possible to base this semiannual adjustment on more current data—the cost of the food plan for March. Therefore, the income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Puerto Rico in March 1978.

Households in which all members are included in the federally aided public assistance or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally aided public assistance or general assistance, in Puerto Rico, shall be as follows:

$1,050 to $1,079.99								288
$1,080 to $1,109.99								288

FOR ISSUANCE TO HOUSEHOLDS OF MORE THAN EIGHT PERSONS USE THE FOLLOWING FORMULA

A. VALUE OF THE TOTAL ALLOTMENT

For each person in excess of eight, add $42 to the monthly coupon allotment for an eight-person household.

B. PURCHASE REQUIREMENT

1. Use the purchase requirement shown for the eight-person household for households with incomes of $989.99 or less per month.

2. For households with monthly incomes of $990 or more, use the following formula: For each $30 worth of monthly income (or portion thereof) over $989.99, add $9 to the monthly purchase requirement for an eight-person household with an income of $989.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $38 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by 4. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has combined the economic impact statement for Puerto Rico with the economic impact statement for the 48 States and the District of Columbia, and certifies that an economic impact statement has been prepared. An economic impact statement is authorized under Executive Order 11821 and OMB Circular A-107.

In view of the need for placing this notice into effect on July 1, 1978, and the leadtime needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: Virgin Islands

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for the Virgin Islands appearing in Appendix E to Part 271 which were effective January 1, 1978. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8289.

APPENDIX E—VIRGIN ISLANDS

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in the Virgin Islands.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in March 1978 has been made in the coupon allotment for all households.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January allotment based on the cost of the food plan in the preceding August. It is now possible to base this semi-annual adjustment on more current data—the cost of the food plan for March. Therefore, the income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States adjusted for the cost of food in the Virgin Islands in March 1978.

Households in which all members are included in the federally-aided public assistance grant or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance or general assistance, in the Virgin Islands, shall be as follows:

Household size	Maximum allowable monthly income standards—Virgin Islands
1	[1]$277

$1,320 to $1,349.99								378
$1,350 to $1,379.99								378
$1,380 to $1,409.99								378

For issuance to households of more than eight persons use the following formula:

A. VALUE OF THE TOTAL ALLOTMENT

For each person in excess of eight, add $54 to the monthly coupon allotment for an eight-person household.

B. PURCHASE REQUIREMENT

1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,289.99 or less per month.

2. For households with monthly incomes of $1,290 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $1,289.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,289.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $50 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

In view of the need for placing this notice into effect July 1, 1978, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program; Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: Guam

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Guam appearing in Appendix F to Part 271 which were effective January 1, 1978. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8982.

SUPPLEMENTARY INFORMATION:

APPENDIX F—GUAM

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in Guam.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in February 1978 has been made in the coupon allotment for all households. (Food price data for March is not available for Guam.)

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the prededing August. Based on prices provided for Guam, the Science and Education Administration estimated that the allotment table adopted for the continental United States, adjusted for the cost of food in Guam would be higher than in the fifty States. Thus, the income standards (except for the one-person household which is the same as Hawaii) and the coupon allotments set forth for Guam are the same as those which will become effective in Alaska on July 1, 1978.

Households in which all members are included in the federally-aided public assistance grant or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Guam shall be as follows:

Household size	Maximum allowable monthly income standards—Guam
1	[1]$301
2	460
3	660
4	840
5	1,000
6	1,200
7	1,320
8	1,513
Each additional member	+193

FOR ISSUANCE TO HOUSEHOLDS OF MORE THAN EIGHT PERSONS USE THE FOLLOWING FORMULA

A. VALUE OF THE TOTAL ALLOTMENT

For each person in excess of eight, add $58 to the monthly coupon allotment for an eight-person household.

B. PURCHASE REQUIREMENT

1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,379.99 or less per month.

2. For households with monthly incomes of $1,380 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $1,379.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,379.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $54 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

In view of the need for placing this notice into effect on July 1, 1978, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

(Catalog of Federal Domestic Assistance, Programs, No. 10.551, Food Stamps.)

Dated: May 12, 1978.

CAROL TUCKER FOREMAN,
Assistant Secretary.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4571

Armed Forces Day, 1978

By the President of the United States of America

A Proclamation

The men and women of the Army, Navy, Air Force, Marine Corps and Coast Guard serve their country with pride and dignity. Each day we enjoy peace is a reminder of their important role.

It is with equal pride that we Americans set aside one day each year to pay tribute to these patriotic volunteers, stationed throughout the world.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States and Commander-in-Chief of the Armed Forces of the United States, continuing the precedent of my six immediate predecessors in this Office. do hereby proclaim the third Saturday of each May as Armed Forces Day.

I direct the Secretary of Defense on behalf of the Army, the Navy, the Air Force, and the Marine Corps, and the Secretary of Transportation on behalf of the Coast Guard, to plan for appropriate observances each year, with the Secretary of Defense responsible for soliciting the participation and cooperation of civil authorities and private citizens.

I invite the Governors of the States, the Commonwealth of Puerto Rico, and other areas subject to the jurisdiction of the United States, to provide for the observance of Armed Forces Day within their jurisdiction each year in an appropriate manner designed to increase public understanding and appreciation of the Armed Forces of the United States.

I also invite national and local veterans, civic and other organizations to join in the observance of Armed Forces Day each year.

I call upon my fellow Americans not only to display the flag of the United States at their homes on Armed Forces Day, but also to learn about our system of defense, and about the men and women who sustain it, by attending and participating in the local observances of the day.

Proclamation 4492 of March 22, 1977, is hereby superseded.

IN WITNESS WHEREOF, I have hereunto set my hand this fifteenth day of May, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

Executive Order 12060 • **May 15, 1978**

Relating to Certain Positions in Levels IV and V of the Executive Schedule

By virtue of the authority vested in me by Section 5317 of Title 5 of the United States Code, and as President of the United States of America, it is hereby ordered as follows:

SECTION 1. Section 1 of Executive Order No. 11861, as amended, placing certain positions in level IV of the Executive Schedule, is further amended by inserting in numerical sequence "(6) Assistant Attorney General, United States Attorneys and Trial Advocacy, Department of Justice." and by deleting "Counselor to the Secretary for Congressional Affairs" in subsection (10) and inserting in lieu thereof, "Deputy Under Secretary for Regional Affairs".

SEC. 2. Section 2 of Executive Order No. 11861, as amended, placing certain positions in level V of the Executive Schedule, is further amended by deleting "(13) Executive Director, Federal Personnel Management Systems Study, United States Civil Service Commission.".

SEC. 3. Executive Order No. 11189 of November 23, 1964, Executive Order No. 11195 of January 30, 1965, and Executive Order No. 11995 of June 8, 1977 are revoked.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[Amdt. 1]

PART 1435—SUGAR

Subpart—Price Support Loan Program for 1977 Crop Sugarbeets and Sugarcane

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The price support loan regulations are hereby amended to (1) change the designated 1977 crop harvesting period for the Puerto Rico sugar producing area; (2) clarify provisions on the storage space that may be used for eligible collateral to be placed and maintained under loan; (3) increase the 1977 loan rate for refined beet sugar; and (4) specify a retention period for records used by processors to support loan collateral eligibility, quantity, and quality. The definition of "1977 crop" is amended to designate the sugarcane harvested in Puerto Rico during the calendar year 1977 as the 1977 crop. An entire storage facility need not be solely for a single processor's use if it is safe and has sufficient space committed for his loan quantity. The loan rate for refined beet sugar is increased from 14.24 cents per pound to 15.57 cents per pound. Records required by this subpart must be retained by processors for not less than 3 years.

The intended effect of this action is to increase the loan rate for refined beet sugar.

EFFECTIVE DATE: May 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert R. Stansberry, Jr., ASCS, 202-447-7561 or 202-447-3517, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On November 11, 1977, a final rule was published in the FEDERAL REGISTER (42 FR 58734) implementing a program, effective as of November 8, 1977, to support prices in the marketplace for producers of 1977 crop sugarbeets and sugarcane through loans made to sugar processors. The loan program was designed to support sugar prices to producers under section 201 of the Agricultural Act of 1949, as amended by section 902 of the Food and Agriculture Act of 1977. On December 28, 1977 (42 FR 64677) the regulations for the conduct of the price support payment program were amended to define the "1977 crop" of sugarcane for Puerto Rico as that harvested during calendar year 1977. Since the combined objective of the price support payment program and the price support loan program is to support the price of sugarbeets and sugarcane in the marketplace for the 1977 crop, it is necessary that definition of the 1977 crop be the same under both programs for all producing areas.

According to information supplied to the Department, some domestic processors of sugar crops, who are otherwise eligible,will be severely limited as to the quantities they can place under loan unless they can rent only such portions of available storage as they need and unless their production can be therein commingled with that of other processors. It is the intent of the Department to permit such commingled production, if it is otherwise eligible, to be placed under loan since the economical utilization of available storage space increases the availability of price support benefits to producers.

Section 1435.19 of this part requires beet sugar processors, as a condition of loan eligibility, to pay eligible producers not less than $22.84 per ton of average quality sugarbeets. Most purchase contracts between beet processors and producers establish a scale of prices per ton of beets based upon the relationship between the level of sucrose in the beets and the net selling price received for the sugar. This relationship indicates that processors need, on average, to net 14.24 cents per pound of refined beet sugar to be able to pay producers $22.84 per ton. The net selling price is determined by deducting from the gross selling price all expenses properly chargeable to the marketing of sugar. Included in the properly chargeable expenses are insurance, taxes, advertising, sales promotion and salaries, storage warehousing, handling, and other related costs which are incurred by a processor regardless of the disposition of a loan. These costs averaged 0.57 cent per pound in 1975, 0.64 cent in 1976 and are estimated to be 0.72 cent for the 1977 crop. Only by increasing the 1977 crop loan rate for refined beet sugar by 0.72 cent per pound can a net selling price of 14.24 cents per pound, which is necessary for payment to sugarbeet producers of the minimum 52.5 percent of parity required by law ($22.84 per ton of average quality sugarbeets), be ensured.

While increasing the refined beet sugar loan rate by more than 0.72 cent per pound could result in price support for some beet producers at more than 52.5 percent of parity while cane producers remain at 52.5 percent on average, experience with the 14.24-cent per pound rate makes it likely that failure to do so will contribute toward low refined cane sugar prices and, consequently, low raw sugar prices. Major buyers of beet sugar have been able to buy at ceiling prices which generally reflect the loan rate plus 2.00 to 2.25 cents per pound total marketing expense. Such arrangements tend to force cane refiners to sell at the same price in order to remain competitive; and at such prices for refined cane sugar, raw sugar processors and cane producers will not realize the minimum 13.5-cent support price.

It is essential, therefore, to establish a representative relationship between refined beet sugar net selling prices (NSP) and raw sugar prices, and to further adjust the refined beet sugar loan rate accordingly. It is believed that a proper long-term ratio can be established by using the actual average relationship which existed during the 15-year period 1962 through 1976. This indicates that the net selling price for refined beet sugar should be 110 percent of the price for raw cane sugar.

Use of the indicated relationship between the raw sugar support price of 13.50 cents and the net selling price for beet processors gives a beet sugar loan rate of 14.85 cents (13.50 × 1.10) which, when increased by the 0.72 cent necessary to achieve the proper support level to producers, results in the herein established beet sugar loan rate of 15.57 cents per pound for the 1977 crop.

No specific record maintenance period had previously been established

MY 17 78

UMI

V 4 3 | 9 6

for processor records. A 3-year period is felt to be reasonable to processors and adequate to protect the interests of CCC.

A regulatory analysis which describes the impact of this amendment has been prepared in accordance with Executive Order 12044, dated March 23, 1978. Copies are available by contacting the Office of the Director of Economics, Policy Analysis and Budget, Room 102, Administration Building, USDA, Washington, D.C. 20250.

Accordingly, 7 CFR Part 1435 is amended as follows:

1. Section 1435.17 is amended by changing the harvesting period designation for Puerto Rico in paragraph (a) to read as follows:

§ 1435.17 Definitions.

(a) "1977 crop" • • •

Sugar-Producing Area	Harvesting Period
• • • • •	
Puerto Rico	Calendar Year 1977
• • • • •	

2. Section 1435.18 is amended by revising that portion of the third sentence immediately preceding the proviso to read as follows:

§ 1435.18 Level and method of support, and loan rate.

• • • Loan rates for the 1977 crop shall be 15.57 cents per pound for refined beet sugar, and 13.50 cents per pound for cane sugar, raw value, including the cane sugar, raw value, equivalent contained in cane syrup and edible molasses: • • •

3. Section 1435.19 is amended by revising paragraph (d) to read as follows:

§ 1435.19 Eligibility requirements.

• • • • • •

(d) Eligible storage shall consist of a storage structure or space which is determined by the State committee to be committed to the storage of such quantity of the processor's eligible sugar as is offered for loan or maintained under loan and which is safe for storage of the product.

4. Section 1435.24 is amended by adding the following sentence to the end of the text in paragraph (f) to read as follows:

§ 1435.24 Miscellaneous provisions.

• • • • • •

(f) *Records and inspection thereof.* • • •

Such books, records, accounts and other written data shall be retained by the processor for not less than 3 years.

• • • • • •

NOTE.—It is hereby certified that a regulatory analysis of this action has been prepared in accordance with Executive Order 12044.

Signed at Washington, D.C. on May 5, 1978.

STEWART N. SMITH,
Acting Executive Vice President, Commodity Credit Corporation.

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Regs. B and Z; Docket No. R-0154]

PART 202—EQUAL CREDIT OPPORTUNITY

Amendment to Procedures for Issuing Official Staff Interpretations; Correction

MAY 12, 1978.

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Correction.

SUMMARY: The correction document appearing in FR Doc. 78-12402 on page 19644 of the issue for May 8, 1978, is being corrected due to an error in the Part number and heading. "PART 226—TRUTH IN LENDING", should have read, "PART 202—EQUAL CREDIT OPPORTUNITY", and "§ 226.1(d)(2)(1)" should have read, "§ 202.1(d)(2)(i)."

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief Staff Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2761.

In FR Doc. 78-11758 appearing at page 18540 of the issue for Monday, May 1, 1978, § 202.1(d)(2)(i) should have read,

"(2)(i) Official staff interpretations will be issued at the discretion of designated officials. No such interpretation will be issued approving creditors' forms or statements. Any request for an official staff interpretation of this Part must be in writing and addressed to the Director of the Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The request must contain a complete statement of all relevant facts concerning the credit transaction or arrangement and must include copies of all pertinent documents."

Board of Governors of the Federal Reserve System, May 11, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[Reg. Z; Docket No. R-0159]

PART 226—TRUTH IN LENDING

Supplement VI

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This supplement to Regulation Z prescribes the criteria and procedures under which a State may apply for an exemption from the requirements of Chapter 5 (Consumer Leases) of the Truth in Lending Act (the Act) or for a determination that a State law is not inconsistent with or preempted by the consumer leasing provisions of Truth in Lending and Regulation Z. The Board has issued this supplement to provide procedures and criteria under which it will grant exemptions under the Act.

EFFECTIVE DATE: May 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief Staff Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2761.

SUPPLEMENTARY INFORMATION: (1) Section 186(b) of Chapter 5 of the Truth in Lending Act authorizes the Board to grant exemptions from Chapter 5 to States, if the Board determines that the State law imposes requirements substantially similar to those of Chapter 5 or that the State law provides greater protection and benefit to consumers than is provided therein. In addition, the Board must determine that there is adequate provision for enforcement of the State law. Section I of the Supplement sets forth the criteria and procedures under which a State may secure such an exemption.

Section 186(a) authorizes the Board to make determinations whether a State law is inconsistent with or preempted by Chapter 5 of the Federal law in any respect. The Board is prohibited from determining that a State law is inconsistent with any provision of Chapter 5 when the State law provides greater protection and benefit to consumers than does Chapter 5. Section II of the Supplement prescribes the criteria and procedures under which a State may secure such a determination.

(2) The provisions of 5 U.S.C. § 553, relating to notice, public participation and deferred effective dates have not been followed in connection with the adoption of this rule because it relates to agency procedures.

(3) Pursuant to the authority granted in 15 U.S.C. § 1604 (1968), the Board hereby files the following Supplement VI as part of the original document, and it will not be carried in 12 CFR Part 226, effective May 17, 1978.

SUPPLEMENT VI TO REGULATION Z

TRUTH IN LENDING

(SECTIONS 226.12 & 226.6(a)(3)—SUPPLEMENT)

SECTION I—EXEMPTIONS

Procedures and criteria under which any State may apply for exemption from the provisions of Chapter 5 of the Truth in Lending Act pursuant to paragraph (a) of § 226.12.

(a) *Application.* Any State may make application to the Board, pursuant to the terms of Section I of this supplement and the Board's Rules of Procedure (12 CFR 262), for a determination that under the laws of that State,[1] consumer lease transactions, as provided in section 181(1) of the Act and § 226.2(mm) of this Part, within that State are subject to requirements which are substantially similar to those imposed under Chapter 5 of the Act[2] or which provide greater protection and benefit to lessees than those provided under Chapter 5, and that there is adequate provision for enforcement of such requirements. Such application shall be made by letter addressed to the Board signed by the Governor, the Attorney General, or any official of the State having responsibilities under the State laws which are applicable to the relevant class of transactions.

(b) *Supporting documents.* The application shall be accompanied by

(1) A copy of the full text of the laws of the State which are claimed by the applicant to impose requirements substantially similar to those imposed under Chapter 5 or to provide greater protection and benefit to lessees than does Chapter 5 with respect to consumer lease transactions as defined in § 226.2(mm) of this Part.

(2) A comparison of each requirement of State law with the corresponding requirement of Chapter 5, together with reasons to support the claim that the requirements of State law are substantially similar to or provide greater protection and benefit to lessees than requirements of Chapter 5 with respect to the class of consumer lease transactions. It shall also demonstrate that any differences are not inconsistent with and do not result in a diminution in the protection and benefit afforded lessees under Chapter 5 and state that there are no other State laws which, due to their relation to the State law under consideration, should be considered by the Board in making its determination.

[1]Any reference to State law in Supplement VI includes a reference to any regulations which implement State law and formal interpretations thereof by a court of competent jurisdiction or a duly authorized agency of that State.

[2]Any reference in Supplement VI to Chapter 5 of the Act or any section thereof includes a reference to the implementing provisions of this Part and the Board's formal interpretations thereof.

(3) A copy of the full text of the laws of the State which provide for enforcement of the State laws referred to in subparagraph (1) of this paragraph.

(4) A comparison of the provisions of State law with the provisions of Sections 108, 112, 130, 131, 183(a), 183(b), 185(a) and 185(c) of the Act, together with reasons to support the claim that such State laws provide for

(i) Administrative enforcement of the State laws referred to in subparagraph (1) of this paragraph which is equivalent to the enforcement provided under Section 108 of the Act;

(ii) Criminal liability for willful and knowing violation of the State law with penalties substantially similar to those prescribed under Section 112 of the Act, except that more severe penalties may be provided;

(iii) Civil liability for failure to comply with the requirements of the State law, including class action liability, which is substantially similar to that provided under Sections 130, 131 185(b) except that more severe penalties may be provided;

(iv) In leases where the lessee's liability at the end of the lease term is based on the estimated value of the leased property, a limitation on the lessee's liability at the end of the least term substantially similar to that provided by paragraph (a) of Section 183 of the Act, except that a stricter limitation may be provided;

(v) A provision prescribing that all penalties and other charges for delinquency, default or early termination specified in the lease must be reasonable substantially similar to that provided in paragraph (b) of Section 183 of the Act, except that a stricter provision may be provided.

(vi) A statute of limitations that prescribes a period in which to institute civil actions of substantially similar duration as that provided under paragraph (c) of Section 185 of the Act, except that a longer period may be provided.

(5) A statement identifying the office designated or to be designated to administer the State laws referred to in subparagraph (1) of this paragraph, together with complete information regarding the fiscal arrangements for administrative enforcement (including the amount of funds available or to be provided), the number and qualifications of personnel engaged therein, and a description of the procedures under which such State laws are to be administratively enforced, including administrative enforcement with respect to Federally-chartered lessors.[3] The foregoing statement should include reasons to support the claim that there is adequate provision for enforcement of such State laws.

(c) *Criteria for Determination.* The Board will consider the following criteria along with any other relevant information in making a determination whether the laws of a State impose requirements substantially similar to or provide greater protection and benefit to lessees than under Chapter 5, and whether there is adequate provision for enforcement of such laws:

(1) In order for provisions of State law to be substantially similar to or provide greater protection and benefit to lessees than the provision of Chapter 5, the provisions of State law[4] shall require that:

(i) Definitions and rules of construction import the same meaning and have the same application as those prescribed under § 226.2 of this Part;

(ii) Lessors make all of the applicable disclosures required by this Part and within the same (or more stringent) time periods as are prescribed by this Part;

(iii) Lessors abide by obligations substantially similar to those prescribed by Chapter 5, under conditions substantially similar to (or more stringent than those prescribed in Chapter 5;

(iv) Lessors abide by the same (or more stringent) prohibitions as are provided by Chapter 5;

(v) Lessees need comply with no obligations or responsibilities which are more costly or burdensome as a condition of exercising any of the rights or gaining the benefits and protections in the State law which correspond to those afforded by Chapter 5, than those obligations or responsibilities imposed upon lessees in Chapter 5;

(vi) Substantially similar or more favorable rights and protections are provided to lessees under conditions substantially similar to or more favorable (to lessees) than those afforded by Chapter 5.

(2) In determining whether the provisions for enforcement of the State law referred to in paragraph (b)(1) are adequate, consideration will be given to the extent to which, under the laws of the State, provision is made for

(i) Administrative enforcement, including necessary facilities, personnel and funding;

(ii) Criminal liability for willful and knowing violation with penalties substantially similar to those prescribed under Section 112, except that more severe criminal penalties may be prescribed.

(iii) Civil liability for failure to comply with the provisions of the State law substantially similar to that provided under sections 130, 131 and 185(b), except that more severe civil liability penalties may be prescribed;

(iv) In leases where the lessee's liability at the end of the lease term is based on the estimated value of the leased property, a limitation on the lessee's liability at the end of the lease term substantially similar to that provided in section 183(a), and a provision requiring that penalties be reasonable substantially similar to that provided in section 183(b), except that stricter standards on end-term liability and penalty provisions may be prescribed;

(v) A statute of limitations with respect to civil liability of substantially similar duration to that provided under section 185(c), except that a longer duration may be provided.

(d) *Public notice of filing and proposed rule making.* Following initial review of an application filed in accordance with the re-

[3]Transactions within a State in which a Federally-chartered institution is a lessor shall not be subject to the exemption, and such Federally-chartered lessors shall remain subject to the requirements of the Act and administrative enforcement by the appropriate Federal authority under section 108, unless it is established to the satisfaction of the Board that appropriate arrangements have been made with such Federal authorities to assure effective enforcement of the requirements of State laws with respect to such lessors.

[4]This paragraph is not to be construed as indicating that the Board would consider adversely any additionaly requirements of State law which are not inconsistent with the purpose of the Act or the requirements imposed under Chapter 5.

M Y 1 7 7 8 UMI

V 4 3 | 9 6

quirements of paragraphs (a) and (b) of section I, notice of such filing and proposed rule making will be published by the Board in the FEDERAL REGISTER, and a copy of such application will be made available for examination by interested persons during business hours at the Board and at the Federal Reserve Bank of each Federal Reserve District in which any part of the State of the applicant is situated. A reasonable period of time will be allowed from the date of such publication for the Board to receive written comments from interested persons with respect to that application.

(e) *Exemption from requirements of Chapter 5.* If the Board determines that under the law of a State consumer lease transactions are subject to requirements which are substantially similar to or which provide greater protection and benefit to lessees than those imposed under Chapter 5 and that there is adequate provision for enforcement, the Board will exempt such class of transactions in that State from the requirements of Chapter 5 in the following manner and subject to the following conditions:

(1) Notice of the exemption will be published in the FEDERAL REGISTER, and the Board will furnish a copy of such notice to the official who made application for such exemption and to each Federal authority responsible for administrative enforcement of the requirements of Chapter 5.

(2) The appropriate official of any State which receives an exemption shall inform the Board within 30 days of the occurrence of any change in its related law (including regulations). The report of any such change shall contain the full text of that change together with statements setting forth the information and opinions with respect to that change as specified in subparagraphs (2) and (4) of paragraph (b). The official who has received an exemption shall file with the Board from time to time such reports as the Board may require.

(3) The Board will inform the official of any subsequent amendments to Chapter 5 (including the implementing provisions of this Part and the Board's formal interpretations) which might call for amendment of State law, regulations or formal interpretations thereof.

(f) *Adverse Determination.* (1) If the Board denies the application for exemption, it will notify the appropriate State official of the facts upon which its decision is based and shall afford that State a reasonable opportunity to demonstrate or achieve compliance.

(2) If, after giving the State an opportunity to demonstrate or achieve compliance, the Board finds that it still cannot grant the exemption, the Board will publish in the FEDERAL REGISTER a notice of its decision and will furnish a copy of such notice to the official who made application for such exemption.

(g) *Revocation of exemption.* (1) The Board reserves the right to revoke any exemption if at any time it determines that the State law does not, in fact, impose requirements which are substantially similar to or provide greater protection and benefit to lessees than those imposed under Chapter 5, or that there is not, in fact, adequate provision for enforcement.

(2) Before revoking any State exemption, the Board will notify the appropriate State official of the facts or conduct which in the opinion of the Board warrants such revocation and shall afford that State such opportunity as the Board deems appropriate to demonstrate or achieve compliance.

(3) If, after having been afforded the opportunity to demonstrate or achieve compliance, the Board determines that the State has not done so, notice of the Board's intention to revoke such exemption shall be published as a notice of proposed rulemaking in the FEDERAL REGISTER. A period of time will be allowed from the date of such publication for the Board to receive written comments from interested persons.

(4) In the event of revocation of such exemption, notice of such revocation shall be published by the Board in the FEDERAL REGISTER, and a copy of such notice shall also be furnished to the appropriate State official and to the Federal authorities responsible for enforcement of requirements of Chapter 5, and the class of transactions affected within that State shall then be subject to the requirements of Chapter 5, to administrative enforcement as provided under section 108, to criminal liability as provided under section 112, and to civil liability as provided under sections 130, 131 and 185(b).

SECTION II—PREEMPTION

Procedures and criteria under which any State may apply for a determination that a State law is not inconsistent with and not preempted by a provision of Chapter 5 of the Act pursuant to § 226.6(b)(3) of this Part.

(a) *Application.* Any State may make application to the Board pursuant to the terms of section II of this supplement and the Board's Rules of Procedure (12 CFR 262), for a determination that a law of such State is consistent[5] with a provision of Chapter 5 of the Act, because such State law provides greater protection and benefit to lessees than does the provision of Chapter 5, that such law is consistent with a provision of Chapter 5 for any other reason, or for a determination of any issues not clearly covered by § 226.6(b) with regard to the relationship of the Federal law to the State law. Such application shall be made by letter addressed to the Board signed by the Governor, Attorney General or any official of the State having responsibilities under the State law put forward for consideration.

(b) *Supporting Documents.* The application shall be accompanied by:

(1) A copy of the full text of the laws of the State which are claimed by the applicant to be consistent with a provision of Chapter 5 or whose relationship (with regard to consistency or inconsistency) to a provision of Chapter 5 is claimed by the applicant to be not clearly covered by the standards and criteria for comparison set forth in § 226.6(b) of this Part.

(2) A comparison of each requirement of the State law with the corresponding requirement of Chapter 5, with reasons to support the claim that the State law is consistent with a provision of Chapter 5 or that the relationship (with regard to consistency or inconsistency) between the State law and Chapter 5 is not clearly covered by the standards and criteria set forth in § 226.6(b) of this Part.

(3) A copy of the full text of any provisions of State law corresponding to sections 112, 130, 131, 183(a), 183(b), 185(b), and 185(c) (if applicable), together with reasons for the applicant's claim that such State provisions are not inconsistent (because they provide greater protection and benefit to lessees or for other reasons) with the Act.

(4) A statement that there are no State laws (including administrative or judicial interpretations) other than those submitted to the Board which have any bearing on whether or not the State law is consistent with a provision of Chapter 5.

(5) A statement identifying the office designated or to be designated to administer the State laws referred to in subparagraph (1) of this paragraph. If no such administrative office exists, then a statement identifying the office to which the Board can address any correspondence regarding the request for such determination shall accompany the application.

(c) *Criteria for Determination.* The Board will consider the following criteria along with any other relevant information, in addition to the criteria set forth in § 226.6(b) of this Part, in making a determination of whether or not State law is inconsistent with a provision of Chapter 5. In order for provisions of State law to be determined to be consistent with a provision of Chapter 5, the provisions of State law[6] shall, to the extent relevant to the determination, require that:

(1) Definitions and rules of construction import the same meaning and have the same application as those prescribed by this Part;

(2) Lessors make all of the applicable disclosures required by the corresponding provision of Chapter 5 and this Part, and within the same (or more stringent) time periods as those prescribed by this Part;

(3) Lessors abide by obligations substantially similar to those prescribed by a provision of Chapter 5 under conditions substantially similar (or more stringent) to those in Chapter 5;

(4) Lessors abide by the same (or more stringent) prohibitions as are provided by Chapter 5;

(5) Lessees need comply with no obligations or responsibilities which are more costly or burdensome as a condition of exercising any of the rights or gaining the benefits and protections provided in the State law, which correspond to those afforded by Chapter 5, than those obligations or responsibilities imposed on lessees in Chapter 5;

(6) Lessees are to have rights and protections substantially similar to or more favorable than those provided by the corresponding provisions of Chapter 5 under conditions and within time periods which are substantially similar to or more favorable (to lessees) than those prescribed by Chapter 5.[7]

(d) *Public notice of filing and proposed rulemaking.* In connection with any application which has been filed in accordance with the requirements of paragraphs (a) and (b) of section II of this supplement, notice of such filing and proposed rulemaking will be published by the Board in the FEDERAL REGISTER, and a copy of such application will be made available for examination by interested persons during business hours at the Board and at the Federal Reserve Bank of each Federal Reserve District in which any part of the State of the applicant is situated. A period of time will be allowed from the date of such publication for the Board to receive written comments from interested persons with respect to that application.

(e) *Determination that a State Law is consistent with chapter 5.* If the Board determines on the basis of the information before it that the law of a State is consistent with a provision of chapter 5, notice of such determination shall be published in the following manner and shall be subject to the following conditions:

(1) Notice of the determination will be published in the FEDERAL REGISTER, and the Board will furnish a copy of such notice to the official who made application for such exemption and to each Federal authority responsible for administrative enforcement of the requirements of Chapter 5.

(2) The appropriate official of any State which receives such a determination shall inform the Board within 30 days of the occurrence of any change in its related law (or regulations). The report of any such change shall contain copies of the full text of the law, as changed, together with statements setting forth the information and opinions with respect to that change as specified in subparagraphs (2) and (4) of paragraph (b) of section II. The appropriate official of any State which has received such a determination shall file with the Board from time to time such reports as the Board may require.

(3) The Board will inform the appropriate official of any State which receives such a determination of any subsequent amendments to chapter 5 (including the implementing provisions of this part and the Board's formal interpretations) which might call for amendment of State law, regulations, or formal interpretations.

(f) *Adverse determination.* (1) If, after publication of notice in the FEDERAL REGISTER as provided under paragraph (d), the Board finds that such State law is inconsistent with a provision of chapter 5, it will notify the appropriate State official of the facts upon which such finding is based and shall afford that State official a reasonable opportunity to demonstrate further that such State law is not inconsistent with the corresponding provisions of chapter 5, if such State official desires to do so.

(2) If, after having afforded the State official such further opportunity to demonstrate that the State law is consistent with a provision of chapter 5, the Board finds that the State law is inconsistent, it will publish in the FEDERAL REGISTER a notice of its decision with respect to such application and will furnish a copy of such notice to the official who made application for the determination.

(g) *Reversal of determination.* (1) The Board reserves the right to reverse any determination made under section II of this supplement to the effect that a State law is consistent with a provision of chapter 5 because of subsequently discovered facts, a change in the State or Federal law (by amendment or administrative or judicial interpretation or otherwise) or for any other reason bearing on the coverage or impact of the State or Federal law.

(2) Before reversing any such determination, the Board will notify the appropriate State official of the facts or conduct which, in the opinion of the Board, warrants such reversal and shall afford that State such opportunity as the Board deems appropriate under the circumstances to demonstrate that the determination should not be reversed.

(3) If, after having been afforded the opportunity to demonstrate that its law is consistent with a provision of chapter 5, the Board determines that the State has not done so, notice of the Board's intention to reverse such determination shall be published as a notice of proposed rulemaking in the FEDERAL REGISTER. A reasonable period of time will be allowed from the date of such publication for the Board to receive written comments from interested persons.

(4) In the event of reversal of such determination, notice shall be published by the Board in the FEDERAL REGISTER, and a copy of such notice shall also be furnished to the appropriate State official and to the Federal authorities responsible for enforcement of the requirements of chapter 5, and the State law affected shall then be considered inconsistent with and preempted by chapter 5 within the meaning of section 186(a).

By order of the Board of Governors, May 1, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 78-12930 Filed 5-16-78; 8:45 am]

[5] For purposes of this supplement, the terms "consistent" and "not inconsistent" shall convey the same meaning and shall involve the same evidentiary showing.

[6] This paragraph is not to be construed as indicating that the Board would consider adversely any additional requirements of State law which are not inconsistent with the purposes of the Act or the requirements imposed under Chapter 5.

[7] A State may make a showing that in certain limited readily identifiable circumstances a law which may otherwise be inconsistent with a provision of Chapter 5 is not inconsistent under the criteria set forth in paragraph (c) of Section II of this supplement. The Board may determine such State law to be consistent only under those circumstances but will make no such determination if doing so would mislead or confuse lessees.

PART 226—TRUTH IN LENDING

Official Staff Interpretation

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official Staff Interpretation.

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

EFFECTIVE DATE: June 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief Staff Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2761.

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copyiny a current index providing identifying information for the public subject to certain limitations stated in 12 CFR part 261.6.

(2) An opportunity for public comment on an official staff interpretation may be provided upon request of interested parties and in accordance with 12 CFR part 226.1(d)(2)(ii). As provided by 12 CFR part 226.1(d)(3) every request for public comment must be in writing, should clearly identify the number of the official staff interpretation in question, should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 and must be postmarked or received by the Secretary's office before the effective date of the interpretation. The request must also state the reasons why an opportunity for public comment would be appropriate.

(3) 15 U.S.C. 1640(f).

Therefore, T12 CFR Part 226 is amended by adding the following staff interpretation to the appendix:

[FC-0148]

Sec. 226.7(k) Debiting date should be substituted for date required to be disclosed (usually, date of transaction) only when primarily required date is unavailable, not when other required information is unavailable.

APRIL 27, 1978.

This is in response to your letter of • • •, in which you request an official staff interpretation with regard to § 226.7(k)(4) of Regulation Z. You request clarification of the circumstances under which a debiting date is to be substituted for a transaction date. You express concern that, read literally, the language of subsection (k)(4) could lead a creditor to use the debiting date in place of the transaction date any time an item of required information (such as the State in which the transaction occurred) is unavailable.

As noted in the FEDERAL REGISTER explanatory material that accompanied publication of § 226.7(k)(4), 41 FR 36662 (August 31, 1976), creditors that use descriptive billing systems are required to substitute the debiting date (that is, the date on which the amount of a transaction is debited to the customer's account) for the primarily required date (usually the date on which the transaction took place) "whenever the primarily required date is not available." The provision does not mean that the creditor should substitute the debiting date whenever any information required by § 226.7(k)(1), (2), or (3) is unavailable.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) and limited in its application to the facts and issues set forth above. I trust this is responsive to your inquiry.

Sincerely,

NATHANIEL E. BUTLER,
Associate Director.

Board of Governors of the Federal Reserve System, May 5, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[Docket No. R-0160]

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

Delegation of Authority to Grant Exemptions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This rule delegates to the Director of the Division of Consumer Affairs the authority to grant (but not deny or revoke) exemptions to States from the requirements of Chapter 5 (Consumer Leases) of the Truth in Lending Act (the Act), when State law imposes substantially similar requirements or provides greater protection and benefit to the consumer, and there is adequate provision for enforcement. In addition, a technical amendment to the existing delegation of authority has been made. The delegation will add the authority to grant exemptions to States from the requirements of the consumer leasing provisions of the Act to the existing delegation of authority.

EFFECTIVE DATE: May 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief Staff Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2781.

SUPPLEMENTARY INFORMATION: (1) The Board has delegated authority to the Director of the Division of Consumer Affairs to grant (but not deny or revoke) exemptions to States from the requirements of Chapter 5 (Consumer Leases) of the Truth in Lending Act, 15 U.S.C. § 1667(e) (1976), and its implementing regulation. The procedures and criteria by which such exemptions may be granted are contained in Supplement VI to Regulation Z. Such delegations have been made to the Director of the Division of Consumer Affairs for the other chapters of Truth in Lending.

In addition, a minor technical amendment has been made to the existing delegation to insure its conformity with the statute.

(2) The provisions of 5 U.S.C. 553, relating to notice, public participation and deferred effective dates have not been followed in connection with the adoption of this rule because it relates to agency procedures.

(3) Pursuant to the provisions of the Section 11(k) Federal Reserve Act (12 U.S.C. 248(k)), the Board hereby revises 12 CFR Part 265.2(h)(2) to read as follows, effective May 17, 1978.

§ 265.2 Specific functions delegated to Board employees and to the Federal Reserve Bank.

• • • • • •

(h) • • •

(2) Pursuant to Sections 123, 171(b) and 186(b) of the Truth in Lending Act (15 U.S.C. 1633, 1666(j) and 1667(e)) and the Board's Regulation Z, 12 CFR Part 226.12, to grant, but not deny or revoke, exemptions to States from the requirements of

(i) Chapter 2 (15 U.S.C. 1631-1644), where State law imposes substantially similar requirements and there is adequate provision for enforcement,

(ii) Chapter 4 (15 U.S.C. 1666), where State law imposes substantially similar requirements or gives greater protection to the consumer and there is adequate provision for enforcement, and

(iii) Chapter 5 (15 U.S.C. 1667), where State law imposes substantially similar requirements or gives greater protection and benefit to the consumer, and there is adequate provision for enforcement.

By order of the Board of Governors, May 1, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 78-13446 Filed 5-16-78; 8:45 am]

[8025-01]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Amdt. 6]

PART 112—NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS OF SMALL BUSINESS ADMINISTRATION—EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Addition of a Federal Financial Assistance Program Which Is Covered by This Part to Appendix A

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This rule adds a new financial assistance program, the disaster loan program based on economic dislocation, to the listing of programs which are subject to the nondiscrimination regulations of the Small Business Administration.

EFFECTIVE DATE: May 17, 1978.

FOR FURTHER INFORMATION CONTACT:

J. Arnold Feldman, Chief, Compliance Division, Small Business Administration, 1441 L Street NW, 12th Floor, Vermont Building, Washington, D.C. 20416, 202-653-6054.

SUPPLEMENTARY INFORMATION: 1In accordance with the requirements of 28 CFR § 42.403(d), published December 1, 1976, there was published in the FEDERAL REGISTER (43 FR 9488) on March 8, 1978, a notice that the Small Business Administration proposed the amendment of Appendix A by adding a new financial assistance program of the Agency thereto, which is subject to the nondiscrimination provisions of this part. Interested parties were given until April 7, 1978, to submit comments, suggestions or objections regarding this proposed amendment. No comments were received.

Therefore, Part 112 of Chapter 1 of Title 13 CFR is hereby amended by: Adding the following financial assistance program to Appendix A.

Disaster Loans: Small Business Act Section 7(b)(9): Economic Dislocation.

Dated: May 9, 1978.

A. VERNON WEAVER
Administrator.

[6320-01]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS

[Regulation ER-1049; Amdt. No. 42]

PART 221—CONSTRUCTION, PUBLICATION, FILING AND POSTING OF TARIFFS OF AIR CARRIERS AND FOREIGN AIR CARRIERS

Editorial Amendment

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This amendment conforms the heading to Subpart P of Part 221 of our regulations with the current statutory notice requirements for tariff filings before the Board.

DATES: Effective: June 16, 1978. Adopted: May 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Richard Juhnke, Associate General Counsel, Rates and Agreements, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5436.

SUPPLEMENTARY INFORMATION: Pub. L. 95-163 changed the former 30-day notice period for tariff filings to 45 or 60 days, depending upon the category of tariff involved. ER-1038 (December 30, 1977), amended Part 221 of the Board's Economic Regulations to conform with these new statutory notice requirements. The reference to the former 30-day notice period was inadvertently left in the title to Subpart P, which deals with special tariff permission. This editorial amendment merely changes the wording to reflect the notice periods presently in effect.

Accordingly, Part 221 of the Board's Economic Regulations (14 CFR Part 221) is amended as follows:

1. The title to Subpart P is amended to read as follows:

Subpart P—Special Tariff Permission to File on Less Than Statutory Notice

• • • • • •

2. The title to Subpart P as it appears in the index to Part 221 is amended to read as follows:

• • • • • •

Subpart P—Special Tariff Permission to File on Less Than Statutory Notice

• • • • • •

(Secs. 204 and 403, Federal Aviation Act of 1958, as amended, 72 Stat. 743, 758, as amended (49 U.S.C. 1324, 1373).)

By the Civil Aeronautics Board.

PHILIP J. BAKES, Jr.,
General Counsel.

[3510-25]

Title 15—Commerce and Foreign Trade

CHAPTER III—INDUSTRY AND TRADE ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 376—SPECIAL COMMODITY POLICIES AND PROVISIONS

Revision of Information Required on License Applications for Numerical Control Systems

AGENCY: Office of Export Administration, Bureau of Trade Regulation, Commerce.

ACTION: Final rule.

SUMMARY: This rule revises § 376.11(b) of the Export Administration regulations which requires certain technical information to be provided with applications to export or reexport numerical control systems to certain destinations. The specifications in that section have become outdated by rapidly advancing technology, and are revised to require more meaningful information in light of the current state of technology.

EFFECTIVE DATE: May 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-4196.

Accordingly, part 376 of the Export Administration regulations (15 CFR Part 376) is revised as follows:

§ 376.11(b) is revised to read as follows:

§ 376.11 Machine tools and/or numerical controls.

• • • • • •

(b) *Control systems*—(1) Name and model number;

(2) Type (hardwired, firmware, software);

(3) Word size;

(4) Size of internal memory;

(5) Number of simultaneously controlled contouring axes and type of interpolation (linear, circular, other);

(6) Number of simultaneously controlled contouring axes and type of interpolation (linear, circular, other) which may be optionally procured;

(7) The minimum programmable increment for each axis;

(8) Interface for direct computer input;

(9) Describe features being provided as part of transaction, (e.g., cutter compensation, program edit, variable pitch threading, etc.);

(10) Describe optional accessories included in transaction;

(11) Describe software being supplied with unit; and

(12) Describe documentation being supplied with unit.

• • • • • •

(Sec. 4, Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

Dated: May 12, 1978.

RAUER H. MEYER,
Acting Deputy Assistant Secretary for Trade Regulation.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 8909]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Xerox Corp.

AGENCY: Federal Trade Commission.

ACTION: Order modifying final order.

SUMMARY: This order modifies an order to cease and desist issued July 29, 1975, by deleting the words "in camera" from paragraph IV C.(9). This modification makes generally available to interested persons patent license agreements submitted to date and such agreements submitted in the future for which Xerox does not show a justification for confidential treatment.

DATES: Final order issued July 29, 1975, order modifying final order issued April 20, 1978. [1]

FOR FURTHER INFORMATION CONTACT:

Alfred F. Dougherty, Jr., Director, Bureau of Competition, Federal Trade Commission, 6th Street at Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3601.

SUPPLEMENTARY INFORMATION: In the matter of Xerox Corp., a corporation. They prohibited trade practices and/or corrective actions, as codified under 16 CFR 13, remain unchanged and appear in the FEDERAL REGISTER of September 11, 1975 (40 FR 42203), 86 F.T.C. 364.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

The order modifying final order is as follows:

ORDER MODIFYING ORDER TO CEASE AND DESIST

On July 29, 1975, the Federal Trade Commission issued a consent order in the above-referenced matter. 86 FTC 364 (1975).

Section 5(b) of the Federal Trade Commission Act provides that the Commission may at any time, after notice and opportunity for hearing, reopen and alter, modify or set aside, in whole or in part, any order issued by it, whenever in the opinion of the Commission conditions of fact or law have so changed as to require such action or if the public interest shall so require.

[1] Copies of the modifying order filed with the original document.

M Y 1 7 7 8 UMI

V 4 3 | 9 6

On January 19, 1978, the Commission issued its order to respondent to show cause why the Commission should not alter or modify the July 29, 1975 Order so as to delete the words "*in camera*" from paragraph IV C.(9) thereof.

On March 6, 1978, respondent filed an answer that did not oppose the proposed modification. Section 3.72(b)(3) of the Commission's rules provides that if an order to show cause is not opposed the Commission may, in its discretion, decide the matter on the basis of that order and the answer thereto.

Accordingly, *it is ordered*, That the matter be reopened, and that paragraph IV C.(9) of the order of July 29, 1975, be modified to read as follows:

If Xerox grants a license under order patents either pursuant to the terms of paragraph II of this order or otherwise, the license agreement shall contain the irrevocable covenant of the licensee to license such of its patents as are licensed to Xerox on reasonable terms and conditions (including the license to itself of its licensees' patents or improvement patents) to any other person who is entitled to a license from Xerox pursuant to paragraph II of this order, *Provided*, That such license need not be effective prior to the effective date of the licensee's license to Xerox. Within 60 days following execution of a license agreement subject to this paragraph IV C.(9), Xerox shall submit to the Commission a copy thereof.

JAMES A. TOBIN,
Acting Secretary.

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER C—FEDERAL HAZARDOUS SUBSTANCES ACT REGULATIONS

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

Technical Requirements for Determining a Sharp Metal or Glass Edge in Toys and Other Acticles Intended for Use by Children Under 8 Years of Age

Correction

In FR Doc. 78-7689, appearing at page 12636 in the issue of Friday, March 24, 1978, make the following changes in § 1500.49:

1. On page 12645, third column, the third line of paragraph (c)(1) should read, "either before or after the test of" and the seventh line of paragraph (c)(3)(ii) should read, "[diam-]eter of Probe B, but less than 9.00 inches".

2. On page 12646, first column, the fifth line of paragraph (c)(3)(iii) should read, "[di-]mension of 9.00 inches (228.6 millimeters)", the third from last line of that paragraph should read, "[dimen-]sion that is 7.36 inches (186.9 millime-[ters]", and the sixteenth line of paragraph (d)(1) should read, "force of 1.35 pounds (6.00 Newtons) such".

3. On page 12646 second column, the last line of paragraph (d)(1) should read, "up to 1.35 pounds (6.00 Newtons).", the fifth line of paragraph (d)(2) should read, "force of 1.35 pounds (6.00 Newtons)", and the thirteenth line of paragraph (d)(2)(iii) should read, "(6.00 Newtons) measured in a direction at".

4. On page 12646, third column, the third and fourth lines of paragraph (e)(1) should read, "[ve-]locity of 1.00±0.08 inch per second (25.4±2.0 millimeters per second) during"; the text of footnote one, with the exception of the first sentence, should appear as regular text following the footnote reference in paragraph (e)(2); and the tenth line of paragraph (e)(3) should read, "The thickness of the polytetrafluor-[oethylene]".

Title 21—Food and Drugs

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

Placement of 1-Phenylcyclohexylamine and 1-Piperidinocyclohexane-Carbonitrile, Immediate Precursors of Phencyclidine, in Schedule II

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: This rule is issued as a result of receipt by the Administrator of DEA of a letter from the Assistant Secretary for Health, Department of Health, Education, and Welfare, which requested DEA to consider the control of analogs and precursors of phencyclidine, and subsequent publication in the FEDERAL REGISTER (43 FR 11588, March 20, 1978) of a Notice of Proposed Rulemaking to place 1-phenylcyclohexylamine and 1-piperidinocyclohexanecarbonitrile, which are immediate precursors of phencyclidine, into Schedule II. No comments or objections were received in response to the Notice. This rule places these two immediate precursors of phencyclidine under Schedule II requirements of the Controlled Substances Act.

EFFECTIVE DATE: The effective date of Schedule II control is June 16, 1978 except as otherwise provided in the Supplementary Information Section of this Order.

FOR FURTHER INFORMATION CONTACT:

Howard McClain, Jr., Chief, Regulatory Control Division, Drug Enforcement Administration, telephone 202-633-1366.

SUPPLEMENTARY INFORMATION: A Notice was published in the FEDERAL REGISTER on March 20, 1978 (43 FR 11588) proposing that 1-phenylcyclophexylamine and 1-piperidinocyclohexanecarbonitrile be placed in Schedule II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801-966) as immediate precursors of phencyclidine, and that Title 21 of the Code of Federal Regulations, § 1308.12 (Schedule II) be amended accordingly. All interested persons were given until April 19, 1978 to submit their comments or objections in writing regarding this proposal.

No comments nor objections were received, nor were there any requests for a hearing, and in view thereof, and based upon the investigations and review of the Drug Enforcement Administration and upon the request of the Assistant Secretary for Health in behalf of the Secretary of Health, Education, and Welfare, the Administrator of the Drug Enforcement Administration finds, pursuant to the authority delegated to him by regulations of the Department of Justice, that:

1. 1-phenylcyclohexylamine and 1-piperidinocyclohexanecarbonitrile are the principle compounds used, or produced primarily for use, in the manufacture of a controlled substance;

2. 1-phenylcyclohexylamine and 1-piperidinocyclohexanecarbonitrile are immediate chemical intermediaries used or likely to be used in the manufacture of a controlled substance; and

3. The control of 1-phenylcyclohexylamine and 1-piperidinocyclohexanecarbonitrile is necessary to prevent, curtail, or limit the manufacture of a controlled substance.

Therefore, under the authority vested in him by the Act and by regulations of the Department of Justice, the Administrator of the Drug Enforcement Administration hereby orders that § 1308.12(e) of Title 21 of the Code of Federal Regulations be amended as follows:

§ 1308.12 Schedule II.

• • • • • •

(e) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Amobarbital	2125
(2) Methaqualone	2565
(3) Pentobarbital	2270
(4) Phencyclidine	7471
(5) Phencyclidine immediate precursors:	
(a) 1-phenylcyclohexylamine	7460
(b) 1-piperidinocyclohexanecarbonitrile(PCC)	8603
(6) Secobarbital	2315

• • • • • •

EFFECTIVE DATES

As to 1-phenylcyclohexylamine and 1-piperidinohexanecarbonitrile:

1. *Registration.* Any person who manufactures, distributes, dispenses, imports or exports such substances or who proposes to engage in such activities, shall submit an application for registration to conduct such activities in accordance with Parts 1301 and 1311 of Title 21 of the Code of Federal Regulations on or before (60 days after publication);

2. *Security.* Such substances must be manufactured, distributed, and stored in accordance with §§ 1301.71, 1301.72 (a), (c), and (d), 1301.73, 1301.74 (a)-(f), 1301.75(b)(c) and 1301.76 of Title 21 of the Code of Federal Regulations on or before (90 days after publication). From now until the effective date of this provision, it is expected that manufacturers and distributors of such substances will initiate whatever preparation as may be necessary in order to provide adequate security in accordance with DEA regulations so that substantial compliance with this provision can be met by (90 days after publication). In the event that this imposes special hardships, the Drug Enforcement Administration will entertain any justified requests for extensions of time.

3. *Labeling and packaging.* All labels on commercial containers of, and all labeling of such substances packaged after (60 days after publication) shall comply with the requirements of §§ 1302.03-1302.05, 1302.07 and 1302.08 of Title 21 of the Code of Federal Regulations. In the event this effective date imposes special hardships on any manufacturer, as defined in section 102(14) of the Controlled Substances Act (21 U.S.C. 802(14)), the Drug Enforcement Administration will entertain any justified requests for an extension of time;

4. *Quotas.* All persons required to obtain quotas with respect to either of such substances shall submit applications pursuant to §§ 1303.12 and 1303.22 of Title 21 of the Code of Federal Regulations on or before August 15, 1978;

5. *Inventory.* Every registrant required to keep records who possesses any quantity of such substances shall take an inventory pursuant to §§ 1304.11-1304.19 of Title 21 of the Code of Federal Regulations, of all stocks of such substances on hand on July 17, 1978;

6. *Records.* All registrants required to keep records pursuant to §§ 1304.21-1304.27 of Title 21 of the Code of Federal Regulations shall do so regarding such substances commencing on the date on which the inventory of such substances is taken;

7. *Order Forms.* The order form requirements of §§ 1305.01-1305.16 of Title 21 of the Code of Federal Regulations shall be in effect on the date which the initial inventory of these Schedule II controlled substances is taken;

8. *Importation and exportation.* All importation and exportation of such substances shall, on or after July 17, 1978, be required to be in compliance with Part 1312 of Title 21 of the Code of Federal Regulations;

9. *Criminal liability.* The Administrator, Drug Enforcement Administration, hereby orders that any activity with respect to 1-phenylcyclo- hexylamine and 1-piperidinocyclohexanecarbonitrile, not authorized by or in violation of the Controlled Substances Act or the Controlled Substances Import and Export Act, conducted after (30 days after publication) shall be unlawful, except that any person who is entitled to registration under such Acts may continue to conduct normal business or professional practice with such substances between the date on which this order is published and the date on which he obtains or is denied registration, provided that application for such registration is submitted on or before June 17, 1978;

10. *Other.* In all other respects, this order is effective June 16, 1978.

Dated: May 11, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

Title 32—National Defense

CHAPTER I—OFFICE OF THE SECRETARY OF DEFENSE, DEPARTMENT OF DEFENSE

SUBCHAPTER M—MISCELLANEOUS

(DoD Directive 3210.2]

PART 273—RESEARCH GRANTS AND TITLE TO EQUIPMENT PURCHASED UNDER GRANTS

AGENCY: Office of the Secretary of Defense.

ACTION: Final rule.

SUMMARY: The Department of Defense has amended its regulation on research grants and title to equipment purchased under grants. This revised rule incorporates the provisions of OMB Circular A-110; outlines criteria and requirements regarding the support of scientific research; delegates authorities; and implements administrative requirements.

EFFECTIVE DATE: April 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. George Gamota, Acting Assistant for Research to the Deputy Under Secretary of Defense for Research and Engineering (Research and Advance Technology), room 3D1067, The Pentagon, Washington, D.C. 20301, Telephone: 202-697-4198.

SUPPLEMENTAL INFORMATION: In FR Doc. 61-11677 appearing in the FEDERAL REGISTER (26 FR 11831) on December 9, 1961, the Office of the Secretary of Defense published as a final rule DoD Directive 3210.2 establishing uniform DoD policy for granting funds to nonprofit institutions to conduct basic research. This Directive was reissued on April 26, 1966 and published in the FEDERAL REGISTER on June 7, 1966 (31 FR 8007) as a revision to part 273. An amendment to this revision was published on July 30, 1970 (35 FR 12205). The following constitutes a further revision to DoD Directive 3210.2 which (a) incorporates and implements the provisions of OMB Circular A-110; (b) limits grants to those that support research projects of excellence authorized by Pub. L. 85-934; (c) considers environmental factors; and (d) prescribes current criteria and policies.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

MAY 12, 1978.

Accordingly, 32 CFR Chapter I is amended by a revision of part 273, reading as follows:

M Y 1 7 7 8
UMI

V 4 3 | 9 6

Sec.
273.1 Reissuance and Purpose
273.2 Applicability
273.3 Definitions
273.4 Policy
273.5 Responsibilities and Authorities

AUTHORITY: Rev. Stat 161, 5 U.S.C. 301; and Pub. L. 85-934.

§ 273.1 Reissuance and purpose.

This Part reissues § 273 to:

(a) Incorporate the provisions of OMB Circular A-110,

(b) Outline criteria and requirements necessary to make grants for the support of scientific research and vest title to equipment purchased or acquired under grants.

(c) Delegate authority to carry out the responsibilities of the Secretary of Defense under Pub. L. 85-934.

(d) Implement the uniform administrative requirements contained in OMB Circular A-110.

§ 273.2 Applicability.

The provisions of this Part apply to the Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, the Defense Agencies, and the Unified and Specified Commands (hereafter referred to as "DoD Components").

§ 273.3 Definitions.

(a) *Grant.* An award of funds or equipment pursuant to a written agreement executed by a sponsoring agency of the Department of Defense under the authority of Pub. L. 85-934. The definition of a grant as stated herein falls within the definition of "other agreements" as set forth in OMB Circular A-110.

(b) *Sponsoring agency.* A DOD Component or official research activity authorized under § 273.5 basic Directive, to make grants in support of research.

(c) *Research.* Scientific study and experimentation directed toward:

(1) Increasing knowledge and understanding in those fields of the physical, engineering, environmental and life sciences related to long-term national security needs.

(2) Providing fundamental knowledge required for the solution of military problems.

(3) Forming a part of the base for (i) subsequent exploratory and advanced developments in defense-related technologies; and (ii) new or improved military functional capabilities in such areas as communications, detection, tracking, surveillance, propulsion, mobility, guidance and control, navigation, energy conversion, materials and structures, and personnel support.

(d) *Grantee organization or recipient.* Any corporation, foundation, trust, or institution (1) operated for purposes of higher education or whose primary purpose is the conduct of scientific research; (2) not organized for profit; and (3) no part of whose net earnings inure to the profit of any private shareholder or individual. Grantee organizations located outside the U.S. and Canada are referred to as "foreign grantee organizations."

§ 273.4 Policy.

(a) *General.* (1) *Use of Grants.* A grant will be limited to the support of those research projects of excellence authorized by Pub. L. 85-934 which are performed by the type of recipients covered under OMB Circular A-110 and which meet relevant research requirements related to the mission of the DOD.

(2) *Prior to awarding a grant.* (i) The grantee organization (defined in § 273.3) must furnish a letter of assurance that it is complying with the provisions of 32 CFR 300.

(ii) Environmental factors involved involved in research programs or projects will be considered, pursuant to the guidelines of 32 CFR 214.

(iii) A determination must be made that the grantee organization is not in violation of the statutory limitations contained in section 606, Pub. L. 92-436[1] or any similar enactment of a later date.

(iv) If the proposed grant to a foreign grantee organization is more than $10,000, the Secretary of the Military Department concerned, or his designee, must determine in advance that the research cannot be performed by a U.S. or Canadian organization, and that it is not feasible to forego performance.

(3) *Special instructions.* (i) *Cost Sharing.* Sponsoring agencies shall encourage grantee organizations to contribute to the cost of performing research, unless the grantee organization has little or no non-Federal sources of funds from which to make a cost contribution. Guidelines applicable to cost contribution by grantee organizations are contained in FMC 73-3 and supplemented by OMB Circular A-110.

(ii) *Vesting of equipment.* Title to equipment purchased or acquired under a grant shall be vested in the grantee organization in accordance with OMB Circular A-110 and Public Law 94-519.

(b) *Grant agreements.* These shall be brief and contain only those provisions which accurately reflect the nature of the grant relationship and which are required by statute or are necessary for the protection of the fundamental interests of the Department of Defense. Provision shall be made for:

(1) The maintenance of records adequate to (i) document the actual amount of any participation and (ii) determine whether or not grant funds have been properly expended.

(2) Appropriate patent, property, and data rights.

(3) The suspension or revocation of grants.

(4) The receipt by the sponsoring agency of technical reports and the results of all research performed by the grantee organization.

(c) *Administration of grants.* (1) Grants shall be administered by the cognizant contract administration office using the ASPR provisions as a guide and in accordance with the provisions of OMB Circular A-110 except for grants to recipients excluded by paragraph 6.b. of the Circular. To the extent practical, the substance of the policies in the Circular will be applied to recipients not covered by it, except that where any statute expressly prescribes policies or specific requirements that differ from the standards in the Circular, the provisions of the statute will govern.

(2) Applicable cost principles of parts 2 or 3 of section XV of ASPR will be used in establishing the grant amount. Costs which are not allowable under those parts may not be included in the grantee organization's cost contribution, if any.

(3) A grantee organization contribution will be subject to audit (see §273.5(d)).

§ 273.5 Responsibilities and authorities.

(a) The Director, Defense Research and Engineering, shall administer the provisions of this Directive.

(b) The Secretary of Defense or Deputy Secretary of Defense shall approve grants in excess of $1 million.

(c) The Director, Defense Research and Engineering, and the Secretaries of the Military Departments shall exercise the authority vested in the Secretary of Defense by sections 1 and 2 of Pub .L. 85-934 for grants of $1 million or less. This authority may be redelegated to the DOD Component or official research activity responsible for supporting research at educational institutions and other nonprofit organizations (as defined in § 273.3) for grants of $500,000 or less.

(d) The sponsoring agency will perform reviews of grant programs and, when necessary, request an audit of grant costs.

[FR Doc. 78-13460 Filed 5-16-78; 8:45 am]

[1] Section 606 requires that no funds be expended at any institution of higher learning whose policies bar military recruiting personnel from their premises, unless the Secretary of Defense, or his designee, specifically determines that a renewal or continuation of previous grants to such institutions is likely to contribute significantly to the Defense effort.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Format of Business Reply Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This rule amends postal regulations to set out a specific, measured format for business reply mail (BRM). Mailers will be permitted to use existing BRM stocks which do not conform to the revised format until May 1, 1979. At the present time there may be as many BRM formats as there are BRM permit holders, despite the fact that postal regulations require adherence to distinctive, alternative formats pictured in the regulations. This regulation change is intended to eliminate deviations from the prescribed BRM format so that BRM mail may be recognized readily (as it was designed to be) by postal employees who must separate it from the mailstream to collect postage and fees. In addition, the new format leaves two clear areas on the address side of BRM pieces for markings which could activate mail processing facing, cancelling and sorting machinery.

EFFECTIVE DATE: June 17, 1978.

FOR FURTHER INFORMATION CONTACT:
Eugene R. McGill, 202-245-4749.

SUPPLEMENTARY INFORMATION: On August 9, 1977, the Postal Service published for comment in the FEDERAL REGISTER proposed changes in Part 131 of the Postal Service Manual as described above (42 FR 40219).

The Postal Service received written comments in response to the proposal from thirty-eight businesses and associations. Virtually all of the commenters agreed in principle with the proposed rule; several commenters, however, raised questions or made suggestions that convinced the Postal Service that a number of changes to the proposed rule were warranted.

Several commenters requested that the proposed July 1, 1978, deadline for permit holders to conform to the new format requirements be extended to May 1, 1979, the date of the deadline set for airmail BRM in the proposed rule, so that the effective date of the new requirements would be the same for both airmail and non-airmail BRM users. The commenters pointed out the need to allow BRM users more time to use up their current inventories, especially since many have a one to two year supply of BRM stock on hand. The commenters pointed out that those BRM users with large amounts of BRM stock on hand would be subject to a substantial financial loss if they were forced to discard their stock after July 1, 1978. We have revised the regulation to make the date for compliance with the new format requirements May 1, 1979, for all BRM users.

We are also revising that part of the proposed rule which deals with Facing Identification Marks (FIM). Presently, unstamped mail, including BRM, must be manually faced before it can be processed. FIM equipment will allow unstamped mail to be mechanically faced and thereby speed the processing of this type of mail. Our proposal reserved space for FIM marks on BRM but did not require that FIM marks be printed in the reserved space because the Postal Service's FIM equipment would not be operational until May 1979, long after the proposed July 1, 1978, effective date. Since the date for compliance with the new format requirements is now May 1, 1979, the Postal Service is including the requirment that FIM marks be printed in the reserved space as a BRM format requirement.

Several commenters questioned how the Postal Service will handle the occasional BRM pieces which are held by customers for several years before being returned to the permit holder. Provided the addressee's business reply permit is in a current status, BRM pieces which conform to former BRM format requirements will be delivered in return for the postage and fees in effect upon the date of delivery. The regulations in § 131.235d prohibit "distribution" of non-conforming BRM after the deadline; they do not prohibit a BRM permit holder from receiving a customer's BRM.

Several commenters objected to proposed § 131.236, which would require postal inspection and approval of sample BRM pieces at least two weeks prior to the initial distribution of a BRM piece. The commenters pointed out that (1) permit holders' production schedules would not permit the time for advance submission of sample BRM, and (2) requiring prior inspection would be viewed as the imposition of a penalty on the majority of BRM users who conform to Postal Service format requirements. The commenters suggested that, instead of requiring prior inspection in order to ensure compliance, the Postal Service impose a surcharge on improperly prepared BRM, or withhold delivery of such pieces, or revoke a holder's permit. We believe that the need exists for a constructive advance review of BRM pieces in order to keep non-complying BRM pieces from entering the mails. However, in order to reduce the burden on BRM users, the Postal Service is adopting in § 131.235c(1) a voluntary, rather than a mandatory, advance inspection program. Under the program, permit holders would be encouraged to submit sample business reply pieces to their local postmaster for approval prior to printing and distribution. We are also adopting the suggestion that the Postal Service revoke the permits of those BRM users who refuse to comply with our regulations. We expect to promulgate appropriate revocation procedures prior to May 1, 1979. In view of this resolution of the matter, there is no need to consider further the other suggested methods to ensure compliance with the BRM format requirements.

In response to comments asking for greater flexibility in the BRM format, the Postal Service has identified and indicated in the final regulation which elements of the format are required and which are optional. The Postal Service believes that this division will give a reasonable degree of flexibility to the BRM user. Another commenter was concerned that electronic BRM mailgrams would not be able to conform to the proposed format requirements and would, therefore, have to be eliminated. The Postal Service believes that its separation of required and optional BRM format elements will give enough flexibility to enable the continued use of electronic BRM mailgrams.

Several commenters asked if it was permissible for the horizontal parallel bars which must appear on the right hand side of the BRM piece to extend below the ZIP Code line. Previously it was necessary that the horizontal bars end at or above the ZIP Code line because placing them below the line caused interference during processing with the optical scanning equipment. However, the Postal Service has now determined that with the advent of more advanced machinery the horizontal bars will not interfere with processing by our equipment including the optical scanner. Therefore, it is permissible for the bars to extend below the ZIP Code line as long as they do not intrude into the ⅝ inch clear space reserved at the bottom of the piece.

The Postal Service also received a request that the proposed 1 inch length requirement for the horizontal parallel bars be changed to allow a ½ inch minimum to a 1 inch maximum length for the bars. The commenter stated that (1) because bars shorter than 1 inch were permitted under earlier format requirements, the greatest number of the printing plates for BRM envelopes now exist with the shorter bars, and (2) changing the bar length on the printing plates would require that new plates be made, at great expense to mailers. The Postal Service considered the request but re-

V 4 3 | 9 6

jected it because the other new format requirements will require such changes that new plates will have to be made regardless of the bar length requirement.

A commenter requested that the Postal Service explain the purpose of the clear space which must be left between the bottom horizontal bar and the bottom edge of the mail piece on business reply letters and cards. It was pointed out that some institutions using preprinted Postal Service bar codes felt that the requirement for a clear space would prevent further use of this sorting mechanism. In response to the comment, the Postal Service amended its proposal by adding a new section 131.235c(2) which provides that the clear space is only to be used for Postal Service bar codes.

Another commenter asked whether return address lines and "strad" marks (optical scanning marks used by some mailers for internal sorting) could appear in the upper left hand corner of the BRM piece. The Postal Service agrees and has specifically included in the final rule return address lines and "strad" marks in the list of items appearing in section 131.235c(5) which may appear in the upper left corner of the piece.

Another commenter argued that the requirement in proposed § 131.234b(3) to place a box around the "Business Reply" legend could be eliminated without detracting greatly from the purpose of the BRM format, which is to catch the eye of mail processing employees. While we continue to believe that enclosing matter within a box tends to make it stand out, we think the format is sufficiently distinctive without this requirement. Accordingly, we have made this an optional provision in § 131.235c(3) of the final rule.

A commenter also suggested that there should be a ½ inch rather than a 1 inch margin on the left hand side of business reply envelopes. We cannot adopt the suggestion. The 1 inch margin is required because our mail processing equipment can only begin to read the envelopes 1 inch from the left.

Another commenter requested clarification of the dimensions for both the permit indicium and the FIM mark spaces. We shifted the location of the permit indicium from the upper right corner on the piece to a straight line immediately below the Business Reply Mail legend. Note the illustration in 131.236. As to the FIM dimensions, we revised the length of the FIM space from the proposed 1 inch to 1¼ inch while keeping the height at ⅝ inch. These dimensions will allow the FIM marks to remain within the clear zone and be free of other printed matter.

A commenter asked whether green diamond first class borders may be used on business reply mail, especially on larger size envelopes. The Postal Service added a provision in 131.235a that green diamond and other printed borders may be used on business reply labels and cartons and envelops larger than 6 inches by 11 inches, but are not authorized on business reply letters and cards.

One commenter asked whether the various endorsements must be printed in all capital letters. the "Business Reply" legend and the other preprinted endorsements described in 131.235b(1) (b) and (c) must be in capital letters. There is no requirement that the other endorsements be in a particular typeface; however, upper case letters should be used for maximum legibility.

Section 131.234b(6) of the proposed rule stated that the upper left hand corner of the BRM piece was available for use by the permit holder and could contain, among other things, a company logo. Proposed section 131.234(b)(7) also provided that company logos, if part of the company name, could appear in the address. The Postal Service received two comments asking whether the lower left hand corner of the piece would also be available for use by the permit holder. One commenter wanted to use the space for a union logo and the other wanted to know if the space was available for copy or artwork. In our opinion, the options provided in the proposed rule give ample flexibility for the placement of logos and copy or artwork. Accordingly, we have carried only those options over into the final regulations in 131.235c(4) and (5).

Another commenter suggested that the Postal Service publish a brochure explaining the new BRM format. The Postal Service expects to mail to BRM permit holders a form letter announcing the format changes, together with a copy of a Postal Bulletin article setting forth the new format requirements on the day that the Postal Bulletin containing the BRM format article is published.

In view of the considerations discussed above, the Postal Service hereby adopts, as amended, the following revisions of the Postal Service Manual:

PART 131—FIRST CLASS

In 131.23 of the Postal Service Manual, redesignate .236 and .237 as .237 and .238 respectively; revise the heading of redesignated .237 and the heading and first sentence of redesignated .238 and add new .235 and .236 reading as follows:

131.23 Business Reply Mail.

• • • • • •

.235 Format.

a. *General:* Any photographic, mechanical or electrical process or combination of such processes, other than handwriting, typewriting or handstamping, may be used to prepare the address side of business reply mail. The background of business reply mail pieces may be any light color that allows the address, postmark and other required endorsements to be readily discerned. Brilliant colors may not be used. Green diamond and other printed borders are not authorized on business reply letters and cards; however, they may be included on business reply labels and cartons and envelops larger than 6 x 11 inches.

b. *Required format elements.*

(1) *Preprinted endorsements.*

(a) The endorsement "No Postage Necessary if Mailed in the United States" must be printed in the upper right corner of the face of the piece. The arrangement of the endorsement may vary, but it may extend no further than 1¾ inches from the right edge of the mail piece.

(b) The appropriate "Business Reply" legend must appear above the address and must be in capital letters at least ⅛ inch in height. Authorized legends are:

Legend	For use on
BUSINESS REPLY MAIL	Letters, cartons, and cards at letter rate.
BUSINESS REPLY CARD	Cards qualifying for post card rate. (The legend "Business Reply Card" must be used to be eligible for the lower card rate. See 131.222 for the maximum dimensions for post cards.)
BUSINESS REPLY LABEL	Labels. (Business Reply envelopes and cards may not be used as labels to return matter to the permit holder. However, the permit holders of a business reply label guarantees payment of first-class postage upon the return of any mailable matter having his business reply label affixed.)

(c) Immediately below the "Business Reply" legend the words "FIRST-CLASS, PERMIT NO. • • •" followed by the permit number, and the name of the issuing post office (city and state) must be shown in capitol letters.

(d) The legend "POSTAGE WILL BE PAID BY ADDRESSEE" must appear above the address.

(e) The complete address, including ZIP Code, must appear in accordance with sections 122.1 and 122.2. A margin of at least one inch is required between the left edge and the address.

(2) *Required markings.*

(a) *Horizontal bars.*—To facilitate rapid recognition of business reply mail, a series of horizontal bars parallel to the length of the mail piece must be printed immediately below the endorsement "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES". The bars must be uniform in length, at least 1 inch long and ⅛ to ⅜ inches thick. The spacing between the bars must be nearly equal to the thickness of the bars. A ⅝ inch space must be left between the bottom horizontal bar and the bottom edge of the mail piece on business reply letters and cards. The series of horizontal bars on business reply labels must be at least 1¼ inches high.

(b) *Facing identification mark (FIM).*—An area measuring ⅝ of an inch in height and 1¼ inches in length, located along the top edge of the piece and to the left of the endorsement "No Postage Necessary if Mailed in the United States", is reserved for the use of Facing Identification Mark (FIM). FIM is a bar code pattern in the top right portion of the address side which functions as an orientation mark for automatic facing and canceling equipment. The Facing Identification Mark area begins 3 inches from the right edge of the piece and extends 1¼ inches to the right (See 131.236).

In all cases, U.S. Postal Services specifications and negatives must be used. The specifications and negatives for Facing Identification Mark can be obtained from local post office customer services representatives.

FIM must be used on all letter size business reply mail and on business reply post cards. (Letter size mail is defined as being from 4¼ inches to 11½ inches long, 3 inches to 6⅛ inches high, and .006 inches to .25 inches thick.)

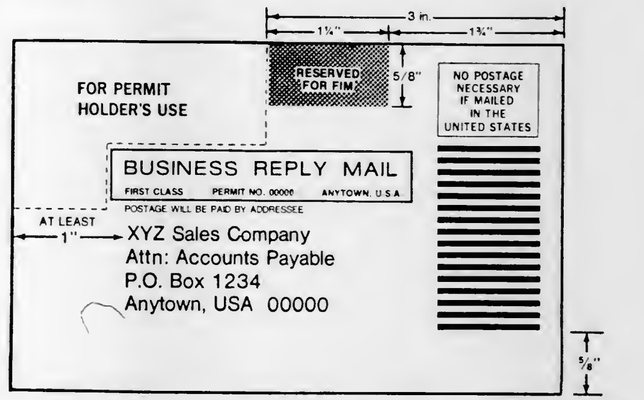
(c) *Optional format elements.*

(1) *Voluntary review:* Normally, postal inspection of sample business reply pieces or artwork is not required prior to distribution by permit holders. However, permit holders are encouraged to submit such materials to their local postmaster for review and approval prior to printing and distribution. Doing so would avoid the possible inconvenience and cost of reprinting if the Postal Service were to determine that business reply format requirements are not being met and that existing unapproved pieces are not mailable. When postal review is desired, two pieces should be submitted to the postmaster either where the permit is held or where the mail will be returned. One piece will be returned after being marked to indicate either postal approval or suggested changes.

(2) *Bar code:* The bottom ⅝ inch of business reply cards and letter size envelopes is reserved for USPS bar codes. The USPS bar code is the only information that may appear in this area.

(3) *BRM legend box:* It is recommended that the "Business Reply" legend and other preprinted endorsements described in 131.235b(1)(b) and (c) be placed in a box for greater visual impact.

(4) *Company logo:* A company logo used as part of the company name may appear in the address provided it is located no lower than the top of the street address line or the post office box line and does not interfere with any of the required business reply endorsements.



(5) *Space for permit holders use:* The upper left corner of the address side is available for use by the permit holder. This area is bordered on the right by the FIM area (see 131.235b(2)(b)) and the legend "BUSINESS REPLY MAIL" and is above the address. It may contain the return address, logos, distributor codes, "strad" marks, etc. (See 131.236).

(6) *Attention lines:* Attention lines or key lines may be included as the first or second line of the distributor's address.

(7) *Window envelopes:* Window envelopes, if used, must comply with Part 141, Postal Service Manual.

(d) *Implementation deadline.*—BRM material distributed after May 1, 1979 must comply with the format requirements contained in this section. Material complying with previous BRM format requirements may continue to be distributed until May 1, 1979. Postmasters may authorize distribution, on a case by case basis, until May 1, 1979, of material already printed which does not comply with the former format requirements, but which is not expected to cause mail processing problems. Distribution after May 1, 1979 of BRM material which does not comply with the format requirements contained in this section will be grounds for revocation of BRM permits.

.236 ILLUSTRATION OF BUSINESS REPLY MAIL

.237 Distribution.

• • • • • • •

.238 Permit holder.

The permit holder guarantees payment on delivery of postage on returned business reply mail. • • •

A Post Office Services (Domestic) transmittal letter making these changes in the pages of the Postal Service Manual will be published and will be transmitted to subscribers automatically. These changes will be published in the FEDERAL REGISTER as provided in 39 CFR 111.3.

(39 U.S.C. 401(2).)

ROGER P. CRAIG,
Deputy General Counsel.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 199a—STATE POSTSECONDARY EDUCATION COMMISSIONS PROGRAM—INTRASTATE PLANNING—FISCAL YEAR 1978

Allocation Formula and Program Guidelines

AGENCY: Office of Education, HEW.

ACTION: Final rules for fiscal year 1978.

SUMMARY: A notice of allocation formula and program guidelines is issued to implement the State Postsecondary Education Commissions Program—Intrastate Planning under Section 1203(a) of the Higher Education Act of 1965, as amended, for fiscal year 1978. This program is operated as a formula grant program, and it is necessary to publish both the formula used to allocate the available funds and the program guidelines each year. The program is designed to provide assistance to State Postsecondary Education Commissions to conduct statewide comprehensive planning activities for postsecondary education.

EFFECTIVE DATE: These regulations are expected to take effect 45 days after they are transmitted to Congress. (Regulations are transmitted to Congress 3-4 days before they are published in the FEDERAL REGISTER.) However, this date is changed by statute if Congress disapproves the regulations or takes certain types of adjournments. If you want to know

M Y 1 7 7 8 UMI

V 4 3 | 9 6

the exact effective date of these regulations, call or write the Office of Education contact person.

FOR FURTHER INFORMATION CONTACT:

Charles I. Griffith, Director, State Planning Commissions Program, Bureau of Higher and Continuing Education, room 4052, Regional Office Building 3, 7th and D Streets SW., Washington, D.C. 20202, telephone 202-245-2671.

SUPPLEMENTARY INFORMATION: Publication as final notice of rulemaking.

The Commissioner finds that proposed rules are unnecessary in this case, within the meaning of 5 U.S.C. 553(b). The allocation formula and program guidelines have not been changed since publication, after a comment period, in fiscal year 1976. The inclusion of the statement concerning the general provisions regulations merely reflects what has been existing program policy since the inception of the program.

The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order No. 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Number 13.550; State Planning Commissions Program—Intrastate Planning)

Dated: March 14, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: May 3, 1978.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

The Office of Education is codifying the allocation formula and guidelines by adding a new Part 199a to the Code of Federal Regulations.

A new Part 199a is added to title 45 of the Code of Federal Regulations, to read as follows:

Sec.
199a.1 Allocation formula.
199a.2 Program guidelines.
199a.3 General Provision Regulations.

AUTHORITY: 20 U.S.C. 1142b(a)

§ 199a.1 Allocation formula.

Such funds as may become available for grant awards during Fiscal Year 1978 for intrastate planning under the State Postsecondary Education Commissions Program will be allocated in the following manner among those State Postsecondary Education Commissions which have filed the required information concerning establishment with the Office of Education and which have applied for funds:

(a) A base amount of $30,000 will be distributed to each State Commission.

(b) The balance of the available funds will be distributed on the basis of the ratio of the population of a postsecondary age, namely 17 and above (as indicated in the latest data available from the U.S. Bureau of the Census), in a given State to the total population of a postsecondary age in all States with such Commissions.

(20 U.S.C. 1142b(a))

§ 199a.2 Program guidelines.

Grants made under these provisions must be used by a State Commission to conduct comprehensive inventories of, and studies with respect to, all public and private postsecondary educational resources in the State, including planning necessary for such resources to be better coordinated, improved, expanded, or altered so that all persons within the State who desire, and who can benefit from, postsecondary education may have an opportunity to do so. Such comprehensive studies and inventories should be developed in coordination with all segments of postsecondary education in the State and should be of such a nature as will assist the State Commission in planning for:

(a) Maximizing the development of human resources within the State through encouragement of student entrance to postsecondary education and the provision to the students of needed guidance, counseling and financial assistance;

(b) Providing comprehensive postsecondary education programs and services;

(c) Achieving efficient operation and orderly growth;

(d) Providing the fullest possible financial support together with efficient use of resources;

(e) Attracting and retaining qualified faculty and professional personnel; and

(f) Providing adequate and appropriate facilities and instructional equipment and securing efficiency in their use.

(20 U.S.C. 1142b(a))

§ 199a.3 General provision regulations.

Assistance provided under this program is subject to applicable provisions contained in Subchapter A of Chapter I of 45 CFR (relating to fiscal, administrative, and other matters).

(20 U.S.C. 1142b(a))

[FR Doc. 78-13454 Filed 5-16-78; 8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21230; FCC 78-301]

PART 31—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS A AND CLASS B TELEPHONE COMPANIES

Accounting and Reporting Changes To Implement Certain Findings in Docket 19129 (Phase II) Rate Case

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This report and order amends the Uniform System of Accounts for Class A and Class B Telephone Companies, to provide therein the rate base and expense treatment of certain items prescribed in the Phase II Final Decision and Order (Decision) in Docket No. 19129, 64 FCC 2d 1 (1977). The Commission in that Decision stated that certain ratemaking principles adopted by the Commission would be reflected as general rules of applicability in the uniform system of accounts.

EFFECTIVE DATE: January 1, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Virginia Brockington, Accounting Branch, Common Carrier Bureau, 202-632-3863.

In the matter of amendment of Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies; Report and order (Proceeding Terminated) (42 FR 24291).

Adopted: May 4, 1978.

Released: May 11, 1978.

By the Commission: Commissioner Fogarty absent.

1. On April 28, 1977, the Commission adopted a Notice of Proposed Rule Making in the above entitled matter. The Notice was published in the FEDERAL REGISTER on May 13, 1977 (42 FR 24291).

2. The Notice proposed amendments to the uniform system of accounts for telephone companies to codify the accounting conclusions reached regarding the American Telephone & Telegraph Co. (AT&T) in the Phase II Final Decision and Order (Decision) in Docket No. 19129, 64 FCC 2d 1, (1977).[1] The amendments were to subdivide the telephone plant under construction account into (1) the cost of plant under construction for one year or less with no provision to accrue interest during construction (subdivision (1)) and (2) the cost of plant under construction for over one year with provision to accrue interest during construction at the prime rate (subdivision (2)). Further, we proposed to institute a two-year limitation on the period during which property may be held in Account 100.3, "Property held for future telephone use," with provision to transfer such property from that account to Account 103, "Miscellaneous physical property," after the two-year period. The Commission also proposed to require telephone companies to maintain their operating expense accounts so that all payments to academic institutions and individuals for academic services could be identified by recipient and service performed and readily available to report to the Commission.

3. Comments were received from Arthur Andersen & Co. (Arthur Andersen), United System Service, Inc. (United) on behalf of member companies of the United Telephone System, Florida Public Service Commission (Florida), RCA American Communications, Inc. (RCA Americom), GTE Service Corp. and its affiliated domestic telephone operating companies (GTE), AT&T, State of Wisconsin Public Service Commission (Wisconsin), Defense Communications Agency and General Services Administration (Federal Executive Agencies), Rural Electrification Agency (REA), Communications Satellite Corp. (Comsat), the United States Independent Telephone Association (USITA) and the late Senator Lee Metcalf.[2] Reply comments were received from Comsat General Corp. (Comsat General), GTE and the Federal Executive Agencies.

4. Most of the comments opposed the adoption of the amendments as proposed, either in whole or in part, and either offered alternatives or proposed that no amendments to the present accounting rules be made. In many instances, these comments seek reconsideration of the Docket 19129 Decision findings and, to that extent, were thus, not relevant to this proceeding.[3] However, we will address these comments to the extent necessary to show that by incorporating into our accounting rules the rate base changes arrived at in our Decision we will not hinder the rate making procedures of the several state commissions.

5. Several other items not germane to reaching a decision in this proceeding were raised in the comments. Therefore, they will not be specifically addressed. These items included applicability of Part 31 to domestic satellite carriers;[4] increasing the dollar amount of revenues used for classifying companies as Class A or Class B companies; establishing new accounts and changing interest during construction terminology to record interest during construction separately for amounts related to debt and equity; and interperiod income tax allocation of timing differences resulting from different book and tax treatment of interest during construction. If the parties which raised these items wish to pursue them other than by petitioning for an appropriate rulemaking(s), we believe our upcoming proceeding which is to deal with broad changes to the Uniform System of Accounts would be the appropriate proceeding in which to do so.

6. Comsat and Comsat General voiced their opposition through comments and reply comments to the plant under construction and interest during construction portions of our decision in Docket No. 19129.[5] The Commission has permitted Comsat to follow the accounting prescribed in Part 31 of our Rules. However, the Commission in Docket No. 16070 prescribed the ratemaking treatment to be followed by Comsat for certain items addressed in Docket No. 19129. See Decision, 56 FCC 2d, 1101 (1976), *remanded in part sub. nom. Communications Satellite Corp.* v. *FCC*, Case No. 75-2193, D.C. Cir., October 14, 1977. Comsat General's concerns are addressed in paragraph 5 of this Order.

7. In our Notice we proposed amendment of Account 100.2, "Telephone plant under construction," by subdividing the account into construction projects designed to be completed in one year or less (subdivision (1)) and construction projects designed to be completed in over one year (subdivision (2)). Further, we specified in our Decision the circumstances under which property includible in subdivision (1) would be allowed in the rate base and the circumstances under which property included in subdivision (2) would accrue interest during construction.

8. The Federal Executive Agencies support the proposal that Account 100.2 be differentiated between short and long-term construction projects. Florida also concurs in the one year cutoff point for projects on which no interest during construction would be accrued. GTE, however, opposes the adoption of the proposed rulemaking and offers new criteria for charges to Accounts 100.1 and 100.2. It suggests that the Commission amend the Note to Section 31.100:2 of Part 31 to provide for all projects designed to be completed in less than one year from the date of the first major expenditure on the project to be charged directly to Account 100.1, "Telephone plant in service." The Note presently permits charging directly to the plant accounts the cost of any construction project which is estimated to be completed ready for service within two months or for which the gross additions to plant are estimated to amount to less than $10,000. The Commission believes that Account 100.2 should continue to be the clearing account for the bulk of construction projects so as to isolate construction from other plant. Consequently, the Commission is not changing the present two-month period. However, we are in agreement with the suggestion of AT&T, GTE, and Florida that an increase in the $10,000 level for charging construction costs directly to plant in service should be made to reflect the substantial inflation and other cost increases experienced since the $10,000 level was adopted in 1957. Therefore, we are increasing this amount to $25,000, a level supported in the comments of AT&T and GTE showing increases experienced since 1956 in the Consumer Price Index, GNP Implicit Price Deflator, Wholesale Price Index for machinery and equipment, and the Bell System Telephone Plant Index.[6]

9. GTE also questions whether subaccounts are being proposed within the plant under construction account to capture the subdivision (1) and subdivision (2) property. It recommends that the information called for in this section be maintained through a work order numbering scheme. Such amounts would be noted on reports to the Commission and available for the Commission's review and audit. The

[1] See also Reconsideration, FCC-78-103, released Feb. 24, 1978.

[2] Although comments from USITA were dated June 15, 1977, and comments from the late Senator Lee Metcalf were dated October 11, 1977, they are being considered. Comments contained in letters filed by Missouri Public Service Commission, State of New York Public Service Commission and Central Telephone & Utilities Corp. have been addressed in our response to comments filed in accordance with § 1.419(b) of Part 1 of our Rules and Regulations, 47 CFR § 1.419(b).

[3] Petition for reconsideration of our Phase II decision should have been filed on or before March 31, 1977, under the Docket 19129 caption; thus to the extent that any party raises in this proceeding matters bearing on reconsideration of our Docket 19129 ruling, this proceeding is the inappropriate procedure vehicle.

[4] The Commission's January 7, 1975, letter ordered new carriers in both the specialized and domestic satellite communications fields to follow on an interim basis, effective January 1, 1975, the basic accounting regulations (Part 31) that apply to telephone companies.

[5] See 64 FCC 2d, at para. 153.

[6] In view of comments received and our own analysis, we feel that while not explicitly noticed in this proceeding, this change can be made without further Notice of Proposed Rulemaking.

V 4 3 | 9 6

Commission's primary concern is to separate large, costly, longer-term projects from the smaller, less costly, shorter-term projects. It was not the Commission's intent in the Decision to establish new subaccounts nor were any proposed in our Notice in this proceeding. However, if any carriers wish to establish subaccounts to maintain the required segregation they may do so and inform the Commission thereof, as provided for in § 31.01-2(d) of Part 31. Otherwise, the use of a work order numbering scheme or similar record keeping practice may be employed.

10. AT&T, United and GTE raised questions on the clarity of proposed § 31.100:2. AT&T notes that provision has been made for inclusion of interest during construction on property included in subdivision (2), but the proposal does not specifically prohibit interest during construction on subdivision (1) property as intended by paragraph 150 of the Decision. The Commission agrees and has revised § 31.100:2(c) to include a specific instruction prohibiting interest during construction on subdivision (1) property.

11. United and USITA note that the proposal does not mention what treatment is to be afforded plant designated to be completed in a period greater than one year, but actually completed in less than one year. The Commission intended that no retroactive exclusion of interest during construction should be made in those circumstances and is clarifying § 31.100:2 accordingly. GTE questions when interest during construction commences after the transfer from subdivision (1) to subdivision (2), indicating that the Commission implies that suspended projects would automatically become subdivision (2) property and the suspension period would be waived. The Commission stated in proposed § 31.100:2(c) that if a project is suspended for six months or more, the cost of plant in subdivision (1) should be transferred to subdivision (2). However, § 31.2-22 (b) (10) indicates that no interest during construction should be charged for a longer period than 6 months from the date of suspension unless specifically authorized by the Commission. The Commission sees no particular conflict between the two sections since its intention was to allow no interest during construction on projects suspended 6 months or more. They will merely be recorded in subdivision (2) until reactivated. GTE's suggestion of inclusion in subdivision (1) of the duration of the suspension is rejected.

12. GTE further questions how to consider the suspension period when determining the life of a construction project. The life of a project should become a factor only with regard to projects originally included, or still included (less than 6 month suspension) in subdivision (1). In those cases the suspension period should be considered a part of the life.

13. Questions were also raised regarding the use of the prime rate in computing interest during construction. In our Docket 19129 Decision, we stated that the Bell System is presently charged the prime rate by financial institutions for its short-term debt and promissory notes.[7] Further, AT&T short-term funding presently constitutes a very minor portion of its total capital obligations but a significant portion of its construction budget. Accordingly, the Commission indicated in that Decision its confidence that AT&T could, if it so desired, fund an even greater share of its construction program with short-term debt (at prime rate) with no adverse consequences to its overall financial stability or cost of capital. On the other hand, United, GTE and USITA indicate in their comments that all of the construction funds of independent telephone companies are not provided entirely by short-term financing. United states that approximately 75 percent to 80 percent of the construction requirements of the United Telephone System companies are internally generated from retained earnings, depreciation etc., with short-term borrowings amounting to only about 25 percent. GTE states that construction is financed by its system telephone companies by funds obtained at rates other than the prime interest rate. USITA states that although the rate of interest at which an independent telephone company can obtain bank loans may provide a clue to its overall cost of capital, it is only one element of that cost. Wisconsin; Florida and others express concerns similar to USITA. Their contentions are that all companies may not be able to borrow at the prime rate and the use of the prime rate may result in using a rate for interest during construction which differs significantly from the actual cost of funds used for construction. The Commission believes that in light of these comments revising the accounting rules to require the use of the prime rate as the rate for capitalizing interest during construction for all carriers subject to Part 31 may not be appropriate at this time. Accordingly, we are not amending § 31.2-22 of Part 31 in this regard. However, it should be noted that our decision with regard to the use of the prime rate in this proceeding does not alter our interstate ratemaking decision in Docket 19129. Further, in order for the Commission to be apprised of the rates used by subject carriers in capitalizing interest during construction, we shall require the carriers to report in their Annual Report Form M as Note 3 to Schedule 11, Income and Retained Earnings Statement, the rate(s) used during the year under report and the basis upon which the rate(s) was determined.

14. United and Arthur Andersen are concerned with the impact that the amendment to exclude interest during construction on short-term projects would have on a company's earnings during the period between implementation of our accounting rules and appropriate rate requests before state commissions. They request the Commission to allow a phase-in period or postpone the effective date until the effect of such rules could be considered in local rate proceedings. The Commission in Docket No. 19129 expressed its concern with the effect its decision would have on the regulatory systems of the several states.[8] Accordingly, we have made the effective date for amending § 31.100:2 of Part 31 January 1, 1979, which should allow time for carriers to address this issue with their local Commissions. It should also be pointed out that we are not in any way attempting to influence the intrastate ratemaking decisions the several state commissions may make in this area.

Of course, they are free to adopt the same ratemaking treatment for plant under construction and interest during construction as we adopted in Docket 19129, or they may prefer to follow a different treatment. We are familiar with at least one state, that by statute, must follow a different treatment. We do not believe, nor is it intended, that the accounting changes adopted in this proceeding impinge upon the ratemaking prerogatives of any state commission. Further, as everyone is aware, different treatment is already given to a number of items for intrastate vs. interstate ratemaking as well as among the several state commissions for intrastate ratemaking. As noted in paragraph 8, Florida is in favor of our accounting change for plant under construction. Wisconsin did not comment on it. Further, the revisions to the uniform system of accounts adopted in this proceeding will not make the information needed by the states in their proceedings unavailable. In fact, these revisions will provide the plant under construction and, as discussed in paragraph 15, the property held for future use items in a more detailed manner.

15. We proposed to amend Account 100.3, "Property held for future telephone use," to require property remaining therein to be useful (and cleared to 100.1) within two years. All other property was to be placed in Account 103, "Miscellaneous physical property," until placed in service. Provision was also proposed, however, to permit a carrier to request additional time for retaining the property in Account 100.3. The Federal Executive Agencies support the proposed revision to Account 100.3, but believe that the rules should specify the information the carrier should submit in support of any waiver request. In the Decision, the Commission did state that a request for a waiver for specific property items shall show that such a waiver is in the public interest and the specific additional time required for the property to be held in Account 100.3.[9] Accordingly, § 31.100:3 of Part 31 will be modified to include the information a carrier must submit in support of its request.

16. AT&T has questioned whether property having a definite plan for use in excess of two years should be recorded in Account 100.3 the first two years and then be transferred to Account 103, or recorded in Account 103 until two years before use and then be transferred to Account 100.3. Actually, the Commission did not intend either option. As set forth in the Decision, for interstate ratemaking purposes property included in Account 100.3, prior to 1977, which has been recorded therein in excess of two years, should be transferred to Account 103; property in Account 100.3 which has not been recorded in this account for over two years, but having no more than a total of two years until planned use, shall remain in Account 100.3. For all property recorded in Account 100.3 in 1977 and thereafter, its planned use must be within two years to remain recorded therein. Any property which will not be used within two years should be placed in Account 103 and remain therein until used. Any item recorded in Account 100.3 for which circumstances change so that its planned use is in excess of two years should be transferred to Account 103.

17. Florida believes that the proposed amendment to Account 100.3 is an unduly restrictive definition of the account and recommends that no change be made to that account. GTE strongly suggests that if a time limitation is imposed by the Commission, a minimum of 10 years is realistic. As discussed in paragraph 14, adoption of the proposed amendment to § 31.100:3 of Part 31 should not impinge on the ratemaking prerogatives for this item by the state commissions. Consequently, the Commission is not persuaded that it should not make the two-year time limitation a general rule of applicability for accounting purposes, and shall do so for the reasons cited in the Docket 19129 Decision.[10]

18. We proposed to amend § 31.6-60 of Part 31 of our rules by adding a note requiring carriers to maintain their records so that all academic payments identifiable by recipient and by service performed shall be readily available to be reported to this Commission.

19. The Federal Executive Agencies strongly support a policy of full and complete disclosure to the public of all such payments by regulated communications common carriers. Florida concurs in this proposal but suggests that these payments be reported only when they exceed $1,000. Other carriers responding indicate that the language proposed is too broad and could be interpreted to include other payments which they feel do not come within the scope of the Commission's intended meaning. In Docket No. 19129, the Decision gave reference to the definition of "academia payments" used in the proceeding and cited examples of such payments.[11] Two examples cited were a fee for a financial consultant and a seminar for the education of employees. Further, the Commission stated in the Decision that once these payments are identified, it can review the reasonableness of such expenditures. Accordingly, those carriers who are concerned with what falls within the purview of academia payments should refer to the Decision or to other evidence presented in Docket No. 19129. The language is revised, however, to make the intent of the Commission clearer.

20. Question was raised by the late U.S. Senator Lee Metcalf as Chairman, Subcommittee on Reports, Accounting, and Management as to the fact that present reports to the Commission do not clearly identify recipients of academia payments and that the language in Docket No. 19129 is not expressed as to their identification. The Commission indicated in Docket No. 19129 that the problem of academia payments is one of identification and further indicated that it shall require isolation and reporting, within each existing account, of the amounts paid for academia expenses. In order that such recipients are clearly identified, the Commission believes that the names as well as addresses and college affiliation, where appropriate, of such recipients should be maintained in the records of the carriers for reports to the Commission. It is further believed that such information is presently at the disposal of all subject carriers and will create no additional burden.

21. Accordingly, *it is ordered*, That, under authority contained in sections 4(i), 4(j) and 220 of the Communication Act of 1934, 47 U.S.C. §§ 154(i), 154(j) and 220, as amended, Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, of the Commission Rules, is amended as set forth below effective January 1, 1979.

22. *It is further ordered*, That this proceeding is hereby terminated.

(Secs. 4, 220, 48 Stat., as amended, 1066, 1078; 47 U.S.C. 154, 220.)

FEDERAL COMMUNICATIONS COMMISSION.
WILLIAM J. TRICARICO,
Secretary.

Attachment: Appendix.

Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, is amended to read as follows:

1. In § 31.100:2, paragraph (a) and the Note are amended, paragraph (b) as amended is redesignated paragraph (e), and new paragraphs (b), (c) and (d) are added to read as follows:

§ 31.100:2 Telephone plant under construction.

(a) This account shall include the original cost of construction of telephone plant, other than station apparatus and station connections, that is not completed ready for service. It shall include interest during construction, as provided for in paragraph (d) of this section, taxes during construction, and all other elements of cost of such construction work. (Note also §§ 31.2-20 to 31.2-22 and account 231.)

(b) This account shall be subdivided so as to show separately the cost of construction projects (1) designed to be completed in one year or less and (2) designed to be completed in over one year.

(c) When plant includible in subdivision (1) is not ready for service at the end of one year, the cost of construction of the plant shall be transferred to subdivision (2) of this account without further direction or approval by this Commission. If a construction project has been suspended for six months or more, the cost of the plant includible in subdivision (1) shall be transferred to subdivision (2) of this account without further direction or approval by this Commission. No interest during construction shall be accrued on plant included in subdivision (1) of this account. No amount of interest during construction shall be accrued retroactively in this account for any telephone plant which was once included in subdivision (1) of this account.

(d) When the cost of telephone plant has been included in subdivision (2) of this account, interest during construction shall be accrued, as provided for in § 31.2-22(b)(10).

(e) When any telephone plant, the cost of which has been included in this account, is completed ready for service, the cost thereof, shall be credited to this account and charged to the ap-

V 4 3 9 6

propriate telephone plant or other accounts. No reversal of interest during construction on property estimated to be completed in over one year but completed earlier is necessary.

NOTE.—There may be charged directly to the appropriate plant accounts the cost of any construction project which is estimated to be completed and ready for service within two months. There may also be charged directly to the plant accounts the cost of any construction project for which the gross additions to plant are estimated to amount to less than $25,000.

In § 31.100:3 paragraph (a) is revised to read as follows:

§ 31.100:3 Property held for future telephone use.

(a) This account shall include the original cost of property other than station apparatus, owned and held for no longer than two years under a definite plan for use in telephone service. If at the end of two years, the property is not in service, the original cost of the property shall be transferred to account 103, "Miscellaneous physical property." Should a carrier desire to retain the property in this account for a period longer than two years, it shall request direction or approval of this Commission according to the circumstances surrounding that property. The request should include the property item in question, demonstrate that the waiver is in the public interest, and indicate the precise additional time required for the property to be held in account 100.3.

* * * * *

3. § 31.6-60 is amended by adding a note to read as follows:

§ 31.6-60 Purpose of operating expense accounts.

* * * * *

NOTE.—The company's records shall be maintained so that payments to institutions or individuals for academic programs including company-run seminars, identifiable by recipient indicating address and college affiliation, where appropriate, and by service performed shall be readily available for reports to this Commission.

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Emergency Order No. 7; Notice No. 3]

REMOVAL OF HIGH CARBON CAST STEEL WHEELS FROM SERVICE; INTERIM RESTRICTIONS ON THEIR USE

Amendment of Emergency Order

AGENCY: Federal Railroad Administration, DOT.

ACTION: Emergency order.

SUMMARY: FRA is amending paragraphs 4 and 9 of Emergency Order No. 7 published March 27, 1978 (43 FR 12691) to exclude freight cars equipped with 28-inch wheels from the prescribed inspection and stenciling requirements and to require that monthly reports be filed by the last day rather than the 10th day of the following month. These amendments are based upon experience in administration of Emergency Order No. 7; their purpose is to clarify the order and lessen the reporting burden.

EFFECTIVE DATE: This amendment to Emergency Order No. 7 becomes effective on May 17, 1978.

ADDRESSES: (1) Submission of written comments: All correspondence concerning this amendment should identify the Emergency Order Number and Notice Number and be submitted in triplicate to the Docket Clerk (RCC-1), Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street SW., Washington, D.C. 20590.

(2) Examination of written comments: All correspondence concerning this emergency order will be available for examination during regular business hours in Room 5101 Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Principal Program Person: Rolf Mowatt-Larssen, Office of Safety, Federal Railroad Administration, Washington, D.C. 20590, 202-426-0924. *Principal Attorney:* Edward F. Conway, Jr., Office of Chief Counsel, Federal Railroad Administration, Washington, D.C. 20590, 202-426-8836.

SUPPLEMENTARY INFORMATION:

BACKGROUND INFORMATION

On March 27, 1978, FRA published Emergency Order No. 7 (43 FR 12691) under section 203 of the Federal Railroad Safety Act of 1970 (45 USC 432). This emergency order restricts the use of freight cars with 70-ton 1 percent carbon cast steel wheels (commonly referred to as "70T U-1 wheels"), prescribes a mandatory program for locating these wheels and removing them from cars, and requires these wheels to be found and removed from service before January 1, 1979.

On April 25, 1978, FRA published an amendment of Emergency Order No. 7 (43 FR 17472) to allow more flexibility in the timing and method of destroying "70T U-1 wheels" after they have been removed from cars.

The Association of American Railroads (AAR) has petitioned the FRA to amend paragraphs 4, 8 and 9 of Emergency Order No. 7.

Paragraph 4 of Emergency Order No. 7 now requires that each 70 ton or less capacity car that is on a shop or repair track and that has not been inspected and stenciled to indicate the presence or absence of "70T U-1 wheels" must be inspected and appropriately stenciled before the car is removed from that shop or repair track. In its petition, AAR requests that paragraph 4 be amended to: (1) limit these requirements to cars with 33-inch wheels and a nominal capacity of 55-tons, and (2) exclude cars of Canadian ownership from these requirements.

In support of the first modification, AAR states that the railroad industry will continue to inspect 50-ton cars when they are on repair tracks and will remove all "70T U-1 wheels" found, although AAR does not expect many of these wheels will be found under 50-ton cars. AAR also contends that the safety record of 1 percent carbon wheels under 50-ton cars does not justify the cost of applying a stencil to about 550,000 of these cars and that the railroad industry has other and more urgent needs for this money.

FRA does not agree that the requirement that 50-ton cars be stenciled is unjustified. This requirement was devised to forestall the necessity for *repeated* inspections of the same car each time it is on a shop or repair track and again each time it is loaded with a placarded hazardous material. Moreover, the prescribed stenciling of cars provides the information needed by railroad personnel to assure that cars with "70T U-1 wheels" are not inadvertently placed in trains containing placarded hazardous materials.

In view of the overall high failure rate of "70T U-1 wheels" and the fact that these wheels can readily be substituted for 50-ton wheels that are in short supply because they are no longer in production, FRA believes that it is imperative from the standpoint of safety that all cars of less than 70-ton capacity be inspected, stenciled and otherwise handled as prescribed in Emergency Order No. 7. Accordingly, FRA is denying the AAR request that the inspection and stenciling requirements of paragraph 4 of the order be limited to cars with 33-inch wheels and a nominal capacity of 55 tons. However, FRA is amending the order to exclude cars with 28-inch wheels from these requirements because these wheels can be easily distinguished from 33-inch wheels (such as "70T U-1 wheels"). Moreover 28-inch wheels are generally confined to autorack and other specialized cars that are not part of the general purpose car fleet.

In support of its second requested modification to exclude cars of Canadian ownership from Emergency Order No. 7, AAR states that railroads in Canada did not not purchase any "70T U-1 wheels"; however, AAR admits that some of these wheels may have been applied to Canadian cars during routine maintenance performed in the United States. AAR states that Canadian cars average four trips per year to a repair track and that any "70T U-1 wheels" found will be removed at that time in accordance with the AAR interchange rules. It argues that Canadian railroads should not be required to spend more than a million dollars to stencil the majority of the cars in the Canadian fleet of almost 200,000 cars.

At the outset, FRA wishes to emphasize that Emergency Order No. 7 applies to Canadian cars only while they are in the United States; Canadian cars of 70-ton or less capacity operated exclusively outside the United States *are not* subject to this order. FRA welcomes and appreciates the cooperation of Canadian railroads in agreeing to stencil U.S.-railroad-owned cars in accordance with Emergency Order No. 7.

Nevertheless FRA is constrained in the interest of safety to require that Canadian cars comply with Emergency Order No. 7 while they are in the United States. Many U.S. railroads did not purchase any "70T U-1 wheels" yet their cars must be inspected to determine whether they have any of these wheels. FRA estimates that as many as 45,900 "70T U-1 wheels" were installed as maintenance replacements on interchange cars. Since Canadian cars are freely interchanged with U.S. railroads and operate throughout the United States, many Canadian cars may have had "70T U-1 wheels" installed as maintenance replacements by U.S. railroads. Any Canadian car with these wheels is just as much a safety hazard as a U.S.-railroad-owned car. Finally, the reasons for requiring U.S. cars to be stenciled apply equally to Canadian cars operated in the United States.

AAR also requests that the provision in paragraph 8 of Emergency Order No. 7 that required "70T U-1 wheels" to be destroyed by burning a hole through the plate of each wheel be changed to require instead that they be stenciled. FRA has already amended this requirement to provide that when these wheels are removed from a car they must be stenciled "Scrap FRA EO 7"; and when the wheel is demounted from the axle, the wheel must be made permanently unusable by cutting a hole through the plate, notching the hub or some other destructive and disfiguring measure (Emergency Order No. 7, Notice No. 2 published in the April 25, 1978 issue of the FEDERAL REGISTER, 43 FR 17472).

Finally, AAR requests that paragraph 9 of Emergency Order No. 7 be amended to provide that monthly reports be filed by the last day of the following month instead of by the 10th day of the following month. This would allow railroads to utilize their car repair billing system to prepare these reports rather than establish an unnecessary and costly accounting procedure that AAR contends cannot be justified in the name of safety. FRA agrees and is amending paragraph 9 accordingly.

Therefore, pursuant to the authority of section 203 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 432), delegated to the Federal Railroad Administrator by the Secretary of Transportation (49 CFR § 1.49(n)), it is hereby ordered that Emergency Order No. 7 (43 FR 12691 and 43 FR 17472) be revised to read as follows:

1. After March 31, 1978, a 70-ton or less capacity freight car containing any hazardous material required to be placarded by the Department of Transportation Hazardous Materials Regulations ("placarded hazardous material") may not be accepted for transportation unless the car has been inspected to ascertain whether it is equipped with any Southern Wheel Co. (ABEX) 33", 70-ton, one-wear 1 percent carbon cast steel wheels manufactured during the years 1958-1969 ("70T U-1 wheels"). In the event it is ascertained that the car is equipped with any "70T U-1 wheel," and the hazardous material is not off-loaded at the point of origin, the car may be moved only to the nearest point where the "70T U-1 wheels" can be removed.

2. After June 30, 1978, no car listed under the provisions of paragraph 6 of this order as having been originally equipped with "70T U-1 wheels" may be hauled in any train unless it has been inspected and marked as prescribed in paragraph 7 of this order.

3. No car stenciled as prescribed in paragraph 7b of this order to indicate that it is equipped with "70T U-1 wheels" may be hauled in a train containing any placarded hazardous material.

4. After March 31, 1978, each 70-ton or less capacity car that is not equipped with 28-inch wheels and is on a shop or repair track but has not been stenciled to indicate whether it is or is not equipped with any "70T U-1 wheels", shall be inspected and stenciled as prescribed in paragraph 7 of this order before the car is removed from that shop or repair track.

5. After December 31, 1978, a car with one or more "70T U-1 wheels" may not be hauled in any train.

6. By April 1, 1978, each railroad that purchsed any "70T U-1 wheels" shall compile a list of the cars on which these wheels were installed as original equipment and distribute that list to its mechanical forces, all other railroads, and the Associate Administrator for Safety, Federal Railroad Administration, Washington, D.C. 20590.

7. Each railroad that finds on its line a car listed pursuant to paragraph 6 of this order as being originally equipped with "70T U-1 wheels" shall inspect that car to determine whether it still has any of these wheels. This inspection shall be made at the nearest car inspection facility or, if proper protection is provided to the personnel making the inspection, at the point the car is found.

a. If the car inspected does not have any "70T U-1 wheels" or they are replaced with other wheels the car shall be stenciled with a "yellow dot" before the car is moved from the point of inspection. The "yellow dot" shall be at least 6 inches in diameter and centered in a black square that is at least 12 inches square and is located immediately to the right of the consolidated stencil on each side of the car.

b. If the car inspected has any "70T U-1 wheels" and they are not all replaced with other wheels, the car shall be stenciled with a "white dot" before the car is moved from the point of inspection. The "white dot" shall be at least 6 inches in diameter and centered in a black square that is at least 12 inches square and is located immediately to the right of the consolidated stencil on each side of the car.

8. Each railroad shall immediately destroy its supply of "70T U-1 wheels" in addition to those it removes from cars. This shall be accomplished in the following manner: (a) the back plate of each wheel that is not immediately demounted from the axle shall be stenciled in white letters at least two inches high ("Scrap FRA EO 7"); and (b) immediately after each wheel is demounted from the axle, the wheel shall also be made permanently unusable by cutting a hole through the plate, notching the hub or by some other destructive and disfiguring measure.

9. Each railroad shall report in writing to the FRA by the last day of each calendar month through the month of January 1979, the following information:

a. The total number of cars inspected during the preceding month under this emergency order.

b. The total number of cars on which "70T U-1 wheels" were found and the number of wheels removed and destroyed.

c. The total number of cars on which "70T U-1 wheels" were found but were not removed and the number of wheels not removed.

The report shall be a addressed to the Associate Administrator for Safety, Federal Railroad Administration, Washington, D.C. 20590.

A civil penalty of $240 to $2,500 will be assessed for any violation of this order (45 U.S.C. 438).

Opportunity for formal review of this emergency order will be provided in accordance with section 203 of the Federal Railroad Safety Act of 1970 by written petition.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Revised Service Order No. 1305]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Revised Service Order No. 1305.

SUMMARY: There is a severe shortage of boxcars on the Union Pacific Railroad Co. That line owns a group of mechanical refrigerator cars which have inoperative refrigeration devices. In all other respects these cars are serviceable. Because of their limited cubical capacity many shipments that could be transported in these cars cannot be loaded with the minimum quantities specified by the applicable tariffs. Revised Service Order No. 1305 authorizes the Union Pacific to substitute two of these refrigerator cars for each boxcar ordered. The minimum weight to be applied to each set of two such cars is the minimum weight applicable to the boxcar ordered. The consent of the shippers is required.

DATES: Effective 12:01 a.m., May 12, 1978; Expires 11:59 p.m., October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: This Order is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C. on the 10th day of May, 1978.

There is an acute shortage of plain boxcars for loading shipments of various commodities on the lines of the Union Pacific Railroad Co. (UP). The UP has a surplus of mechanical refrigerator cars with inoperative refrigerating devices which are suitable for transporting these products if the use of two such cars for each boxcar ordered is permitted.

The economic loss suffered by shippers dependent on the UP for their car supplies can be alleviated by the substitution of sufficient smaller cars for the larger cars ordered to transport the shipments offered.

In the opinion of the Commission, present regulations and practices with respect to the use and supply of boxcars are ineffective to overcome these shortages of boxcars and an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1305 Distribution of freight cars.

(a) Subject to the concurrence of the shipper the Union Pacific Railroad Co. (UP) may substitute two mechanical refrigerator cars bearing reporting marks UPRX for each boxcar ordered.

(b) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(c) *Rates and minimum weights applicable.* The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by section (a) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(d) *Billing to be endorsed.* The carrier substituting smaller cars for larger cars as authorized by section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Boxcar Ordered, UPRX ( ) and UPRX ( ) furnished authority ICC Revised Service Order No. 1305.

(e) *Concurrence of shipper required.* Smaller cars shall not be furnished in lieu of cars of greater capacity without the consent of the shipper.

(f) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing and must clearly state the points at which such exceptions are requested and the reason therefor.

(g) *Rules and regulations suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order

(h) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(i) *Effective date.* This order shall become effective at 12:01 a.m., May 12, 1978.

(j) *Expiration date.* This order shall expire at 11:59 p.m., October 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

MACLEOD MOBILE HOMES, INC., ET AL., MOBILE HOMES—MULTIPLEX CORP., INC., ET AL., AND HARPER SALES, INC., ET AL.

Extension of Time

AGENCY: Federal Trade Commission.

ACTION: Comment period extended for sixty days.

SUMMARY: The period of time for filing comments on the consent agreements has been extended for sixty days to July 5, 1978.

DATES: Comments must be received on or before July 5, 1978.

ADDRESSES: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St., and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

John F. Dugan, Acting Director, New York Regional Office, Federal Trade Commission, 2243-EB Federal Building, 26 Federal Plaza, New York, N.Y. 10007, 212-264-1207.

SUPPLEMENTARY INFORMATION: Provisionally accepted consent agreements and analyses to aid public comment were published in the FEDERAL REGISTER on March 8, 1978, 43 FR 9493, 9495, and 9497. The Commission has received a number of requests for an extension of time within which to file comments.

The consent orders in these matters will affect numerous mobile home parks and various others who apparently have not had an opportunity to study the proposed consent orders. Accordingly, notice is hereby given that the Commission has extended the comment period for an additional sixty days to and including July 5, 1978.

By direction of the Commission dated May 4, 1978.

JAMES A. TOBIN,
Acting Secretary.

Federal Highway Administration

[49 CFR Part 393]

[BMCS Docket No. 58-1; Notice No. 78-10]

PARTS AND ACCESSORIES NECESSARY FOR SAFETY OPERATION

Step, Handhold, and Deck Requirements on Commercial Motor Vehicles

AGENCY: Federal Highway Administration, DOT.

ACTION: Extension of time to file comments.

SUMMARY: The date for submitting comments to the Notice of Proposed Rulemaking on Step, Handhold, and Deck Requirements on Commercial Motor Vehicles published on February 15, 1978 (43 FR 6637), is being extended from May 16, 1978, to June 30, 1978. This action is being taken as a result of requests from the Motor Vehicle Manufacturer's Association (MVMA) and the Department of Labor (DOL) in order to allow for the preparation of a more meaningful response.

DATE: Comments must be received on or before June 30, 1978.

ADDRESS: Submit comments (original and 2 copies) to: BMCS Docket No. MC-58-1; Notice No. 78-3, Room 3402, Bureau of Motor Carrier Safety, Federal Highway Administration, Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Gerald J. Davis, Chief, Driver Requirements Branch, Bureau of Motor Carrier Safety, 202-426-9767; Principal Lawyer, Attorney, Gerald M. Tierney, Motor Carrier and Highway Safety Law Division, Office of Chief Counsel, 202-426-0834; Federal Highway Administration, Department of Transportation, Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. EST, Monday through Friday.

SUPPLEMENTARY INFORMATION: The MVMA has requested that the comment period to the docket on Step, Handhold and Deck Requirements on Commerical Motor Vehicles be extended due to complex questions that are involved in the consideration of

V 4 3 9 6

the proposals contained in the Notice. They report that "member companies of MVMA are gathering, examining and assessing anthropometric data and other information germane to the questions raised in the Notice." They believe that a 45-day extension will allow them sufficient time to submit comments which would be of genuine assistance to the Federal Highway Administration's Bureau of Motor Carrier Safety and other segments of the public.

The DOL has also requested an extension of comment time based on the complexity of this Notice.

Consequently, the comment time is being extended by 45 days, from May 16, 1978, to June 30, 1978.

Issued on: May 15, 1978.

ROBERT A. KAYE,
Director,
Bureau of Motor Carrier Safety.

[FR Doc. 78-13531 Filed 5-16-78; 8:45 am]

[4910-22]

[49 CFR Part 399]

[BMCS Docket No. MC-64; Notice No. 78-9]

EMPLOYEE HEALTH AND SAFETY STANDARDS

Extended Comment Period

AGENCY: Federal Highway Administration, DOT.

ACTION: Extension of Time to File Comments.

SUMMARY: The date for submitting comments to the Notice of Proposed Rulemaking on employee Health, and Safety Standards, published on March 2, 1978, is being extended 30 days to June 30, 1978. This action was initiated as a result of a request from the Department of Labor (DOL). They state additional time is needed to prepare their response due to the complexity of the proposed rule.

DATE: Comments must be received on or before June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald J. Davis, Chief, Driver Requirements Branch, Bureau of Motor Carrier Safety, Federal Highway Administration, Department of Transportation, Washington, D.C. 20590, 202-426-9767; Principal Lawyer, Attorney, Gerald M. Tierney, Motor Carrier and Highway Safety Law Division, Office of Chief counsel, Federal Highway Administration, Department of Transportation Washington, D.C. 20590, 202-426-0346. Office hours are from 7:45 a.m. to 4:15 p.m., EST, Monday through Friday.

SUPPLEMENTARY INFORMATION: On March 2, 1978 (43 FR 8566), a Notice of Proposed Rulemaking was published proposing safety and health standards for employees engaged in the operation of motor vehicles for the purpose of improving safety and health for these employees.

The DOL has requested an extension of time to prepare their comments to this docket based on the complexity of the proposal. Since the DOL has significant interest in this particular proposal, the request is a reasonable one.

Consequently, the comment period is extended from May 31, 1978, to June 30, 1978.

Issued on: May 15, 1978.

ROBERT A. KAYE,
Director
Bureau of Motor Carrier Safety.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Threatened Status for West African Manatee (*Trichechus senegalensis*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes that the West African manatee (*Trichechus senegalensis*) be listed as a Threatened species. A petition from the Marine Mammal Commission to list this species contains the data upon which the proposal is based. If the West African Manatee is listed as Threatened, certain measures will go into effect that could benefit the species and result in its restoration.

DATES: Comments from the public must be received by July 17, 1978.

ADDRESSES: Submit comments to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, 202-343-4646.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On November 18, 1977, the Service was petitioned by the Marine Mammal Commission to list the West African manatee as a Threatened species pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531-1543). It is the Service's opinion that the Marine Mammal Commission provided sufficient data to propose this species for Threatened status.

Section 4(a) of the Act states:

General.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) The present or threatened destruction, modification or curtailment of its habitat or range;

(2) overutilization for commercial, sporting, scientific or educational purposes;

(3) disease or predation;

(4) the inadequacy of existing regulatory mechanisms; or

(5) other natural or manmade factors affecting its continued existence.

This authority has been delegated to the Director.

SUMMARY OF THE FACTORS AFFECTING THE SPECIES

With the West African manatee, factors (1), (2), (4) and (5) are operational. The appropriate portion of the petition from the Marine Mammal Commission detailing these factors is herewith reproduced:

The West African manatee is known from the coastal waters and adjacent rivers along the west coast of Africa from the mouth of the Senegal River (16° N), southward to the mouth of the Cuanza River (9° S) in Angola. Its range includes parts of the following countries: Senegal, Gambia, Guinea-Bissau, Upper Volta, Guinea, Sierra Leone, Liberia, Ivory Coast, Ghana, Togo, Benin, Mali, Nigeria, Cameroon, Chad, Equatorial Guinea, Gabon, Congo Brazzaville, Cabinda, Zaire, and Angola. Its present range is though to be comparable to its historic range.

"Husar (Mammalian Species, in press) has summarized what is known of the status of this species. No estimates of past or present population size are available. In at least one area, the Niger and Mekrou Rivers along the northern boundary of Benin (formerly Dahomey), it has been exterminated by local hunting (Poche, *Oryx* 12(2): 216-222, 1973). Manatees are taken by guns and harpoons in Liberia and Sierra Leone, where existing protective regulations are routinely ignored (Robinson, *Oryx* 11(2-3): 117-121, 1971). Ritual hunting for manatees still takes place in Ghana (Cansdale, *Oryx* 7(4): 168-171, 1964). In Nigeria, the species has traditionally been hunted by use of grass-baited traps (Dollman, *Nigeria Nat. Hist. Mag.* 4: 1170125, 1933; Allen, *Am. Comm. for Intern. Wildl. Protect.*, Spec. Publ. No. 11, 620 pp., 1942), a practice which continues there "unrestrained" despite legal prohibitions (Sikes, *Oryx* 12(4): 465-470, 1974). Native hunting in Zaire and Angola, on the lower Congo, was said to be reducing the Manatee population (Derscheid, Rev. Zool. *Africaine Bull. Cercle Congolaise* 14 (2): 23031, 1926; Allen *Loc. cit.*) and hunting continued as recently as 1952 (Bouveignes, *Zooleo* 14(4): 237-244, 1952). For most areas, it seems fair to assume that subsistence hunting is, or has been, intense, and that many local stocks are depressed. Fortunately, a large-scale commercial exploitation has never been directed at *T. senegalensis* (Husar, *loc. cit.*).

In addition to direct hunting by natives, other factors may be having a negative impact on the species. Wood (*Nigerian Field* 6(1): 23-28, 1937) described the way Nigerian fishermen, in 1932, trapped 48 manatees in the Anambra creek system, apparently exterminating them from the sea. The men did it because they regarded the animals as a nuisance to canoe traffic. Manatees are susceptible to accidental drowning in fish nets, particularly those set for sharks; this phenomenon has been documented in Senegal by Cadenat (*Bull. Inst. F. Afr. Noire* 19 A(4): 1358-1383, 1957). The extent of shark netting in West African waters is not known, so its impact on manatees there cannot be assessed (Husar, *loc. cit.*). Likewise, the degree to which manatees are injured by accidental collisions with motorboats in West Africa is unknown (Husar, *loc. cit.*); experience in Florida with *T. manatus* (Hartman, PhD Thesis, Cornell University, 1971) suggests that it could contribute substantially to mortality in heavily trafficked areas.

The West African manatee is currently protected under Class A of the African Convention for the Conservation of Nature and Natural Resources, 1969. However, enforcement of this convention is reported to be ineffective (Husar, *loc. cit.*). Some forms of additional legal protection exists in most countries where the West African manatee occurs, but the problems of enforcement and education are seemingly universal. The presence of the species in reserves gives some guarantee of protection (See Howell, *Nigerian Field* 33(4): 32-35, 1968; Dupuy and Verschuren, *Oryx* 14(1): 36-46, 1977). The West African manatee is listed as vulnerable by the IUCN, whose Red Data Book notes that the high value of the meat has been an irresistible incentive for killing. *T. Senegalensis* is also included in Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

If hunting and habitat modification continue uncontrolled, this species will become more seriously depleted. Damming of rivers and increased boat and ship traffic in many areas may contribute to its decline. Assuming that it is not one already, *T. senegalensis* is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. Therefore, the Commission recomends that it be classified as 'threatened' under the Endangered Species Act of 1973, until more is known about it status.

EFFECTS OF THE RULEMAKING

The West African manatee is already protected by the Marine Mammal Protection Act. (16 U.S.C. 1362 (5)-(6); 50 CFR 18.3). Among other things, that Act imposes significant restrictions on importation of the species into the United States. (16 U.S.C. 1371(a), 1372(b)-(c); 50 CFR 18.12). Listing the manatee as a Threatened species under the Endangered Species Act would not only provide an additional prohibition against importation, but would also restrict transportation or sale in interstate or foreign commerce. (16 U.S.C. 1533(d), 1538(a)(1)(G); 50 CFR 17.31(a)). Under each Act, permits are available in certain instances for scientific and zoological display purposes. (16 U.S.C. 1371(a)(1), 1372(b), 1374(c); 50 CFR 17.32, 18.31).

Listing of the West African manatee as Threatened would allow the United States to try to: (1) make the countries in which it is resident aware of the importance of manatee protection; (2) make available to scientists of other countries the results of manatee research undertaken under U.S. sponsorship in such form as to be helpful to them in developing their own research plans; (3) encourage other countries to undertake comprehensive surveys of the status and distribution of this species; (4) encourage other countries to establish reserves; (5) encourage reintroductions to areas once they are well established as protected habitat; and (6) encourage the acquisition of study specimens, that might not otherwise be available, for purposes of scientific research of animals taken incidental to net fisheries.

PUBLIC COMMENTS SOLICITED

The Director intends that the rules finally adopted will be as accurate and effective in the conservation of any Endangered or Threatened species as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests or any other interested party concerning this proposed rulemaking are welcome. Comments particularly are sought concerning:

(1) Abundance and distribution of the species; and

(2) population trends.

Final promulgation of the regulations on the West African manatee will take into consideration the comments and any additional information received by the Director and such communications may lead him to adopt final regulations which differ from this proposal. An environmental assessment is being prepared in conjunction with this proposal. When completed it will be on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. 20240, and may be examined during regular business hours or can be obtained by mail. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

The primary author of this proposed rulemaking is John L. Paradiso, Office of Endangered Species, 202-343-7814.

REGULATIONS PROMULGATION

Accordingly, it is proposed to amend Part 17, Subpart B, Chapter I of Title 50 of the U.S. Code of Federal Regulations as follows:

Amend § 17.11 by adding in alphabetical order under "Mammals" the following to the List of Endangered and Threatened Wildlife and Plants:

§ 17.11 Endangered and threatened wildlife.

Species		Population	Range		Status	When listed	Special rules
Common name	Scientific name		Known distribution	Portion threatened			
West African manatee.	*Trichechus senegalensis*	N/A	West Coast of Africa	Entire	T		None

NOTE: The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: May 9, 1978.

ROBERT S. COOK,
Acting Director,
Fish and Wildlife Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 651]

COD AND HADDOCK BY VESSEL CLASSES

Proposed Regulations Establishing Annual Allocations; Plan Amendment Approval

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Proposed regulations.

SUMMARY: These proposed regulations would amend existing regulations for Atlantic groundfish fisheries for cod and haddock by assigning specific annual allocations for each size class of vessel, or gear type of vessel, engaging in those fisheries. Those allocations would be based on historical landing data, and are intended to ensure that each vessel has an adequate opportunity to compete for the

MY 17 78
UMI

V 43 96

quantity of cod and haddock assigned to the class in which that vessel falls.

DATES: Interested parties may submit in writing data, views, or comments on the plan amendment or the proposed regulations until July 1, 1978.

ADDRESS: Comments should be submitted to Mr. William G. Gordon, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Mass. 01930. Please mark on the envelope and contents "vessel allocation comments."

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, address above, telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: The New England Fishery Management Council, under authority of section 302(h) of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended (Act), proposed an amendment to the fishery management plan for Atlantic groundfish. That amendment would provide proportionate annual allocations of cod and haddock to each of three trawl vessel size categories, and to fixed gear vessels regardless of size. The Assistant Administrator for Fisheries, acting under an appropriate delegation of authority from the Secretary of Commerce, approved that amendment on May 12, 1978. That amendment amends the Plan which was approved on March 28, 1978 (43 FR 13601). The amendment, which follows immediately, is published with the proposed regulation so that the public may have the greatest possible opportunity to offer comments, suggestions, or other ideas, either in writing or at public hearings which have been announced (43 FR 20531), on the amendment and the proposed regulations.

Revisions to the fishery management plan are as follows:

1. A new section II.C.4.(F) is added as follows:

(F). *Vessel class allocation system.*—(1). *General.* The commercial quotas of cod and haddock representing amounts of those species allocated to vessels of the United States shall be further allocated by four vessel classes: Mobile gear vessels in three classes—60 Gross Registered Tons (GRT) and under, 61-125 GRT, and 126 GRT and over; and all sizes of fixed gear vessels in one class.

The allocation to each class of vessels is determined by applying the appropriate percentage to the domestic commercial quota for each area.

(2) *Cod.* The allocation of cod to domestic licensed commercial fisheries shall be determined by apportioning the domestic commercial cod quotas among the four vessel classes on the basis of the following percentages:

Vessel class	Gulf of Maine	Georges Bank and Southern New England
0–60 GRT	42.55	9.45
61–125 GRT	18.91	31.41
126 GRT and over	7.37	44.66
Fixed gear vessels	31.17	14.48
Total	100.00	100.00

(3) *Haddock.* The allocation of haddock to domestic licensed commercial fisheries shall be determined by apportioning the domestic commercial haddock quota among the four vessel classes on the basis of the following percentages:

Vessel class	Percentage	
	Gulf of Maine	Georges Bank[1]
0 to 60 GRT	31.59	3.68
61 to 125 GRT	25.97	34.98
126 GRT and over	17.56	56.88
Fixed gear vessels	24.88	4.46
Total	100.00	100.00

[1]And southern New England.

The necessity for this amendment comes from the fact that available stocks of the three species of fish regulated under the Fishery Management Plan for Atlantic Groundfish (cod, haddock, and yellowtail flounder) cannot support the amount of fishing effort which is engaged in those fisheries. Yellowtail flounder catches have declined to the extent that many boats which formerly engaged in the yellowtail flounder fishery have shifted into the cod and haddock fisheries. This increase in effort has resulted in further pressure on the cod and haddock stocks to the point where the optimum yield of those stocks could be caught during the early part of the year, or the early part of each succeeding quarter when the largest boats can safely fish consistently in spite of most adverse weather conditions. Such adverse weather conditions, however, could prevent owners and fishermen operating smaller boats from setting out, thereby depriving them of a fair opportunity to catch their share of those species.

The proposed regulations would permit in-season adjustment of weekly trip limitations by vessel class. They would also provide, when necessary, for cessation of fishing for cod and haddock by one vessel class when the catch exceeds the allocation for that class.

The allocations which are proposed in these regulations are based on historical catch data for the years 1970, 1972, 1974, and 1976.

The Assistant Administrator for Fisheries has determined that this amendment:

(1) Is consistent with the National Standards and other provisions of the Act and other applicable laws;

(2) Does not constitute a major Federal action requiring the preparation of an environmental impact statement; and

(3) Requires an economic impact analysis under Executive Orders 11821 and 11949 which is being prepared.

Signed at Washington, D.C., this 15th day of May 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

(1) 50 CFR 651.3 is revised in its entirety.

(2) 50 CFR 651.7(f) is amended.

(3) 50 CFR 651.8(a) and (b) is amended.

§ 651.3 Catch quotas.

(a) Catch quotas for 1978 for vessels of the United States for haddock, cod, and yellowtail flounder are as follows:

(1) *Haddock.* The total commercial and recreational catch for haddock is 8,000 metric tons. The catch quota for the last three quarters is divided as follows:

Quarter	Catch quota (metric tons)
April 1 to June 30	2,591
July 1 to September 30	1,092
October 1 to December 31	1,362

The annual commercial catch of 7,800 mt is allocated as follows:

Vessel class[1]	Gulf of Maine		Georges Bank[2]	
	Percent	Metric tons	Percent	Metric tons
0 to 60	31.59	517.4	3.68	226.8
61 to 125	25.97	425.4	34.98	2155.5
126 plus	17.56	287.6	56.88	3504.9
Fixed gear	24.88	407.6	4.46	274.8
Total	100.00	1638.0	100.00	6162.0

[1]Gross registered tons.
[2]And southern New England.

(2) *Cod.* (i) The total commercial catch for cod is 6,000 metric tons for the Gulf of Maine and 22,000 metric tons for Georges Bank and southern New England. The quota for the last three quarters is divided as follows:

CATCH QUOTAS (METRIC TONS)

Quarter	Gulf of Maine	Georges Bank[1]
April 1 to June 30	1,629	5,596
July 1 to September 30	1,289	5,096
October 1 to December 31	1,290	5,106

[1]And southern New England.

The annual commercial catch is allocated as follows:

Vessel class[1]	Gulf of Maine		Georges Bank[2]	
	Percent	Metric tons	Percent	Metric tons
0 to 60	42.55	2,553	9.45	2,079
61 to 125	18.91	1,135	31.41	6,910
126 plus	7.37	442	44.66	9,825
Fixed gear	31.17	1,870	14.48	3,186
Total	100.00	6,000	100.00	22,000

[1]Gross registered tons.
[2]And southern New England.

(ii) The annual catch for the charter and headboat fishery is 2,500 metric tons for the Gulf of Maine. This quota is not divided into quarterly increments.

(3) *Yellowtail flounder.* The annual commercial and recreational catch for yellowtail flounder is 4,400 metric tons east of 69° W. long. and 3,700 metric tons west of 69° W. long. The quotas for the last three quarters are as follows:

CATCH QUOTAS (METRIC TONS)

Quarter	East of 69° W.	West of 69° W.
April 1 to June 30	950	800
July 1 to September 30	1,150	730
October 1 to December 31	800	928

(b) The Assistant Administrator may establish quarterly quotas for each vessel class for cod and haddock by publication of a notice in the FEDERAL REGISTER.

(c) The Assistant Administrator may adjust quarterly quotas upon publication of a notice in the FEDERAL REGISTER, in the following circumstances.

(1) When a quarterly quota is not reached, to add the surplus onto quotas in subsequent quarters;

(2) When a quarterly quota is exceeded, to deduct the overage from quotas in subsequent quarters.

§ 651.7 [Amended]

(2) Amend § 651.7(f) as follows:

Insert the words "as established under § 651.3(b)," between the words "quota" and "the Assistant Administrator" so that the second sentence of that paragraph reads: "If the statistics indicate that one or more vessel classes in paragraph (a) of this section have taken more than their proportionate share of the current or a previous quarterly quota, as established under § 651.3(b), the Assistant • • •."

At the end of the paragraph, strike the words "historic percentage of the catch." Insert "annual allocation, as established under § 651.3(a)."

§ 651.8 [Amended]

(3) Amend § 651.8(a) and (b) as follows:

In paragraph (a), Line nine, strike the words "the total", substitute the word "any". At the end of line 12, insert the words "by all vessels or by the applicable vessel class," after the word "species" and before the word "shall" at the beginning of line 13. In line 17, insert the words "to which the closure applies" between the word "vessel" and the word "must".

In paragraph (b) Line one, insert the words "for a vessel to which the closure applies "between the word "unlawful" and the word "to".

CIVIL AERONAUTICS BOARD

[Order No.78-5-75; Docket No. 32186]

BRITISH CALEDONIAN AIRWAYS, LTD.

Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 12th day of May 1978.

British Caledonian Airways, Ltd. (B.CAL), is the holder of a permit which authorizes it, subject to conditions, to engage in foreign air transportation of persons, property, and mail, as follows: Between the coterminal points London and Manchester, England, and Prestwick, Scotland, and the coterminal points Houston, Tex., and Atlanta, Ga.[1]

By application filed March 1, 1978, B.CAL requests amendment of its foreign air carrier permit to add to its existing segment the following authorization: "the optional intermediate point Bangor, Maine, for property only".

B.CAL operates twice-weekly freighter services between Houston, Tex., and London, one via Prestwick and one via Manchester, which regularly make technical fueling stops at Bangor, Maine. In addition, B.CAL offers daily combination service between Houston and London which does not make technical stops. Both all-cargo and combination services use Boeing 707 aircraft.

British Caledonian also requests a waiver from the airport notice requirement, to the extent otherwise applicable, of § 213.4 of the Board's economic regulations, as it is already regularly using Bangor International Airport, which is the only international facility serving that city.[2]

The authority requested would provide Bangor with its first regular and reliable air cargo service to the United Kingdom. The applicant states that, "not only would grant of this application help to satisfy Bangor's pressing and long unmet requirements, but it would ensure that B.CAL's freighter capacity is more effectively utilized and would provide B.CAL with an additional source of revenue at little incremental cost." B.CAL states that it is a limited company incorporated under the Companies Acts, 1908 to 1917, of the United Kingdom and registered in England on October 11, 1928; that it is a citizen of the United Kingdom and a wholly owned subsidiary of Caledonian Airways, Ltd., the holding company for the British Caledonian Group of Companies; and that it is substantially owned and effectively controlled by citizens of the United Kingdom. Order 77-9-64 found that ownership and control of B.CAL to be within the United Kingdom and that the applicant was financially and operationally fit. We are aware of no changes in B.CAL's structure or operations which would require us to modify these findings. Finally, B.CAL has been issued air transport license No. 1B/24045/3 by the Civil Aviation Authority, effective February 8, 1978, which enables B.CAL to perform the foreign air transportation for which the amendment to its foreign air carrier permit is requested.

On June 19, 1973, the Board issued press release CAB-73-106 which invited U.S. and foreign-flag carriers to apply for the right to enplane and deplane cargo at Bangor International Airport in Maine on a "flag-stop" or permissive basis. The release stated that Bangor International Airport is uncongested; offers carriers excellent facilities; and is on or close to the great circle route between much of the United States and Europe; its use could alleviate the burden on existing cargo facilities such as at New York and Chicago, and could help to attract light manufacturing industries to Maine and promote the export of goods such as seafoods. Finally, the Board's release stated that it contemplated that the privileges would be granted on a temporary, experimental basis for a period of 3 years.

The city of Bangor, Maine, and the Greater Bangor Area Chamber of Commerce (Bangor) filed an answer on March 10, 1978, in support of B.CAL's application. Bangor asserts that it is ready and willing to work jointly with carriers, including B.CAL, to further the vigorous development of air cargo service at Bangor. It sponsors a bonded warehouse and international air freight terminal as well as a 12-acre, duty-free, quota-free foreign trade zone. In addition, Bangor states there is a substantial unmet demand at Bangor for regular and reliable air cargo service. Finally, it infers that since B.CAL has a technical stop there anyway, denying B.CAL fill-up authority to transport Bangor Transatlantic cargo on its all-cargo flights would fail to use an available air transport resource which is clearly in the public interest.

Both Seaboard World Airlines, Inc., and Pan American World Airways, Inc., have outstanding authority to serve Bangor, limited to the carriage of property, on a permissive basis until January 21, 1980.[3] However, as Bangor is not a point in the bilateral agreement, neither carrier has operating authority for Bangor from the British Government, nor has either applied to the British Government for such authority. Thus, the authority from the Board has remained dormant, in Pan American's case, and dormant with respect to the United Kingdom in Seaboard's case.[4]

No answers in opposition to B.CAL's application have been received.

We tentatively find that the grant of the application will serve the public interest. Since this authority is outside of the bilateral agreement, we propose to make it temporary, matching the expiration of the U.S. carriers' permissive Bangor authority. In the event U.S. carriers wish to institute the same type of cargo service at Bangor, we expect that in accordance with comity and reciprocity, the Government of the United Kingdom would give reciprocal authority to them.

In view of the foregoing and all the facts of record, the Board tentatively finds and concludes that:

1. British Caledonian Airways, Ltd., is substantially owned and effectively controlled by citizens of the United Kingdom;

2. It is in the public interest to amend the foreign air carrier permit held by British Caledonian Airways, Ltd., authorizing the carrier, subject to conditions, to add Bangor, Maine, as an optional intermediate point for property only, on its authorized segment. This authority will expire on January 21, 1980;

3. The public interest requires that the exercise of the privileges granted by such amended permit shall be subject to the terms, conditions, and limitations contained in the specimen form of permit attached to this order and to such other reasonable terms, conditions, and limitations required by the public interest as from time to time may be prescribed by the Board;

4. British Caledonian Airways, Ltd., is fit, willing, and able properly to perform the above-described foreign air transportation, and to conform to the provisions of the Federal Aviation Act of 1958, as amended, and the rules, regulations, and requirements of the Board;

5. The request of B.CAL for a waiver of the airport notice requirements of section 213.4 of the Board's economic regulations should be denied.

6. The public interest does not require an oral hearing;

7. The amendment of British Caledonian Airways, Ltd.'s foreign air carrier permit would not constitute "a major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA) and will not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975 (EPCA), as defined in subsection of the Board's regulations;[5] and

8. Except to the extent granted, the application of British Caledonian Airways, Ltd., in Docket 32186 should be denied.

It is therefore ordered, That: 1. All interested persons are directed to show cause why the Board should not, subject to the approval of the President under section 801 of the act, make final its tentative findings and conclusions, and issue an amended foreign air carrier permit in the form of the attached specimen permit to British Caledonian Airways, Ltd.;

2. Any interested person having objection to the issuance of an order making final the Board's tentative findings and conclusions and issuing the attached permit shall, within 15 days after the service of this order, file with the Board and serve upon the persons named in paragraph 5, a statement of objections specifying the part or parts of the tentative findings and conclusions objected to, together with a summary of testimony, statistical data, and such evidence expected to be relied upon in support of the statement of objections. If an oral hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be given the matters and issues raised therein by the objector before further action is taken by the Board. The Board may, nevertheless, proceed to enter an order in accordance with its findings and conclusions set forth in this order if it determines that there are no factual issues present that warrant the holding of an oral hearing;[6]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Secretary shall enter an order which: (1) shall make final the Board's tentative findings and conclusions set forth in this order, and (2) subject to the approval of the President, shall issue a foreign air carrier permit to the applicant in the specimen form attached; and

5. This order shall be served upon British Caledonian Airways, Ltd., the Ambassador of the Government of the United Kingdom of Great Britain and Northern Ireland, the Department of State, the Department of Transportation, Pan American World Airways, Seaboard World Airlines, Trans World Airlines, National, Braniff, and Delta.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[7]

PHYLLIS T. KAYLOR,
Secretary.

Specimen Permit

PERMIT TO FOREIGN AIR CARRIER (AS AMENDED)

BRITISH CALEDONIAN AIRWAYS, LTD.,

is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued thereunder, to engage in foreign air transportation with respect to persons, property, and mail, as follows:

1. Between the conterminal points London and Manchester, England, and Prestwick, Scotland; the optional intermediate point Bangor, Maine, for property only; and the coterminal points Houston, Tex., and Atlanta, Ga.

The holder shall be authorized to engage in charter trips in foreign air transportation, subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's economic regulations.

The authority to add Bangor, Maine, as an optional intermediate point for property only shall expire on January 21, 1980.

The holder shall not operate nonstop service to Atlanta, Ga., prior to July 23, 1980.

The holder shall not grant stopover privileges at Atlanta or Houston on flights over its segment.

The exercise of the privileges here granted shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall be effective on ————————. Unless otherwise terminated at an earlier date under the terms of any (1) upon the effective date of any treaty, convention, or agreement, or amendment thereto, which shall have the effect of eliminating the routes authorized from the routes which may be operated by airlines designated by the Government of the United Kingdom of Great Britain and Northern Ireland (or in the event of the elimination of any part of a route or routes authorized, the authority granted shall terminate to the extent of such elimination), or (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of the United Kingdom of Great Britain and Northern Ireland in lieu of the holder, or (3) upon the termination or expiration of the air services agreement between the Government of the United States and the Government of the United Kingdom of Great Britain and Northern Ireland effective July 23, 1977: However, clause (3) of this paragraph shall not apply if, prior to the occurrence of the event specified in clause (3), the operation of the foreign air transportation here authorized becomes the subject of any treaty, convention, or agreement to which the United States and the United Kingdom of Great Brtain and Northern Ireland are or shall become parties.

The Civil Aeronautics Board, through its

---

[1] Issued by order 77-10-81, approved October 7, 1977. The permit as initially issued included additional authority between the United Kingdom and New York and Chicago and Los Angeles. However, that authority terminated under the terms of the permit, since B.CAL was not designated by the Government of the United Kingdom under the Air Service Agreement to serve those routes by November 1, 1977.

[2] An airport-notice procedure requires only a simple notification, and can be granted on short notice to the extent time restraints require. Therefore, we are not persuaded that a waiver of the normal procedures is warranted and will deny the waiver request.

[3] Seaboard World Airlines was originally granted this authority by order 74-1-99 which expired November 16, 1976. Its authority was renewed by order 77-3-87. Pan American World Airways was originally granted this authority by order 74-6-11 which expired January 21, 1977. Its authority was renewed by order 77-3-118.

[4] Upon application for renewal, Pan American stated that it had thus far been unable to use the authority. Nevertheless, the carrier hopes that the potential for service to Bangor will develop during the renewal period sought. According to order 76-11-108, "Seaboard has utilized its permissive Bangor authority to provide a needed public service, as indicated by the fact that during fiscal year 1976 the carrier operated 56 departures which enplaned 648.57 tons of cargo."

[5] Our tentative findings are based on the proposed amendment of B.CAL permit not resulting in any significant increase in aircraft operations at U.S. points, as B.CAL presently stops at Bangor, Maine, for refueling. Moreover, the implementation of the proposed authority will not result in the near-term consumption of 10 million gallons of fuel.

[6] Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

[7] All Members concurred.

GOVERNMENT-OWNED INVENTIONS

Notice of Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161, for $4 ($8 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

Patent and Trademark Office

PROCEDURES FOR ENFORCING REGULATIONS RELATING TO THE USE OF PATENT AND TRADEMARK OFFICE RECORDS FACILITIES

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice.

SUMMARY: The Patent and Trademark Office is adopting procedures for enforcing existing regulations governing the use of the public search room for patents and the patent examining group search facilities by members of the public. Enforcement of the existing regulations is necessary, and is intended by these procedures, to carry out the commitment of the Office to the public to promote an atmosphere conducive to research and maintain the integrity of files in the public search room for patents and in the examining group search facilities.

EFFECTIVE DATE: June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Bradford R. Huther, Deputy Assistant Commissioner for Administration, Patent and Trademark Office, Washington, D.C. 20231, 703-557-2290.

SUPPLEMENTARY INFORMATION: The procedures will apply in enforcing the regulations for the public use of records of the public search room for patents and the patent examining group search facilities. The regulations of the Public Search Room for Patents were published in the FEDERAL REGISTER for July 14, 1976, 41 FR 29009, and incorporated in a search room user agreement entered into by each person who is issued a user pass. Regulations for users of the patent examining group search facilities were established under rule 2 of the regulations of the public search room for patents and were published in the Official Gazette of March 22, 1977, 956 O.G. 1118.

The procedures appear below.

PROCEDURES FOR ENFORCEMENT OF THE REGULATIONS

FOR THE PUBLIC USE OF RECORDS IN THE PUBLIC SEARCH ROOM FOR PATENTS AND THE PATENT EXAMINING GROUP SEARCH FACILITIES

Under applicable statutes and regulations, including 40 U.S.C. 486(c); 41 CFR 101-20.3; and appropriate sections of Department Organization Orders 30-3A and 30-3B of the Department of Commerce, the procedures appearing below are established.

VIOLATIONS INVOLVING THE SECURITY SYSTEM

1. Unauthorized removal of government property. (a) The public search room for patents is equipped with a security system designed to sound an alarm when an attempt to remove government property from the public search room is detected. Each alarm signal triggered by a person passing through an exit to the public search room will be investigated by security guards stationed at the public search room exits. The person involved will be required to stop and allow the security guards to determine the cause of the alarm. If non-government property is the cause for the alarm, the person will be allowed to proceed without further delay. If unauthorized possession of government property is found to be the cause of the alarm, the person in whose possession the property is found will be advised that a violation has occurred and will be required to surrender the property to the manager of the public search room. An oral explanation for the possession of such property will be requested by the manager.

(b) The manager of the public search room will immediately report each incident involving unauthorized possession of government property to the Deputy Assistant Commissioner for Administration by telephone, and if requested submit a written report, together with the government property and user pass involved to the Deputy Assistant Commissioner for Administration.

(c) If it shall appear to the Deputy Assistant Commissioner for Administration that unauthorized possession of government property, detected by the security system, was inadvertent or otherwise unintentional, no further action will be taken. Otherwise, the Deputy Assistant Commissioner for Administration will request the person involved to show cause in writing why his or her user pass should not be suspended or revoked pursuant to the terms of the search room user agreement. A written decision will be rendered by the Deputy Assistant Commissioner for Administration after consideration of any timely submitted response.

OTHER VIOLATIONS OF THE PUBLIC SEARCH ROOM REGULATIONS

2. All other violations of the public search room regulations. (a) Each observed or reported violation will be investigated by the manager of the public search room. If a violation has occurred and is not denied, the person involved will be verbally requested by the manager to comply with the regulations. If the person involved denies that a violation has occurred, or refuses to comply with a verbal request of the Manager to comply with the regulations, or violates the regulations after having agreed to comply with them, the person will be required to surrender his or her User Pass to the manager of the public search room.

(b) The manager of the public search room will submit a written report of each violation, and the user pass, if surrendered, to the Deputy Assistant Commissioner for Administration.

(c) If the Deputy Assistant Commissioner for Administration is satisfied that a reported violation was inadvertent or otherwise unintentional, the User Pass, if surrendered, will be returned and no further action will be taken. In all other cases, the Deputy Assistant Commissioner for Administration will request the person involved to show cause in writing why his or her User Pass should not be suspended or revoked pursuant to the terms of the search room user agreement. A written decision will be rendered by the Deputy Assistant Commissioner for Administration after consideration of any timely submitted response.

VIOLATIONS OF THE PATENT EXAMINING GROUP SEARCH FACILITIES REGULATIONS

3. Violations of the regulations for users of the patent examining group search facilities. (a) Each observed or reported violation will be investigated by an authorized official. If a violation has occurred, and is not denied, the person involved will be verbally requested to comply with the regulations. If the person involved denies that a violation has occurred, or refuses to comply with a verbal request to comply with regulations, or violates the regulations after having agreed to comply with them, the person involved will be required to surrender his or her user pass to the authorized official.

(b) The authorized official will submit a written report of each violation, and the user pass, if surrendered, to the Deputy Assistant Commissioner for Patents.

(c) If the Deputy Assistant Commissioner for Patents is satisfied that violation was inadvertent or otherwise unintentional, the user pass, if surrendered, will be returned and no further action will be taken. In all other cases, the Deputy Assistant Commissioner for Patents will request the person involved to show cause in writing why his or her user pass should not be suspended or revoked. A written decision will be rendered by the Deputy Assistant Commissioner for Patents after consideration of any timely submitted response.

PENALTIES

4. Factors to be considered in assessing penalties.

(a) Penalties will be determined on a case-by-case basis. A record of penalties imposed for given violations will be kept and made available to the public upon request.

(b) Due weight may be given to prior violations of the regulations in assess-

V 43 96

ing whether any given violation is willful, deliberate or intentional.

(c) Prior violations of the regulations will be considered in determining any specific penalty to be imposed. Depending upon the circumstances, the penalty for a first offense may range from an oral or written warning to a 60-day suspension of the user pass. For a second offense, the penalty may be a suspension of from 5 days to 1 year. For a third offense, the penalty may range from a 30-day suspension to revocation of the user pass.

GENERAL PROVISIONS

5. Use of search facilities during suspension or after revocation of user pass.

No individual will be permitted to use the public search room for patents or the patent examining group search facilities while his or her user pass is suspended or revoked.

6. Temporary user pass.

Any person whose user pass was surrendered, but not suspended or revoked, may be issued a temporary user pass which shall be valid until the user pass is returned or a decision is rendered pursuant to paragraph 1(c), 2(c), or 3(c).

7. Absence of the deputy assistant commissioner for administration.

In the absence of the Deputy Assistant Commissioner for Administration, the Director of the Office of Patent and Trademark Services will carry out the functions and responsibilities assigned to the Deputy Assistant commissioner for administration in paragraphs 1(b) and (c) and 2(b) and (c).

8. Absence of the manager of the public search room.

In the absence of the manager of the public search room, the acting manager will carry out the duties and responsibilities assigned to the manager in paragraphs 1(a), 1(b), 2(a) and 2(b).

9. Assistance.

The manager of the public search room and the authorized official may, when necessary request the security officer of the Patent and Trademark Office or the GSA to provide assistance in carrying out their functions in paragraphs 1(a), 2(a), and 3(a).

10. Petitions.

A decision rendered by the Deputy Assistant Commissioner for Administration, the Director of the Office of Patent and Trademark Services, or the Deputy Assistant Commissioner for Patents may be reviewed on petition to the Commissioner.

LUTRELLE F. PARKER,
Acting Commissioner of Patents and Trademarks.

MAY 5, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

ANNOUNCING AN ADDITIONAL EXEMPT TEXTILE PRODUCT FROM PAKISTAN12, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Exempting Peshawari waist coats from the levels of restraint established under the terms of the bilateral cotton textile agreement between the Governments of the United States and Pakistan.

SUMMARY: The Governments of the United States and Pakistan have agreed to exempt Peshawari waist coats from the levels of restraint established under the terms of the Bilateral Cotton Textile Agreement of January 4 and January 9, 1978, in addition to other previously designated handloomed and traditional textile products (See 38 FR 14184 and 39 FR 2293). Accordingly, there is published below a letter of May 12, 1978 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, directing that Peshawari waist coats be added to the list of traditional Pakistan items which are currently exempt from the agreement.

EFFECTIVE DATE: May 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Judith L. McConahy, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, 202-377-5423.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

UNITED STATES DEPARTMENT OF COMMERCE
*May*12, 1978.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive issued to you on January 19, 1978 by the Chairman of the Committee for the Implementation of Textile Agreements which designated levels of restraint for certain cotton textiles and cotton textile products, produced or manufactured in Pakistan, which may be entered or withdrawn from warehouse for consumption in the United States during the twelve-month period which began on January 1, 1978. It also amends, but does not cancel, the directives of June 28, 1972, May 16, 1973, and January 15, 1974 which established an export visa requirement for entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textiles and cotton textile products, produced or manufactured in Pakistan, and administrative mechanisms to exempt certain traditional Pakistan items and handloomed products of the cottage industry of Pakistan from the levels of restraint of the bilateral agreement.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton Textile Agreement of January 4 and January 9, 1978 between the Governments of the United States and Pakistan; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, the aforementioned directives are amended, effective on May 17, 1978, to exempt Peshawari waist coats, in addition to previously designated items, when they are properly certified. A Peshawari waist coat is defined as a "vest-type jacket worn in the Northwest Frontier Province of Pakistan. The garment is made from velvet and lined with heavy cotton fabric. It is heavily embroidered with lame braid."

The actions taken with repect to the Government of Pakistan and with respect to imports of cotton textile products from Pakistan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

FUEL OIL MARKETING ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Fuel Oil Marketing Advisory Committee will meet on Thursday and Friday, June 1 and 2, 1978, at 9 a.m., in Room 2105, 2000 M Street NW., Washington, D.C.

The Committee was established to provide the Secretary of Energy with expert and technical advice concerning the marketing of fuel oil as it relates to the development and implementation of policies and programs by the Department of Energy.

The agenda for the meeting is as follows:

Monitoring Methodologies
Issues for August Evidentiary Hearing
Other Issues as Appropriate
Remarks From Floor (10 minute rule)

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management, 202-566-9969, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Transcripts of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 2107, DOE, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcripts from the reporter.

Issued at Washington, D.C. on May 12, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

Federal Energy Regulatory Commission

[Docket No. RI78-52]

A. E. PERKINS (OPERATOR)

Notice of Petition for Special Relief

MAY 11, 1978.

Take notice that on April 18, 1978, A. E. Perkins (Operator), 472 West 3d, Hoisington, Kans. 67544, filed a petition for special relief in the above-captioned docket pursuant to § 2.76 of the Commission's Rules.

Currently selling gas at 29.45¢ per M ft³ from the Bertha J. Gray Well, Sedan-Peru Field, Chautauqua, Kans., Petitioner seeks authorization to increase this rate to $1 per M ft³. Petitioner states that the life of the well will be increased by 3 years once proposed reworking is done. However, without additional revenue, rework cannot begin.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file

V 43 96

a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP 72-110, (PGA78-7)]

ALGONQUIN GAS TRANSMISSION CO.

Notice of PGA Rate Increase

MAY 8, 1978.

Take notice that Algonquin Gas Transmission Co. ("Algonquin Gas") on April 26, 1978, tendered for filing 39th Revised Sheet No. 10 to its FERC Gas Tariff, First Revised Volume No. 1.

Algonquin Gas states that such tariff sheet is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision set forth in section 17 of the General Terms and Conditions of its FERC Gas Tariff, First Revised Volume No. 1. Algonquin Gas also states that such rate change, proposed to be effective May 1, 1978, is being filed to reflect a change in purchased gas costs filed by its supplier, Texas Eastern Transmission Corp. ("Texas Eastern"). Algonquin Gas requests that the Commission waive the usual notice requirement and permit such 39th Revised Sheet No. 10 to become effective on May 1, 1978, so that Algonquin Gas' rates will be synchronized with those of Texas Eastern.

It may be noted that the instant adjustment is superimposed upon rates which became effective as of April 1, 1978, through Commission approval of the Alongquin Gas Settlement in Docket Nos. RP73-112, et al. (see Algonquin Gas' filing dated April 21, 1978, of tariff sheets to comply with the Commission's order approving settlement).

The proposed effective date of the revised tariff sheet is May 1, 1978.

Algonquin Gas states that a copy of its filing is being served upon all affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-249]

APPALACHIAN POWER CO. ET AL

Order Granting Late Intervention

MAY 9, 1978.

On March 17, 1978, notice was issued of a filing by American Electric Power Service Corp. on behalf of its affiliates, Appalachian Power Co., Ohio Power Co., and Wheeling Electric Co. of an amendment to an existing interconnection agreement among these companies and Monongahela Power Co. and West Penn Power Co., in Docket No. ER78-249. All petitions to intervene or protest were due on or before April 3, 1978.[1]

On April 7, 1978 the Public Service Commission of West Virginia filed an untimely notice of intervention. The petition states that the Public Service Commission of West Virginia is the department of government of said State which has jurisdiction to regulate the rates, charges, and service for the sale and distribution of electricity within said State. The Public Service Commission of West Virginia requests that it be permitted to intervene at this time, since it will not in any way delay the proceeding.

The Commission finds: The participation by the Public Service Commission of West Virginia in this proceeding may be in the public interest.

The Commission orders: (A) The Public Service Commission of West Virginia is hereby permitted to intervene in these proceedings subject to the Rules and Regulations of the Commission; *Provided, however,* that participation by the Public Service Commission of West Virginia shall be limited to matters affecting the interconnection agreements which are involved in the above-captioned proceeding; and *Provided, further,* that the admission of the Public Service Commission of West Virginia shall not be construed as recognition by the Commission that the intervenor might be aggrieved because of any order or orders entered in this proceeding.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

[1] By order issued on April 13, 1978, the Commission conditionally accepted for filing and suspended the filed rate increase subject to filing of cost support data. Upon submission of the data the Commission will further evaluate the increased rate filing.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-358]

ARIZONA PUBLIC SERVICE CO.

Notice of Proposed Increase in Rate

MAY 10, 1978.

Take notice that on May 4, 1978, Arizona Public Service Co. (APS) tendered for filing the implementation of the material and supply component of the rate in the Agreement with the Navajo Tribe of Indians (NTUA), FPC Rate Schedule No. 6. APS states that the implementation of this component would have resulted in increased revenue for the year 1977 in the sum of $27,626.00.

APS requests an effective date of June 1, 1978, and therefore requests waiver of the Commission's notice requirements.

According to APS a copy of this filing was served upon the Arizona Corporation Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-356]

ARKANSAS POWER AND LIGHT CO.

Notice of Proposed Cancellation

MAY 10, 1978.

Take notice that on May 3, 1978, Arkansas Power & Light Co. (Company) tendered for filing the cancellation of two of the Company's Rate Schedules:

1. Arkansas Power & Light Co., Rate Schedule FPC No. 53.
2. Arkansas Power & Light Co., Rate Schedule FPC No. 65.

The Company indicates that both of these schedules are contracts between

the Company and the Mississippi County Electric Cooperative Corp. The Company further indicates that the Mississippi County Electric Cooperative Corporation has requested cancellation of the contracts under the terms of the contracts with an effective date of June 1, 1978, and therefore requests waiver of the Commission's notice requirements. The Company indicates that after June 1, 1978, service to the points of delivery formerly served by the Company under the two Rate Schedules will be served by the Arkansas Electric Cooperative Corp.

A copy of the filing has been mailed to the Mississippi County Electric Cooperative Corp. according to the Company.

Any person desiring to be heard or to protest this filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-357]

ARKANSAS POWER AND LIGHT CO.

Notice of Proposed Cancellation

MAY 10, 1978.

Take notice that on May 3, 1978, Arkansas Power & Light Co. (Company) tendered for filing the cancellation of two of the Company's Rate Schedules:

1. Arkansas Power & Light Co., Rate Schedule FPC No. 53.
2. Arkansas Power & Light Co., Rate Schedule FPC No. 65.

The Company states that both of these schedules are contracts between the Company and the Mississippi County Electric Cooperative Corp. The Company further states that the Mississippi County Electric Cooperative Corp. has requested cancellation of the contracts under the terms of the contracts with an effective date of June 1, 1978, and therefore requests waiver of the Commission's notice requirements. The Company indicates that after June 1, 1978, service to the points of delivery formerly served by the Company under the two Rate Schedules will be served by the Arkansas Electric Cooperative Corp.

According to the Company a copy of the filing has been mailed to the Mississippi County Electric Cooperative Corp.

Any person desiring to be heard or to protest this filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. RI78-21]

BRADEN-DEEM, INC.

Notice of Amended Petition for Special Relief

MAY 11, 1978.

Take notice that on March 28, 1978, Braden-Deem, Inc. (BD), Suite 520, 200 East First Street, Wichita, Kans. 67202, filed an amendment to its original petition for special relief (noticed March 7, 1978).

In its amended petition BD requests a rate of $1.10/M ft³ for the sales of the 269,209 M ft³ for the sales of the 269,209 M ft ³ of gas reserves to Panhandle Eastern Pipe Line Co. (Panhandle). In its original December 7, 1977 petition, BD requested a rate of 83 cents/M ft³ plus an annual escalation of 14 cents/M ft³ for its sales to Panhandle. In the present amendment BD request a flat rate with no annual escalations. BD's original petition was pursuant to 18 CFR § 2.76 stating that it would need to invest an additional $34,000 to maintain the operations on the scale proposed.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protest filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. EL78-20]

CENTRAL KANSAS POWER CO.

Notice of Petition for Declaratory Order Disclaiming Jurisdiction and Application for Approval of Sale of Stock

MAY 11, 1978.

Take notice that Central Kansas Power Co. (CKP) on April 26, 1978, tendered for filing, pursuant to section 1.7 (c) of the Commission's Rules of Practice and Procedure a Petition requesting that the Commission issue a Declaratory Order Disclaiming Jurisdiction over the proposed purchase of CKP's stock by Central Kansas Electric Cooperative (CKEC) on the basis that the transaction is not within the purview of section 203 of the Federal Power Act.

CKP indicates that by contract dated October 19, 1977, United Telecommunications, Inc. (UTI) agreed to sell all the stock of its subsidiary, CKP, to CKEC. CKP states that the sale price for the stock will $17,537,900, adjusted for accumulated earnings, less dividends paid, from July 31, 1977 to the closing date. CKP further states that while CKEC is a borrower from the Rural Electrification Administration (REA) in many matters, CKEC will not borrow money from REA to finance this stock purchase. CKP states that instead, the necessary funds will be borrowed from the National Rural Utilities Cooperative Finance Corp. (CFC). CKP indicates that upon completion of the transaction, CKP will continue its operations as a separate corporation, even though its stock will be wholly owned by CKEC.

CKP is organized under the laws of the State of Kansas. It is engaged in the sale of electric energy and power, water and natural gas to retail customers within its service area in western Kansas. CKP sells electric power at wholesale to one customer pursuant to its FERC Rate Schedule No. 1 as amended. It also selis a small amount of natural gas for resale for which it has obtained an exception under section 1(c) of the Natural Gas Act from Federal jurisdiction. CKP is a Class A public utility under the Federal Power Act, and is a member of and interconnected with the Mokan Pool.

MY 17 78
UMI

V 43 96
MY 17 78
UMI

CKEC is an REA-financed, electric distribution cooperative serving approximately 6,700 member customers in west central Kansas. It is organized under the laws of the State of Kansas. Beause it is an REA-financed cooperative, CKEC is not subject to the jurisdiction of the Commission under the Federal Power Act. As of January 1, 1977, CKEC owned 312.95 miles of transmission lines with operating voltages of 44 kV or higher, of which 59.34 miles are operating at 115 kV and an additional 69.04 miles are designed for 115 kV operation. CKEC presently purchases over 93 percent of its electric energy from the Western Power Division of Central Telephone and Utilities Corp. (CTU), with the remaining power being supplied primarily by six internal combustion engines with a combined capacity of 10,250 kW it owns and operates for peaking purchases.

CKP indicates that CKP and CKEC are not directly interconnected through a 115 kV line owned by CTU interconnects with a 115 kV line owned by CKP running in a southeasterly direction from Hays, Kans. CKP indicates that neither CKP nor CKEC presently supply power to the other and neither has the present capability to do so except on an emergency basis. CKP states that there is no present contract or agreement between CKP and CKEC providing for present, for future sale or exchanges of power between the two, even on an emergency basis, nor are there any plans to do so when CKEP's acquisition of CKP's stock is effectuated. CKP states that instead, CKP will be operated for the indefinite future as a separate and independent subsidiary of CKEC without any additional coordination of its operations with those of CKEC.

CKP also tendered for filing an Application for authorization under section 203 of the Federal Power Act and Part 33 of the Commission's Rules and Regulations to consummate the aforementioned agreement for the sale of stock, to the extent that the Commission determines that such authorization is required.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20428, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 31, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-360]

CONNECTICUT YANKEE ATOMIC POWER CO.

Notice of Filing of Supplementary Power Contract

MAY 11, 1978.

Take notice that on May 5, 1978, Connecticut Yankee Atomic Power Co. (the Company) tendered for filing a Supplementary Power Contract, dated as of March 1, 1978, between the Company and its eleven sponsor-purchaser electric utilities: The Connecticut Light and Power Co., New England Power Co., Boston Edison Co., Central Maine Power Co., The Hartford Electric Light Co., The United Illuminating Co., Cambridge Electric Light Co., Western Massachusetts Electric Co., Public Service Co. of New Hampshire, Montaup Electric Co., and Central Vermont Public Service Corp.

The Company states that the Supplementary Power Contract supplements the Power Contracts dated July 1, 1964 (Connecticut Yankee Atomic Power Co. FERC Rate Schedule No.) and provides for additional undertakings by the Company and payments by the eleven sponsor-purchaser utilities to raise the overall rate of return from 6 percent to 10 percent. This proposed change is estimated by the Company to result in a revenue increase of $11,283,000 based on the twelve month period ending December 31, 1978. The Company states that the Supplementary Power Contract also clarifies the term "net unit investment" to include the aggregate amounts chargeable to nuclear fuel accounts in accordance with the Commission's Uniform System of Accounts. In addition to the changes set forth in the Supplementary Power Contract, the Company states that the following changes have been made in the computation of depreciation expenses to be recovered under the Power Contracts: (1) adoption of a 30-year life in place of the earlier 25-year life, (2) use of an annual 0.5 percent interim retirement rate, and (3) inclusion of nuclear plant decommissioning costs based on the method known as partial dismantlement or entombment. The Company states that these changes by the Company result in a depreciation expense increase of $543,000 during the 12 month period ending December 31, 1978.

Connecticut Yankee Power Co. requests that the Commission waive its notice requirements and permit the Supplementary Power Contract to be effective as of May 1, 1978.

Connecticut Yankee Atomic Power Co. states that copies of the filing have been served upon each of the eleven sponsor-purchaser utilities and upon the electric utility regulatory authorities in the States of Connecticut, Maine, New England, Vermont, Massachusetts and Rhode Island.

Any person desiring to be heard or to make any protest with reference to the Interconnection Agreement should on or before May 22, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). Persons wishing to become parties to a proceeding or to participate as a party in any hearing related thereto must file peitions to intervene in accordance with the Commission's rules. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. RP78-18]

EL PASO NATURAL GAS CO.

Notice of Tariff Filing

MAY 9, 1978.

Take notice that on May 1, 1978, El Paso Natural Gas Co. ("El Paso") filed, pursuant to Part 154 of the Commission's Regulations Under the Natural Gas Act, certain revised and alternate tariff sheets to its FPC Gas Tariff,[1] providing proposed adjustments to its rates contained on the tariff sheets submitted in the notice of change in rates filed at Docket No. RP78-18 on November 29, 1977, and currently under suspension until June 1, 1978.[2]

El Paso states that the rates set forth on the tendered revised tariff sheets differ from the rates which were suspended in Docket No. RP78-18 in that the suspended rates have been modified to:

(i) Reflect the effectiveness of increased rates permitted in El Paso's notice of change in rates filed March 1, 1978, pursuant to El Paso's Purchased Gas Cost Adjustment Provision ("PGAC") and made effective April 2, 1978, by Commission order issued March 31, 1978, at Docket Nos. RP72-155 and RP77-18 (PGA78-1 and AP78-1);[3]

(ii) Reflect, where applicable, the Gas Research Institute ("GRI") Research, Development and Demonstration Funding Unit ("RD&D Funding Unit) of 0.12 cents per Mcf approved by the Commission's Opinion No. 11 and accompanying order issued March 22, 1978, at Docket No. RM77-14,[4]

El Paso states that ordering paragraph (D) of the Commission order issued December 30, 1977, at Docket No. RP77-18 contained the following provisions:

"• • • El Paso shall file revised rates before June 1, 1978, reflecting the elimination of all costs associated with facilities not placed in service on or before June 1, 1978: El Paso shall file supporting cost of service data which shows the elimination of such facilities from the cost of service."

El Paso states that the facilities related to said construction costs have been placed in service and that such costs have been transferred from Account No. 107, Construction Work in Progress, to Account No. 101, Gas Plant in Service, as of February 28, 1978.

El Paso states that it is concurrently filing its motion to place increased rates into effect on June 1, 1978, the end of the suspension period in Docket No. RP78-18. A copy of said motion is attached to the tariff filing. As fully set forth in the Motion, El Paso has requested the Commission to include as part of its order placing the suspended rates, as adjusted, into effect on June 1, 1978, temporary tracking authority, by a mechanism described therein, which will permit El Paso to adjust its rates to reflect changes in gas well royalty and production tax expense resulting from changes in the price of natural gas and from variations in the volume of produced gas. For the reasons set forth in the concurrent Motion, El Paso states that it is requesting:

(i) In the event that the proposed natural gas pricing legislation is not enacted into law on or before June 1, 1978, that the Commission place into effect on June 1, 1978, the tendered "revised tariff sheets," subject to the express condition that El Paso shall be permitted to file rate revisions from time to time during the effectiveness of Docket No. RP78-18 rates, in accordance with the temporary tracking procedures set forth in Appendix A to the motion; and

(ii) In the event that the proposed natural gas pricing legislation is enacted into law on or before June 1, 1978, that the Commission place into effect on June 1, 1978, the increased rates[5] contained in the "alternative tariff sheets," attached under the Tab denominated "alternative tariff sheets,"[6] in lieu of the tendered "revised tariff sheets," subject to the express condition that El Paso shall be permitted to file revisions from time to time during the effectiveness of Docket No. RP78-18 rates, in accordance with the temporary tracking procedures set forth in Appendix A to the motion.

In order to effectuate the purposes of the instant filing, El Paso has requested that the Commission grant such waiver of its Regulations Under the Natural Gas Act as may be deemed necessary in order to permit effectiveness of the tendered tariff sheets, and the rates set forth therein, on June 1, 1978, in the manner described in the accompanying motion.

El Paso states that copies of the filing and attachments thereto, have been served upon all parties of record in Docket No. RP78-18 and, otherwise, upon all affected customers and interested state regulatory commissions.

Any person desiring to be heard or to make any protest with reference to said tariff filing should, on or before May 19, 1978, file with the Federal Energy Regulatory Commision, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13318 Filed 5-16-78; 8:45 am]

---

[1]The tendered tariff sheets are identified on the index attached hereto.

[2]By order issued December 30, 1977, at Docket No. RP78-18 the Commission accepted for filing the alternate tariff sheets and suspended the use thereof until June 1, 1978, or until such time as they are made effective in the manner prescribed by the Natural Gas Act.

[3]Included as a part of said March 1, 1978, filing was a unit rate reduction of 0.04 cents per Mcf in jurisdictional rates attributable to the reduced advance payments balance on El Paso's books as of December 31, 1977, which reduction was made in conformity with the Advance Payment Adjustment Provision contained in El Paso's Stipulation and Agreement dated May 26, 1977, approved and accepted at Docket No. RP77-18. The effect of such Advance Payment Adjustment is included in the Base Tariff Rates suspended at Docket No. RP78-18, as Adjustment 7, Sheet 1; therefore, the 0.04 cents per Mcf reduction included in the March 1, 1978, filing is not included as an adjustment in the tariff sheets submitted herewith.

[4]In connection with the GRI adjustment described in (ii) above, on April 6, 1978, El Paso tendered for filing and acceptance its proposed GRI RD&D Funding Unit Adjustment Provision as permitted by ordering paragraph (G) of said Opinion No. 11. The April 6, 1978, tender, which is currently pending effectiveness, included a request by El Paso that El Paso's initial GRI RD&D Funding Unit of 0.12 cents per Mcf be permitted to become effective on June 1, 1978, concurrent with the end of the suspension period for the rates filed at Docket No. RP78-18. In the event that El Paso's GRI tariff tender is not made effective on June 1, 1978, as requested, El Paso states that it will be required to file with the Commission in this proceeding substitute tariff sheets replacing those sheets tendered herewith and containing the appropriate rates to be placed into effect on June 1, 1978, at Docket No. RP78-18.

[5]Also enclosed under the alternative tariff sheet tab are supporting schedules respecting the derivation of the increased rate reflected on the tendered alternative tariff sheets.

[6]Such alternate revised tariff sheets are described in the index describing the tariff sheets submitted herewith.

V 43 96

[6740-02]

[Docket No. RP78-60]

EL PASO NATURAL GAS CO.

Notice of Change in Rates

MAY 9, 1978.

Take notice that on April 28, 1978, El Paso Natural Gas Co. ("El Paso") tendered for filing: (i) a notice of change in rate under special Rate Schedule X-31 contained in El Paso's FERC Gas Tariff, Third Revised Volume No. 2; and (ii) proposed modifications to certain provisions applicable under said special rate schedule. Special Rate Schedule X-31 is comprised of the San Juan Gathering Agreement ("Gathering Agreement") dated January 31, 1974, as amended, between El Paso and Northwest Pipeline Corp. ("Northwest") and provides for the gathering of natural gas in the San Juan Basin area of northwestern New Mexico and southwestern Colorado.[1]

El Paso states that on January 27, 1978, it filed with the Federal Energy Regulatory Commission ("Commission") a notice of change in rate under special Rate Schedule X-31 contained in El Paso's FERC Gas Tariff, Third Revised Volume No. 2. Such filing also proposed modifications to certain currently effective provisions applicable under said special rate schedule.

By letter order issued February 24, 1978, at Docket No. RP78-34, the Commission rejected El Paso's above-mentioned notice of change in rate for failure to comply with the provisions of section 154.63(e)(2) of the Commission's Regulations Under the Natural Gas Act. Specifically, the Commission noted that the proposed increase in the gathering charge was based upon costs for the twelve (12) months ended August 31, 1976, as adjusted, per settlement in Docket No. RP77-18. Such base period does not reflect the twelve (12) consecutive months of most recently available actual experience. Said letter order stated such rejection is made without prejudice to any subsequent filing by El Paso which meets the conditions imposed by Section 154. El Paso submitted the instant tariff proposal based upon El Paso's twelve (12) consecutive months of most recently available actual experience, as required by section 154.63(e)(2) of the Commission's Regulations.

El Paso further states by Letter Agreement dated April 25, 1978, El Paso and Northwest have agreed to, *inter alia*, change the gathering charge applicable to special Rate Schedule X-31, from the currently effective 6.61¢ per Mcf to 13.39¢ per Mcf. Such proposed gathering charge is based upon a weighted average cost of service determined for El Paso's and Northwest's respective portions of the San Juan Basin gathering system. El Paso's costs in the instant filing are based on the twelve (12) months ended December 31, 1977, actual data. Upon effectiveness the gathering charge will be applied monthly to the balancing gas volumes received by each of the parties in accordance with Articles VIII and IX of the Gathering Agreement.

El Paso states that said Letter Agreement of April 25, 1978, also: (i) deletes Section 4 of Article IX and Exhibit F of the Gathering Agreement, inasmuch as such provisions have been satisfied and are no longer applicable under special Rate Schedule X-31; and (ii) modifies the wording of sections 5 and 6 of Article XIX. To implement the instant change in the gathering charge rate and the modifications necessary to special Rate Schedule X-31, as provided by the Letter Agreement dated April 25, 1978, El Paso is tendering herewith for filing and acceptance the following revised tariff sheets to its Third Revised Volume No. 2 tariff:

First Revised Sheet No. 466
First Revised Sheet No. 467
First Revised Sheet No. 476
First Revised Sheet No. 502

El Paso further states that such gathering charge is not designed to provide a general revenue increase, but is only designed to enable the parties to equitably recover the appropriate currrent costs of the gathering system operating arrangements which benefit both parties. Accordingly, El Paso states the change in the gathering charge proposed by the subject filing was filed in accordance with the minor rate increase requirements set forth in § 154.63(b)(4) of the Commission's Regulations Under the Natural Gas Act.

El Paso has requested that the instant notice of change in rate and the related tariff sheets by made effective thirty (30) days from the date that the Commission accepts the instant tender for filing. However, in the event the Commission suspends the proposed change in rate El Paso requests that such supension by limited to only one (1) day so the parties can collect the cost based charge as soon as possible. In this connection, El Paso is advised that Northwest filed concurrently its notice of change in rate and tariff tender providing for the identical modifications, as are reflected in the instant filing, to Northwest's special Rate Schedule X-24, and is requesting therein an effective date coincident with the effective date of El Paso's instant filing. El Paso has requested that the Commission permit the effectiveness of the instant filing and the related filing made by Northwest, described above, on the same date.

El Paso states that copies of the notice of change, together with the enclosures and modified tariff sheets, were mailed to Northwest Pipeline Corp., El Paso's interstate system customers and interested state regulatory commissions.

Any person desiring to be heard or to make any protest with reference to said tariff tender should, on or before May 19, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations Under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-342]

FLORIDA POWER & LIGHT CO.

Notice of Proposed Cancellation

MAY 8, 1978.

Take notice that on April 28, 1978, Florida Power & Light Co. (FP&L) tendered for filing pursuant to section 35.15 of the Commission's Regulations a notice of cancellation of service by FP&L under its FERC Electric Tariff to the Fort Pierce Utilities Authority (Fort Pierce), to take effect on June 1, 1978.

FP&L states that this cancellation of service is in accordance with the terms of the service agreement initiating service to Fort Pierce, which was filed on March 29, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or

[1]The Gathering Agreement was necessitated by the divestiture of El Paso's former Northwest Division System to Northwest effective as of January 31, 1974. Authorization for such gathering arrangement was granted by Federal Power Commission order issued September 21, 1973, at Docket Nos. CP73-331, *et al.* The Gathering Agreement is also on file as part of Northwest's FERC Gas Tariff as special Rate Schedule X-24.

before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13320 Filed 5-16-78; 8:45 am]

[6740-02]

[Docket No. CP78-311]

GAS TRANSPORT, INC.

Notice of Application

MAY 9, 1978.

Take notice that on April 27, 1978, Gas Transport, Inc. (Applicant), 109 North Broad Street, Lancaster, Ohio 43130, filed in Docket No. CP78-311 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of certain natural gas pipeline facilities presently owned and operated by Columbia Gas Transmission Corp. (Columbia), all as more fully set forth in the application on file with the Commission and open to public inspection.

It is stated that this application is a companion to Columbia's application in Docket No. CP78-247 for permission and approval to abandon certain natural gas facilities by sale to Applicant. Applicant seeks authorization herein to acquire and operate 1,666 feet of 10-inch transmission pipeline in Gravel Bank, Washington County, Ohio, which segment of pipeline is said to be used exclusively by Columbia to transport gas to Applicant. Applicant states that the facilities would continue to be used for the same purpose and that such facilities would also be available, by reason of their being owned and operated by Applicant, for the receipt of new gas supplies which Applicant may develop in an area near Gravel Bank in order to offset the effects, to the extent possible, of curtailments of deliveries from Columbia.

The facilities would be acquired at the net book value of approximately $7,507, to be financed with internally generated funds and-or interim short term bank loans.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP73-17; PGA78-3]

GRANITE STATE GAS TRANSMISSION, INC.

Notice of Proposed PGA Rate Increase

MAY 19, 1978.

Take notice that on May 2, 1978, Granite State Gas Transmission, Inc. (Granite State), 66 Market Street (P.O. Box 508), Portsmouth, N.H. 03801, tendered for filing Substitute Twenty-third Revised Sheet 3A in its FERC Gas Tariff, Original Volume No. 1, containing a proposed change in rates for effectiveness on June 1, 1978.

Granite State states that the purpose of its filing is to reflect in its rates the effect of the surcharge contained in the Gas Research Institute Rate Adjustment filed by Tennessee Gas Pipeline Co., a Division of Tenneco, Inc. (Tennessee) which Tennessee proposes to make applicable to deliveries of gas under its Rate Schedule G-6 to Granite State, effective June 1, 1978. Tennessee is Granite State's sole supplier of natural gas.

Granite State also withdraws the filing it tendered on April 10, 1978 in Docket No. RM78-14 to establish a Gas Research Institute Rate Adjustment Provision in its FERC Gas Tariff, Original Volume No. 1. The instant filing, made pursuant to its purchased gas cost adjustment provision, is in substitution for its earlier filing, Granite State avers.

Granite State further states that its purchased gas cost adjustment is applicable to its sales to Northern Utilities, Inc. (Northern) which is Granite State's only jurisdictional customer. According to Granite State, the annual effect of the proposed rate increase contained on Substitute Twenty-third Revised Sheet No. 3A is $4,442, based on sales for the twelve months ended February 28, 1978.

According to Granite State, copies of the filing were served upon Northern and the regulatory commissions of the States of Maine and New Hampshire.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-348]

GREEN MOUNTAIN POWER CORP.

Notice of Filing of Tariff Agreement Between Green Mountain Power Corp. and the Washington Electric Cooperative, Inc.

MAY 9, 1978.

Take notice that on May 2, 1978, Green Mountain Power Corp. (GMPC) tendered for filing a rate schedule pertaining to the sale of generation from GMPC's No. 5 gas turbine plant, located in Berlin, Vt., to the Washington Electric Cooperative, Inc. (WEC). GMPC states that the generation contract provides that WEC will purchase 700 Kw of capacity and related energy from the aforementioned plant from May 1, 1978, through October 31, 1978. By separate contract, GMPC proposes to provide transmission service to

MY 17 78
UMI

V 43 96

WEC for the power provided under the generation contract and for power furnished by others. GMPC indicates that the generation contract is similar in form to a contract, between GMPC and the Central Vermont Public Service Corp., filed with the FERC on March 31, 1978. The March 31, 1978 filing involved selling the Berlin unit at the identical rate now offered WEC.

The parties request that the Commission waive its notice requirements and permit the generation contract to become effective as of May 1, 1978.

Copies of this filing have been sent to the Vermont Public Service Board and the aforementioned electric system, according to GMPC.

Any person desiring to be heard or to protest said appliction should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-351]

GREEN MOUNTAIN POWER CORP.

Notice of Filing of Tariff Agreement Between Green Mountain Power Corp. and Central Vermont Public Service Corp.

MAY 9, 1978.

Take notice that on May 2, 1978, Green Mountain Power Corp. (GMPC) tendered for filing proposed changes in its FERC Electric Service Tariff as filed with the Federal Energy Regulatory Commission on March 31, 1978. GMPC indicates that the March 31, 1978 filing pertained to a transmission and generation contract between Green Mountain Power Corp. (GMPC) and Central Vermont Public Service Corp. (CVPS). GMPC states that these contracts terminate April 30, 1978. GMPC further states that the proposed tariff changes were brought about when both parties (Green Mountain Power Corp. and Central Vermont Public Service Corp.) agreed to extend the terms of the agreements from May 1, 1978 through October 31, 1978, subject to the following changes.

According to GMPC the generation and transmission contracts were amended to provide that GMPC would sell and transmit to CVPS 10,000 Kw of capacity and associated energy from its No. 5 gas turbine plant, located in Berlin, Vt.

GMPC requests that the Commission waive its notice requirements and permit the amended contracts to become effective as of May 1, 1978. Copies of this filing have been sent to the Vermont Public Board and to central Vermont Public Service Corp., according to GMPC.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-353]

INDIANA & MICHIGAN ELECTRIC CO.

Notice of Filing

MAY 10, 1978.

Take notice that Indiana & Michigan Electric Co. (I&M) on May 2, 1978, filed its demand charge for the period June 1 through September 30, 1978, pursuant to the demand rate formula contained in I&M's Rate Schedule FERC No. 20, Supplement No. 15 (Service Schedule G—Supplemental Power to Commonwealth Edison Co.) which I&M claims became effective on April 25, 1974.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-359]

INTERSTATE POWER CO.

Notice of Filing of Rate Schedule Amendments

MAY 11, 1978.

Take notice that Interstate Power Co. on May 5, 1978, tendered for filing proposed amendments to six of its FERC Electric Service Rate Schedules—Nos. 38, 67, 101, 103, 105, and 108. The Company indicates that the six rate schedules are separate electric service agreements between Interstate and the Minnesota communities of Jackson, Lakefield, Luverne, Adrian, Westbrook, and Worthington, respectively. Interstate proposes that the amendments expand the scope of the aforementioned rate schedules to provide for the transmission of "firm" electric power and energy, through Interstate's facilities, from the Missouri Basin Municipal Power Agency to each of the communities involved.

The Company requests waiver of the Commission's notice requirements to allow for an effective date of November 1, 1977 for all six rate schedules.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Streeet NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a perty must file a petition to intervene. Copies of this filing are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-367]

INVESTIGATION INTO WHOLESALE POWER TRANSACTIONS DURING TIME OF FUEL INADEQUACIES

Order Instituting Investigation Under the Federal Power Act

MAY 10, 1978.

As a result of a preliminary staff audit of a limited number of utilities that engaged in the sale, purchase or transmission of wholesale electric power during the course of the recent power shortages resulting from the coal strike, the Commission has determined that some utilities may have collected revenues in excess of a just and reasonable rate for the involved transactions. The results of the preliminary staff audit, that was undertaken at the direction of the Commission Chairman, are attached as Appendix A. The Commission has concluded that the questions raised by the staff audit warrant further investigation.

The investigation, undertaken pursuant to the Commission's authority under the Federal Power Act, will encompass, but not be limited to: (1) Whether extraordinary operating and billing practices that occurred during the strike were proper and in the public interest; (2) whether the selling, purchasing and transmitting utilities utilized appropriate filed rate schedules in rendering such service; or (3) whether the companies properly utilized their filed and effective fuel adjustment clauses to bill costs related to the transactions.

The investigation will be conducted by staff personnel appointed by the Commission to act as designated officer of the Commission. Such designated officer is hereby directed to invite state public utility commissions to cooperate in the investigation. Upon conclusion of his inquiry, the designated officer shall prepare a report to the Commission as to his findings and recommendations.

The Commission finds: It is necessary and appropriate for purposes of the Commission's administration of the Federal Power Act to institute an investigation for the purposes set forth in this order.

The Commission orders: (A) Pursuant to the Federal Power Act and the Commission's Rules and Regulations thereunder, an investigation is hereby instituted.

(B) It is ordered that for the purposes of this investigation Daniel C. Lamke is hereby designated officer of this Commission and is empowered to administer oaths, and affirmation, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, or other records deemed relevant and material to the inquiry and to perform all other duties in connection therewith as prescribed by law.

(C) The designated officer shall report his findings and recommendations to the Commission.

By the Commission.

KENNETH F. PLUMB,
Secretary.

MAY 4, 1978.

Memorandum to: The Commission.
From: William W. Lindsay, Director, Office of Electric Power Regulation.
Subject: Investigation Into the Wholesale Transactions During the Coal Shortage.

On April 3, 1978, the Commission issued a press release announcing that the staff was commencing field audits to verify intercompany billings of utilities operating in and selling electricity into the area affected by the coal strike. The field audit took place at American Electric Power Co. (AEP) from March 30 through April 6, 1978, at Allegheny Power System (APS) from April 3 through April 6 and April 12 and 13 and at Pennsylvania-New Jersey-Maryland Interconnection (PJM) Dispatch Center and at some of the member companies of PJM from March 30 through April 6, 1978. In addition, billing information was received from eight other companies for the purpose of determining whether other companies should be audited in addition to AEP, APS and PJM.

The investigation concentrated on the incremental cost rates contained in the wholesale rate schedules and the effects of such costs on the wholesale fuel adjustment clause. The initial investigation focused primarily on transactions during the months of January and February.

Substantial transactions took place during January and February. Attachment A contains a summary of the major transactions of AEP, APS and PJM. For example, PJM sold over 1,200,000 MWH of energy during January and 1,700,000 MWH during February to APS, Virginia Electric and Power Co. and Cleveland Electric Illuminating Co. (CEI).[1] APS purchased significant amounts of power for use on its system. For example, it purchased 750,000 MWH of short-term power during February. APS also purchased large amounts of power for the purpose of reselling it to AEP, Ohio Edison Co. (OE), and Duquesne Light Co. These sales amounted to approximately 310,000 MWH during February.

APS resales were one of the largest outside sources of power to AEP during January and February. During February AEP also began purchasing substantial amounts of power from systems to the west, such as Commonwealth Edison Co. and Illinois Power Co. Most of the power purchased by AEP was resold to other systems with AEP retaining only small amounts for use on its system. The largest buyers from the AEP system during January and February included OE, Columbus and Southern Ohio Electric Co. and Cincinnati Gas & Electric Co.

The information received from the eight additional companies from which preliminary data were requested indicates that Union Electric Co. and Kentucky Utilities Co. also purchased and resold significant amounts of power to parties other than the three covered by the field audit. Attachment B is a summary of transactions for one randomly selected hour during the month of February. This single hour may not be entirely representative of the period but it does give some idea of the magnitude, types and direction of the transactions.

The audits of the three power pools indicate that the abnormal conditions imposed by the coal strike caused extraordinary operating practices by the pools and, in turn, prompted some deviations from normal billing practices. For example, APS was off economic dispatch from the first day of the coal strike to conserve fuel. AEP was similarly off economic dispatch beginning January 23, 1978. PJM remained on economic dispatch throughout the strike but did restrict the use of some plants to operate at less than full capacity in order to conserve fuel. Conservation of coal on the PJM system which has substantial oil-fired capacity was not nearly as significant as on the AEP and APS systems. AEP and APS dispatched their systems so as to run the plants with the largest coal supplies relative to the size of the unit without regard to the incremental cost, which is the usual criterion for economic dispatch. Such deviation from economic dispatch raises questions as to the proper billing under the fuel adjustment clause in that the inclusion of certain costs are dependent on the purchases being made on an economic dispatch basis. Being off economic dispatch also creates a potential definitional problem as to the meaning of incremental cost in the filed rate schedule when the system is operating in the non-economic dispatch mode.

AEP ceased utilizing a "first come—lowest cost" priority in making sales to other systems (which is their usual practice) and began pricing at a uniform incremental cost for all sales of the same category.

Replacement fuel costs used in the determination of the incremental cost rate are normally based on the estimated cost of deliveries of fuel to each plant in the case of APS and PJM[2] and the highest cost of actual deliveries to each plant during the month to meet the quantity of fuel consumed for the transactions in the case of AEP. AEP, however, departed from this and utilized a single replacement cost for the entire system during January and February. AEP's normal practice is to price each plant source separately based on fuel deliveries of each plant.

During January and February, APS used estimated replacement costs even though no actual replacement deliveries were contemplated in some cases. Since neither AEP nor APS made substantial sales from their own systems, however, the changes in the normal practice of calculating replacement costs would not have a substantial rate effect. A possible exception is intra-pool billing where such costs are also utilized by APS. This area requires further investiga-

[1] This compares to a total of 819,000 MWH sales to PJM, the New York Power Pool (NYPP) and New England Power Pool during the 5-month period of January through May of 1974 associated with the fuel oil shortage during the Arab Oil Embargo as reported in the Federal Power Commission Order issued in the "Coal-by-Wire" proceeding in Docket No. E-8550 et al.

[2] Actual practice varies for some companies within PJM.

V 4 3 9 6

tion.[3] Further inquiry should also be made comparing PJM's actual replacement costs with its estimates since substantial sales were made by PJM.

There appears to be non-compliance with the Commission's fuel adjustment clause regulations with respect to the members of all three pools in treatment of emergency energy purchases.[4] In all instances, the entire cost of emergency energy purchases was included in the fuel adjustment clause calculation as opposed to inclusion of only the fuel portion of such costs. This does not appear to be appropriate in that such purchases were not made on an economic dispatch basis to replace higher fuel costs on the purchasing system. This is the requirement of the Commission's Order No. 517 which established the current fuel adjustment clause regulation permitting the inclusion of the total energy cost where the purchase is on an economic dispatch basis to replace fuel cost on the purchaser's system.

In the "Coal-by-Wire" proceeding during the Arab oil embargo, fuel conservation energy rate schedules were found to be appropriate schedules for the purpose of moving power over multiple systems to replace fuel in short supply. These rate schedules provide for a fixed "transmission rate" usually stated in mills/kwh. Generally the fuel conservation energy rate schedules were limited to off-peak usage. These rates continue as filed rate schedules even though many have expired as contractual agreement. None of the transactions in January and February took place under these rate schedules. Additionally, PJM filed a revised conservation energy rate schedule with APS and NYPP on December 13, 1977, specifically in anticipation of the needs of the coal strike. These filings were suspended and made subject to refund by Commission Order issued on Feburary 13, 1978 in Docket No. ER78-107 et al. Additionally, conservation energy rate schedules were subsequently filed by PJM with Cleveland Electric Illuminating (CEI) and suspended by order issued February 24, 1978 in Docket No. ER78-219. AEP tendered filings with Illinois Power Co. in Docket No. ER78-229 and with APS and OE in Docket Nos. ER78-249 and 252. These were suspended by order issued on March 1, 1978 and April 13, 1978, respectively.

The recently filed conservation energy schedules which were suspended were not utilized for any of the transactions in January and February. The transactions during these months were instead billed primarily as short term and emergency transactions. Since many of the transactions involved the resale of power through multiple systems, the percentage adder contained in these rates produced substantially more revenues than would have been the case had the fixed "transmission" charge contained in the fuel conservation energy rate schedules been utilized. The appropriateness of billing these transactions as short term power or emergency energy is questionable since adequate capacity existed on the various systems but was not being utilized primarily because of conserving fuel stocks, i.e., the stated purpose of conservation energy rate schedules.

The revenues produced by the percentage adders appear to far exceed the actual incremental cost of such transactions on the "transmitting" system. The percentage adders in the short term and emergency rates generally are not intended as compensation for losses, such costs being separately recovered as part of the incremental costs.[5] The costs other then losses would not support the revenues produced by such adders.

Summary and Recommendations

The audit of the three pools discloses the following facts: (1) Substantial transactions billed as short term, emergency and non-displacement power took place during the coal strike. The percentage adders contained in these rates produced substantial revenues for sellers and for "transmitters"; (2) Extraordinary operating and billing practices were utilized; (3) Some noncompliance with the filed rate schedules occurred. (4) The rate schedules which appear to be the most appropriate for the service (the conservation energy rate schedules) were not utilized for billing the transactions; and (5) The use of emergency and short term power rate schedules for this service during the coal strike was questionable whether or not fuel conservation energy rate schedules were on file. To the extent they were on file, the use of emergency and short term power schedules was especially questionable.

In light of the above, it is recommended that the Commission set for formal investigation the transactions which occurred during the coal strike under the jurisdictional rate schedules involving the members of the three pools and any other public utilities supplying or transmitting power during the coal strike for the purpose of conserving coal supplies. Such utilities include, among others, the members of the NYPP, CAPCO, ILL-MO and KIP pools and Commonwealth Edison Co.

[3] Additionally, APS's use of past demands (three highest monthly demands in the prior 24 month period) under the pooling agreement to allocate all purchases among the pool members should also be investigated further to determine its reasonableness as applied to energy purchases for the purpose of conserving energy.

[4] This problem does not appear to be limited to the time of the coal strike.

[5] The exception to this general statement is the 20 percent adder contained in AEP's non-displacement power service with OE. In the case, losses are included in the adder. However, the audit disclosed that AEP was improperly billing for the losses. This amounted to an estimated overcharge of $100,000 in February.

[Docket No. RM77-14]

KENTUCKY WEST VIRGINIA GAS CO.

Notice of Filing Revised Tariff Sheets

MAY 9, 1978.

Take notice that Kentucky West Virginia Gas Co. (Kentucky West), on April 20, 1978, tendered for filing revised sheets of its FERC Gas Tariff, Original Volume No. 1:

First Revision of Original Sheet No. 8
First Revision of Original Sheet No. 10
First Revision of Original Sheet No. 28
First Revision of Original Sheet No. 29-37
First Revision of Original Sheet No. 38

The purpose of this filing is to provide for the establishment of a funding charge for RD&D by GRI and to provide for the collection thereof through a rate adjustment clause for each rate schedule imposing a charge of 0.12¢ per dekatherm.

Copies of the filing were served upon Kentucky West's jurisdictional customers and the Public Service Commission of Kentucky.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before May 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-355]

LOCKHART POWER CO.

Notice of Proposed Tariff Change

MAY 10, 1978.

Take notice that Lockhart Power Co. (Lockhart) on May 3, 1978, tendered for filing proposed changes in its FERC Electric Tariff, Rate Schedule Resale and Rate Schedule O. Lockhart states that the proposed changes would increase annual revenues from jurisdictional sales and service by $42,747 based on the 12 months ended December 31, 1977.

Lockhart further states that it is seeking the proposed increase in jurisdictional revenues primarily because of increased costs associated with capital expenditures to upgrade its transmission power supply system. According to Lockhart, these capital expenditures have been necessary to meet customer load requirements, insure system capability, improve reliability and create better flexibility of operations. Lockhart proposes an effective date of June 2, 1978.

Copies of this filing have been served on the City of Union, S.C., and the Public Service Commission of the State of South Carolina, according to Lockhart.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP68-75]

NORTHERN NATURAL GAS CO.

Notice of Petition to Amend

MAY 10, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977), and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activiated on October 1, 1977. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

Take notice that on April 28, 1978, Northern Natural Gas Co. (Petitioner), 2223 Dodge Street, Omaha, Nebr. 68102, filed in Docket No. CP68-75 a petition to amend the order of May 20, 1968 (39 FPC 821) as amended, issued by the FPC in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to provide for the continued delivery of exchange gas to Phillips Petroleum Co. (Phillips) at two additional delivery points pursuant to Petitioner's currently effective Rate Schedule X-18 of its FERC Gas Tariff, Original Volume No. 2, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of May 20, 1968, Petitioner was granted in the instant docket permission and approval to abandon its 20-inch Gray County line (12 miles) by sale to Phillips and was authorized to construct and operate certain measuring station facilities and to exchange with and transport natural gas for Phillips.

Petitioner states that owing to an inadvertance two gas wells have been attached to the existing gathering system of Phillips as additional points in the exchange, absent FERC authorization. Petitioner states that it and Phillips are parties to the following amendments to the Gray County gas exchange agreement providing for inclusion of these wells:

Amendment dated May 1, 1972

Name of well: Cox "F" No. 1.
Location: Sec. 37, Block 11, W. Ahrenbeck & Bros. Survey, Ochiltree County, Tex.
Initial delivery date: June 1, 1972.

Amendment dated December 1, 1977

Name of well: Etling No. 1.
Location: Sec. 7, T. 1 N. R. 13 E., Texas County, Okla.
Initial delivery date: February 6, 1978.

Petitioner states that originally, the Etling No. 1 well was connected to Petitioner's gathering system; and as delivery pressure of the well decreased resulting in the well's not being able to produce against the existing gathering line pressures, the decision was made to attach the well to Phillips' low-pressure gathering system.

Pursuant to the above-described amendments, Petitioned proposes to continue the delivery to Phillips of gas volumes owing to Petitioner's share in the production of the wells. To effect the delivery, Petitioner is presently operating facilities which connect the wells to the low-pressure gathering system of Phillips, which facilities consist of a measuring station at the wellhead of the Cox F No. 1 and approximately 0.26 mile of 4-inch gathering line and a measuring station which connects the Etling No. 1 Well, it is stated. Petitioner indicates that redelivery of gas exchange volumes by Phillips to Petitioner would be made at the existing delivery points in Ellis

County, Okla., and Gray County, Tex., pursuant to the Gray County gas exchange agreement, as amended.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Com-will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-8]

NORTH PENN GAS CO.

Notice of Proposed Changes in FERC Gas Tariff

MAY 8, 1978.

Take notice that North Penn Gas Co. (North Penn) on May 2, 1978, tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1, pursuant to its PGA Clause for rates to be effective June 1, 1978.

North Penn states that Fifty-Fourth Revised Sheet No. PGA-1 reflects a decrease of 22.173 cents per Mcf to the rates as submitted for Commission approval on April 26, 1978 in Fifty-Third Revised Sheet No. PGA-1.

The revised tariff sheet reflects increases filed by North Penn's pipeline suppliers, Consolidated Gas Supply Corp., Tennessee Gas Pipeline Co., and Transcontinental Gas Pipe Line Corp., all for effectiveness June 1, 1978, and a surcharge credit to be effective for the six-month period June 1, 1978, through November 30, 1978.

North Penn requests waiver of any of the Commission's Rules and Regulations in order to permit the proposed rates to go into effect on June 1, 1978.

Copies of this filing were served upon North Penn's jurisdictional customers, as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-8]

NORTH PENN GAS CO.

Notice of Proposed Changes in FERC Gas Tariff

MAY 5, 1978.

Take notice that North Penn Gas Co. (North Penn) on April 26, 1978, tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1, pursuant to its PGA Clause for rates to be effective May 1, 1978.

North Penn states that the change in rates reflected in Fifty-Third Revised Sheet No. PGA-1 reflects an increase of 1.668 cents per Mcf to the rates as submitted for Commmission approval on March 6, 1978, in Fifty-Second Revised Sheet No. PGA-1.

The increase in rates contained in Fifty-Third Revised Sheet No. PGA-1 reflects an increase in rates from North Penn's pipeline supplier, Consolidated Gas Supply Corp. for effectiveness May 1, 1978.

North Penn requests waiver of any of the Commission's Rules and Regulations in order to permit the proposed rates to go into effect on May 1, 1978.

Copies of this filing were served upon North Penn's jurisdictional customers, as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. OR78-5 (formerly ICC Docket Nos. NOR 35794 and NOR 35852)]

NORTHVILLE DOCK PIPE LINE CORP. AND CONSOLIDATED PETROLEUM TERMINAL, INC., ET AL.

Notice of Further Extension of Time

MAY 2, 1978.

On April 21, 1978, Northville Dock Pipe Line Corp., Consolidated Petroleum Terminal, Inc., and Total Resources, Inc. (Petitioners), filed a motion for a further extension of time to and including May 30, 1978, within which to file replies to the administrative appeals from two orders issued by the Interstate Commerce Commission, filed in the captioned proceeding. Upon motion by the Commission Staff Counsel, a previous extension of time for filing replies was granted by Notice issued April 25, 1978. Petitioners' motion states that Staff Counsel has no objection to the further extension of time.

Upon consideration, notice is hereby given that a further extension of time is granted to and including May 30, 1978, within which to file replies to the administrative appeals filed in the above referenced proceeding.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-59]

NORTHWEST PIPELINE CORP.

Notice of Change in Rate

MAY 9, 1978.

Take notice that on April 28, 1978, Northwest Pipeline Corp. ("Northwest") tendered for filing proposed changes in special Rate Schedule X-24 of its FERC Gas Tariff, Original Volume No. 2. The following revised tariff sheets reflect the proposed changes of the instant filing:

First Revised Sheet No. 60
First Revised Sheet No. 68
First Revised Sheet No. 69
First Revised Sheet No. 70
First Revised Sheet No. 79
First Revised Sheet No. 104

Special Rate Schedule X-24 constitutes the San Juan Gathering Agreement ("Gathering Agreement") dated January 31, 1974 between Northwest and El Paso Natural Gas Co. ("El Paso") and provides for the gathering

M Y 1 7 7 8 UMI

of natural gas in the San Juan Basin area of northwestern New Mexico and southwestern Colorado. As more fully explained in the instant filing, Northwest and El Paso, pursuant to a Letter Agreement between the parties dated April 25, 1978, have agreed to increase the gathering charge of the subject rate schedule (and of El Paso's related special Rate Schedule X-31) from the currently effective 6.61 cents to 13.39 cents per Mcf. In addition, said Letter Agreement: (i) deletes section 4 of Article IX and Exhibit F of the Gathering Agreement and (ii) modifies the wording of sections 5 and 6 of Article XIX.

Northwest requests that the instant filing be accepted and made effective by the Commission thirty (30) days from the date of such filing. However, in the event the proposed change in rate is suspended by the Commission, Northwest requests that such suspension be limited to only one (1) day inasmuch as the proposed rate is cost based and Northwest desires to recover its costs at the earliest possible date. Northwest understands El Paso is concurrently filing its notice of rate change providing for the identical modifications and is asking for an effective date coincident with the effective date of Northwest's filing. Northwest requests that the respective filing of each company be given the same effective date.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No.CP78-308]

NORTHWEST PIPELINE CORP.

Notice of Application

MAY 5, 1978.

Take notice that on April 27, 1978, Northwest Pipeline Corp. (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP78-308 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 7,000 Mcf of natural gas per day for Cordillera Corp. and Wyoming Gas Fuel Corp. (Producer), all as more fully set forth in the application of file with the Commission and open to public inspection.

The application states that Producer has participated in the development of or has otherwise acquired a supply of natural gas in Lincoln County, Wyo., which it desires to have transported and delivered for its account at various points where Applicant is currently authorized to sell and deliver gas to Wyoming Industrial Gas Co. (Wyoming Industrial) and to Utah Gas Service Co. (Utah Gas).[1] Consequently, Producer and Applicant have entered into a gas purchase and transportation agreement dated February 27, 1978, which agreement provides that Producer would cause to be delivered to Applicant up to 7,000 Mcf of natural gas per day (excluding any volumes sold by Producer to Applicant), presently or hereafter owned or controlled by Producer in the Lincoln County areas. Applicant states that initially, the proposed volumes of gas would be delivered to it for Producer's account, by FMC Corp. (FMC) at a proposed point of interconnection between the facilities of Applicant and FMC in Lincoln County, Wyo., where Applicant would construct a tap and metering facilities to receive such gas.

It is stated that Producer would sell and Applicant would purchase for its own use any gas in excess of Producer's requirements at the points of redelivery hereunder; provided, however, that Applicant would in any event have the right to purchase a minimum of 25 percent of the volumes delivered to Applicant for Producer's account. The balance of the volumes delivered to Applicant for Producer's account would then be transported by Applicant, either directly or by displacement to one or more of Applicant's existing points of sale and delivery to Wyoming Industrial and/or Utah Gas, where thermally equivalent volumes, less compressor fuel, would be redelivered for Producer's account.

Applicant indicates that it would pay Producer for each Mcf of gas purchased hereunder an intial price of $1.48 cents plus tax, Btu and other adjustments, as provided by Federal Power Commission Opinion No. 770-A[2].

Applicant states that for those volumes transported directly and redelivered to Wyoming Industrial for Producer's account, it would charge Producer a rate equal to 16.03 cents per Mcf, which price is Applicant's current average, rolled-in transmission system cost-of-service. Applicant further states that for those volumes transported by displacement and redelivered to Utah Gas for Producer's account, it would charge Producer a rate equal to 8.0 cents per MCf, approximately 50 percent of Applicant's average, rolled-in transmission cost-of-service. Also, Applicant, as compensation for compressor fuel usage, would retain 2 percent of all volumes transported directly for Producer's account.

Applicant states that it would construct the aforementioned tap and metering facilities necessary to receive deliveries of gas from FMC for Producer's account pursuant to its budget-type certificate authorization.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13339 Filed 5-16-78; 8:45 a.m.]

[1] Producer, Wyoming Industrial, and Utah Gas are affiliates. Wyoming Industrial and Utah Gas are customers of Applicant.

[2] This price in only applicable to gas sold by Producer to Northwest.

V 43 96

[6740-02]

[Docket No. ER78-354]

OTTER TAIL POWER CO.

Notice of Initial Rate Filing

MAY 10, 1978.

Take notice that Otter Tail Power Co. (Otter Tail), of Fergus Falls, Minn., on May 3, 1978, tendered for filing a rate covering a new service to be provided to East River Electric Power Cooperative, Inc. (East River), for a pipeline pumping load of Dome Pipeline Corp. (Dome), of Calgary, Alberta, Canada.

Otto Tail states that the new rate is embodied in an agreement between East River and Otter Tail in the form of Supplement No. 1 to the Interconnection and Transmission Service Agreement between East River Electric Power Cooperative, Inc., Madison, S.D., and Otter Tail Power Co., Fergus Falls, Minn., on file with the Commission as Rate Schedule FERC No. 168. Otter Tail further states in its filing that the new rate is to provide service to a new load not contemplated by the original agreement (FERC No. 168) and is designed to provide service at Otter Tail's fully allocated cost.

Otter Tail requests that the new rate (Supplement No. 1 to FERC No. 168) be permitted to become effective on June 1, 1978, or as soon as service can be initiated at the new point of interconnection, if that is earlier, and requests waiver of the Commission's rules, if necessary, to permit the rate to become effective at that time.

Copies of the filing were served upon East River Electric Power Cooperative, Inc., Traverse Electric Cooperative, and the Public Service Commission, Department of Public Service, State of Minnesota, according to Otter Tail.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13401 Filed 5-16-78; 8:45 am]

[6740-02]

[Docket Nos. CP75-140, etc.]

PACIFIC ALASKA LNG CO. ET AL.

Order Granting Timely and Late Petitions to Intervene Consolidating Proceedings, and Prescribing Further Procedures

MAY 11, 1978.

In the matter of Pacific Alaska LNG Co., et al., Docket Nos. CP75-140, etc.; Pacific Indonesia LNG Co., et al., Docket Nos. CP74-160, etc.; Pacific Lighting Gas Development Co., Docket Nos. CI78-453; Pacific Simpco Partnership, Docket Nos. CI78-452.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "saving provisions" of section 705(b) of the DOE Act provide that proceeedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)-(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —— provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Three primarily procedural motions are currently ripe for Commission decision and none have been deemed denied by operation of law. Specifically: (1) Three petitions to intervene pursuant to section 1.8 of the Commission's Rules of Practice and Procedure filed in Docket Nos. CP75-140, et al. (*Pac Alaska*), (2) Requests pursuant to section 1.12 to consolidate producer applications with Docket Nos. CP75-140, et al., and (3) A joint motion, pursuant to section 1.12, for a procedural order to consolidate Docket Nos. CP74-160, et al. (*Pac Indonesia*) with Docket Nos. CP75-140, et al. (*Pac Alaska*) for certain limited purposes; and responses thereto. We will address these matters seriatim.

In response to a "Notice of Petition for a Declaratory Order" issued December 5, 1977, (FR ——), timely interventions were filed by Northern Natural Gas Co. on December 27, 1977, and Energy Terminal Services Corp. on December 23, 1977. Each alleges a unique interest in the outcome of these jurisdictional petitions and their participation may be in the public interest and will not delay consideration of this proceeding.

Ogden Marine Indonesia filed a petition on March 24, 1978, stating that as a transporter for Pac Indonesia they have a substantial interest and that they were not aware of their need to participate until receipt of certain communication concerning a prehearing conference noticed March 21, 1978. Without commenting on the arguments advanced and having reviewed this petition, we are convinced that good cause is shown to grant said intervention, and said late petitioner will be expected to take the record as it finds it and neither delay nor complicate said proceeding.

II

On February 27, 1978, Pacific Alaska LNG Associates and Western LNG Terminal Associates (Movants) moved that the producer applications represented by Docket Nos. CI78-452 and CI78-453 be consolidated with the *Pac Alaska* proceeding. Movants argue that by Order issue January 10, 1978, the applications of certain companies concerned with proposed sales of natural gas at Cook Inlet, Alaska, were consolidated with the *Pac Alaska* case. And, as the two subject applications concern similar proposals concerning the sale of natural gas at Cook Inlet, they should also be consolidated with the Movants' applications for purposes of hearing and decision. No responses have been filed to this motion.

Therefore, we find that the applications in Docket Nos. CI78-452 and CI78-453 present common questions of law and fact within the meaning of section 1.20(b) of the Rules of Practice and Procedure and should be consolidated for hearing and decision.

III

On March 21, 1978, Movants also moved the Commission and the Economic Regulatory Administration (ERA) for an order consolidating the hearing in *Pac Alaska* with the amendment filed by the Pacific Indonesia LNG Co. in Docket No. ERA77-001-LNG to such extent that each requests a joint situs for an LNG facility on the south-central California coast. Answers to the motion were filed by Bixby Ranch Co. as well as Hollister Ranch Owners' Association and the Santa Barbara Citizens for Environmental Defense on April 5, 1978, and the Sierra Club (Respondents) on April 6, 1978.

Respondents object to this motion only to the extent that it would waive initial decision by the Presiding Administrative Law Judge at the Commission and as it would provide for a two-phased proceeding, a decision in the *Pac Indonesia* proceeding prior to a decision in the *Pac Alaska* proceeding. No other answers were filed.

The joint regulation[1] issued by the Commission and the Secretary of the Department of Energy (Secretary) on October 1, 1977 (42 FR 55534), provided that the *Pac Indonesia* proceeding would continue before the Commission for initial decision and subsequent briefing but that final approval authority would rest in ERA. The Commission and the Secretary by an amendment to the joint regulation[2] have agreed that the same procedure should be followed for the instant amendment in the *Pac Indonesia* proceeding.

Therefore, as both matters are properly before the Commission for hearing and the proceedings present common questions of law and fact within the meaning of Section 1.20(b), they should be consolidated for hearing. Also, it would defeat the purpose of said consolidation, as stated by Respondents, to authorize a phased proceeding, and therefore such request is denied.

The joint action of the Commission and the Secretary, however, does not address the question of whether the initial decision of the Presiding Administrative Law Judge should be waived. Ordinarily, such waiver is not favored in order to utilize the familiarity and expertise of the presiding judge. Good cause has not been shown for such waiver. Additionally, the Secretary has not yet taken a position on the matter and since the companion amendment provides for such initial decision, we would be inclined to give the Secretary's position great weight.[3] Accordingly, the request for waiver of the initial decision is hereby dismissed as premature.

The Commission orders: (A) The above-named petitioners are permitted to intervene in this consolidated proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene; and *provided, further,* that the admission of such intervenors shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The applications of Pacific Lighting Gas Development Co., Docket No. CI78-453, and Pacific-Simpco Partnership, Docket No. CI78-452, are consolidated with the *Pacific Alaska* proceeding for purpose of hearing and decision.

(C) The application of *Pacific Alaska LNG Associates, et al.,* in Docket Nos. CP75-140, et al. are consolidated with the amendment filed by *Pacific Indonesia LNG Co.* in Docket No. ERA77-001-LNG for purposes of hearing and briefing and good cause has not been shown to order phasing of said limited consolidated proceeding.

(D) The request for waiver of the initial decision by the Presiding Administrative Law Judge is dismissed as premature.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-347]

PACIFIC POWER & LIGHT CO.

Notice of Filing

MAY 10, 1978.

Take notice that Pacific Power & Light & Co. (Pacific) on May 1, 1978, tendered for filing, in accordance with section 35.13 of the Commission's Regulations, an amendment to Pacific's Rate Schedule FPC No. 123 providing for a new Point of Delivery to Tri-State Generation and Transmission Association, Inc. (Tri-State).

Copies of the filing were supplied to Tri-State, according to Pacific.

Pacific indicates that service under this agreement is proposed to commence on or about July 1, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 31, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-352]

PACIFIC POWER & LIGHT CO.

Notice of Rate Filing

MAY 10, 1978.

Take notice that Pacific Power & Light Co. (Pacific) on May 2, 1978, tendered for filing, in accordance with section 35.12 of the Commission's Regulations, a rate schedule for use of its substation facilities by Portland General Electric Co. (Portland General).

Pacific proposes that service under this agreement commence on or about July 1, 1978.

Copies of the filing were supplied to Portland General, according to Pacific.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 31, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. CP77-253]

PANHANDLE EASTERN PIPE LINE CO.

Notice of Petition To Amend

MAY 10, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (Aug. 4, 1977) and Executive Order No. 12009,

MY 17 78 UMI

V 43 96

42 FR 46267 (Sept. 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. The functions which are the subject of these proceedings were specificaly transferred to the FERC by section 402(a) (1) or (2) of the DOE Act.

Take notice that on May 1, 1978, Panhandle Eastern Pipe Line Co. (Petitioner), P.O. Box 1642, Houston, Tex. 77001, filed in Docket No. CP77-253 a petition to amend further the order of December 9, 1977, as amended, issuing a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act in the instant docket so as to authorize the delivery of additional natural gas by Petitioner to Michigan Consolidated Gas Co.—Interstate Storage Division (Consolidated) for storage by Consolidated, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of December 9, 1977, as amended January 4, 1978, Petitioner is authorized to transport and deliver to consolidated for storage and redelivery to Petitioner up to 12,400,000 Mcf of gas for a period of either seven or fourteen years, with six or thirteen years, respectively, now remaining, in accordance with two separate gas storage agreements dated October 31, 1976, as amended June 10, 1977, and November 1, 1976, as amended June 10, 1977. The October 31, 1976 agreement, as amended, provides for the storage of up to 6,000,000 Mcf of gas for firm service; and the November 1, 1978 agreement, as amended, provides for the storage of up to 6,400,000 Mcf of gas for offpeak service, it is said.

Petitioner states that in order to provide additional service required by its customers, Consolidated and Petitioner have entered into an amendment to the October 31, 1976, gas storage agreement, as amended, so as to provide for the maximum volumes of gas to be stored for firm service to be increased to 12,250,000 Mcf; and furthermore, should Petitioner's customers elect to defer redelivery from one winter period to the next winter period of any part of the volumes stored, then to the extent that such deferred volumes exceed 2,450,000 Mcf (rather than 1,200,000 Mcf as originally provided in said agreement of October 31, 1976, Petitioner's customers would furnish an additional 1 percent of such excess as compressor fuel in order to permit the cycling of such excess gas to maintain storage capacity.

Petitioner states that in order to render the additional gas storage service beginning with the 1978-79 storage season, Consolidated would use the Taggart Storage Field and associated pipeline and compression facilities for which Consolidated has been issued temporary certificates in Docket No. CP76-254. The application states that Consolidated would have sufficient storage capacity available at the Taggart Storage Field beginning with the 1978-79 storage season because of the determination by Michigan Wisconsin Pipe Line Co. (Michigan Wisconsin) that it would not require the storage of gas by Consolidated during the last year of a temporary storage service authorized in Docket Nos. CP75-182 and CP75-200, respectively. It is indicated that the additional storage volumes that are proposed herein to be made available would be used by seven of Petitioner's customers pursuant to six amendments to existing storage agreements and one new storage agreement, as follows:

ADDITIONAL FIRM REQUIREMENTS (MCF)

Customer	
Indiana Gas Co	2,000,000
Citizens Gas & Coke Utility	1,000,000
Northern Indiana Public Service Co	2,000,000
Central Illinois Public Service Co. (new service)	1,000,000
Citizens Gas Fuel Co	100,000
Richmond Gas Co	100,000
Ohio Gas Co	50,000
Total	6,250,000

It is stated that Michigan Wisconsin would transport the gas to and from the Taggart Field through its existing pipeline facilities and would charge 4.52 cents per Mcf of gas transported, which charge would be passed on to Petitioner's customers.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP78-62]

PANHANDLE EASTERN PIPE LINE CO.

Notice of Proposed Changes

MAY 9, 1978.

Take notice that Panhandle Eastern Pipe Line Co. (Panhandle) on May 1, 1978, tendered for filing proposed changes in the following revised tariff sheets:

FERC Gas Tariff, Original Volume No. 1

Twenty-Fourth Revised Sheet No. 3-A
First Revised Sheet No. 3-B
Second Revised Sheet No. 43-1
Fourth Revised Sheet No. 43-2
Fifth Revised Sheet No. 43-3
Sixth Revised Sheet No. 43-4

FERC Gas Tariff, Original Volume No. 2

Second Revised Sheet No. 93
Second Revised Sheet No. 135
Second Revised Sheet No. 211
Third Revised Sheet No. 375
First Revised Sheet No. 439
First Revised Sheet No. 462
First Revised Sheet No. 463
First Revised Sheet No. 484
First Revised Sheet No. 556
First Revised Sheet No. 611
First Revised Sheet No. 640
First Revised Sheet No. 641
Second Revised Sheet No. 694
Second Revised Sheet No. 695
First Revised Sheet No. 724
First Revised Sheet No. 725
Second Revised Sheet No. 784
Second Revised Sheet No. 801
First Revised Sheet No. 811
First Revised Sheet No. 812
First Revised Sheet No. 848
First Revised Sheet No. 849
Second Revised Sheet No. 875
Second Revised Sheet No. 876
First Revised Sheet No. 963
First Revised Sheet No. 964

Panhandle states that these revised tariff sheets implement a general rate increase to its jurisdictional sales of $73,565,192 annually based on a test year ending January 31, 1978, adjusted for charges known and measurable to October 31, 1978.

Panhandle states that the increased rates are necessitated by increased costs at all levels including operating costs, increased capital costs, a 10.52 percent rate of return, increased gas supply facilities and increased costs associated with Transmission and Compression of Costs By Others. The proposed effective date of the tendered sheets is June 1, 1978.

Panhandle further states copies of this filing were served on Panhandle's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 23, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ID-1831]

PETER J. DEMARIA

Notice of Application

MAY 10, 1978.

Take notice that on April 25, 1978, Peter J. DeMaria, filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Treasurer, Appalachian Power Co	Electric utility.
Treasurer, Beech Bottom Power Co	Do.
Treasurer, Cardinal Operating Co	Do.
Treasurer, Indiana & Michigan Electric.	Do.
Treasurer, Indiana & Michigan Power.	Do.
Treasurer, Kanawha Valley Power Co.	Do.
Treasurer, Kentucky Power Co	Do.
Treasurer, Kingsport Power Co	Do.
Treasurer, Michigan Power Co	Do.
Treasurer and director, Ohio Electric Co.	Do.
Treasurer and director, Ohio Power Co.	Do.
Treasurer, wheeling Electric Co	Do.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426 in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before May 26, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-340]

PUBLIC SERVICE CO. OF INDIANA, INC.

Notice of Proposed Tariff Change

MAY 5, 1978.

Take notice that Public Service Co. of Indiana, Inc. on April 28, 1978, tendered for filing a Service Agreement between Public Service Co. of Indiana, Inc. and the city of Frankfort, Ind., proposed to become effective June 1, 1978.

The Company inidicates that said Service Agreement provides for Public Service Co. of Indiana, Inc. to supply the city of Frankfort, Ind., with their entire requirements of electric capacity and associated energy. The company states that said Service Agreement also cancels and replaces the Interconnection Agreement dated October 20, 1971, which has been designated as Rate Schedule FERC No. 224.

Copies of the filing were served upon the city of Frankfort, Ind., and the Public Service Commission of Indiana, according to the Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are available for public inspection at the Federal Energy Regulatory Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-339]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE

Notice of Proposed Tariff Change

MAY 5, 1978.

Take notice that Public Service Co. of New Hampshire (PSNH) on April 28, 1978, tendered for filing increased rates to all of its firm wholesale for resale customers. PSNH states that the affected customers and the FERC rate schedule designations of their contracts are as follows:

Concord Electric Co	FERC No. 24
Town of Ashland, N.H	FERC No. 28
The New Hampton (N.H.) Village Precinct.	FERC No. 29
Exeter & Hampton Electric Co	FERC No. 35
New Hampshire Electric Cooperative, Inc.	FERC Nos. 50 and 71
Town of Wolfeboro, N.H	FERC No. 72

PSNH indicates that the proposed changes would increase revenues from the affected jurisdictional sales and service by $2,377,636 or 7.7 percent based on test year 1978. PSNH requests that the increase be allowed to become effective on May 29, 1978.

PSNH further indicates that the filing would increase the demand charge from $4.10 to $4.40 per kva and the energy charge from 1.964 cents to 2.139 cents per kwh. PSNH states that the filing would also increase the monthly customer charge from $50 to $65. PSNH further states the fuel clause and low voltage delivery charge as presently effective would not be changed.

According to PSNH copies of this filing have been sent to the New Hampshire Public Utilities Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-331]

PUBLIC SERVICE CO. OF NEW MEXICO

Notice of Filing

MAY 5, 1978.

Take notice that Public Service Co. of New Mexico (PNM) on April 25, 1978, tendered for filing an Agreement for Electric Service and Amendments 1 and 2 thereto between PNM and Plains Electric Generation and Transmission Cooperative, Inc. (Plains).

PNM states that the service to be provided is a change in Delivery Point for service to Plains from the West Mesa Switching Station near Albuquerque, N. Mex., to the Hildalgo Switching Station in southwestern New Mexico.

PNM requests an effective date of August 1, 1977, and therefore requests

MAY 17 78
UMI

[6740-02]

[Docket No. ER78-338]

PUBLIC SERVICE CO. OF NEW MEXICO

Notice of Proposed Changes in Rates

MAY 5, 1978.

Take notice that Public Service Co. of New Mexico on April 28, 1978 tendered for filing a proposed change in rates for its customer, the City of Gallup, N. Mex. The Company proposes that all CWIP be included in rate base, stating that such is required because of the Company's extraordinary growth and concomitant capital demands.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-337]

PUBLIC SERVICE CO. OF NEW MEXICO

Notice of Proposed Change in Rates

MAY 5, 1978.

Take notice that Public Service Co. of New Mexico (PNM), on April 28, 1978, tendered for filing proposed changes in its FERC PNM Rate Schedules Nos. 31, 32, 34 and 35, which provide rates to four wholesale customers, namely, Plains Electric Generation and Transmission Cooperative, Inc., Community Public Service Co., Department of Energy (DOE)—Los Alamos, and City of Farmington, N. Mex.

The Company estimates its rate of return under presently effective rates during Period II would be 6.884 percent. The Company states that this rate of return is not adequate to enable the Company to generate funds sufficient to meet its current construction program that is required to provide for substantial growth.

According to the Company copies of the filing were served upon the public utility's jurisdictional customers being served under these rate schedules and the New Mexico Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-298]

SEA ROBIN PIPELINE CO.

Notice of Pipeline Application

MAY 11, 1978.

Take notice that on April 20, 1978, Sea Robin Pipeline Co. (Sea Robin), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP78-298, an application for a temporary and permanent certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act, as amended, requesting authorization to transport gas for Consolidated Gas Supply Corp. (Consolidated), all as more fully set forth in the application which is on file with the Federal Energy Regulatory Commission (Commission).

Sea Robin states that pursuant to a transportation agreement dated February 21, 1978, between Sea Robin and Consolidated, Consolidated will deliver or cause to be delivered to Sea Robin for transportation up to 18,000 Mcf per day in South Marsh Island Area, Block 127, offshore Louisiana. Sea Robin will redeliver equivalent volumes to Columbia Gulf Transmission (Columbia Gulf) for the account of Consolidated at an existing delivery point located at the terminus of Sea Robin's system near Erath, Vermilion Parish, La. Columbia Gulf will transport such volumes and redeliver same to Consolidated at an existing point near Egan, Acadia Parish, La.

Any person desiring to be heard or to make any protest with reference to said application, on or before June 2, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP76-60]

SOUTH TEXAS NATURAL GAS GATHERING CO.

Notice of Purchased Gas Cost Adjustment Rate Change

MAY 11, 1978.

Take notice that South Texas Natural Gas Gathering Co. ("South Texas"), on April 28, 1978, tendered for filing with the Federal Energy Regulatory Commission its Exhibit "A" (Fourth Revised PGA-1) superseding the First Revised Exhibit "A" (Substitute Third Revised PGA-1) to its Purchased Gas Cost Adjustment Clause. The proposed change reflects an increase in South Texas' rate to Natural Gas Pipeline Co. of America of 23.06 cents per Mcf.

Copies of the filing were served by South Texas upon its only affected customer, Natural Gas Pipeline Co. of America.

Any person desiring to be heard or to protest said filing should file a petition to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13406 Filed 5-16-78; 8:45 am]

[6740-02]

[Docket No. RP78-58]

SOUTH TEXAS NATURAL GAS GATHERING CO.

Notice of Proposed Change in Rates

MAY 9, 1978.

Take notice that on April 28, 1978, South Texas Natural Gas Gathering Co. (South Texas) tendered for filing a notice of change in rates for the sale of gas to (1) Natural Gas Pipeline Co. of America (Natural) under South Texas' FERC Gas Rate Schedule No. 1, Supplement No. 21, and (2) Transcontinental Gas Pipeline Corp. (Transco) under South Texas' FERC Gas Rate Schedule No. 2, Supplement No. 84. South Texas proposes that the revised rates take effect on June 1, 1978.

In addition to the above sales services, South Texas performs transportation services for Natural and for three producers in the McAllen and Schmidth Fields. South Texas states that in the proceeding pending in Docket No. RP77-59 the Commission Staff has for the first time proposed the allocation of a portion of its cost of service to those transportation services, and that South Texas has, as a result, moved the Commission to initiate an investigation into its transportation rate. Because its motion in RP77-59 is still pending, South Texas similarly requests that the Commission initiate a proceeding under section 5 in this docket in order to determine the just and reasonable transportation rates if the filed sales rates are found not to be just and reasonable or are found to be discriminatory.

South Texas states that copies of its filing were served on Natural, Transco, Shell Oil Co., Tenneco Oil Co., and Continental Oil Co.

Any person desiring to be heard or to protest South Texas' filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13334 Filed 5-16-78; 8:45 am]

[6740-02]

[Docket No. RP77-11]

SOUTHWEST GAS CORP.

Notice of Request for Resolution of Billing Dispute

MAY 10, 1978.

Take notice that on May 2, 1978, California-Pacific Utilities Co. (Cal-Pac) requested that the Commission resolve a billing dispute between Cal-Pac and Southwest Gas Corp. (Southwest) concerning the proration for rate charges during a billing month.

Cal-Pac states that Southwest placed its filed rate increase in the above-capitioned docket into effect on May 9, 1977. Subsequently a settlement was approved with revised rates, calling for refund of the charges in excess of the filed rate. The filed rate and the prior rate are blocked rates.

Cal-Pac asserts that Southwest's computations are irrational to the extent they fail to properly prorate the service charge and in their treatment of the blocking. Southwest's computations result in a negative refund of $3,145.67 while Cal-Pac's computations result in a positive refund of $2,287.07.

Cal-Pac requests a ruling, therefore, that Southwest's charges under the old rate for gas delivered in the first 8 days of May be computed on the basis of a proration of the first monthly block to the 8 days and that its refund in this proceeding be determined accordingly. Cal-Pac believes that there are no facts in dispute and that the expense of a hearing is not warranted. Therefore it does not request a hearing and requests the matter be decided on the basis of its request and such response thereto as Southwest may make, with an opportunity for Cal-Pac to reply to Southwest if deemed necessary.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appopriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP76-16]

TENNECO LNG, INC.

Notice of Conference

MAY 8, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "saving provisions" of section 705(b) of the DOE Act provide that

V 4 3 | 9 6

proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)-(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —— provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Take notice that after consideration of the status of the application in this docket the Commission directed the convening of a conference of all parties to this case to discuss the status of the application and the applicant's plans for pursuing it. The conference will be held on May 25, 1978, at 10 a.m., at the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426. The room number will be posted on the hearing board on the second floor on the day of the conference. Members of the Commission's technical staff will participate in the conference.

This application is for a certificate of public convenience and necessity authorizing the construction and operation of an LNG terminal on the Delaware River at West Deptford, Glouster County, N.J., to receive, store, and vaporize imported LNG. The details of the proposal are described in a previous notice issued July 29, 1975.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. TC78-4]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Notice of Petition for Order Directing Implementation of Storage Sprinkling

MAY 9, 1978.

Take notice that on April 27, 1978, Columbia Gas Transmission Corp. (Columbia) filed a petition pursuant to section 1.7 of the Commission's Rules of Practice and Procedure requesting the Commission to issue an order directing Tennessee Gas Pipeline Co. (Tennessee) to file appropriate tariff sheets incorporating storage sprinkling[1] in its currently effective curtailment plan.

In the alternative, Columbia requests the Commission to issue an order directing Tennessee to show cause why storage sprinkling procedures should not be implemented on its system in accordance with Commission determinations in certain other proceedings. Columbia further requests the Commission to prescribe a shortened notice period in regard to this matter.

It appears reasonable and consistent with the public interest in this proceeding to prescribe a period shorter than fifteen days for the filing of protests and petitions to intervene. Therefore, persons desiring to be heard or to make protests with reference to said filing should, on or before May 19, 1978, file protests or petitions to intervene with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make such persons parties to the proceeding. Any person wishing to become a party to this proceeding or to participate as a party in any hearing in this proceeding must file a petition to intervene in accordance with the Commission's Rules. The petition is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-307]

TENNESSEE NATURAL GAS LINES, INC.

Notice of Application

MAY 10, 1978.

Take notice that on April 26, 1978, Tennessee Natural Gas Lines, Inc. (Applicant), 2008 Parkway Towers, Nashville, Tenn. 37219, filed in Docket No. CP78-307 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for its resale customer, Nashville Gas Co. (Nashville), pursuant to proposed Rate Schedule T-1 and authorizing the transportation of gas pursuant to proposed Rate Schedule T-2 for any person, served directly or indirectly from the system of Applicant, which gas the buyer has purchased from a source other than Applicant, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that in an effort to help maintain service to its high priority requirement customer in light of the severe curtailments resulting from Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (TGP), Nashville, Applicant's sole jurisdictional customer, has made arrangements for Kentucky Gas Storage Co. (Kentucky Gas) to perform a storage service for Nashville. The maximum quantity stored for Nashville would be 1,200,000 Mcf, and the maximum daily volume to be injected into storage by Nashville would not exceed 5,920,000 Mcf with the maximum daily volume which Nashville may withdraw from storage not to exceed 10,909 Mcf.

It is stated that to effectuate the above-described arrangements, TGP would deliver the storage injection volumes to Texas Gas Transmission Corp. for the account of Applicant and Nashville for transportation to Kentucky Gas. Gas withdrawn from storage would be received by Midwestern Gas Transmission Co. for delivery to TGP at the existing interconnection of their facilities. TGP would deliver such gas to Applicant at the existing points of interconnection of their facilities.

Applicant proposes to complete the transportation to Nashville, pursuant to proposed Rate Schedule T-1 of the gas withdrawn from storage. It is indicated that under such rate schedule, Nashville would pay Applicant no separate charge for transportation other than reimbursement for any payments made by Applicant for Nashville's account.

Applicant also proposes under proposed Rate Schedule T-2 to transport for any person served directly or indirectly from Applicant's system gas purchased from sources other than Applicant. Under such rate schedule, Applicant would charge a transportation rate equal to the unit cost of service (excluding purchased gas, storage, and LNG costs) as reflected in its then effective base tariff rate. The transportation rate is stated to be 3.5 cents per Mcf as of April 30, 1978. Service under proposed Rate Schedule T-2 would be subordinate to that under proposed Rate Schedule T-1.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13409 Filed 5-16-78; 8:45 am]

[1]The term "storage sprinkling" refers to the classification of storage injection volumes on the basis of the proportionate end use of winter storage withdrawals.

[Docket No. CP66-43]

TEXAS EASTERN TRANSMISSION CORP.

Notice of Conference

MAY 8, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (Aug. 4, 1977) and Executive Order No. 12009, 42 FR 46267 (Sept. 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "saving provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)-(1) or 402(a) (2) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —— provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Take notice that after consideration of the status of this proceeding in its regularly scheduled meeting of May 3, 1978, the Commission directed to the convening of a conference of all parties to this case to discuss the status of the application and the applicant's compliance with deficiency letters previously submitted. The conference will be held on May 17, 1978, at 10 a.m. at the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426. The room number will be posted on hearing board on the second floor on the day of the conference. Members of the Commission's technical staff will participate in the conference.

This application is for a certificate of public convenience and necessity authorizing the construction and operation of an LNG storage project on Staten Island, N.Y. The details of the proposal are described in a previous notice published in the FEDERAL REGISTER on May 13, 1975 (40 FR 20859).

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. EL78-18]

TOWNS OF HIGHLANDS, N.C. v. ALUMINUM CO. OF AMERICA, NANTAHALA POWER & LIGHT CO., AND TAPOCO, INC.

Notice of Complaint

MAY 10, 1978.

Take notice that on April 24, 1978, the Town of Highlands, N.C. (Highlands) filed a complaint, pursuant to section 306 of the Federal Power Act and § 1.6 of the Commission's Rules of Practice and Procedure against the Aluminum Co. of America ("Alcoa"), Nantahala Power & Light Company (Nantahala) and Tapoco (Respondents).

Highlands alleges that the respondents have violated the Federal Power Act by diverting for the benefit and private use of Alcoa hydro-electric power and hydro-electric facilities dedicated to public service. Highlands complains that this diversion has caused Nantahala ratepayers to pay unlawful, unjust and unreasonable rates.

Respondents have thirty days from the date of filing to satisfy the complaint or to answer the same in writing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 9, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this complaint are on file for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. OR78-1]

TRANS ALASKA PIPELINE SYSTEM: INVESTIGATION AND SUSPENSION

Order on Request To Hold Hearing in Alaska

MAY 9, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.[1]

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this pro-

[1]The "Commission" when used in the context of an action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

V 4 3 9 6

ceeding were specifically transferred to the FERC by section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR ——. provided that this proceeding would be continued before the FERC. The FERC takes action in this proceedlng in accordance with the above mentioned authorities.

By letter dated February 22, 1978, the Alaska Pipeline Commission (APC) requested that the FERC consider holding in Anchorage, Alaska the hearing scheduled to begin on May 23, 1978, in the Trans Alaska Pipeline System (TAPS) proceeding. The APC stated that it believes that it would be in the broad public interest and in the interest of the Alaskan public to hold in Alaska at least one of the hearings currently scheduled in Phase I of the FERC proceedings. The APC added that it believes it would be valuable to the Administrative Law Judge in making his determinations to view the pipeline and Alaska.

Public notice of the APC's request was issued on March 13, 1978, with comments due on or before March 31, 1978.

On March 24, 1978, Sohio Pipe Line Co. (Sohio) filed a motion requesting the FERC to authorize a view of the Trans Alaskan Pipeline by Presiding Administrative Law Judge Kane. Sohio stated that a "primary issue in OR78-1 is the risk of construction and operation of TAPS in the hostile environment of Alaska • • •" and that a "short 'view' of representative portions of TAPS by Judge Kane by helicopter and site visits should be helpful in evaluating the nature and extent of these risks and the testimony covering them." Sohio added that three or four days should be allowed for the view.

On March 31, 1978, joint comments were submitted by BP Pipelines Inc., Exxon Pipeline Co., Mobil Alaska Pipeline Co., and Union Alaska Pipeline Co. (respondents) to the published notice of the APC request. Respondents took the position that it would be beneficial for the Administrative Law Judge to view the Trans Alaska Pipeline at an appropriate time. However, they added, they believe that the costs involved in holding any extended portion of the evidentiary hearings in this proceeding in Alaska outweigh any possible benefits which might result. The respondents opposed the APC's request that members of the Alaskan public be permitted to express their views at a public hearing in Anchorage, because they stated, "• • • any such hearing would be inappropriate for this, or any other rate proceeding." The respondents argued that general statements of members of the Alaskan public concerning their views on the impact of TAPS on Alaska are irrelevant to the issues now before the Commission and would be improper for inclusion in the record of the proceeding.

In comments filed March 31, 1978, Amerada Hess Pipeline Corp. (AHPC) opposed the request of the APC inasmuch as it would be "inconvenient, burdensome and inordinately expensive to hold hearings in Alaska." AHPC added that it is not a party to the APC proceeding and that it would be unreasonable to require it to suffer the inconvenience and expense inherent in the APC's request.

ARCO Pipe Line Co. (ARCO) filed comments on March 31, 1978. ARCO recommended that the FERC take no present action on the APC request because the parties are attempting to accommodate various interests, and Commission action on a modified proposal maybe requested in the future. ARCO described the extraordinary expense and inconvenience to the parties if the cross-examination of rebuttal witnesses were required to be held in Alaska as requested by the APC.

In its March 31, 1978 comments, FERC staff stated it had no objection to scheduling a portion of the hearings in Alaska. However, the staff suggested that any Alaskan hearings be scheduled to coincide with the testimony of witnesses which might have special interest to Alaskan citizens, namely, that of the Alaska Public Interest Research Group and/or the Arctic Slope Regional Corp. Further, the staff concurred in the suggestion that the Presiding Judge be given the opportunity to view TAPS and added that the FERC staff would also benefit from viewing TAPS.

The Department of Justice, in comments filed April 4, 1978, opposed holdings a full round of hearings in Alaska on the basis of the substantial cost and inconvenience it would cause the parties. The Department, however, does not oppose holding a portion of the hearing, for example, one week, in Alaska. It suggested the final week of cross-examination of protestants' witnesses as an appropriate time to remove the hearing to Alaska. Following the close of hearing, the Department suggested, the view of the pipeline supported by Sohio could be scheduled.

The Honorable Mike Gravel, United States Senator, by letter filed March 7, 1978, supported the request of the APC to hold a portion of the TAPS hearings in Alaska. Senator Gravel stated that "(h)earings in the State would give FERC officials and staff members the opportunity of viewing first-hand the State and the pipeline itself, providing all those involved in the decision-making process a better understanding of the problems and impacts of the pipeline and the decision of the Commission will have on the State and its residents." In addition, Senator Gravel asserted that Alaskan residents should be given the opportunity to present information to the Commission concerning its decision. By letter dated April 20, 1978, Senator Gravel further suggested that any hearings held in Alaska should include at least a day of hearings in Fairbanks, as well as Anchorage, due to the overall impact of the pipeline on Fairbanks and because it is the site of the North Pole Refinery.[2]

On April 20, 1978, Earth Resources Co. of Alaska (ECA) filed comments stating it had no objection to a portion of the hearing being scheduled in Alaska. ECA added, however, that at least one-half day of any Alaskan hearing should be held in Fairbanks to permit witnesses and citizens residing in that area to participate. ECA noted that Fairbanks' residents are directly affected by the tariff rates to be charged for crude oil moving from Pump Station 1 to the ECA refinery, located just outside of Fairbanks, through the price they pay for refined oil products. ECA further observed that if public hearings were held in Fairbanks, several citizens would appear to testify who, if hearings were held in Anchorage, would not be able to appear due to the distance between the two cities.

On April 24,1978, Sohio filed a response to ECA's comments. Sohio objected to ECA's request to schedule a period of time for a hearing in Fairbanks. According to Sohio, it would be disruptive of a planned program to view the pipeline, including the ECA refinery at Fairbanks, which has been scheduled to coincide with hearings in Anchorage.

As a general rule, the Commission supports local hearings as a means of gaining area citizens' reactions to a proposal before the Commission for decision which would uniquely affect local residents. Further, local witnesses should they choose to intervene could contribute their knowledge to the development of the formal, evidentiary hearing record. However, the Commission recognizes a countervailing concern in this instance: to move the hearing to Anchorage would cause certain parties substantial inconvenience and expense. Moreover, the public would bear a significant expense to reimburse the staffs of the various government participants in the proceeding if they were required to remain in Alaska for an extended period of time.

Because the Presiding Judge is more familiar with the nature of the hearing record thus far and can better predict whether there would be a significant advantage to holding a portion of the hearing in Alaska, rather than continuing with the entire proceeding in Washington, D.C., we will defer to his judgment in this matter. To the extent Judge Kane determines that the hearing record would be enhanced by moving the site of the hearing to Alaska and that such a move would be the most expeditious way to assure a fully developed record, he is authorized to so order. The Commission encourages Judge Kane to use the most expeditious means of providing a fair and adequate evidentiary record while at the same time not burdening the public and the parties with extraordinary expenses.

Moreover, we believe the Presiding Judge can at this time better determine than the Commission whether he would benefit by a trip to Alaska to view the pipeline, regardless of whether a portion of the formal evidentiary hearing is held in Alaska. Accordingly, we are leaving to Judge Kane's discretion the decision to view the pipeline and authorize him to travel to Alaska if it would assist him in his duties. However, in the event Judge Kane does travel to Alaska, whether for a formal hearing or to inspect the pipeline, he should devote some time to hear comments of Alaskan citizens with respect to the issues in the FERC proceeding. We leave it to Judge Kane to apportion his time and to establish neccessary procedures to accommodate public hearings, if in fact he is going to be present in Alaska. Any statement Judge Kane receives from a private citizen who is not an intervenor in the captioned proceeding will not be part of the record upon which the Commission's decision is made, but may be considered for such further exploration by the FERC staff and the other parties of the substantive matters raised therein as may be appropriate.

The Commission further finds: Good cause exists to refer the requests of the APC and of certain parties discussed, supra, to Presiding Judge Kane for his disposition.

The Commission further orders: The requests of the APC received by letter dated February 22, 1978, other related requests discussed, supra, are hereby referred to Judge Kane for disposition.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13335 Filed 5-16-78; 8:45 a.m.]

[2]The Honorable Ted Stevens, United States Senator, filed a telegram on May 3, 1978, urging that concurrent hearings with the APC be held in Fairbanks, as well as in Anchorage and that the citizens of Fairbanks be permitted to comment. In addition, Senator Gravel in a letter dated May 3, 1978, emphasized his belief that some testimony in the proceeding should be taken in Fairbanks.

[Docket No. ER78-346]

TUCSON GAS & ELECTRIC CO.

Notice of Proposed Cancellation

MAY 8, 1978.

Take notice that Tucson Gas & Electric Co. (TG&E) on April 28, 1978 tendered for filing a proposed Notice of Cancellation of TG&E Rate Schedule FPC No. 11 between TG&E and Southern California Edison Co. (Edison). TG&E indicates that a notice of the proposed cancellation has been served upon Edison. TG&E proposes an effective date of April 30, 1978, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-343]

UNION ELECTRIC CO.

Notice of Filing

MAY 9, 1978.

Take notice that on May 1, 1978, Union Electric Co. (Union) tendered for filing a Letter Agreement revising the reservation charge for Maintenance Energy Transactions under the Interconnection Agreement dated November 1, 1969 between the Tennessee Valley Authority and Central Illinois Public Service Co., Illinois Power Co., and Union.

Union indicates that the Letter Agreement provides for an increase in the reservation charge for Maintenance Energy Transactions and the proposed reservation charge was arrived at through negotiations and is the same as rates the Companies have on file with the Commission.

Union proposes an effective date of June 1, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are available for public inspection at the Federal Energy Regulatory Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-374]

UNITED GAS PIPE LINE CO.

Notice of Petition to Amend

MAY 5, 1978.

Take notice that on April 25, 1978, United Gas Pipe Line Co (Petitioner), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP77-374 a petition to amend the Commission's order of October 19, 1977, issued in the instant docket, pursuant to section 7(c) of the Natural Gas Act so as to provide for an increase of up to 1,055 Mcf of natural gas per day over the presently authorized maximum daily quantity (MDQ) which Petitioner may transport for Mississippi River Transmission Corporation (Mississippi River) and to provide for the receipt of such increased volumes of gas to be received by Petitioner at an additional delivery point on Petitioner's existing 18-inch Sterlington-Sarepta Line in Lincoln Parish, La., all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the Commission's order of October 19, 1977, Petitioner was authorized to transport up to 5,000 Mcf of gas per day for Mississippi River, which gas is being received by Petitioner at a delivery point in Desota Parish, La. Petitioner states that it transports and redelivers equivalent volumnes, less an allowance for fuel and company-used gas, to Mississippi River at Petitioner's measuring and regulating station located at Mississippi River's Perryville compressor site in Monroe Field, Ouachita Parish, La., pursuant to a transportation agreement between the two parties dated April 6, 1977. For gas so transported, Petitioner charges Mississippi River an amount per Mcf equal to Petitioner's current average jurisdictional transmission cost of service

V 43 96

in effect from time to time on Petitioner's Northern Rate Zone, exclusive of the cost of gas consumed in Petitioner's operation, which current rate is 24.46 cents per Mcf, it is said.

The petition states that Mississippi River has requested Petitioner to transport volumes of gas which it has purchased from production in the Middlefork Field, Lincoln Parish, La., and that pursuant to an amendatory agreement dated March 31, 1978, Petitioner has agreed to transport an additional volume of up to 1,055 Mcf of natural gas per day for Mississippi River, which gas Mississippi River would deliver, or cause to be delivered for its account, to Petitioner at a point on Petitioner's 18-inch pipeline in Lincoln Parish, La. Petitioner states that it would transport and redeliver equivalent volumes, less an allowance retained for fuel and company-used gas, to Mississippi River at an existing point of interconnection between the systems of Petitioner and Mississippi River in Ouachita Parish, La., where Petitioner redelivers transportation volumes to Mississippi River under Petitioner's existing Rate Schedule X-91. It is stated that authorization of this proposal would result in the addition of a new delivery point on Petitioner's system in Lincoln Parish, La., and would raise the total MDQ applicable to Mississipi River under the contract, as amended, to 6,055 Mcf per day. The rate charged Mississippi would be the same as charged for transportation service rendered under Petitioner's Rate Schedule X-91, it is stated.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-309]

UNITED GAS PIPE LINE CO.

Notice of Application

MAY 5, 1978

Take notice that on April 27, 1978, United Gas Pipe Line Co. (Applicant), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP 78-309 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 1,100 Mcf of natural gas per day for Transcontinental Gas Pipe Line Corp. (Transco), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Transco has acquired the right to purchase said volumes of gas from Superior Oil Co. which would make such sale under certificate authority issued in Docket No. CI61-714. It is indicated that Applicant and Transco have entered into an agreement dated March 10, 1978, whereby Transco would deliver or cause to be delivered up to 1,100 Mcf of gas per day for its account to Applicant at a tap to be installed by Applicant, at Transco's expense, on Applicant's existing pipeline in Lafayette Parish, La. Applicant states that it would redeliver equivalent volumes of gas to Transco, less 2.3 percent for fuel and unaccounted-for gas, at the outlet side of Applicant's existing authorized measuring and regulating station located at Gibson, Terrebonne Parish, La., or other mutually agreeable existing authorized points of interconnection between the pipeline systems of Applicant and Transco.

It is stated that Transco would pay Applicant for gas transported hereunder an amount per Mcf equal to Applicant's average jurisdictional transmission cost of service in effect from time to time in Applicant's Southern or Northern Rate Zones, less any amount included in such average jurisdictional transmission cost of service which is attributable to gas consumed in the operation of Applicant's pipeline system and unaccounted-for gas. The current average jurisdictional transmission cost of service, exclusive of the cost of gas consumed in Applicant's operation, is said to be 18.84 cents per Mcf in Applicant's Southern Rate Zone and 24.46 cents per Mcf in Applicant's Northern Rate Zone.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing wil be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13348 Filed 5-16-78; 8:45 am]

[6740-02]

[Docket No. CP78-310]

UNITED GAS PIPE LINE CO.

Notice of Application

MAY 5, 1978.

Take notice that on April 27, 1978, United Gas Pipe Line Co. (Applicant), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP78-310 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon by sale approximately 8,000 feet of 2-inch pipeline located in Jefferson Davis Parish, La., to Extex, Inc. (Extex), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that presently it provided natural gas service to the community of Mermentau, La., through sales of gas at the Mermentau Town Border Station to Entex, the distributor in the area, and that it delivers gas to Entex at the Mermentau Town Border Station through a 2-inch pipeline which is connected to Applicant's 6-inch South Jennings Field Line. It is indicated that pursuant to an agreement between Applicant and Entex dated March 2, 1978, Applicant has agreed to abandon and sell to Entex, the 2-inch pipeline for $511.68.

Applicant states that this 2-inch pipeline presently functions as a distribution system line and, accordingly, should more properly be owned and operated by entex. Applicant further states that after the proposed abandonment and sale, the line would continue its present service, but would become a part of Entex's distribution system in Mermentau and environs. The proposed sale to Entex would not affect service to Entex or its customers in the area, now would it affect service to the customers of United, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-336]

ALABAMA POWER CO.

Filing of Rate Schedule

MAY 5, 1978.

Take notice that Alabama Power Co. on April 27, 1978, tendered for filing an Agreement with the City of Hartford, intended as a rate schedule. The Company indicates that this Agreement was necessitated by the sale of the company's Hartford Central Substation to the City of Hartford resulting in a change in delivery voltage from 4.16 kV to 44 kV. The Company states that this Agreement provides for a capacity of 5,000 kVA at 44 kV under Rate MUN-1 and the applicable revisions thereto.

Copies of the filing were served upon the City of Hartford, according to the Company.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-350]

ARKANSAS POWER AND LIGHT CO.

Proposed Changes in FERC Rate Schedules

MAY 9, 1978.

Take notice that on May 2, 1978, Arkansas Power & Light Co. (Company) tendered for filing proposed changes in Arkansas Power & Light Co. Rate Schedules FPC No. 49.

The Company indicates that this Rate Schedule is a contract between the Company and the City of North Little Rock and that the only change is an increase in the maximum capacity made available at one point of delivery. The Company states that it does not believe that the increase in capacity will have any material effects upon the billing and that no billing data was filed. The Company states that there will be no change in rates or provisions in the contract other than those noted above. The Company proposes an effective date of June 1, 1978.

According to the Company a copy of the filing has been mailed to the City of North Little Rock.

Any person desiring to be heard or to protest this filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. EL78-19]

BLACK HILLS POWER AND LIGHT CO.

Petition for a Declaratory Order

MAY 5, 1978.

Take notice that on April 24, 1978, Black Hills Power and Light Co. (Petitioner), a corporation organized under the laws of the State of South Dakota and qualified to transact business in the states of Wyoming, Montana and Nebraska, with its principal business office at Rapid City, South Dakota, filed a Petition for a Declaratory Order pursuant to the Federal Power Act and 18 CFR 1.7(c), seeking a declaratory order to remove an uncertainty alleged by petitioner to be necessary for it to lease a 20% interest in the Wyodak Project under a proposed leveraged lease and to specifically provide that Petitioner's cost of payment of its Financing Lease Obligation (as defined in Section 4.04 of the Petitioner's Seventeenth Supplemental Indenture) resulting from the participation by Petitioner as a lessee of 20% of the Wyodak Project and the execution of all of the Basic Agreements and Agreement between Utilities as described in Exhibit A attached to the Petition will be reflected and included in those rates charged by the Petitioner to its customers where the Commission has jurisdiction of those rates.

Petitioner indicates that the Commission now has jurisdiction over sales

V 43 96

of electric power and energy by Petitioner to the cities of Gillette and Upton, Wyo. for resale by said cities.

Any person desiring to be heard or to make any protest with reference to said application should, on or before May 19, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application as amended is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-341]

CENTRAL POWER & LIGHT CO.

Filing of Contract

MAY 5, 1978.

Take notice that Central Power & Light Co. on April 28, 1978, tendered for filing an Emergency Electric Service Contract between the Company and the City of Robstown, Tex. The Company indicates that the reason for the emergency service is that Robstown has notified the Company that Robstown cannot meet its requirements for the remainder of this year.

The Company proposes an effective date of February 9, 1978, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. CP77-406]

COLORADO INTERSTATE GAS CO.

Petition to Amend

MAY 5, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977), and Executive Order No. 12009, 42 Fed. Reg. 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provided that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Take notice that on April 24, 1978, Colorado Interstate Gas Co. (Petitioner), P.O. Box 1087, Colorado Springs, Colo. 80944, filed in Docket No. CP77-406 a petition to amend the order of August 5, 1977 (57 FPC —) issued by the Federal Power Commission (FPC) in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to authorize the abandonment in place of the two 1,320-horsepower compressor units at its Fourway Compressor Station, all as more fully set forth in the petition on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of August 5, 1977, Petitioner was granted permission and approval to abandon two 1,320 horsepower compressors at its Fourway compressor station and was granted certificate authorization to install and operate the two units for air injection service at Petitioner's Watkins Station. These facilities would have allowed Petitioner to increase the capability of its Watkins Station air injection facilities by 8,000 Mcf per day, it is said.

Petitioner states that further study indicated, however, that in order to maintain thermal stabilization of gas for delivery to the Denver market area and to comply with existing tariff and service agreement requirements, substantially more air injection was required. Consequently, Petitioner filed for authorization in Docket No. CP78-133 to construct and operate five 2,700-horsepower air injection compressors, it is indicated. Pursuant to the order of April 12, 1978, Petitioner was granted the requested authorization. Therefore, the relocation of these units to Watkins Station is no longer required, it is stated.

Petitioner states that it initially believed the Fourway compressor units to be the most economical and expedient method for obtaining additional air service during the 1977-1978 heating season; however, removal, reinstallation, and conversion of these units for natural gas service to air injection service was not possible in time for the 1977-1978 heating season. Therefore, Petitioner entered into a short-term service contract to provide air for thermal control during that period, it is said.

Consequently, Petitioner requests that the Commission delete the authorization for the installation and operation of the two 1,320-horsepower Fourway Station compressors for service at its Watkin's Station, and permit the abandonment in place of the two units at the Fourway Station.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary

[Docket No. ER78-333]

FLORIDA POWER CORP.

Filing

MAY 5, 1978.

Take notice that Florida Power Corp. (Florida Power), on April 26, 1978, filed two Letters of Commitment which concern service to the cities of Kissimmee and St. Cloud, Fla. (Cities). Florida Power states that the Letters of Commitment provided for the continuation, from June 1, 1975 through November 30, 1979, of firm electric service under Schedule D of the Contract for Interconnection and Electric Service between the Company and the Cities. Florida Power further states that the Letters provided for changes in the energy and demand charges for such service, as well as increasing the amount of service to the Cities, and amending certain terms and conditions under which service is provided.

Florida Power proposes an effective date of June 1, 1975, for the Letter of Commitment dated May 23, 1975, and April 1, 1978 for the Letter of Commitment dated March 30, 1978, and therefore requests waiver of the Commission's notice requirements.

According to Florida Power copies of this filing were served upon the Cities and upon the Florida Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-334]

FLORIDA POWER CORP.

Notice of Filing

MAY 5, 1978.

Take notice that Florida Power Corp. (Florida Power), on April 26, 1978, filed a Letter of Commitment which concerns service to the Sebring Utilities Commission (Sebring). Florida Power states that the Letter of Commitment provides for firm electric service under Schedule D of the Contract for Interconnection and Electric Service between the Company and Sebring from April 1, 1978. Florida Power further states that the Letter provided for changes in the energy and demand charges for such service, as well as providing for an increase in the amount of service available to Sebring.

Florida Power proposes an effective date of April 1, 1978, and therefore requests waiver of the Commission's notice requirements.

According to Florida Power copies of this filing were served upon Sebring and upon the Florida Public Service Commission.

Any person desiring to be heard or to protet said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-332]

ILLINOIS POWER CO.

Notice of Filing

MAY 5, 1978.

Take notice that on April 25, 1978, Illinois Power Co. (Illinois Power) tendered for filing proposed Modification 2, dated January 26, 1978, to the Interconnection Agreement, dated July 25, 1975, between Western Illinois Power Cooperative, Inc. and Illinois Power.

Illinois Power indicates that this filing is made for an increase for Short-Term firm capacity, Maintenance Power and Short-Term Non-Firm Power reservation charges.

Illinois Power respectfully requests that this Modification No. 2 be permitted to become effective on June 1, 1978.

Illinois Power states that a copy of the filing was served upon Western Illinois Power Cooperative, Inc. and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said filing should file a comments or protests with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426 in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER78-344]

KANSAS CITY POWER AND LIGHT CO.

Filing of Proposed Change in Rate Schedules

MAY 9, 1978.

Take notice that on May 1, 1978, Kansas City Power & Light Co. ("KCPL") tendered for filing a Municipal Participation Agreement dated February 2, 1978, between KCPL and the City of Carrollton, Mo. KCPL requests an effective date of November 1, 1977 and therefore requests waiver of the Commission's notice requirements. KCPL states that the Agreement terminates the Municipal Interconnection Contract, dated February 20, 1962, KCPL's Rate Schedule FPC No. 38, and provides for rates and charges for certain wholesale service by KCPL to the City of Carrollton.

KCPL states that the proposed rates are KCPL's rates and charges for similar service under schedules previously filed by KCPL with the Federal Energy Regulatory Commission.

Any person desiring to be heard or to protest this filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. CP76-25]

MICHIGAN WISCONSIN PIPE LINE CO.

Petition to Amend

MAY 5, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of energy and the Federal energy Regulator Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provided that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR ——, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Take notice that on April 25, 1978, Michigan Wisconsin Pipe Line Co. (Petitioner), One Woodward Avenue, Detroit, Mich. 48226, filed in Docket No. CP76-25 a petition to amend the order of December 18, 1975 (54 FPC ——) issued by the Federal Power Commission (FPC) in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to authorize a new delivery point for the exchange of natural gas with Arkansas Louisiana Gas Co. (Arkla), all as more fully set forth in the application on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of December 18, 1975, Petitioner was authorized to construct and operate facilities and deliver up to 25,000 Mcf of natural gas daily to Arkla at a point in Caddo County, Okla., in exchange for an equivalent volume from Arkla at a redelivery point in Custer County, Okla., pursuant to an exchange agreement dated May 8, 1975, between the two parties.

Petitioner states that it has obtained a commitment of gas reserves from the McClure No. 1 Well in Grady County, Okla. Petitioner proposes, pursuant to an amendment dated March 9, 1978, to the subject gas exchange agreement, to deliver such gas up to 10,000 Mcf per day to Arkla at a new delivery point in Grady County, Okla., in exchange for delivery of an equivalent volume of gas by Arkla to Applicant at the presently authorized existing point of redelivery in Custer County, Okla.

Petitioner indicates that it would construct and operate approximately 2 miles of pipeline and related facilities necessary to deliver the natural gas to Arkla at the proposed new point of delivery.

Any person desiring to be heard or to make an protest with reference to said petition to amend should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

[6740-02]

[Docket No. RP78-61]

MOUNTAIN FUEL RESOURCES, INC.

Proposed Changes in FERC Gas Tariff

MAY 5, 1978.

Take notice that on April 28, 1978, Mountain Fuel Resources, Inc. (Resources) tendered for filing a proposed change to its FERC Gas Tariff, Original Volume No. 1. The proposed rates would increase revenues from jurisdictional sales by approximately $931,145 based on the twelve-month period ending December 31, 1977, as adjusted, compared with the present rates.

Resources states that the increased costs are attributable to (1) increases in operating expenses; (2) an increase in rate base and related costs; and (3) the necessity for an increase in the rate of return.

Resources requests an effective date of June 1, 1978, for the proposed Revised Sheet. In the event that the Commission orders a suspension of Resources' filing, Resources requests that such suspension be for no more than one (1) day, until June 2, 1978. Resources further states that it served copies of this filing upon the Company's only jurisdictional customer and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 19, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP74-162]

NATURAL GAS PIPELINE CO. OF AMERICA

Petition to Amend

MAY 5, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of Section 705(b) of the DOE Act provided that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by Section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR ——, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

Take notice that on April 25, 1978, Natural Gas Pipeline Co. of America (Petitioner), 122 South Michigan Avenue, Chicago, Ill., 60603, filed in Docket No. CP74-162 a petition to amend the order of April 2, 1975 (53 FPC ——), as amended, issued by the Federal Power Commission (FPC) in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize an additional exchange point for the exchange of natural gas between Petitioner and El Paso Natural Gas Co. (El Paso) in Washita County, Okla., all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of April 2, 1975, Petitioner and El Paso were authorized to exchange natural gas and construct and operate certain facilities to implement such exchange. It is stated that by a long-term exchange agreement dated September 24, 1973, as amended, Petitioner and El Paso agreed to exchange quantities of gas available and tendered from time to time by one to the other subject to quantity limits set forth therein.

It is indicated that on April 28, 1976, Petitioner was granted temporary certificate authorization to construct and operate additional exchange points in Washita County, Okla., and Lea and Eddy Counties, N. Mex., pursuant to an amendment dated June 6, 1975, to the subject exchange agreement.

Petitioner indicates that the April 2, 1975, order was amended as follows:

On April 27,1977, the FPC issued an order herein permitting construction and operation of an additional exchange point in Eddy County, N. Mex., pursuant to an amendment dated November 3, 1975, to the subject Gas Exchange Agreement. The FPC had issued a temporary certificate herein on June 28, 1976.

On February 14, 1977, the FPC issued an order authorizing the operation of additional exchange points in Beckham County, Okla., and Ward County, Tex., and to increase the maximum daily volumes of exchange to 65,000 Mcf per day pursuant to an amendment dated July 14, 1976, to the subject Gas Exchange Agreement.

On August 30, 1977, the FPC issued an order authorizing the operation of an additional exchange point in Lea County, N. Mex., pursuant to an amendment dated April 28, 1977, to the subject Gas Exchange Agreement.

On April 4, 1978, the FPC issued an order authorizing the operation of additional exchange points in Eddy and Lea Counties, N. Mex., pursuant to amendments dated October 12, 1977 and December 1, 1977.

Petitioner states that it and El Paso have agreed by an amendatory agreement dated March 21, 1978, to provide for an additional exchange point in Washita County, Okla. (Washita No. 2 Exchange Point), whereby Petitioner proposes to deliver gas it has available for purchase under a gas purchase contract with Inexco Oil Co. (Inexco), as small producer, from the Stout No. 1 Well and Floyd Neice Nos. 1 and 2 wells located in Washita County, Okla. It is stated that El Paso is already connected to said wells; therefore, Petitioner would not be required to construct any facilities. El Paso would redeliver equivalent volumes of gas to Petitioner at existing exchange points, it is said.

Petitioner also proposes to redesignate the existing Washita Exchange Point as Washita No. 1 Exchange Point.

The petition states that the additional exchange arrangement proposed herein would have no effect on any of the other sales or services now rendered by Petitioner nor would there by any change in Petitioner's operation occasioned thereby.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-335]

NEW ENGLAND POWER POOL

Filing of Emergency Conservation Energy Supplement to Interconnection Agreement Between the New England Power Pool and the New York Power Pool

MAY 5, 1978.

Take notice that on April 27, 1978, the New England Power Pool (NEPOOL) tendered for filing a Conservation Energy Agreement supplement to the Interconnection Agreement between NEPOOL and the New York Power Pool. Certificates of concurrence have been filed on behalf of Central Hudson Gas & Electric Corp., Consolidated Edison Co. of New York, Inc., Long Island Lighting Co., New York State Electric & Gas Corp., Niagara Mohawk Power Corp., Orange and Rockland Utilities, Inc., and Rochester Gas and Electric Corp.

NEPOOL indicates that the Conservation Energy Agreement provides for emergency energy interchanges between the systems participating in the NEPOOL and the systems participating in the New York Power Pool (NYPP) for periods of one week or more. NEPOOL indicates that the Conservation Energy Agreement also provides for each of the pools to facilitate similar emergency transactions which one pool may have with remote systems and with which the other pool is interconnected.

In view of conditions resulting from the recent coal strike and the potential occurence of emergency contributions, the parties have requested that the Commission waive its notice requirements and permit the Conservation Energy Agreement to become effective as of may 1, 1978.

Any person desiring to be heard or to make any protest with reference to the Interconnection Agreement should on or before May 15, 1978 file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). Persons wishing to become parties to a proceeding or to participate as a party in any hearing related thereto must file petitions to intervene in accordance with the Commission's rules. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

CONSUMER ADVISORY COUNCIL

Notice of Meeting of Consumer Advisory Council

Notice is hereby given that the Consumer Advisory Council will meet on Wednesday, May 31, and Thursday, June 1. The meeting, which will be

MY 17 78 UMI

V 43 96

open to public observation, will take place in Terrace Room E of the Martin Building. The May 31 session will begin at 1 p.m. until 5 p.m., and will resume that evening from 7:30 p.m. until 9:30 p.m. The June 1 session will begin at 8:30 a.m. and conclude at 3:30 p.m., with a one-hour break for lunch. The Martin Building is located on C Street NW., between 20th and 21st Streets in Washington, D.C.

The Council's function is to advise the Board on the exercise of the Board's responsibilities with regard to consumer credit legislation and regulation. It is anticipated that the May 31-June 1 meeting of the Council will include consideration of the following topics:

1. *Enforcement of Consumer Credit Laws.* Review of efforts of the Federal Reserve System in examining and achieving compliance by State member banks and unresolved issues in connection with the proposed promulgation of uniform Truth in Lending enforcement guidelines by the Board and other Federal financial institution regulatory agencies.

2. *Discrimination Based on Geographical Factors in Extension or Availability of Credit.* Nature and extent of "redlining" and policies Board should adopt in dealing with it, particularly with respect to the regulation the Board is required to issue by November 6, 1978, for member banks under the Community Reinvestment Act. Also, operations under Regulation C, Home Mortgage Disclosure Act, applying to all depository institutions which make federally related mortgage loans.

3. *Unfair Bank Practices.* Implementing the Board's powers under the Federal Trade Commission Improvement Act to prohibit unfair, deceptive, or abusive practices of banks.

Brief reports will be made on the status of matters previously discussed by the Council.

Information with regard to this meeting may be obtained from Mr. Joseph R. Coyne, Assistant to the Board, at 202-452-3204.

Board of Governors of the Federal Reserve System, May 11, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[6210-01]

MOUNTAIN FINANCIAL SERVICES, INC.

Acquisition of Bank

Mountain Financial Services, Denver, Colo., has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of South Aurora State Bank, Aurora, Colo., a proposed new bank. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than June 12, 1978.

Board of Governors of the Federal Reserve System, May 11, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 78-13442 Filed 5-16-78; 8:45 am]

[6210-01]

MOUNTAIN FINANCIAL SERVICES, INC.

Proposal to Engage in Sale of Credit Related Insurance

Mountain Financial Services, Inc., Denver, Colo., has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to engage in the sale of credit life and credit accident and health insurance at the offices of South Aurora State Bank, Aurora, Colo. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). Notice of the application was published on April 25, 1978, in the Denver Post, a newspaper circulated in Aurora, Colo.

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than June 12, 1978.

Board of Governors of the Federal Reserve System, May 11, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on May 10, 1978. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed CAB request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before June 5, 1978, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, room 5106, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

CIVIL AERONAUTICS BOARD

The CAB requests clearance of a new, single-time request for lease financing information from 22 air carriers for use in the Board's Insitutional Control of Air Carriers Investigation, Docket 26348. The information requested is required to complete documents and other data received in response to a previous inquiry approved by the General Accounting Office on April 29, 1977 (approval number B-180226 (S77015)). Responses to the previous request did not include sufficient information to evaluate the extent of participation by various financial institutions in aircraft leases. The CAB estimates that respondents will be the 22 certificated air carriers who responded to the previous inquiry and that reporting time will average 25 hours per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

PROPOSED PARADOX VALLEY UNIT, COLORADO RIVER BASIN SALINITY CONTROL PROJECT

Notice of Public Hearing on Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the proposed Paradox Valley Unit. This statement (INT DES 78-19) was made available to the public on May 11, 1978.

The draft environmental statement deals with the proposed construction in southwestern Colorado of a brine well field, hydrogen sulfide stripping plant, brine pipeline, and solar evaporation pond. These structures would decrease salinity in the Colorado River system.

To receive comments from interested organizations or individuals on the environmental statement, the Bureau of Reclamation will hold a public hearing on June 17, 1978, at Nucla High School in Nucla, Colo. The hearing will begin at 10 a.m., and continue until all comments are received.

Oral statements at the hearing will be limited to a period of 10 minutes. Speakers will not trade their time to obtain a longer oral presentation; however, the person authorized to conduct the hearing may allow any speaker additional opportunity to comment after all other persons wishing to comment have been heard. Requests for scheduled presentation will be accepted up to 4:30 p.m., June 14, 1978. Any subsequent requests will be handled at the hearing on a first-come-first-served basis following the scheduled presentations. Whenever possible, speakers will be scheduled according to the time preference mentioned in their letter or telephone request. Any scheduled speaker not present when called will lose his turn in the scheduled order but will be given an opportunity to speak at the end of the scheduled presentations.

Organizations or individuals desiring to present statements at the hearing should contact Regional Director, Harl M. Noble, Bureau of Reclamation, Room 7201, 125 South State Street, Salt Lake City, Utah 84147, telephone, 801-524-5536, and announce their intention to participate. Oral and written statements presented at the hearing will be summarized and responded to in the final environmental statement. Any person wishing his or her comments printed in full in the final environmental statement should respond by addressing the draft environmental statement in a separate written document. These written comments should be addressed to the Regional Director and postmarked no later than June 26, 1978.

Dated: May 12, 1978.

CLIFFORD I. BARRETT,
Acting Commissioner of Reclamation.

National Park Service

FORT SUMTER TOURS, INC.

Notice of Intention to Negotiate Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on June 16, 1978, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Fort Sumter Tours, Inc., authorizing it to continue to provide concession facilities and services for the public at Fort Sumter National Monument for a period of ten (10) years from date of execution through December 31, 1987.

An assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental assessment may be reviewed in the Regional Office, 1895 Phoenix Boulevard, Atlanta, Ga. 30349.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on September 30, 1978, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Fort Sumter Tours, Inc., as the present satisfactory concessioner, the right to meet the terms of responsive proposals for the proposed new contract and a preference in the negotiation of the contract, if the offer of Fort Sumter Tours, Inc., is substantially equal to others received. In the event a responsive proposal superior to that of Fort Sumter Tours, Inc., (as determined by the Secretary) is submitted, Fort Sumter Tours, Inc., will be given the opportunity to meet the terms and conditions of the superior proposal, the Secretary considers desirable, and, if it does so, the new contract will be negotiated with Fort Sumter Tours, Inc. The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be submitted within thirty (30) days after the publication date of this notice to be considered and evaluated.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

V 43 96

Dated: May 5, 1978.

DANIEL J. TOBIN, Jr.
Associate Director,
National Park Service.

GRAZING MANAGEMENT PROGRAM, RIO PUERCO RESOURCE AREA, N. MEX.

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement on grazing management in the Rio Puerco Resource Area, New Mexico.

The proposal involves the implementation of Allotment Management Plans on 393,083 acres of public lands for the purpose of establishing a range and vegetation improvement program.

Copies are available for inspection at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Streets NW., Washington, D.C. 20240, telephone 202-343-5171.

[INT FES 78-8]

PROPOSED GRAZING MANAGEMENT ON PUBLIC LANDS IN THE SAN LUIS VALLEY, COLO.

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior's Bureau of Land Management has prepared a final environmental statement (FES) on the proposed grazing management in the San Luis Resource Area, Colo.

The statement analyzes environmental impacts that would result from implementation of intensive grazing management plans, including necessary range improvements, on 92 percent of the public lands in the San Luis Valley. Other allotments would be managed less intensively (16,625 acres), or would be entirely eliminated from grazing use (5,930 acres). The remaining 19,900 acres are not currently grazed by livestock and that status would remain the same.

Several alternatives were considered, including No Action, Elimination of Grazing, Custodial Management, Reduced Management on Specific Allotments, Wildlife Effective, Watershed Effective, and Balanced Multiple Use.

In preparing the final statement, BLM requested and received assistance and comments from many agencies of Federal, State, and local government. Notice of availability of draft environmental statement appeared in FEDERAL REGISTER Vol. 42, No. 9, January 13, 1977. Written comments were invited for a 45-day period ending March 1, 1977. Additional opportunity to comment was provided at public hearings held on February 23, 1977, in Alamosa, Colo. The final environmental statement contains specific responses to both written comments and oral testimony that dealt with the adequacy of the draft environmental statement. Revisions in the text were also made in response to comments or new information provided by the public during the comment period.

Copies of the final statement and review copies are available at the following Bureau of Land Management offices:

Canon City District Office, 3080 East Main Street, Canon City, Colo. 81212, telephone 303-275-7494.

Colorado State Public Affairs Office, room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202, telephone 303-837-4481.

San Luis Resource Area Office, Bureau of Land Management, 1921 State Street, Alamosa, Colo. 81101, telephone 303-589-4975.

Review copies only are available at the following locations:

Washington Office of Public Affairs, Bureau of Land Management, room 5625, 18th and C Streets NW., Washington, D.C. 20240, telephone 202-343-4151.

National Endowment for the Arts and the Humanities

National Endowment for the Humanities

HUMANITIES PANEL

Meeting

MAY 11, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Humanities Panel will be held at 806 Fifteenth Street NW., Washington, D.C. 20506, in room 807, from 9 a.m. to 5:30 p.m. on June 12 and 13, 1978.

The purpose of the meeting is to review Higher Education Projects applications submitted to the National Endowment for the Humanities for projects beginning after October 1, 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 Fifteenth Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee
Management Officer.

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on June 1-3, 1978, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, JUNE 1, 1978

8:30 a.m.-9 a.m.: Executive session (open). The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities including the appointment of new Committee members.

This session will be open to the public except for those portions which must be closed to protect information the release of which would represent an unwarranted invasion of personal privacy.

The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding the request for operation at increased power of the Maine Yankee Atomic Power Station.

Portions of this session will be closed if necessary to discuss proprietary information applicable to this matter and provisions for physical protection of this unit.

9 a.m.-11 a.m.: Maine Yankee Atomic Power Station (open). The Committee will hear and discuss presentations by representatives of the NRC staff and the applicant related to the request to operate this unit at increased power. Portions of this session will be closed if necessary to discuss proprietary information applicable to this matter and provisions for physical protection of this unit.

11 a.m.-12:15 p.m.: Executive session (open). The Committee will hear and discuss reports of Subcommittees and Working Groups on a number of generic matters related to reactor safety including anticipated transients without scram and proposed revisions to NRC regulatory guides. The Subcommittee on the Vermont Yankee Nuclear Power Station will also report on operating experience at this facility.

1:15 p.m.-2:15 p.m.: Report on Intergovernmental Review of Nuclear Waste Management (open). The Committee will hear and discuss a report by representatives of the NRC regarding NRC participation in the program for reviews of nuclear waste management and disposal.

2:15 p.m.-2:30 p.m.: Executive session (open). The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding the request for operation of the Indian Point Nuclear Generating Station, Unit 3, at full power. Portions of this session will be closed if necessary to discuss proprietary information applicable to this matter and provisions for physical protection of this unit.

2:30 p.m.-4:30 p.m.: Indian Point Nuclear Generation Station, Unit 3 (open). The Committee will hear presentations by and hold discussions with representatives of the NRC staff and the applicant regarding the request for operation of this unit at full power. Portions of this session will be closed if necessary to discuss proprietary information applicable to this matter and provisions for physical protection of this unit.

4:30 p.m.-6:30 p.m.: Executive session (open). The Committee will discuss proposed ACRS positions and comments regarding generic matters related to nuclear powerplant safety including the use of Class 9 accidents for evaluation of alternate reactor sites and the source term used in reactor safety analysis.

The Committee will also discuss its proposed reports to the NRC on the Maine Yankee Nuclear Plant and the Indian Point Nuclear Generating Station, Unit 3.

FRIDAY, JUNE 2, 1978

8:30 a.m.-1:30 p.m.: Meeting with NRC staff (open). The Committee will hear presentations from and hold discussions with members of the NRC

MY 17 78 UMI

V 43 96
MY 17 78
UMI

staff regarding recent licensing actions and operating experience including the seismic reevaluation of several nuclear powerplants and review of a proposed safe shutdown system for the Oconee Nuclear Plant.

Representatives of the NRC staff and its contractors will also report to the ACRS on generic matters related to nuclear powerplant safety including the bases for combination of seismic and other dynamic loads, the proposed use of Class 9 accidents for evaluation of alternate powerplant sites, and comparison of risks from nuclear powerplants with other societal risks.

The future schedule for ACRS activities and topics proposed for consideration by the Committee will also be discussed.

2:30 p.m.–6 p.m.: Executive session (open). The Committee will discuss proposed ACRS comments regarding the establishment of a quasi-judicial, statutory board to investigate reactor accidents. The Committee will also discuss proposed comments regarding generic matters discussed during this meeting and miscellaneous Committee activities including reorganization of ACRS Subcommittees and Working Groups and a proposed periodic report of ACRS activities.

The Committee will also discuss proposed reports to the NRC on the Maine Yankee Nuclear Plant and the Indian Point Nuclear Generating Station, Unit 3.

SATURDAY, JUNE 3, 1978

8:30 a.m.–12 noon: Executive session (open). The Committee will discuss its proposed reports to NRC regarding the Indian Point Nuclear Generating Station, Unit 3, and the Maine Yankee Atomic Power Station.

The Committee will complete discussion of generic matters and miscellaneous ACRS activities considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were outlines in the FEDERAL REGISTER on October 31, 1977, page 56972. In accordance with these procedures, oral or written statement may be presented by members of the public, recordings well be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

I have determined in accordance with section 10(d) of Pub. L. 92-463 that is is necessary to close portions of the meeting as noted above to protect proprietary information (5 U.S.C. 552b(c)(4)), to preserve the confidentiality of information related to safeguarding of special nuclear material and the physical protection of nuclear facilities (5 U.S.C. 553b(c) (1) and (4)), and to protect information the release of which would represent an unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)). Separation of factual information from information considered exempt from disclosure during closed portions of the meeting is not considered practical.

Background information concerning items to be considered during this meeting can be found in documents on file and available for public inspection in the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and in the following public document rooms:

INDIAN POINT NUCLEAR GENERATING STATION, UNIT 3

White Plains Public Library, 100 Martine Avenue, White Plains, N.Y. 10601.

MAINE YANKEE ATOMIC GENERATING STATION

Wiscasset Public Library, High Street, Wiscasset, Maine 04578.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, telephone 202-634-1371, between 8:15 a.m. and 5 p.m. e.d.t.

Dated: May 15, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Proposed Meetings

In order to provide advance information regarding proposed meetings of the ACRS Subcommittees and Working Groups and of the full Committee, the following preliminary schedule is being published. This preliminary schedule reflects the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or canceled since the last list of proposed meetings published in the REDERAL REGISTER on April 28, 1978. Those meetings which are definitely scheduled have had, or will have, an individual notice published in the FEDERAL REGISTER approximately 15 days (or more) prior to the meeting. Those Subcommittee and Working Group meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee and Working Group meetings usually begin at 8:30 a.m. The exact time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee and Working Group meetings will start will be published approximately 15 days prior to each meeting. Information as to whether a meeting has been firmly scheduled, canceled, or rescheduled, or whether changes have been made in the agenda for the June 1-3, 1978, ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee, telephone 202-634/1374, Attn.: Mary E. Vanderholt, between 8:15 a.m. and 5 p.m., e.d.t.

SUBCOMMITTEE AND WORKING GROUP MEETINGS

**Davis Besse Nuclear Power Station,* Units 2 and 3, May 18, 1978, Washington, D.C. Rescheduled to June 30, 1978. Notices of this meeting were published in the FEDERAL REGISTER on May 3 and 11, 1978.

**Vermont Yankee Nuclear Power Station,* May 19, 1978, Vernon, Vt. The Subcommittee will review the operating history and fuel performance for this station. Notice of this meeting was published in the FEDERAL REGISTER on May 4, 1978.

**Fluid/Hydraulic Dynamic Effects,* May 23, 1978, Des Plaines, Ill. The Subcommittee will discuss items related to the Mark I, II, and III containment systems. Notice of this meeting was published in the FEDERAL REGISTER on May 8, 1978.

**Diablo Canyon Nuclear Power Station,* May 24-25, 1978 (rescheduled from May 17, 1978), Washington, D.C. Rescheduled to June 14-15, 1978.

**Maine Yankee Nuclear Plant,* May 25, 1978 (rescheduled from May 2, 1978), Washington, D.C. The Subcommittee will review the request of the Maine Yankee Atomic Power Corp., to operate this plant beyond the FSAR designated power of 2,560 MW(t) up to a power level of 2,630 MW(t). Notices of this meeting were published in the FEDERAL REGISTER on April 17, May 2, and May 11, 1978.

**Anticipated Transients Without Scram (ATWS),* May 26, 1978, Washington, D.C. The Working Group will discuss various issues pertaining to anticipated transients during reactor operations that might take place without the occurrence of reactor scram. Notice of this meeting was published in the FEDERAL REGISTER on May 11, 1978.

**Regulatory Activities,* May 31, 1978, Washington, D.C. The Subcommittee will review working papers, future regulatory guides and changes to existing regulatory guides; also, it will discuss pertinent activities which affect the current licensing process and/or reactor operations. Notice of this meeting was published in the FEDERAL REGISTER on May 16, 1978.

**Reactor Safety Research,* May 31, 1978, Washington, D.C. The Subcommittee will meet in open executive session to discuss review efforts for the ACRS 1978 report to Congress on NRC reactor safety research. Notice of this meeting was published in the FEDERAL REGISTER on May 16, 1978.

**Diablo Canyon Nuclear Power Station,* June 14-15, 1978 (rescheduled from May 24-25, 1978), Washington, D.C. The Subcommittee will continue its review of the Pacific Gas & Electric Co.'s applications for operating licenses for units 1 and 2 of this station.

**Siting Evaluation,* June 16, 1978, Washington, D.C. The Subcommittee will discuss the NRC report entitled, "Early Site Reviews for Nuclear Power Facilities—Procedures and Possible Technical Review Options," NUREG-0180, draft revision dated February 1978.

**Allens Creek Nuclear Generating Station, Unit 1,* June 22, 1978, Houston Tex. Postponed indefinitely.

Naval Reactors/Naval Operations, June 28, 1978, Schenectady, N.Y. The Subcommittee will review the request of the Division of Naval Reactors, Department of Energy, to operate the S8G reactor prototype located at Knolls Atomic Power Laboratory.

**New England Power Nuclear Project, Units 1 and 2,* June 28-29, 1978, Providence, R.I. The Subcommittee will review the application of the New England Power Co. for a permit to construct units 1 and 2 of this project.

**Electrical Systems, Control, and Instrumentation,* June 29, 1978, Washington, D.C. The Subcommittee will meet with representatives of numerous vendors and utilities to review the capability of loose parts monitoring systems in nuclear powerplants.

**Davis Besse Nuclear Power Station, Units 2 and 3,* June 30, 1978 (rescheduled from May 18, 1978), Washington, D.C. The Subcommittee will review the application of the Toledo Edison Co. for a permit to construct units 2 and 3 of this station.

**Regulatory Activities,* July 5, 1978, Washington, D.C. The Subcommittee will review working papers, future regulatory guides and changes to existing regulatory guides; also, it will discuss pertinent activities which affect the current licensing process and/or reactor operations.

**Fast Flux Test Facility,* July 12, 1978, Washington, D.C. The Subcommittee will meet with the NRC staff and officials from the Department of Energy to discuss the status of construction and the NRC safety review of the fast flux test facility.

**Erie Nuclear Power Plant, Units 1 and 2,* July 18, 1978, Sandusky, Ohio. The Subcommittee will review the application of the Ohio Edison Co. for a permit to construct units 1 and 2 of this plant.

**Electrical System, Control, and Instrumentation,* July 20, 1978, Los Angeles, Calif. The Subcommittee will meet with representatives of numerous vendors and utilities to review the capability of loose parts monitoring systems in nuclear powerplants.

**Waste Management,* July 25, 1978, Washington, D.C. The Subcommittee will review the progress on the NRC staff study of waste disposal classification; discuss recent USGS reports on high level waste management; and discuss NRC response to actions suggested in DOE/ER-0004/D, February 1978, "Report of Task Force for Review of Nuclear Waste Management."

**Environmental,* July 26, 1978, Washington, D.C. The Subcommittee will review Regulatory Guide 1.88, Rev. 1, "Methods for Determining the Technical Specification Limit on Activity Release at the Main Condenser Vacuum System on Boiling Water Reactors."

**Decommissioning of Nuclear Facilities,* July 26, 1978, Washington, D.C. The Subcommittee will review NUREG-0436, "Plan for Reevaluation of NRC Policy on Decommissioning of Nuclear Facilities."

**Hypothetical Core Disruptive Accident for Fast Reactors (HCDA),* July 27-28, 1978, Los Alamos, N. Mex. The Working Group will discuss the goals and accomplishments of the SIMMER program and the capability of the SIMMER code to model a hypothetical core disruptive accident.

**Regulatory Activities,* August 2, 1978, Washington, D.C. The Subcommittee will review working papers, future regulatory guides and changes to existing regulatory guides; also, it will discuss pertinent activities which affect the current licensing process and/or reactor operations.

ACRS FULL COMMITTEE MEETINGS

JUNE 1-3, 1978

A.*Maine Yankee Atomic Power Station—Review request for power level increase.

B.*Indian Point Nuclear Generating Station, Unit 3—Review request to operate at full power.

JULY 6-8, 1978

Agenda to be announced.

AUGUST 3-5, 1978

Agenda to be announced.

Dated: May 15, 1978.

INTERNATIONAL ATOMIC ENERGY AGENCY DRAFT SAFETY GUIDE

Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is developing a limited number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides will be developed in the following five areas: Government Organization, Siting, Design, Operation, and Quality Assurance. The purpose of these codes and guides is to provide IAEA guidance to countries beginning nuclear power programs.

The IAEA Codes of Practice and Safety Guides are developed in the following way. The IAEA receives and collates relevant existing information used by member countries. Using this collation as a starting point, an IAEA Working Group of a few experts then develops a preliminary draft. This preliminary draft is reviewed and modified by the IAEA Technical Review Committee to the extent necessary to develop a draft acceptable to them. This draft Code of Practice or Safety Guide is then sent to the IAEA Senior Advisory Group which reviews and modifies the draft as necessary to reach agreement on the draft and then forwards it to the IAEA Secretariat to obtain comments from the Member States. The Senior Advisory Group then considers the Member State comments, again modifies the draft as necessary to reach agreement and forwards it to the IAEA Director General with a recommendation that it be accepted.

As part of this program, Safety Guide SG-QA8, "Quality Assurance for Manufacture of Items for Nuclear Power Plants," has been developed. The Working Group, consisting of Mr. C. Carrier, France; Mr. G. S. Horne, United Kingdom; Mr. H. Whilhelm, Federal Republic of Germany; and Mr. J. P. Jackson (Management Analysis Company), United States of America, developed the initial draft of this Safety Guide from an IAEA collation during a meeting on March 7-11, 1977. The Working Group draft of this Safety Guide was modified by the Technical Review Committee on Quality Assurance which met on December

V 4 3 5 9 6

5-9, 1977, and we are soliciting public comments on this modified draft. Comments on this draft received by June 23, 1978 will be useful to the U.S. representatives to the Technical Review Committee and Senior Advisory Group in evaluating its adequacy prior to the next IAEA discussion.

Single copies of this draft may be obtained by a written request to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(5 U.S.C. 522(a).)

Dated at Rockville, Maryland this 4th day of May 1978.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director,
Office of Standards Development.

[7590-01]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 8.19, "Occupational Radiation Dose Assessment in Light-Water Reactor Power Plants—Design Stage Man-Rem Estimates," describes a method acceptable to the NRC staff for performing an assessment of collective occupational radiation dose as part of the process of designing a light-water-cooled power reactor.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 8.19 will, however, be particularly useful in evaluating the need for an early revision if received by July 17, 1978.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md. this 9th day of May 1978.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director,
Office of Standards Development.

[NUREG-75/087]

REVISION TO THE STANDARD REVIEW PLAN

Notice of Issuance and Availability

As a continuation of the updating program for the Standard Review Plan (SRP) previously (FEDERAL REGISTER notice dated December 8, 1977), the Nuclear Regulatory Commission's (NRC's) Office of Nuclear Reactor Regulation has published Revision No. 1 to section No. 2.4.11 (Low Water Considerations) of the SRP for the NRC staff's safety review of applications to build and operate light-water-cooled nuclear power reactors. The purpose of the plan, which is composed of 224 sections, is to improve both the quality and uniformity of the NRC staff's review of applications to build new nuclear powerplants, and to make information about regulatory matters widely available, including the improvement of communication and understanding of the staff review process by interested members of the public and the nuclear power industry. The purpose of the updating program to revise sections of the SRP for which changes in the review plan have been developed since the original issuance in September 1975 to reflect current practice.

Copies of the Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants, which has been identified as NUREG-75/087, are available from the National Technical Information Service, Springfield, VA. 22161. The domestic price is $70, including first-year supplements. Annual subscriptions for supplements alone are $30. Individual sections are available at current prices. The domestic price for Revision No. 1 to section No. 2.4.11 is $4. Foreign price information is available from NTIS. A copy of the Standard Review Plan including all revisions published to date is available for public inspection at the NRC's Public Document Room at 1717 H Street, NW., Washington, D.C. 20555.

(5 U.S.C. 552(a).)

Dated at Bethesda, Md., this 4th day of May, 1978.

For the U.S. Nuclear Regulatory Commission.

DANIEL R. MULLER,
Deputy Director, Division of Site Safety and Environmental Analysis, Office of Nuclear Reactor Regulation.

[7590-01]

[NUREG-75/087]

REVISION TO THE STANDARD REVIEW PLAN

Notice of Issuance and Availability

As a continuation of the updating program for the Standard Review Plan (SRP) previously announced (FEDERAL REGISTER notice dated December 8, 1977), the nuclear Regulatory Commission's (NRC's) Office of Nuclear Reactor Regulation has published Revision No. 1 to section Nos. 2.4.10 (Flooding Protection Requirements) and 2.4.14 (Technical Specifications and Emergency Operation Requirements) of the SRP for the NRC staff's safety review of applications to build and operate light-water-cooled nuclear power reactors. The purpose of the plan, which is composed of 224 sections, is to improve both the quality and uniformity of the NRC staff's review of applications to build new nuclear power plants, and to make information about regulatory matters widely available, including the improvement of communication and understanding of the staff review process by interested members of the public and the nuclear power industry. The purpose of the updating program is to revise sections of the SRP for which changes in the review plan have been developed since the original issuance in September 1975 to reflect current practice.

Copies of the Standard Review Plan for the Review of Safety Analysis Reports for nuclear Power Plants, which has been identified as NUREG-75/087, are available from the National Technical Information Service, Springfield, Va. 22161. The domestic price is $70, including first-year supplements. Annual subscriptions for supplements alone are $30. Individual sections are available at current prices. The domestic price for Revision No. 1 to section Nos. 2.4.10 and 2.4.14 is $4 per section. Foreign price information is available from NTIS. A copy of the Standard Review Plan including all revisions published to date is available for public inspection at the NRC's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 (5 U.S.C. 552(a)).

Dated at Bethesda, Md., this 4th day of May, 1978.

For the U.S. Nuclear Regulatory Commission.

[NUREG—75/087]

REVISION TO THE STANDARD REVIEW PLAN

Notice of Issuance and Availability

As a continuation of the updating program for the Standard Review Plan (SRP) previously announced (FEDERAL REGISTER notice dated December 8, 1977), the Nuclear Regulatory Commission's (NRC's) Office of Nuclear Reactor Regulation has published Revision No. 1 to section No. 2.3.5 of the SRP for the NRC staff's safety review of applications to build and operate light-water-cooled nuclear power reactors. The purpose of the plan, which is composed of 224 sections, is to improve both the quality and uniformity of the NRC staff's review of applications to build new nuclear power plants, and to make information about regulatory matters widely available, including the improvement of communication and understanding of the nuclear power industry. The purpose of the updating program is to revise sections of the SRP for which changes in the review plan have been developed since the original issuance in September 1975 to reflect current practice.

Copies of the Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants, which has been identified as NUREG-75/087, are available from the National Technical Information Service, Springfield, Va. 22161. The domestic price is $70, including first-year supplements. Annual subscriptions for supplements alone are $30. Individual sections are available at current prices. The domestic price for Revision No. 1 to section No. 2.3.5 is $4. Foreign price information is available from NTIS. A copy of the Standard Review Plan including all revisions published to date is available for public inspection at the NRC's Public Document Room at 1717 H Street NW., Washington, D.C. 20555 (5 U.S.C. 552(a)).

Dated at Bethesda, Md., this 9 day of May, 1978.

For the U.S. Nuclear Regulatory Commission.

[7590-01]

[Dockets Nos. 50-277 and 50-278]

PHILADELPHIA ELECTRIC CO., ET AL., PEACH BOTTOM UNITS NOS. 2 AND 3

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 41 and 40 to Facility Operating License Nos. DPR-44 and DPR-56, issued to Philadelphia Electric Co., Public Service Electric and Gas Co., Delmarva Power and Light Co., and Atlantic City Electric Co., which revised the Technical Specifications for operation of the Peach Bottom Atomic Power Station Units Nos. 2 and 3, located in York County, Pa. The amendments are effective as of the date of issuance.

The amendments revised the Technical Specifications to incorporate requirements for establishing and maintaining suppression chamber water level, to maintain the margins of safety established in the NRC staff's "Mark I Containment Short Term Program Safety Evaluation", NUREG-0408. Operation in accordance with the conditions specified in NUREG-0408 has been previously authorized in the FEDERAL REGISTER on March 29, 1978 (43 FR 13111). The Commission's Safety Evaluation supporting these amendments provides the basis for rescinding the requirements to establish and maintain drywell to suppression chamber differential pressure control.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and

M Y 1 7 7 8 UMI

V 4 3 9 6

the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) application for amendment dated November 4, 1976, as supplemented by letters dated February 28, April 14, June 16, and August 30, 1977, (2) Amendments Nos. 41 and 40 to License Nos. DPR-44 and DPR-56, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pa. 17126. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 11th day of May 1978.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 78-13364 Filed 5-16-78; 8:45 am]

[7590-01]

[Docket No. 50-344]

PORTLAND GENERAL ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 27 to Facility Operating License No. NPF-1 issued to Portland General Electric Co., the City of Eugene, Oreg., and Pacific Power & Light Co. which revised Technical Specifications for operation of the Trojan Nuclear Plant (the facility), located in Columbia County, Oreg. The amendment is effective as of its date of issuance.

This amendment (1) changes the allowable heatup rate for the pressurizer from 200° F per hour to 100° F per hour, (2) corrects an error with respect to operability requirements for the spent fuel pool exhaust ventilation system, and (3) adds a clarifying phrase to Technical Specification 4.03 regarding surveillance requirements.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 30, 1977, (2) Amendment No. 27 to license No. NPF-1 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and at the Columbia County Courthouse, Law Library, Circuit Court Room, St. Helens, Oreg. 97051. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 18th day of April 1978.

[Docket No. 50-344]

PORTLAND GENERAL ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 26 to Facility Operating License No. NPF-1 issued to Portland General Electric Co., the City of Eugene, Oreg., and Pacific Power and Light Co. which revised Technical Specifications for operation of the Trojan Nuclear Plant (the facility), located in Columbia County, Oreg. The amendment is effective as of its date of issuance.

The amendment corrects Table 3.7-4 of Appendix A Technical Specifications to reflect the proper designation of fire hose stations that are required to be operable.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 13, 1978, (2) Amendment No. 26 to License No. NPF-1 and (3) the Commission's related letter. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Columbia County Courthouse, Law Library, Circuit Court Room, St. Helens, Oreg. 97051. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 13th day of April 1978.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[7590-01]

[Docket No. 50-272]

PUBLIC SERVICE ELECTRIC & GAS CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 12 to Facility Operating License No. DPR-70, issued to Public Service Electric & Gas Co., et al (the licensee), which revised the Environmental Technical Specifications for operation of the Salem Nuclear Generating Station, Unit No. 1 located in Salem County, N.J. The amendment is effective as of its date of issuance.

This amendment deletes the requirement to weigh sample populations of anadromous fishes caught in gill-nets.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 21, 1977, (2) Amendment No. 12 to License No. DPR-70 and (3) the Commission's letter dated April 14, 1978. Both of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Salem Free Public Library, 112 West Broadway, Salem, N.J. 08079. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 14th day of April 1978.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[7590-01]

[Construction Permits No. CPPR-139; CPPR-140]

UNION ELECTRIC CO. (CALLAWAY PLANT, UNITS 1 AND 2)

Hearing

The Union Electric Co., St. Louis, Mo. (Licensee), is the holder of construction permits number CPPR-139 and CPPR-140 (the license) issued by the Nuclear Regulatory Commission. The license authorizes the construction of Callaway Plant, Units 1 and 2 and was issued on April 16, 1976.

On April 3, 1978 the Director, Office of Inspection and Enforcement, pursuant to 10 CFR 2.202 of the Commission's regulations, served on the Licensee an Order to Show Cause Why Construction Permits Should Not Be Suspended. The basis of the show cause Order was that on March 30, 1978 duly authorized investigators of the Commission's Office of Inspection and Enforcement were denied access to records and personnel necessary to conduct an investigation to determine

(1) Whether a construction worker engaged in activity under the license was discharged because the worker made allegations to the Commission concerning alleged construction problems which, if uncorrected, could lead to unsafe conditions at the Callaway facility jeopardizing the public health and safety;

(2) Whether the Commission's regulations should be amended to provide expressly that all workers involved in license activities under a construction permit are encouraged to communicate with the Commission concerning matters which could jeopardize the public health and safety and to expressly prohibit any retaliation by employers against workers who do so, and

(3) Whether there may now exist at the Callaway facility potentially unsafe conditions, the existence of which has not been communicated to the Commission because of the chilling effect on workers at the site of any perception on such workers' part that a worker was discharged because he alleged potentially unsafe conditions to the Commission.

An answer dated April 21, 1978 to the Order to Show Cause Why Construction Permits Should Not Be Suspended was received from the Licensee. The answer demanded a hearing on the Order pursuant to 10 CFR 2.202(c).

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and 10 CFR Part 2 of the Commission's regulations, notice is hereby given that a hearing will be held before an Atomic Safety and Licensing Board composed of John F. Wolf, Esq., Chairman, Hugh K. Clark, Esq., and Joseph F. Tubridy, Esq. The Commission believes that extraordinary circumstances sufficient to warrant it to hear this matter in the first instance do not exist, and accordingly declines the licensee's suggestion to that effect.

The issues before the Atomic Safety and Licensing Board to be considered and be decided shall be:

(1) Whether the Commission in its investigation was denied access to records and personnel relating to the termination of a worker who had alleged construction problems which if uncorrected could lead to unsafe conditions in an activity licensed by the Commission; and

(2) Whether Construction Permits No. CPPR-139 and No. CPPR-140 should be suspended until such time as the Licensee, including its employees, agents and contractors engaged in activities under the license, submits to investigations and inspections as the Commission deems necessary and as authorized by the Atomic Energy Act of 1954, as amended, in the Commission's regulations.

In addition, the Board is authorized to resolve the Licensee's contention that NRC should defer its investigation to the ongoing grievance proceeding between the worker and contractor here involved.

A prehearing conference shall be held by the Atomic Safety and Licensing Board at a date and place to be set by the Board to consider pertinent matters in accordance with the Commission's Rules of Practice. The date and place of the hearing will be set at or after the prehearing conference and will be noticed in the FEDERAL REGISTER.

Pursuant to 10 CXFR 2.705, an answer to this Notice may be filed by the Licensee not later than June 6, 1978.

The Commission authorizes an Atomic Safety and Licensing Appeal board pursuant to 10 CFR 2.785 to exercise the authority to perform the review functions which would otherwise be exercised and performed by the Commission, subject to Commission review, as appropriate, under 10 CFR 2.786. The Appeal Board will be designated pursuant to 10 CFR 2.787 and notice as to membership will be published in the FEDERAL REGISTER.

Dated at Washington, D.C., this 11th day of May, 1978.

For the Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[Docket Nos. 50-266 and 50-301]

WISCONSIN ELECTRIC POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 34 and 39 to Facility Operating License Nos. DPR-24 and DPR-27 issued to Wisconsin Electric Power Co., which revised Technical Specifications for operation of the Point Beach Nuclear Plant Units 1 and 2, located about 15 miles north of

MAY 17 1978 UMI

V 4 3 | 9 6

Manitowoc, Wis. The amendments are effective as of the date of issuance.

The amendments remove spent fuel storage restrictions related to spent fuel cooling capability since recent design changes have rendered these restrictions unnecessary.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated September 8, 1976, as supplemented January 31, 1977 and March 16, 1978, (2) Amendment No. 34 to License No. DPR-24, (3) Amendment No. 39 to License No. DPR-27, and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the University of Wisconsin—Stevens Point Library, Stevens Point, Wis. 54481. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 18th day of April 1978.

For the Nuclear Regulatory Commission,

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[Docket No. 50-305]

WISCONSIN PUBLIC SERVICE CORP. ET AL.

Establishment of Atomic Safety and Licensing Board to Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

WISCONSIN PUBLIC SERVICE CORP., ET AL.

(Kewaunee Nuclear Power Plant)

PROPOSED ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

This action is in reference to a notice published by the Commission on December 30, 1977, in the FEDERAL REGISTER (42 FR 65335) entitled "Proposed Issuance of Amendment to Facility Operating License".

The Chairman of this Board and his address is as follows: Robert M. Lazo, Esq., Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

The other members of the Board and their address are as follows: Mr. Glenn O. Bright, Dr. Oscar H. Paris, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dated at Bethesda, Md. this 10th day of May 1978.

James R. Yore,
Chairman.

METROPOLITAN FIRE ASSURANCE CO.

Reinsuring Companies Acceptable on Federal Bonds; Termination of Authority

Notice is hereby given that the certificate of authority issued by the Treasury to Metropolitan Fire Assurance Company, Hartford, Connecticut, under Sections 6 to 13 of Title 6 of the United States Code, to qualify as an acceptable reinsuring company on Federal bonds, is hereby terminated, effective this date.

The company was last listed as an acceptable reinsuring company on Federal bonds at 42 FR 34081, July 1, 1977.

With respect to any bonds currently reinsured by Metropolitan Fire Assurance Company, bond-approving officers of the Government should secure new reinsurance with acceptable reinsuring companies in those instances where a significant amount of liability remains outstanding.

Dated: May 9, 1978.

D. A. PAGLIAI,
Commissioner, Bureau of Government Financial Operations.

VETERANS ADMINISTRATION

WHEELCHAIR LIFT SYSTEMS

VA Standard Design and Test Criteria for Safety and Quality of Automatic Wheelchair Lift Systems for Passenger Motor Vehicles

Notice is hereby given of the proposed publication of the VA Standard Design and Test Criteria for Safety and Quality of Automatic Lift Systems for Passenger Motor Vehicles, to provide an evaluation base and to ensure automatic wheelchair lifts which are safe, easy to operate and durable.

These standards provide detailed information as to the Scope, Classification, Limitations, Design Requirements, Desirable Design Goals and Test Procedures pertaining to automatic wheelchair lift systems for passenger motor vehicles.

Interested persons are invited to submit written comments regarding these standards to the following office: Director 790-121, VA Prosthetics Center, 252 Seventh Avenue, New York, N.Y. 10001.

M Y 1 7 7 8 UMI

All relevant comments received before June 16, 1978, will be considered with a view toward revision of the wheelchair lift standards prior to publication.

Effective date: It is proposed that all wheelchair lifts, as described in the VA Standard Design and Test Criteria for Safety and Quality of Automatic Wheelchair Lift Systems for Passenger Motor Vehicles, meet the described final VA standards by July 1, 1978.

Approved: May 10, 1978.

MAX CLELAND,
Administrator.

VA STANDARD DESIGN AND TEST CRITERIA FOR SAFETY AND QUALITY OF AUTOMATIC WHEELCHAIR LIFT SYSTEMS FOR PASSENGER MOTOR VEHICLES.

JUNE 28, 1977.

FOREWORD

This document is one in a series of standards developed by the Veterans Administration (VA) to present desired qualities and features of various items of prosthetic and orthotic hardware, sensory aids, and items of adaptive equipment used by disabled veterans, and to specify those attributes necessary to control the quality, safety, and performance of the items. These standards are designed to assist manufacturers and fitters to achieve uniformly high standards, assuring all patients of function, comfort, safety and durability.

Testing for compliance using these standards will be at the direction of the Veterans Administration Prosthetics Center, New York, N.Y. Compliance with this standard is determined by first obtaining from the various manufacturers lifts typical of those which manufacturers desire to sell to disabled veterans. The lifts are then tested in the manner stated herein, and those lifts complying with these requirements will be certified as approved by the VA. Reasons for non-compliance will be transmitted to the manufacturer.

To be continually effective these standards will be continually reviewed for currency as well as applicability to new concepts in lift design. Interested persons are invited to submit suggestions for additions, deletions, or changes regarding this standard to the Director, Veterans Administration Prosthetics Center, 252 Seventh Avenue, New York, N.Y. 10001.

6.0. Test Procedures.
Appendix 1, Metrication
Appendix 2, References

1.0. *Scope, Classification, Limitations, and Definitions.*

1.1. *Scope. This standard relates to a special class of automotive assistive equipment used by wheelchair-bound persons utilizing wheelchairs which do not exceed 26" overall width to enter and exit commercially available motor vehicles. Maximum safety to handicapped drivers, passengers, and the general public is of primary concern.*

1.2. *Classification.* Automotive wheelchair lifts include a variety of electric powered mechanical and hydraulic systems used to raise or lower a person in a wheelchair from one level to another. They are classified by van door application (side or rear) and by power transfer method (e.g., hydraulic, electro-mechanical, or others).

1.3. *Limitations.* These standards are limited to powered lift systems manufactured for use by the handicapped and either retrofitted or furnished as original equipment in motor vehicles (e.g., vans).

1.4. *Definitions.*

1.4.1. *Controls.* A term denoting manually operated devices which in some way regulate the lift operation. Examples: switches, handles, thumbscrews.

1.4.2. *Electrical Components.* A term encompassing all electrical hardward used on a wheelchair lift. These components include, but are not limited to, batteries, fuses, circuit breakers, motors, switches, wiring, and terminals.

1.4.3. *Fasteners.* Devices used to secure by physical means other devices or parts in place. These include, but are not limited to, bolts, nuts, screws, washers, pins, rivets, and clamps.

1.4.4. *Floor.* The floor of the vehicle in which the wheelchair lift is installed.

1.4.5. *Ground.* The surface (nominally horizontal) on which the vehicle is parked.

1.4.6. *Lift Platform.* A term denoting that portion of a wheelchair lift device on which the wheelchair rests while being raised or lowered.

1.4.7. *May.* The term "may" where used shall be construed as permissive.

1.4.8. *Nip or Pinch Point.* A term for a hazardous location which exists when two closely spaced parallel shafts rotate in opposite directions, or at the point of contact between belt and pulley, chain and sprocket, or similar moving parts of machinery.

1.4.9. *Roll Stop.* A term for a device on a wheelchair lift to prevent a wheelchair from inadvertently rolling off the lift platform.

1.4.10. *Shall.* The term "shall" where used shall be construed as mandatory.

1.4.11. *Shear Point.* A term for a hazardous location where a moving (e.g., reciprocating or sliding) part approaches or crosses a fixed part.

1.4.12. *Should.* The term "should" where used shall be construed as advisory.

1.4.13. *Weatherproof.* The term applied to equipment so constructed or protected that exposure to the weather will not interfere with successful operation.

1.4.14. *Wheelchair Ground Plane.* An imaginary plane, nominally horizontal, upon which the wheelchair wheels rest.

1.4.15. *Wire Rope Components.* A term encompassing, but not limited to, wire rope, sheaves (pulleys), clips, thimbles, end fittings, and winch hardware.

2.0. *Applicable Documents.* Standards, Specifications, or Recommended Practices promulgated by the following agencies and specified herein are applicable to the design, manufacture, and/or use of wheelchair lifts.

2.1. American National Standards Institute, 1430 Broadway, New York, N.Y. 10018.

2.1.1. ANSI A17.1—1971, Elevators, Dumbwaiters, Escalators, and Moving Walks.

2.1.2. ANSI A117.1—1961 (R1971), Specifications of Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped.

2.1.3. ANSI A120.1—1970, Safety Requirements for Powered Platforms for Exterior Building Maintenance.

2.1.4. ANSI B1.5—1973, Acme Screw Threads.

2.1.5. ANSI B1.8—1973, Stub Acme Threads.

2.1.6. ANSI B15.1—1972, Safety Standard for Mechanical Power Transmission Apparatus.

2.1.7. ANSI B29.1—1963 (R1972), Transmission roller Chains and Sprocket Teeth.

2.1.8. ANSI B30.2—1967, Overhead and Gantry Cranes.

2.1.9. ANSI B30.9—1971, Safety Standards for Cranes, Derricks, Hoists, Hooks, Jacks, and Slings.

2.1.10. ANSI B153.1—1973, Safety Requirements for the Construction, Care, and Use of Automotive Lifts.

2.2. American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.

2.2.1. ASTM D 1005-51 (R1972), Measurement of Dry Film Thickness of Organic Coatings.

2.2.2. ASTM D 2200-67 (1972), Pictorial Surface Preparation Standards for Painting Steel Surfaces.

2.3. American Welding Society, 2501 Northwest 7th Street, Miami, Fla. 33125.

2.3.1. AWS D1.1-72, Structural Welding Code.

2.3.2. AWS D10.7-60, Recommended Practices for Gas Shielded Arc Welding of Aluminum and Aluminum Alloy Pipe.

2.4. National Highway Traffic Safety Administration, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590.

2.4.1. Federal Motor Vehicle Safety Standard No. 302, Flammability of Interior Materials.

2.5. Society of Automotive Engineers, Inc., 400 Commonwealth Drive, Warrendale, PA 15096.

2.5.1. SAE Handbook, 1976, Part 1.

2.5.2. SAE Handbook, 1976, Part 2.

3.0. *Standards and Tests.* Powered automotive wheelchair lifts shall be qualified by tests conducted by or for the VA. The standards and tests set forth in the following subsections shall be applied, and failure of a lift to meet specification shall disqualify the lift from purchase by the VA for veteran beneficiaries.

3.1. *Design Requirements.*

3.1.1. Safety to persons using wheelchair lifts shall be a prime design consideration. Any single point failure of the lift shall not compromise user safety.

Rationale. Paraplegic and quadriplegic persons do not have all normal capabilities of strength, reach, and grip necessary to operate mechanical equipment. Further, they may have visual, equilibrium, or tactile limitations which affect their ability to use lifts. Therefore, every effort should be made to ensure a lift system with minimum potential for injury.

3.1.2. Wheelchair lifts shall be capable of lifting at least 400 pounds (1780 N).*

Rationale. The Human Engineering Guide to Equipment Design gives the following

*Discussion on Metrication is in Appendix 1.

V 43 96

data on weight, in pounds, of U.S. and Canadian civilian men and women (nude):(*1*)

	50th percentile	95th percentile
Men	166	217
Women	137	199

It is recognized that some spinal cord injured and other physcially handicapped persons lose some of the body weight attained prior to injury. Thus, the 95th percentile weight for men (217 lb., corrected for clothing to 225 lb.) would be a conservative estimate of the maximum body weight to be lifted. Standard electric wheelchairs (e.g., Everest and Jennings Model 34) weigh approximately 150 lb.(*2*) The sum of these two weights is 375 lb.

The smallest specified weight capacity of any lift tested was 400 lb. Therefore a figure of 400 lb. is well within the current planned capacity of lift manufacturers and is conservative when compared to expected loads.

3.1.3. The design factor based on ultimate strength shall be six (6).

Rationale. The factors of safety in equipment design commonly vary from 4 to 10 or higher. ANSI A17.1—1971, Elevators, Dumbwaiters, Escalators, and Moving Walks, specified various factors of safety for different components of a system. For example, factors from 7 to 12 are given for suspension ropes, depending on elevator speed. At 20 fpm, corresponding to the maximum allowable wheelchair lift speed, the value from ANSI A17.1 is 7.4. The factors for elevator driving machines and sheaves "shall be not less than:

"a. Eight (8) for steel, bronze, or for other metals having an elongation of at least fourteen (14) percent in a length of two (2) inches.

"b. Ten (10) for cast iron, or for other metals having an elongation of less than fourteen (14) percent in a length of two (2) inches."(*3*)

Also, factors of safety of 5 and 6 are given for hoisting equipment covered by other ANSI standards.(*4,5*) Consequently, the structural design factor of 6 is chosen as a conservative value for equipment designed to lift persons for short distances at low speeds.

It should be noted that lifts are not required to move 2400 lb. (i.e., 400 x 6), but must be capable of suspending that weight.

3.1.4. Wheelchair lifts should be powered by a dual battery system with batteries characteristic of that supplied by the manufacturer of the vehicle on which the lift is used. The batteries shall be charged by the vehicle battery charging system and regulated by a commercially available dual battery charging device. If a battery is placed inside the passenger compartment, the battery shall be located inside a restrained, protective, corrosion resistant enclosure.

Rationale. One of the dual batteries can be the vehicle battery. Battery compatibility allows charging by the existing vehicle system. A separate lift battery helps ensure that the wheelchair occupant will not be trapped inside the vehicle.

3.1.5. Battery powered wheelchair lifts shall operate at an electrical current of less than 100 amperes while lifting the rated load of 400 lb. at an ambient temperature between 50° F (10° C) and 90° F (32° C).

Rationale. The electrical current measured in most lifts was fairly low. The maximum measured current of 120 A and approximate lift time of 12 sec are well within the cold start test capacity of heavy duty batteries: approximately 400 A at 0° F for 30 sec.(*6*)

3.1.6. Installation of a wheelchair lift shall not require motor vehicle alterations that significantly diminish the structural integrity of the vehicle or in any way impair or reduce safety features provided by the motor vehicle manufacturer. The degree of alteration will be determined by analysis of the method of installation and of resulting structural changes.

Rationale. Self-evident.

3.1.7. The total weight of the lift should not exceed 275 pounds (1220 N).

Rationale. A minimum total weight of the lift, commensurate with adequate strength, should be a significant design goal. The weights of eight of the nine lifts evaluated were 146, 180, 188, 232, 255, 266, and 310 lb, respectively. (*7*) The ninth lift utilized the van doors as a platform and, therefore, was not of a similar design as the others. The average weight of these eight lifts was 225 lb. with a standard deviation of 53 lb. The average plus one standard deviation is 225 + 53 = 278 lb., rounded off to 275 lb.

3.1.8. Hand holds, if used, should be of round cross-section and approximately 1½ inches (3.81 cm) outside diameter.

Rationale. The Human Engineering Guide to Equipment Design gives maximum grip strength versus grip diameter and showed that a 2½ in. diameter was optimal for male pilots used in the experiment. (*8*) The Occupational Safety and Health Standards gives the diameter of stair railings as 1½ in. nominal diameter. (*9*) In consideration of the smaller female hand, (*10*) the 1½ in. diameter was chosen. Several lifts have a platform framework of rectangular and square cross-section (1½ in. side) and another lift has a similar 2 in. diameter tube, all of which serve as lateral hand hold bars. There were favorable comments from disabled users about being able to hold on, but the square tube was less comfortable to grip.

3.1.9. The lift shall have no dirty or greasy surfaces which will contact the wheelchair occupant during normal lift operation as specified by the manufacturer.

Rationale. This item relates to the aesthetic characteristics of a lift and convenience to the user. Some of the lifts evaluated had dirty or greasy parts within the reach envelope of the user. The possible soiling of clothes, hands, arms, and legs is apparent.

3.1.10. Lift framework dimensional requirements to ensure accommodation of wheelchair occupant in the following four subparagraphs and as shown in Figures 1 and 2.

3.1.10.1. The width provided for the wheelchair ground plane, measured laterally, shall be at least 29 inches (73.7 cm).

Rationale. The nominal wheelchair width of 25 in. is given in ANSI A117.1—1961 (R1971), Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped. (*3*) A platform width of 29 in. will allow 2 in. on each side as maneuvering space. Further, the evaluated lifts had a range of platform widths form 28⅜ in. to 48 in. with the mean being 31¾ in.

3.1.10.2. The width between any verticle members twelve (12) inches (30.48 cm) or more above the wheelchair ground plane, measured laterally, shall be at least 29 inches (73.7 cm).

Rationale. The basic consideration here is hand clearance for the occupant in a manual wheelchair during manipulation of the chair onto and off of the platform. Observation shows that the hand, while gripping the hand rim, extends outside the rim some 1¼ in. to 2 in. Therefore any verticle framework through which the wheelchair must pass should be as wide as the wheelchair hand rims plus at least 4 in. Using the ANSI A117.1—1961 (R1971) dimension this value becomes 25 + 4 = 29 in.

The range of frame width dimensions of the evaluated lifts was 26 in. to 40 in. with the mean at 32 in.

3.1.10.3. For those lifts in which the occupant faces the van side (or rear in the case of rear door installation), the distance, measured horizontally along the wheelchair ground plane from the occupant's rear to front between the inside edge of the roll stop in its active position and the nearest point on the vehicle or a lift member at all "occupant carrying" positions shall be at least 45 inches (1.143 m).

Rationale. This section applies only to the folding platform lifts. A significant problem in the design of such lifts is adequate foot clearance. For example, one lift evaluted had a platform length dimension of 43 in. A tall person (6 ft 1 in.) with an electric wheelchair (20 in. wheels) can, when facing the van, move onto the platform, rest the rear wheels against the roll stop and have no foot interference. This same person could not use a lift with a 39 in. long platform in a similar manner because of foot interference, but he can face away from the van and successfully use the lift.

The 45 in. dimension has no real significance for lifts which have a swing-in platform, since there is no foot interference problem in those cases.

3.1.10.4. The interior height from the wheelchair ground plane, measured vertically, to any lateral lift member shall be at least 32 inches (81.3 cm).

Rationale. The arm-rest height of wheelchairs as given in ANSI A117.1—1961 is 29 in.(*3*) Measurements on a number of wheelchairs confirmed this, but the electric wheelchair joysticks protrude such that their tops are about 32 in. above floor level, depending, of course, on the user's choice of joystick. The 32 in. dimension was chosen based on observation of a number of wheelchair joysticks and upon the three lifts evaluated which have lateral frame member heights of 31 in., 32 in., and 32¼ in., respectively.

3.1.11. The use of the lift shall not require an on-platform turning movement for proper alignment and location of the wheelchair.

Rationale. A turning maneuver of a wheelchair on a lift platform is difficult unless the wheelchair occupant can look down to see the wheel location. And, if not made properly, the maneuver may leave one or more wheels improperly located or interfering with the roll-stop. One lift of those evaluated does require a left turn of approximately 30°, then a return to the straight-ahead direction in order to align the wheelchair properly.

3.1.12. *Tests.*

3.1.12.1. *Receiving Inspection Test.* A receiving inspection shall be conducted and shall include:

a. Weighing the wheelchair lift.

b. Assessment of installation method and required vehicle alterations.

c. Assessment of battery power supply, connections, and charging method.

3.1.12.2. *Dimensional Test.* Upon installation of the lift on a test fixture according to manufacturer's instructions, measurements will be taken to determine compliance with dimensional requirements of section 3.1.10.

3.2. *Desirable Design Goals.*

3.2.1. Ease of operation by a broad range of handicapped persons should be a prime consideration of the designer/manufacturer.

Rationale. Experience in using handicapped persons to assist in evauations and discussions with users indicated a wide variety of capabilities among quadriplegics and paraplegics. Also, it is known from personal contact with one manufacturer(*11*) that he, and perhaps other manufacturers, make modifications of their standard lifts for purchasers who cannot use the standard model. It is to the manufacturers' advantage to produce lifts that are satisfactory to most users and, therefore, to avoid the necessity of customizing.

3.2.2. The lift should be designed with an integral system allowing manual operation in the event of failure of the primary operation method. An alternative to such a manual system should be written instructions for actions to be taken in event of such failure.

Rationale. Failure of the primary operation method (e.g. dead battery, burned-out motor, etc.) can result in great inconvenience to a lift user. A back-up mode of lift operation is highly desirable.

3.2.3. Required user actions such as pulling, pushing, holding, and similar physical actions should be kept to a minimum.

Rationale. The lift operation should be as free of required user action as possible. This minimizes the possibility of human error. For example, limit switches can be used to turn off the lift drive motor, but depending on the user to release a manual switch at the proper time may result in injury to the user or damage to the equipment.

3.2.4. A wheelchair lift should be designed for minimum interference to normal vehicle usage.

Rationale. The convenience of able-bodied family members and guests to use the lift-equipped van is important and should be considered by the designer.

3.2.5. Commercially available components should be used in the design wherever possible.

Rationale. Commercially available components have advantages of cost, availability, and standardization.

3.3. *Materials and Components.*

3.3.1. *General Performance.*

3.3.1.1. *Standard.* Wheelchair lifts shall be constructed to prevent permanent deformation under the stress of normal usage as specified by the manufacturer and to operate reliably over an extended period of time.

3.3.1.2. *Specification.* A fully assembled and installed wheelchair lift shall withstand without fracture the stresses resulting from a static load of 2400 pounds (10676 N) to ensure a minimum factor of safety of six (6) for the rated load of 400 pounds (1780 N).

Rationale. The rationale statements given for sections 3.1.2. and 3.1.3. apply here. In summary, the rated load specification of 400 lb. was chosen by combining anthropometric data and wheelchair weights, and the safety factor was based on ANSI standards for similar-use equipment.

The lifts are not required to lift 2400 lb. but must be able to suspend that load.

In addition to a static load test of 2400 lb. an accelerated life cycle test of 4400 cycles will be conducted. The value of 4400 cycles (approximately two year's use) was developed from a telephone survey of individuals who have lifts installed in their personal-use vans.

3.3.1.3. *Tests.*

3.3.1.3.1. *Accelerated Life Cycle Test.* An accelerated life cycle test will be performed by repeating the wheelchair lift use cycle 4400 times. The time between each cycle shall be not less than six minutes. Ambient temperature shall be between 50° F and 90° F (10° C and 32° C). Alternating cycles of loaded and unloaded platform configuration will be simulated by applying a 400 pound (1780 N) load for 100 cycles, then removing the load for 100 cycles. Periodic visual inspection without disassembly of the lift will be made in intervals of 500 cycles and changes in alignment, component wear, loosening of fasteners, and the like will be recorded. Failure mode analyses will be performed and a decision will be made based on those analyses. Preventive maintenance will be performed in accordance with the manufacturer's instructions.

3.3.1.3.2. *Static Load Test.* A static load of 2400 pounds (10676 N) shall be applied through the centroid of a test pallet placed at the centroid of the platform when the platform is positioned at van floor level. The length and width dimensions of the test pallet shall be 23" length x 24" width to correspond to the approximate outer dimensions of a wheelchair "footprint". The load shall remain on the platform not less than two (2) minutes. After the load is removed an inspection shall be made to determine if fractures have occurred. An equivalent test shall be performed on lifts which do not have a platform. The Static Load Test shall be performed after the Accelerated Life Cycle Test.

3.3.2. *Electrical Components and Wiring.*

3.3.2.1. *Standard.* Electrical components and wiring shall conform to the Society of Automotive Engineers Standards or Recommended Practices as applicable.(*6*) Those listed below are applicable to all lifts.

SAE J258, SAE J553c: Circuit Breakers

SAE J537h: Storage Batteries

SAE J538a: Grounding of Storage Batteries

SAE J554a: Electric Fuses

SAE J556: Automobile Wiring

SAE J561b, SAE J858a, SAE J928a: Electrical Terminals

Rationale. Electrical components of wheelchair lifts should be of the same quality as those of the vehicle on which the lift is installed. SAE standards are developed, accepted, and utilized in the automotive industry.

3.3.2.2. *Standard.* All electrical systems shall be designed and packaged to protect the driver or passengers against injury resulting from short circuits, electrical fires, and similar incidents.

Rationale. The protection of the lift user and passengers from injury and protection of the vehicle from damage is of obvious concern.

3.3.2.3. *Standard.* Electrical components which are exposed to the environment outside the vehicle shall be protected by a suitable weatherproof enclosure.

Rationale. By their very nature electrical components must be protected from moisture to eliminate one cause of short circuits and corrosion. Such protection increases the overall system reliability. An example of non-protection of components was seen on one lift which had parts of the mechanism and electrical components under the vehicle. While this concept is acceptable, the components must be protected from such under-vehicle hazards as dirt, rock impacts, salt, and water.

3.3.2.4. *Standard.* Externally mounted wheelchair lift controls shall be installed so that they are weatherproofed by the use of inset compartments or protective coatings. Controls will be protected from misuse or vandalism by the use of key locks or key switches. Controls shall be located so that the operator of the controls will be well clear of the moving doors and lift mechanisms and in a position which will allow observation of lift movement.

Rationale. Since a function of a lift is entry into a van from the outside, there must be a means of actuating the lift from the van exterior to enable independent usage by a disabled person. This is typically done by installing toggle switches through the van side panel near the right front or right rear wheels and clear of the descending lift. Weatherproofing can be done by rubber or plastic-coated toggles or by inserting the switches in a commercially available recessed compartment. Weatherproofing will contribute to reliability, and the use of an electrical lock, key lock, or locked compartment door will help prevent unauthorized entry into the van. Installing the switches near the front or the rear of the van (for side door lift) will keep the wheelchair occupant clear of the moving doors and lift.

3.3.2.5. *Standard.* A solenoid or other device shall be designed into the power circuit to ensure that no electrical component on the lift has voltage applied to it until a lift operating control is actuated.

Rationale. Inadvertent operation of the lift must be avoided, thereby giving a measure of accident/injury protection. In the electrical system of some lifts, there is such a solenoid, and it operates very effectively to prevent lift operation except by conscious intent. With this solenoid loose wiring or accidental shorting across electrical contacts during maintenance cannot, for example, cause inadvertent lift operation.

3.3.2.6. *Electrical Tests.*

3.3.2.6.1. *General.* Electrical components and wiring shall be considered integral parts of the lift system and shall be tested for failures during the performance of Accelerated Life Cycle Testing, Section 3.3.1.3. Any failure or any hazardous condition caused by an electrical component during testing shall disqualify the entire system from acceptance.

3.3.2.6.2. *Water Spray Test.* The exposed portions of electrical components intended for installation external to the vehicle will be subjected to a five minute, fine droplet water spray test in which the droplets contact the components both vertically and horizontally. The wetted components will be allowed to air dry for approximately three (3) minutes and then the circuits will be electrically checked for successful operation.

3.3.2.6.3. *Electrical Current Test.* Electrical current flow will be measured for each lift movement. The ammeter used will be of laboratory quality with appropriate shunts. Only steady-state current, ignoring momentary surges, will be recorded.

3.3.3. *Chain Drive Components.*

3.3.3.1. *Standard.* Chain drive components shall conform to either: ANSI B29.1—1963 (R1972), Transmission Roller Chains and Sprocket Teeth(*3*) (for standard base series

MAY 17 78 UMI

V 43 M 96 Y 17 7 8 UMI

chain), or other ANSI standards applicable to specialized use chains.

Rationale. Conformance to applicable industry standards is required.

3.3.3.2. *Chain Drive Test.* Chain drive components shall be considered integral parts of the lift, and shall be tested for failures during the performance of the Accelerated Life Cycle Test, Section 3.3.1.3., and inspected for conformance to the above standards. Discrepancies in conformance or failures during the test shall disqualify the lift from acceptance.

3.3.4. *Hydraulic Components.*

3.3.4.1. *Standard.* Hydraulic components shall fonform to the following Society of Automotive Engineers Standards or Recommended Practices as applicable.(6)

SAE J514h: Hydraulic Tube Fittings.

SAE J516a: Hydraulic Hose Fittings.

SAE J517c: Hydraulic Hose.

SAE J518c: Hydraulic Flanged Tube, Pipe and Hose Connections, 4-Bolt Split Flange Type.

Rationale. Conformance to applicable industry standards is required.

3.3.4.2. *Standard.* Hydraulic hoses shall be protected from bearing or rubbing on structural components.

Rationale. This self-evident requirement is inserted primarily as a reminder to manufacturers. While the high pressure hoses used on lifts have thick walls and wear-through is unlikely, the potential exists if the hose bears or rubs on a sharp edge, and therefore must be avoided.

3.3.4.3. *Hydraulic Components Test.* Hydraulic components shall be considered integral parts of the wheelchair lift and shall be tested for failures during the performance of the Accelerated Life Cycle Test, Section 3.3.1.3. Any failures, including significant leaks, shall disqualify the lift from acceptance. A significant leak is defined as seepage or leakage which produces one or more droplets (e.g., a teardrop, approximately 0.1 cc) in ten (10) complete cycles of the wheelchair lift.

3.3.5. *Wire Rope Components.*

Comment. The rationale statements for the various subsections are combined and placed at the end of the section.

3.3.5.1. *Standard.* Wire rope systems shall be designed and fabricated using rope and support components of proper dimensions and arrangement.

3.3.5.2. *Specifications.* Industry standards and specifications relating to wire rope components are generally for larger, higher capacity systems other than wheelchair lifts. However, the design principles of wire rope systems in general are applicable to wheelchair lifts; therefore, the principles given in the following documents should be employed in lift design and so certified in writing by the manufacturer upon submission of the lift for testing:

3.3.5.2.1. ANSI A120.1—1970—Safety Requirements for Powered Platforms for Exterior Building Maintenance, Section 14.8, "Drums and Sheaves," and Section 15, "Hoisting Ropes and Rope Connections".(3)

3.3.5.2.2. ANSI B30.2.0—1967—Overhead and Gantry Cranes, Section 2-1.10, "Hoisting Equipment."(3)

3.3.5.2.3. McElroy, Frank E. (ed): Accident Prevention Manual for Industrial Operations. 6th Edition, National Safety Council, Chicago, Ill., 1969, pp. 641-657.(12)

3.3.5.2.4. Rossnagel, W. E.: Handbook of Rigging, 3rd Edition. McGraw-Hill Book Co., New York, N.Y., 1964 pp. 41-83.(13)

3.3.5.2.5. Wire rope manufacturer's recommendations.

3.3.5.3. *Specifications.* If the manufacturer/designer chooses not to use the documents specified in Section 3.3.5.2. for design guidance, then these specifications shall be used:

Material. Wire rope material shall be galvanized carbon steel (aircraft cable quality), Type 302 stainless steel, or equivalent in strength and corrosion resistance and so certified.

Construction. Wire rope shall be of 7 x 19 construction.

Sheaves. Sheaves shall be grooved with a minimum groove diameter of 25 times the nominal wire rope diameter. Grooves shall be shaped so as to saddle the rope with a 150 degree arc of support. The radius of curvature of the groove shall be one-half the nominal rope diameter plus 1/32 inch (0.8 mm). The sides of the groove shall be tangent to the groove arc. The total depth of the groove shall be between 1.5 and 2.0 times the nominal rope diameter. Material shall be aluminum alloy 2024-T6, or equivalent.

Attachments. When a wire rope is formed into an eye as a removable method of attaching the rope to equipment, a thimble shall be used inside the eye, and at least two U-bolt clips shall be attached to the doubled rope. The U-bolt portion of the clips shall bear upon the dead end of the rope, with clips spaced not less than six (6) rope diameters apart. One clip shall be as near to the thimble as possible.

Fittings. The lift manufacturer shall provide, upon request, a rope manufacturer's certification that permanent rope fittings have not less than 90 percent of the rope manufacturer's stated rope strength.

Drums. Drum diameter shall not be less that 25 times the nominal rope diameter. It is desirable that there be only one layer of rope on the drum, but the maximum number of layers shall be three. Helically grooved drums should be used to minimize crushing and excessive wear of the rope. The dimensions of such grooving shall be that of the sheave grooving, with the exception that the total depth should be approximately 0.2 times the nominal rope diameter. There shall be at least one turn of rope on the drum when the wheelchair ground plane is at ground level.

Alignment. The drum and lead sheave shall be aligned to control lateral movement of a wire rope when winding on a drum. The fleet angle shall not exceed 1½ degrees. The same maximum angular relationship shall exist between centerlines of adjacent sheaves.

Orientation. The design of the wire rope system should avoid reverse bending of the rope. The wire rope shall not bear on any portion of the lift framework.

Rationale. As noted in the opening specification statement (Section 3.3.5.2.), related industry standards are primarily for larger systems. The wire rope components used on lifts are comparable in size to those of aircraft systems. This leads to the application of military standards and manufacturer's recommendations. Consequently, in keeping with the general theme of the standard, the designer/manufacturer is given an option of adhering to the principles of industry standards as given in Section 3.3.5.2. or to those detailed specifications in Section 3.3.5.3. The detailed specifications were written from information taken from two wire rope manufacturers' recommendations (American Chain and Cable Company (14) and Carolina Steel and Wire Corporation), (15) Military Standards (MS 20220: Pulley, Groove, Flight Control, Aircraft, (16) and other similar standards for pulleys), and from the references in Section 3.3.5.2.

3.3.5.4. *Wire Rope System Test.* An inspection of the wire rope system shall be made and shall include measurement of the nominal diameters of rope, sheaves, and drum. The fleet angle between the lead sheave and drum and between sheaves at all platform positions shall be measured. Attachments and fittings shall be inspected for conformance to Section 3.3.5.3. The travel of the rope during all lift movements shall be followed to observe possible rope contact with structural members.

3.3.6. *Power Screw Components.*

3.3.6.1. *Standard.* The power screw system even when disconnected from the driving source should not allow the platform to exceed the acceleration specification by more than 50 percent.

Rationale. The self-locking feature of a vertical power screw requires that torque be applied (to the nut or the screw, depending on the design) to raise and to lower the load and is dependent only upon the screw lead angle and the coefficient of friction. The drive motor and connection components (gears, belts) may contribute toward a condition which would prevent the platform from a high rate of overhauling, but from the safe operation standpoint, the design of the power screw system should positively control such inadvertent action.

3.3.6.2. *Standard.* The power screw system shall transmit power in both directions.

3.3.6.3. *Specification.* Power screws shall be of the Acme screw thread type in conformance with ANSI B1.5—1973, Acme Screw Threads, (3) ANSI B1.8—1973, Stub Acme Threads, (3) or equivalent. The 60-degree (V-type) thread shall not be used as a power screw.

Rationale. The Acme thread has been standardized and is in wide use for power screw applications. It is less expensive to manufacture than the square thread. (6, 17, 18) The 60° (V-type) thread normally used in fastener applications is not to be used.

3.3.6.4. *Standard.* The lift designer should ensure that the power screw is checked for long-column conditions and that an appropriate column design formula is used.

Rationale. The variety of design approaches precludes specification of a particular long or short column condition and the appropriate design formulas. Further, the slenderness ratio used in such formulas may actually be different from that directly calculated from the column length and radius of gyration because of the overall design approach used.

3.3.6.5. *Power Screw Tests.* The threads on the power screw shall be inspected to ensure that Acme screw threads (or equivalent) are used and that the system transmits power in both directions.

3.4. *Fabrication.*

3.4.1. *Weldments.* The design and fabrication of any weldments used in a wheelchair lift shall conform to sections 1,2,3, and 4 of the American Welding Society Structural Welding Code, D1.1-72(19) (for steel construction) or to the AWS Recommended Practices for Gas Shielded Arc Welding of Aluminum and Aluminum Alloy Pipe, D10.7-60,(19) as applicable.

Rationale. It should be noted that the AWS code D1.1-72 is for steel construction and D10.7-60 is for aluminum alloy pipe. It is expected that aluminum lifts will have portions of the weldment which are not

pipe; however, code D10.7-60 is general enough relative to welding techniques, bead dimensions, filler materials, and other factors to be applicable here.

3.4.1.1. *Weldment Test.* A close visual inspection shall be made of all welds to detect (1) structural flaws such as undercutting, cracking, poor penetration, and surface defects, and (2) dimensional flaws such as warpage, incorrect weld size or profile, and incorrect joint separation. Other nondestructive testing using radiographic, ultrasonic, dye penetrant, or other methods may be conducted if deemed necessary by the testing agency. Significant defects shall disqualify the lift from acceptance.

3.4.2. *Fasteners.*

3.4.2.1. *Standard.* All fasteners used shall conform to the Society of Automotive Engineers Standards or Recommended Practices as applicable.(6)

Rationale. Conformance to applicable industry standards is required.

3.4.2.2. *Standard.* All fasteners used shall be designed or treated for resistance to vibration.

Rationale. It was noted during the accelerated life cycle testing that one non-locking cap screw in a critical location frequently became loosened, as did two other less critical bolts. Although the in-van lift installation is such that it is not in a high vibration environment, the repetitive operation could cause non-locking fasteners to fail and possibly result in injury or damage.

3.4.2.3. *Fastener Tests and Inspection.* Fasteners shall be considered as integral parts of the lift system and shall be tested for wear, integrity, and resistance to loosening or loss through vibration or use conditions. Such testing and inspection will be done during the Accelerated Life Cycle Test, Section 3.3.1.3.1.

3.4.3. *Level of Lift Platform.*

3.4.3.1. *Standard.* With the lift installed on a rigid structure the platform at floor level shall not slope more than 0.75 inches (1.9 cm) rise to twelve (12) inches (30.48 cm) of run (3.6 degrees) in any direction, both with no load on the platform and with the rated load of 400 pounds (1780 N) applied in the same manner as in the Static Load Test, Section 3.3.1.3.2.

Rationale. The slope requirement is primarily to avoid the steep-ramp effect of folding platform lifts. Evaluations on these lifts showed a variation at van floor level ranging from a positive to a negative slope into the van. Such a slope is, in effect, a ramp which the wheelchair occupant must negotiate, and excessive slope could be difficult or dangerous. The platform slope of a lift installed in a van will change from the static value depending on van suspension characteristics and the total wheelchair and occupant weight, the worst case being if the static platform slope is an up-slope into the van. The slope given in this section is approximately 1° less than the maximum ramp angle given in ANSI A117.1—1961 (R1971), Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped.(3)

3.4.3.2. *Platform Angle Test.* The lift shall be installed on a rigid structure. Measurements shall be taken to determine the lift platform angle at the van floor position.

3.4.4. *Coating and Finishing.*

3.4.4.1. *Standard.* Corrosion of ferrous metal wheelchair lift components can be expected as a result of contact with atomospheric moisture, road deicing salt solutions, mud, and possibly other corrosive agents. Ferrous metals shall be protected from such corrosion by the application of protective coatings.

3.4.4.2. *Specifications.*

3.4.4.2.1. Ferrous metal surfaces shall be prepared for the chosen coatings and the coatings applied in accordance with the following minimum requirements:

Surface preparation. Residues such as oil, grease, dirt, weld slag, mill scale, and rust shall be removed from the surface. Solvent or solvent vapor cleaning shall be used to remove residues prior to removal of rust and scale. The degree of rust and scale shall be determined by the methods of ASTM D2200-67 (1972), Pictorial Surface Preparation Standards for Painting Steel Surfaces.(20) The surface shall be cleaned to condition "St 2" (Scraping and wire brushing, thorough) or "Sa 2" (Blast cleaning, thorough) as given in ASTM D2200-67 (1972). Surfaces thus cleaned shall be prime coated not more than twenty-four (24) hours later.(20)

Primer coat. At least one primer coat containing rust inhibitive pigments shall be applied to the cleaned surface. A coating thickness of 1 mil (0.03 mm) to 1½ mils (0.04 mm) is adequate.(21)

Color coat. Two or more coats of corrosion and abrasive resistant flat finish shall be applied.(22)

Rationale. A high quality surface coating is necessary for long-term durability and pleasing appearance. While lift manufacturers have a wide choice of coatings for ferrous metals, the minimum requirements are specified to ensure proper preparation and choice of coatings. The lifts evaluated showed much variation in coatings, especially in the surface preparation. For example, paint sprayed over greasy areas and weld slag areas chipped off very rapidly after the lift was put into use.

3.4.4.2.2. Specular glare from the lift framework surfaces shall be minimized by using a flat or matte surface finish.

3.4.4.2.3. Finish coating colors which have a coefficient of absorption equal to or less than 0.55 should be chosen to minimize solar radiation absorptivity of the lift framework: e.g. white (0.25), light cream (0.35), light yellow (0.45), light gray (est. 0.4), light green (0.50), aluminum (0.55).

Rationale. The objective of these two sections is to minimize specular glare into the driver's eyes and to minimize solar absorptive heating of the lift framework which might burn the skin of the lift user. The driver could be subject to reflectance through the rear view mirror or while looking to the right rear. Recommendations were taken from the Human Engineering Guide to Equipment Design(23) and from the Handbook of Chemistry and Physics.(24)

3.4.4.3. *Finish Coating Test.* An inspection of the coating shall be made to include, but not be limited to, overall appearance and existence of a dull, matte surface finish. Measurements of film thickness shall be made in at least three locations using a dial comparator or dial indicator as described in ASTM D1005-51 (R1972), Measurement of Dry Film Thickness of Organic Coatings.(20) A subjective evaluation of coating adherence will be obtained in at least three locations as follows: use a machinist's scribe to scribe a single line approximately one inch long with sufficient force to penetrate to the base metal. Lay on a strip of transparent mending tape and burnish the scribed area for approximately 15 seconds with a smooth-ended metal tool. Pull the tape off with a quick, perpendicular motion. A very thin line of coating particles is indication of good adhesion. Upon completion of the Accelerated Life Cycle Test, Section 3.3.1.3.1. and the Operational Safety Test, Section 3.6.9.4., another inspection will be made to determine long-term wear and use characteristics of the coating.

3.5. *Operation.*

3.5.1. *Human Factors Standards and Specifications.*

3.5.1.1. *Controls Standard.* Control selection and application shall be done in accordance with good human factors practice of location, direction of control movement, force, range, and identification.

3.5.1.2. *Controls Specification.* Selections and application shall be made in accordance with the principles and recommendations presented in Chapter 8, Design of Controls, Human Engineering Guide to Equipment Design, Harold P. Van Cott, Editor (U.S. Government Printing Office),(25) or an equivalent publication as applicable. See Appendix 2.

Rationale. There is a wealth of data available concerning selection and application of human-actuated controls. The lifts evaluated showed a wide variety of application and misapplication of such human factors principles. Examples include the use (wisely) of 2 in. long toggle switches which the disabled users found very convenient, the orientation of toggle switch motion exactly backward from the corresponding equipment motion, and good to bad selections of switch locations.

3.5.1.3. *Acceleration Standard.* The motion of the platform shall not subject the wheelchair occupant to lateral or vertical accelerations which are frightening, uncomfortable, or potentially dangerous.

3.5.1.4. *Acceleration Specification.* Lateral and vertical accelerations shall not exceed 0.3g during any operational motion of the lift in which a weight of 400 pounds (1780 N) is being raised, lowered, or moved horizontally.

Rationale. Accelerations imposed on the wheelchair occupant by the lifts evaluated were at a low level comparable to those experienced by high performance aircraft pilots or even automobile passengers involved in a minor collision. All lifts had vertical lift accelerations below 0.5g, and most were in the 0.1g to 0.3g range. The vertical lift acceleration problem is primarily one of comfort rather than danger, but a horizontal acceleration can possibly throw the wheelchair and occupant off the platform. It was seen in the evaluation of an early model of a lift that horizontal accelerations of the order of 0.5g to 0.6g were "very rough . . ." and that 1.0g was sufficient to cause the wheelchair, with an instrumented, 170 lb anthropometric dummy, to be thrown off the platform. The specification value of 0.3g was chosen as an upper limit of the comfort range for vertical accelerations and as a conservative upper limit for the protection of the wheelchair occupant.

3.5.1.5. *Platform Access Standard.* Ramps or steps over which the wheelchair must roll onto the platform shall not preclude ease of access.

3.5.1.6. *Platform Access Specification.* A ramp, if used, shall have a slope of not more than one (1) inch (2.54 cm) rise to six (6) inches (15.24 cm) of run and provided that the slope between front and rear wheels shall not exceed 1 inch in 12 inches. A step over which a wheelchair must roll to enter

V 43 96

the platform shall have a vertical dimension of not more than ⅝ inch (15.9 mm) above the surface on which the platform rests.

Rationale. This specification is based on the ramp angle of 1 in 12 as specified in ANSI A117.1-1961 (R1971), Specification for making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped.(3) It was noted during the evaluations that the platforms on three of the lifts did have ramps and that two of these were of a greater angle than that specified. Also, the ramps were short, on the order of 3 in., which made the ramp more of a step to be rolled over. The ramps were not difficult to climb in an electric wheelchair, but did give the occupant a jolt when the wheels contacted the ramp. Access was much more difficult for those persons using manual wheelchairs.

The maximum step height of ⅝ in. was not found documented in the literature but was determined by a series of subjective tests of attempting to roll a manual wheelchair, with 8 in. hard rubber front wheels, over steps of ⅜ in., ½ in., ⅝ in., and ¾ in. height.

3.5.1.7. *Tests.*

3.5.1.7.1. *Control Inspection Test.* Inspection of controls in accordance with the principles and recommendations in the referenced volume (section 3.5.1.2.).

3.5.1.7.2. *Acceleration Test.* Accelerations will be measured by means of accelerometers in the head or chest cavity of an anthropometric dummy which is seated in a wheelchair on the platform. The wheelchair and dummy weight will be supplemented to a total weight of 400 pounds (1780 N). Accelerometer readings will be taken for all lift motions on which an occupant is carried.

3.5.1.7.3. *Slope Dimension Test.* The empty platform will be lowered to the ground position with the ramp, if any, at its entry/exit position. Linear measurements of rise and run will be made. Likewise, any step over which the wheelchair must roll will be measured.

3.5.2. *Constraints.*

3.5.2.1. The manufacturer shall specify in writing to prospective purchaser prior to purchase any type of wheelchair or specific physical handicap which hinders effective use of his lift.

3.5.2.2. The manufacturer shall specify in writing to prospective purchaser prior to purchase any factors such as ambient air temperature, rain, low battery voltage, and street slope which would hinder the designed operation of the lift.

Rationale. As might be expected, very little of current advertising of lifts relates to the constraints in using the lift. The positive rather than the negative aspects are usually emphasized. The intent of this section of the standard is to encourage the manufacturer to fully inform potential purchasers concerning lift operation so a more intelligent purchasing decision can be made.

3.5.3. *Operating Instruction Manual.* The manufacturer shall provide to the purchaser a manual of instructions concerning the proper use and operation of the lift. The instructions shall address at least the following areas: general operation, preferred entry/exist technique, operation of all controls and resulting platform movements, required user actions, actions (if any) which the user should not/must not take, warning of unusual noise, movements, or other fright-producing factors, and potential hazards. The instructions should be supplemented by photos and illustrations as necessary.

Rationale. The need for operating instructions is almost self-evident, even recognizing that many people do not read operating instructions provided with any piece of equipment. This section will prompt the manufacturer to give proper consideration to informing and warning the user about the operation of the lift.

3.5.3.1. *Visual Inspection.* A visual inspection shall be made as to the inclusion of the required Operating Instructions and the suitability of the contents.

3.6. *Standards for Product Safety.*

3.6.1. The requirements of ANSI B15.1-1972, Safety Standard for Mechanical Power Transmission Apparatus,(3) with respect to the safeguarding of (1) sources of mechanical power, (2) the associated and intermediate equipment, and (3) the driven components shall be applied in the design and manufacture of wheelchair lifts.

Rationale. Protection of wheelchair lift users and van occupants from the hazards of moving machinery is extremely important. The lifts evaluated had a variety of hazards (exposures); some were safeguarded and others were not. Some lifts may have to be redesigned in order to remove or to protect against machanical hazards.

3.6.2. The wheelchair lift operation shall be such that no movement of the whellchair is required during the raising or lowering of the platform.

Rationale. One lift evaluated and another one known to be on the market are designed such that the wheelchair must roll during the raising or lower of the platform. This motion requires a degree of attention, manual dexterity, and equilibrium that may not exist in paraplegics, and rarely exists in quadriplegics. The maximum physical action that shoud be expected of a lift user is the actuation of the lift control—typically a toggle switch.

3.6.3. The lift shall have an automatically operating device at the ground-to-platform entry/exist area, the purpose of which is to prevent the wheelchair and occupant from falling off the lift. The device shall conform to the following:

It shall be electrically or mechanically interlocked with the lift such that any time the platform is nominally horizontal and more than two (2) inches (5.08 cm) above the ground, the device will be effective.

It shall have the same effect on a rearward moving wheelchair as a lateral, fixed step which is three (3) inches (7.62 cm) high and perpendicular to the wheelchair ground plane and which can resist a distributed force of 1600 lb (7100 N) applied parallel to and three (3) inches (7.62 cm) above the wheelchair ground plane.

Rationale. Experience in industry and in consumer product usage has shown that safety devices must be designed into the equipment to ensure that they will be used. It is poor practice to expect the operator to use optional safety devices with regularity. An automatically operating roll preventing device is in this category; the lift user should not be given the option of using or not using it. As with safety devices on other equipment, the roll preventing device can be designed so that it does not interfere with normal use of the lift. In those lifts evaluated, there were five that had such devices and which functioned reasonably well. Two lifts had no roll preventing mechanism whatsoever, and two had manually operated devices.

The step height value of 3 in. was determined from a series of experiments in which an electric wheelchair (20 in. balloon tires) with a 170 lb occupant was operated rearward down a 5° ramp into a firmly attached vertical wood barrier of various heights. The wheelchair traveled 1 ft prior to striking the stop, at a velocity of approximately 3 fps as determined by other distance-time measurements. The chair rolled over 1½ in. and 2 in. stops but would not roll over a 3 in. or higher stop. The force value of 1600 lb was determined by analytical methods: writing and solving the equations of motion for the wheelchair and occupant moving down a 5° ramp and striking the stop at a velocity of 3.6 fps. The impulse ($F\Delta t$) of the wheelchair wheels on the stop of 3 in. height was calculated to be 13.55 lb-sec. Assuming a contact velocity of 3.6 fps and a zero velocity at a combined tire and stop deflection of 1 in., we get the average impact time as:

$$\Delta t = \frac{1/12 \text{ ft}}{\frac{3.6 - 0 \text{ ft/sec}}{2}} = 0.046 \text{ sec, say } 0.05 \text{ sec.}$$

The impulse $F\Delta t = 13.35$ lb-sec can be solved to yield

$$F = \frac{13.35 \text{ lb-sec}}{0.05 \text{ sec}} = 267 \text{ lb.}$$

Applying the factor of safety of 6 gives F=1602, which is rounded to 1600 lb.

3.6.4. Limit devices or methods shall be employed to ensure that the platform ceased movement at the desired position as required by the design. As a minimum, the floor level position of the platform shall be positively controlled such that the wheelchair does not have to roll over a step greater than ⅝ inch (15.9 mm) in height. Ground and stowage positions of the platform should be controlled as necessary to prevent equipment damage.

Rationale. The need for limit devices is closely related to the need for a roll-preventer, previously discussed. On the folding-platform lifts, it is very important from the safety standpoint to ensure that the platform, when being raised from ground level, automatically stops at the floor level, thereby allowing the wheelchair to be rolled into the van. If the platform does not stop, it may begin its folding action, which could cause the wheelchair occupant to fall forward into the van. Other limit devices are highly desirable, but their employment depends upon the lift design. For example, there is no need for a limit switch to open the DOWN circuit of a gravity-type hydraulic lift.

3.6.5. During those portions of the raise/lower cycle in which the platform is nominally horizontal, any openings in the platform shall reject a ¾ inch (19.1 mm) diameter metal ball.

Rationale. The hard rubber caster wheels of wheelchairs vary in tread width from ⅞ in. to approximately 1¼ in. In the evaluations it was noted that some lift platforms had openings of such dimensions that the smaller tread tires could fall through, or at least become wedged. The Speedy Wagon and Para lifts have a slot of approximately 1 in. wide running the full width of the platform and located at the roll-stop area. The Ricon platform has a very coarse expanded metal grating which prevents proper wheel castering action. The implications of a wheel falling through a slot is obvious, and the inconvenience of difficult wheelchair movements makes Section 3.6.5. a firm requirement.

3.6.6. The wheelchair lift system shall be free of sharp edged and jagged projections, thereby minimizing minor injuries and damage to clothing of lift users and vehicle passengers.

Rationale. This requirement is necessary to ensure that manufacturers remove sharp edges and projections. There were some very obvious examples of inattention to this type exposure on some lifts.

3.6.7. The wheelchair lift platform surface shall be of a slip resistant type material to provide adequate tire-platform traction.

Rationale. Slip resistant surfaces are considered mandatory because of the slight ramp angle allowed by section 3.4.3. It is reasonable to expect that lifts will be used in wet weather which could cause the platform to become slippery. A slip resistant surface will negate problems resulting from such conditions.

3.6.8. Federal Motor Vehicle Safety Standard No. 302, Flammability of Interior Materials, (27) shall apply to nonmetallic components such as protective coverings, housings, and paddings.

Rationale. This requirement refers to those non-metallic materials used on some lifts which were evaluated. There were very few such materials, but with the requirement for safeguards, for electrical component packaging, and suggestions concerning dirty surfaces, this requirement will become more significant.

3.6.9. *Tests.*

3.6.9.1. *Occupant Hazards Test.* The fully assembled and installed wheelchair lift shall be carefully inspected with regard to safeguards, sharp edges, projections, and dirty or greasy surfaces with which the occupant might come in contact during normal operation of the lift.

3.6.9.2. *Slip Resistance Test.* The wheelchair platform shall be inspected for utilization of slip-resistant surfaces on which the wheelchair rolls. Slip-resistant characteristics will be observed in these cases when the platform is at ground and at floor level: occupant in manual wheelchair onto/off of dry and wet platform; occupant in electric wheelchair onto/off of dry and wet platform.

3.6.9.3. *Platform Opening Test.* The platform will be positioned at ground level and at van floor level, and all openings therein will be tested with a metal ball of ¾ inch (19.1 mm) diameter for oversize dimensions.

3.6.9.4. *Operational Safety Test.* The fully assembled and installed wheelchair lift shall be operated by both able-bodied and disabled persons, in the manner specified in the Operating Instructions, and observations made as to whether the lift can be operated safely, with minimum potential to injury. Observation shall be made as to a requirement for an on-platform turning movement of the wheelchair. Observations shall be made of the floor level stop position as to safe entry/exit of the wheelchair into/out of the van.

3.6.9.5. *Wheelchair Retaining Test.* Test equipment will be constructed to fit each wheelchair retaining device. The equipment will apply a static load of 1600 pounds at a height of three (3) inches above and parallel to the wheelchair ground plane, evenly distributed over the full width of the roll stop device. The load will be applied for at least five (5) seconds with the lift platform at the van floor level and also will be applied as the wheelchair ground plane moves down (or up). A load of 400 pounds will be on the lift during the test if the wheelchair retaining operation is dependent on such a load for its proper operation.

4.0. *Installation and Maintenance of Wheelchair Lift Systems.*

4.1. *Installation.*

4.1.1. *Installing Agency.* The manufacturer shall specify, when advertising or otherwise promoting his wheelchair lift, whether the lift must be factory or distributor installed or whether it can be installed by an individual or agency of the purchaser's choice.

Rationale. It is known from the experience gained in purchasing and receiving the lifts for evaluation that some manufacturers sell and install lifts only through distributors, others install at the factory, and yet others may have no preference who or what agency installs their lift. The manufacturer, for his own protection, should be allowed to specify the conditions under which he will sell and install the lift. In either case, the consumer should be informed, and this section is included for that reason.

4.1.2. *Method of Installation.*

4.1.2.1. *Standard.* Manufacturers shall specify the appropriate method of installation for the complete wheelchair lift system.

4.1.2.2. *Installation Manual Specification.* Wheelchair lifts which are identified as suitable for installation by an individual or agency of the purchaser's choice shall be accompanied by an Installation Manual which shall contain written and graphic instructions for installing the lift and shall contain specific installation information relative to the make, year, and type of van for which the lift is suited. The manual should be written at a technical level comparable to an automotive service manual.

4.1.2.3. *Installation Hardware Specification.* Wheelchair lifts distributed for installation shall be accompanied by all necessary installation hardware for the vehicle on which the lift is to be installed.

Rationale. Regardless of the agency selected for installation of lifts, the manufacturer must provide the instructions and hardware to ensure that the task can be performed properly. This effort protects the manufacturer from potential product failures, adverse reputation, and perhaps litigation. It also provides the purchaser with sufficient information to determine if a quality installation has been performed.

4.1.2.4. *Visual Inspection.* A visual inspection will be made as to the inclusion of required Installation Manual and the suitability of its contents and of the existence of the necessary installation hardware.

4.1.3. *Certified Installation.* The VA strongly urges that installation be accomplished by experienced technicians who have familiarized themselves with lift systems. The individual or agency who does the installation should certify in writing to the user/owner that the lift installation is complete and done according to the manufacturer's instructions.

4.2. *Maintenance.*

4.2.1. *Standard.* The manufacturer shall specify user/owner maintenance to be performed and make adequate provision in the design for the performing of such maintenance.

4.2.2. *Repair Parts.* The manufacturer shall develop and maintain an appropriate stock level of repair or replacement parts. Appropriate records related to purchased parts shall be maintained. Repair parts shall be available for purchase.

4.2.3. *Maintenance Manual Specification.* The manufacturer shall provide to the purchaser a manual of instructions concerning required maintenance to be performed by the user/owner. The maintenance instructions shall address at least the following areas: theory of operation, lubrication (types, location, and frequency), fluids (types, levels, and frequency of checking), adjustments (function, location, and method), calibration and alignment procedures, trouble-shooting (possible failures and required corrective action), parts lists, components requiring special attention, definitions and measurements to determine excessive wear, and name, address, and telephone number of the manufacturer or his representative.

Rationale. Owner/operator performed maintenance is likely to be the only maintenance that many lifts will receive until the manufacturers further develop their distributor-owner relationships. In order for this maintenance to be accomplished, the manufacturer must prescribe it in terms of those items listed. In the lift evaluations, as in other aspects, there was a wide variety of maintenance instructions ranging from none to adequate.

4.2.4. *Documentation Specification.* The manufacturer shall provide to the purchaser all electrical and hydraulic schematic diagrams necessary to properly maintain and repair the lift. These diagrams shall include wiring diagrams, component layout, parts lists, and applicable test and calibration points. A list of authorized distributors or service agencies shall be provided.

4.2.5. *Tool Specification.* The manufacturer shall design and fabricate a lift such that the tools needed for the required user/owner maintenance are of the standard, readily available type, e.g., adjustable, end, or socket wrenches for bolt heads equal to or less than ¾ inch (20 mm, nominal), slot-type screwdriver, phillips-type screwdriver.

Rationale. During the performance of maintenance on the lifts undergoing accelerated life cycle tests, it was very evident that some manufacturers were not concerned about the availablity of proper maintenance tools. If tools other than standard, readily available types are required, it can be expected that maintenance will not be done—to the detriment of the equipment, and perhaps to the bodily harm of the lift user.

4.2.6. *Accessibility Specification.* The manufacturer shall design and fabricate his lift such that parts requiring owner/operator maintenance are readily accessible without major disassembly or use of special tools.

Rationale. This requirement is necessary because of the examples of inaccessible maintenance components seen on the evaluated lifts. For example, one lift had a grease fitting "looking" directly at a structural member approximately ½ in. away. Another lift had a housing around the gear drive unit, which was good protection from moving parts, but a special screwdriver was needed to remove the housing in order to check the grease level. One hydraulic lift had a horizontal fluid filler fitting, requiring a long flexible funnel to avoid spills. A thorough maintainability analysis by the manufacturers would help to eliminate such situations.

4.2.7. *Tests.*

MY 17 78 UMI

V 4 3 1 9 6

4.2.7.1. *Visual Inspection.* A visual inspection shall be made to determine the inclusion of a Maintenance Manual and its compliance with Section 4.2.3. and of the inclusion of documentation as required by Section 4.2.4.

4.2.7.2. *Maintainability Test.* The maintenance procedure prescribed by the manufacturer shall be performed to ascertain compliance with Sections 4.2.5. and 4.2.6.

5.0. *Identification and Inspection by the Manufacturer.*

5.1 *Identification.* Each lift manufactured for sale shall bear a model number, a serial number, and the name and address of the manufacturer. This identification may be engraved or placed on a permanently affixed tag which will remain visible after lift installation in the vehicle.

Rationale. Identification of consumer products and industrial equipment is a common practice and should be applied to wheelchair lifts. Such an identification system will not only aid the lift owner in contacting the manufacturer in the event of product failure, but will also aid the manufacturer in many ways: retrofitting (if necessary), design change identification, component traceability, and others.

5.2. *Manufacturing Inspection.* In view of the implied seriousness of in-service failures, quality control inspections made by the manufacturer shall be 100 percent on every lift which is commercially sold. Evidence of quality assurance shall be included with every lift sold and can be in the form of a seal, inspection stamp, tag, or any other legible identification. Uninspected lifts shall be returned to the manufacturer.

Rationale. It is imperative that manufacturers carefully conduct quality control inspections on their lifts. The procedure and timing for conducting the inspections must be developed by the manufacturers and while there is no effective way to test compliance with this section, the requirement of the inspector's tag will help to force recognition of this essential program.

5.3. *Warranty.* A statement of warranty shall be provided with each lift device assuring the quality of materials and workmanship of the product for at least one (1) year from the date of delivery to final consumer. The warranty shall state that if defects are found during the warranty period, the device will be repaired, replaced, or a refund made by the seller or his authorized agent.

Rationale. The one-year warranty is comparable to that of many other consumer products. Having such a warranty will encourage manufacturers to improve their designs, require high quality from component manufacturers, and improve the overall quality of their product.

5.4. *Claims Made.* Advertising literature shall reveal the adaptive equipment manufacturer's name and address. All claims of approval by private groups, local, state or federal government shall be specific as to the approving agency and the acceptance test protocol. Such claims shall be documentable on request. Furthermore, all claims of scientific merit shall be clearly stated and documentable on request.

Rationale. It is well known that advertising claims are sometimes more self-laudatory than true. This requirement concerning claims is intended to protect the VA and the public from claims of approvals or performance which cannot be substantiated.

5.5. *Liability Claims.* Although lifts may be certified by the VA as having conformed to the requirement of this standard, the VA assumes no liability for any claim arising from the use of the lift.

Rationale. This disclaimer statement is inserted as a protective measure against claims primarily from non-veteran users.

5.6. *Annual Inspection.* In the interest of long-term safety, the VA recommends an annual inspection of all wheelchair access systems. The inspection should include checks for wear, deterioration, proper adjustment, loose fasteners, etc. as well as a performance test. The manufacturer is urged to include annual inspections in the maintenance procedure and to encourage such inspections by proper support to distributors and/or installing agencies.

Rationale. This statement is not intended as a requirement but is included to urge the manufacturer to prescribe such inspections in his maintenance prodecure and to assist distributors/installers as necessary to conduct the inspections.

5.7. *Visual Inspection.* Each lift shall be inspected for the inclusion of the required identification tag, evidence of manufacturer's quality control inspection, and for inclusion of the required Warranty Statement.

6.0. *Test Procedures.* This section brings together under one heading all tests specified in the standard and in the approximate sequence of testing.

3.1.12.1. *Receiving Inspection Test.* A receiving inspection shall be conducted and shall include:

a. Weighing the wheelchair lift.

b. Assessment of installation method and required vehicle alterations.

c. Assessment of battery power supply, connections, and charging method.

3.1.12.2. *Dimensional Test.* Upon installation of the lift on a test fixture according to manufacturer's instructions, measurements will be taken to determine compliance with dimensional requirements of Section 3.1.10.

3.3.2.6.2. *Water Spray Test.* The exposed portions of electrical components intended for installation external to the vehicle will be subjected to a five minute, fine droplet water spray test in which the droplets contact the components both vertically and horizontally. The wetted components will be allowed to air dry for approximately three (3) minutes and then the circuits will be electrically checked for successful operation.

3.3.2.6.3. *Electrical Current Test.* Electrical current flow will be measured for each lift movement. The ammeter used will be of laboratory quality with appropriate shunts. Only steady-state current, ignoring momentary surges, will be recorded.

3.4.1.1. *Weldment Test.* A close visual inspection shall be made of all welds to detect (1) structural flaws such as undercutting, cracking, poor penetration, and surface defects, and (2) dimensional flaws such as warpage, incorrect weld size or profile, and incorrect joint separation. Other nondestructive testing using radiographic, ultrasonic, dye penetrant, or other methods may be conducted if deemed necessary by the testing agency. Significant defects shall disqualify the lift from acceptance.

3.4.3.2. *Platform Angle Test.* The lift shall be installed on a rigid structure. Measurements shall be taken to determine the lift platform angle at the van floor position.

3.4.4.3. *Finish Coating Test.* An inspection of the coating shall be made to include, but not be limited to, overall appearance and existence of a dull, matte surface finish. Measurements of film thickness shall be made in at least three locations using a dial comparator or dial indicator as described in ASTM D 1005-51 (R1972), Measurement of Dry Film Thickness of Organic coatings.(*20*) A subjective evaluation of coating adherence will be obtained in at least three locations as follows: use a machinist's scribe to scribe a single line approximately one inch long with sufficient force to penetrate to the base metal. Lay on a strip of transparent mending tape and burnish the scribed area for approximately 15 seconds with a smooth-ended metal tool. Pull the tape off with a quick, perpendicular motion. A very thin line of coating particles is indication of good adhesion. Upon completion of the Accelerated Life Cycle Test, Section 3.3.1.3.1. and the Operational Safety Test, Section 3.6.9.4., another inspection will be made to determine long-term wear and use characteristics of the coating.

3.5.1.7.1. *Control Inspection Test.* Inspection of controls in accordance with principles and recommendations in the referenced volume (Section 3.5.1.2.).

3.5.1.7.2. *Acceleration Test.* Accelerations will be measured by means of accelerometers in the head or chest cavity of an anthropometric dummy which is seated in a wheelchair on the platform. The wheelchair and dummy weight will be supplemented to a total weight of 400 pounds (1760 N). Accelerometer readings will be taken for all lift motions on which an occupant is carried.

3.5.1.7.3. *Slope Dimension Test.* The empty platform will be lowered to the ground position with the ramp, if any, at its entry/exit position. Linear measurements of rise and run will be made. Likewise, any step over which the wheelchair must roll will be measured.

3.5.3.1. *Visual Inspection.* A visual inspection shall be made as to the inclusion of the required Operating Instructions and the suitability of the contents.

3.6.9.1. *Occupant Hazards Test.* The fully assembled and installed wheelchair lift shall be carefully inspected with regard to safeguards, sharp edges, projections, and dirty or greasy surfaces with which the occupant might come in contact during normal operation of the lift.

3.6.9.2. *Slip Resistance Test.* The wheelchair platform shall be inspected for utilization of slip-resistant surfaces on which the wheelchair rolls. Slip-resistant characteristics will be observed in these cases when the platform is at ground and at floor level: occupant in manual wheelchair onto/off of dry and wet platform; occupant in electric wheelchair onto/off of dry and wet platform.

3.6.9.3. *Platform Opening Test.* The platform will be positioned at ground level and at van floor level, and all openings therein will be tested with a metal ball of ¾ inch (19.1 mm) diameter for oversize dimensions.

3.6.9.4. *Operational Safety Test.* The fully assembled and installed wheelchair lift shall be operated by both ablebodied and disabled persons, in the manner specified in the Operating Instructions, and observations made as to whether the lift can be operated safely, with minimum potential to injury. Observation shall be made as to a requirement for an on-platform turning movement of the wheelchair. Observations shall be made of the floor level stop position as to safe entry/exit of the wheelchair into/out of the van.

3.6.9.5. *Wheelchair Retaining Test.* Test equipment will be constructed to fit each wheelchair retaining device. The equipment will apply a static load of 1600 pounds at a height of three (3) inches above and parallel to the wheelchair ground plane, evenly distributed over the full width of the roll stop device. The load will be applied for at least five (5) seconds with the lift platform at the van floor level and also will be applied as the wheelchair ground plane moves down (or up). A load of 400 pounds will be on the lift during the test if the wheelchair retaining operation is dependent on such a load for its proper operation.

4.1.2.4. *Visual Inspection.* A visual inspection will be made as to the inclusion of required Installation Manual and the suitability of its contents and of the existence of the necessary installation hardware.

4.2.7.1. *Visual Inspection.* A visual inspection shall be made to determine the inclusion of a Maintenance Manual and its compliance with Section 4.2.3. and of the inclusion of documentation as required by Section 4.2.4.

4.2.7.2. *Maintainability Test.* The maintenance procedure prescribed by the manufacturer shall be performed to ascertain compliance with Sections 4.2.5. and 4.2.6.

5.7. *Visual Inspection.* Each lift shall be inspected for the inclusion of the required identification tag, evidence of manufacturer's quality control inspection, and for inclusion of the required Warranty Statement.

3.3.1.3.1. *Accelerated Life Cycle Test.* An accelerated life cycle test will be performed by repeating the wheelchair lift use cycle 4400 times. The time between each cycle shall be not less than six minutes. Ambient temperature shall be between 50° F and 90° F (10° C and 32° C). Alternating cycles of loaded and unloaded platform configuration will be simulated by applying a 400 pound (1780 N) load for 100 cycles, then removing the load for 100 cycles. Periodic visual inspection without disassembly of the lift will be made in intervals of 500 cycles and changes in alignment, component wear, loosening of fasteners, and the like will be recorded. Failure mode analyses will be performed and a decision will be made based on those analyses. Preventive maintenance will be performed in accordance with the manufacturer's instructions.

3.3.2.6.1. *General Electrical Test.* Electrical components and wiring shall be considered integral parts of the lift system and shall be tested for failures during the performance of Accelerated Life Cycle Testing, Section 3.3.1.3. Any failure or any hazardous condition caused by an electrical component during testing shall disqualify the entire system from acceptance.

3.3.3.2. *Chain Drive Test.* Chain drive components shall be considered integral parts of the lift, and shall be tested for failures during the performance of the Accelerated Life Cycle Test, Section 3.3.1.3., and inspected for conformance to the above standards. Discrepancies in conformance or failures during the test shall disqualify the lift from acceptance.

3.3.4.3. *Hydraulic Components Test.* Hydraulic components shall be considered integral parts of the wheelchair lift and shall be tested for failures during the performance of the Accelerated Life Cycle Test, Section 3.3.1.3. Any failures, including significant leaks, shall disqualify the lift from acceptance. A significant leak is defined as seepage or leakage which produces one or more droplets (e.g., a teardrop, approximately 0.1 cc) in ten (10) complete cycles of the wheelchair lift.

3.3.5.4. *Wire Rope System Test.* An inspection of the wire rope system shall be made and shall include measurement of the nominal diameters of rope, sheaves, and drum. The fleet angle between the lead sheave and drum and between sheaves at all platform positions shall be measured. Attachments and fittings shall be inspected for conformance to Section 3.3.5.3. The travel of the rope during all lift movements shall be followed to observe possible rope contact with structural members.

3.4.2.3. *Fastener Tests and Inspection.* Fasteners shall be considered as integral parts of the lift system and shall be tested for wear, integrity, and resistance to loosening or loss through vibration or use conditions. Such testing and inspection will be done during the Accelerated Life Cycle Test, Section 3.3.1.3.1.

3.3.6.5. *Power Screw Tests.* The threads on the power screw shall be inspected to ensure that Acme screw threads (or equivalent) are used and that the system transmits power in both directions.

3.3.1.3.2. *Static Load Test.* A static load of 2400 pounds (10676 N) shall be applied through the centroid of a test pallet placed at the centroid of the platform when the platform is positioned at van floor level. The length and width dimensions of the test pallet shall be 23" length ×24" width to correspond to the approximate outer dimensions of a wheelchair "footprint". The load shall remain on the platform not less than two (2) minutes. After the load is removed, an inspection shall be made to determine if fractures have occurred. An equivalent test shall be performed on lifts which do not have a platform. The Static Load Test shall be performed after the Accelerated Life Cycle Test.

APPENDIX 1

METRICATION

The use of SI (metric) units is in conformance with SAE J916a, Rules for SAE Use of SI (Metric) Units. Examples of conversion to SI units are given below.

1. From Section 3.1.3., related to lift speed of four (4) inches per second. Convert to centimetres per second (cm/s).

a. Estimate the implied precision of the value to be ±0.1 inch per second. Then Total Implied Precision (TIP)=0.2 inch per second.

b. Convert values to metric units

$$\frac{4 \text{ inches}}{\text{sec}} \times \frac{2.54 \text{ cm}}{\text{inch}} = 10.16 \text{ cm/s}$$

$$\frac{0.2 \text{ inch}}{\text{sec}} \times \frac{2.54 \text{ cm}}{\text{inch}} = 0.508 \text{ cm/s}$$

c. Choose the smallest number of decimals to retain, such that the last digit retained is in units equal to or smaller than the converted TIP. In this example use 0.1 cm/s since it is the next unit smaller than 0.508 cm/s.

d. The converted, rounded value is then given as 10.2 cm/s.

2. From Section 3.1.7., related to a weight of 275 lb. Convert to newtons (N).

a. Estimate implied precision as ±5 lb. Then TIP=10 lb.

Convert values to metric

$$275 \text{ lb} \times \frac{4.448222 \text{ Newtons}}{\text{lb}} = 1223.26105 \text{ N}$$

$$10 \text{ lb} \times \frac{4.448222 \text{ N}}{\text{lb}} = 44.48222 \text{ N}$$

c. Use 10 N for rounding.

d. Then 275 lb=1220 N.

INTERSTATE COMMERCE COMMISSION

[Notice No. 661]

ASSIGNMENT OF HEARINGS

MAY 12, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. MC 120981 (Sub-No. 24), Bestway Express, Inc., now assigned June 5, 1978, at Frankfort, Ky., is canceled; application dismissed.

I & S M 29772, General Increase S.M.C.R.C., April, 1978, now being assigned June 26, 1978, at Washington, D.C., at the office of the Interstate Commerce Commission.

No. MC 125433 (Sub-No. 139), F-B Truck Line Co., is now assigned for prehearing conference June 26, 1978, at the offices of the Interstate Commerce Commission, Washington, D.C.

No. MC 144188, P. L. Lawton, Inc., is now assigned for hearing June 28, 1978, at the offices of the Interstate Commerce Commission, Washington, D.C.

No. MC 142760 (Sub-No. 1), Data Processing Maintenance, Inc., d.b.a. Luxury Coaches, is now assigned for hearing July 19, 1978 (3 days), at Houston, Tex., at a location to be later designated.

No. MC 53965 (Sub-No. 133), Graves Truck Line, Inc., is now assigned for hearing July 24, 1978 (1 week), at Oklahoma City, Okla. at a location to be later designated.

No. MC 114211 (Sub-No. 344F), Warren Transport, Inc., is now assigned for hearing June 8, 1978 (2 days), in Room 235, Federal Building, 85 Marconi Boulevard, Columbus, Ohio.

AB 10 (Sub-No. 6), Wabash Railroad Co. and Norfolk & Western Railway Co., abandonment between Fairbury and Clay in Livingston County, Ill., now assigned June 26, 1978, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

No. MC 120436 (Sub-No. 2), Nussbaum Trucking, Inc., now assigned June 13, 1978, and continued to June 28, 1978, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street, on both hearing dates.

No. MC 51146 (Sub-No. 534), Schneider Transport, Inc., and MC 136786 (Sub-No. 132F), Robco Transportation, Inc., now being assigned August 15, 1978, at the Offices of the Interstate Commerce Commission in Washington, D.C.

No. MC 143568 (Sub-No. 2), Simmons Trucking, Inc., now assigned June 1, 1978, at Jefferson City, Mo., will be held in Room 201, Governor's Hotel.

AB 7 (Sub-No. 37), Chicago, Milwaukee, St. Paul & Pacific Railroad Co., abandonment near Sparta and Viroqua, in Monroe and Vernon Counties, Wis., now assigned June 5, 1978, at Viroqua, Wis., will be held in the Circuit Court, Courtroom.

No. MC 138882 (Sub-No. 14), Wiley Sanders, Inc., now assigned June 6, 1978, at Nashville, Tenn., will be held in Room A-440, U.S. Courthouse, 801 Broadway.

No. MC 143621, Tennessee Steel Haulers, Inc., now assigned for continued hearing June 7, 1978, at Nashville, Tenn., will be held in Room A-440, U.S. Courthouse, 801 Broadway.

No. MC 143691, Pony Express Courier Corp., now assigned June 12, 1978, at Nashville, Tenn., will be held in Room A-440, U.S. Courthouse, 801 Broadway.

No. MC 118159 (Sub-No. 223), National Refrigerated Transport, Inc., now assigned June 26, 1978, at Louisville, Ky., will be held in Room 635, Post Office Building, Sixth and Broadway.

No. MC 116915 (Sub-No. 36), Eck Miller Transportation Corp., now assigned June 27, 1978, at Louisville, Ky., will be held in Room 635, Post Office Building, Sixth and Broadway.

No. MC 118610 (Sub-No. 28), George Parr Trucking Service, Inc., now assigned June 28, 1978, at Louisville, Ky., will be held in Room 635, Post Office Building, Sixth and Broadway.

No. MC 60014 (Sub-No. 51), Aero Trucking, Inc., now assigned June 29, 1978, at Louisville, Ky., will be held in Room 635, Post Office Building, Sixth and Broadway.

No. MC 116254 (Sub-No. 188), Chem-Haulers, Inc., now assigned June 30, 1978, at Louisville, Ky., will be held in Room 635, Post Office Building, Sixth and Broadway.

No. MC 720 (Sub-No. 36), Bird Trucking Co., Inc., is assigned for hearing June 6, 1978, at Madison, Wis., and will be held at Room 125, CI Conference Room, U.S. Forest Products Laboratory.

No. MC 110683 (Sub-No. 122), Smith's Transfer Corp., is assigned for hearing June 27, 1978, at Indianapolis, Ind., and will be held at Room 402, Old Federal Building, 46 East Ohio Street.

No. MC 123061 (Sub-No. 92), Leatham Brothers, Inc., is assigned for hearing June 5, 1978, at Portland, Oreg., and will be held at Room 103, Pioneer Courthouse, 555 West Yamhill Street.

No. MC 52680 (Sub-No. 3), T. W. Express of Indiana, Inc., is assigned for hearing June 5, 1978, at Indianapolis, Ind., and will be held at Room 402, Federal Building, 575 North Pennsylvania.

No. MC 32779 (Sub-No. 13), Silver Eagle Co., now being assigned June 20, 1978 (6 days), for continued hearing at Olympia, Wash., and will be held at the Greenwood Inn, 2300 Upper Green Park Drive.

H. G. HOMME, Jr.,
Acting Secretary.

[Exception No. 6 to Corrected Service Order No. 1304]

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD CO.

MAY 12, 1978.

The Chicago, Rock Island and Pacific Railroad Co. (RI) is acquiring an additional 500 jumbo covered hopper cars all of which will be delivered prior to May 31, 1978. When the delivery is completed the RI will own 5,210 such cars. The RI has requested authority to place seventy-five (75) of these new cars in unit-grain-train service. The remaining 425 new cars will be used to augment its supply of jumbo covered hoppers available to other shippers. The addition of these 500 cars to the RI's ownership of such cars and the use of seventy-five (75) of them for unit-grain-train service will reduce that carrier's ratio of jumbo covered hoppers in unit-grain-train service from 18.2 percent of ownership to 17.9 percent of ownership.

It is ordered, That, pursuant to the authority vested in the Railroad Service Board by Section (a)(6) of Corrected Service Order No. 1304, the Chicago, Rock Island and Pacific Railroad Co. is authorized to place seventy-five (75) newly acquired jumbo covered hopper cars in unit-grain-train service regardless of the provisions of Section (a)(5) of the order.

By the Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Joel E. Burns not participating.

Effective May 5, 1978.

Issued at Washington, D.C., May 5, 1978.

ROBERT S. TURKINGTON,
Acting Chairman,
Railroad Service Board.

[Notice No. 76]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 12, 1978.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized repre-

V 4 3 9 6

sentative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 32050 (Sub-No. 4TA), filed April 14, 1978. Applicant: J. MITCHELL TRUCKING CO., INC., 115 Claremont Avenue, Colonia, NJ 07067. Applicant's representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, NJ 08904. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Oleomargarine and Table Sauces* in controlled temperature vehicles, from Baltimore City, MD, to CT, DE, IL, IN, KY, ME, MA, MI, MO, NH, NJ, NY, OH, PA, RI, VT, VA, WV, and DC. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: J. H. Filbert, Inc., 3701 Southwestern Boulevard, Baltimore, MD 21229. Send protests to: Robert E. Johnston, District Supervisor, 9 Clinton Street, Newark, NJ 07102. For 180 days.

No. MC 63417 (Sub-No. 149TA), filed April 12, 1978. Applicant: BLUE RIDGE TRANSFER CO., INC., P.O. Box 13447, Roanoke, VA 24034. Applicant's representative: William E. Bain, P.O. Box 13447, Roanoke, VA 24034. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers, iron or steel*, from Canton, MS, to points in IL, IN, KY, MI, NC, OH, PA, SC, VA, and WV, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Inland Steel Container Co., Chicago, IL 60658. Send protests to: Interstate Commerce Commission, Bureau of Operations, P.O. Box 210, Roanoke, VA 24011.

No. MC 63417 (Sub-No. 150TA), filed April 12, 1978. Applicant: BLUE RIDGE TRANSFER CO., INC., P.O. Box 13447, Roanoke, VA 24034. Applicant's representative: William E. Bain, P.O. Box 13447, Roanoke, VA 24034. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Insulating materials, mineral wool*, from the facilities of Rock Wool Manufacturing Co., Leeds, AL, to points in FL west of the Appalachicola River, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Rock Wool Manufacturing Co., Birmingham, AL 35205. Send protests to: Interstate Commerce Commission, Bureau of Operations, P.O. Box 210, Roanoke, VA 24011.

No. MC 63417 (Sub-No. 151TA), filed April 12, 1978. Applicant: BLUE RIDGE TRANSFER CO., INC., P.O. Box 13447, Roanoke, VA 24034. Applicant's representative: William E. Bain, P.O. Box 13447, Roanoke, VA 24034. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plumbers goods, vanities and vanity cabinets*, (1) from the facilities of Universal-Rundle, Inc., Union Point, GA, to points in DE, LA, MD, MS, and WV, and (2) from the facilities of Universal-Rundle, Inc., Monroe, GA, to points in AL, DE, FL, KY, LA, MD, MS, NC, SC, TN, VA and WV, for 180 days. Supportings shipper(s): Universal-Rundle Corp., New Castle, PA. Send protests to: Interstate Commerce Commission, Bureau of Operations, P.O. Box 210, Roanoke, VA 24011.

No. MC 90870 (Sub-No. 6TA), filed April 12, 1978. Applicant: GLEN R. RIECHMANN, d.b.a. RIECHMANN TRUCK SERVICE, Route 2, Box 137, Alhambra, IL 62001. Applicant's representative: Cecil L. Goettsch, Attorney, 1100 Des Moines Building, Des Moines, IA 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the plantsite of Inland Steel Company, East Chicago, IN to points in MO on and east of U.S. Hwy 65, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): W. A. Jerndt, Asst. Gen. Traffic Mgr., Inland Steel Co., 30 West Monroe, Chicago, IL 60603. Send protests to: Charles D. Little, District Supervisor, Interstate Commerce Commission, 414 Leland Office Building, 527 East Capitol Avenue, Springfield, IL 62701

No. MC 96992 (Sub-No. 7TA), filed April 12, 1978. Applicant: HIGHWAY PIPELINE TRUCKING CO., P.O. Box 1517, Edinburg, TX 78539. Applicant's representative: Kenneth R. Hoffman, 1100 Milam Bldg., Suite 3300, Houston, TX 77002. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen orange concentrate*, (except in bulk), from Weslaco, TX to Verona, PA, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Valley Citrus Products, Inc., 1533 N. Texas Blvd., Weslaco, TX 78596. Send protests to: Richard H. Dawkins, District Supervisor, Interstate Commerce Commission, Room B-400 Federal Building, 727 E. Durango Blvd., San Antonio, TX 78206.

Docket MC-103051 (Sub-No. 439TA), filed April 13, 1978. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Avenue, North P.O. Box 90408, Nashville, TN 37209. Applicant's representative: Russell E. Stone, P.O. Box 90408, Nashville, TN 37209. Temporary authority is sought to operate as a *common carrier*, by motor vehicle, over irregular routes for 180 days, transporting: *Liginin sulfonate*, in bulk, in tank vehicles, from New Johnsonville, TN to Walnut Ridge, AR. Supporting shipper is: Frit Industries, Inc., 405 Joseph Dr, Ozark, AL 36360. Send protests to: Glanda Kuss, Transportation Assistant, Bureau of Operations, ICC, Suite A-422 U.S. Court House, 801 Broadway, Nashville, TN 37203. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority.

No. MC 108676 (Sub-No. 122TA), filed April 12, 1978. Applicant: A. J. METLER HAULING & RIGGING, INC., 117 Chicamauga Avenue, Knoxville, TN 37917. Applicant's representative: William T. McManus (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Uncrated Flat Glass*, from the facilities of PPG Industries, Inc. at or near Fresno, CA to points in AZ, ID, OR, UT, and WA for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: PPG Industries, Inc., One Gateway Center, Pittsburgh, PA 15222. Send protests to: Glenda Kuss, Interstate Commerce Commission, Suite A422, Federal Building, U.S. Court House, 801 Broadway, Nashville, TN 37203.

No. MC 113678 (Sub-No. 751TA), filed April 12, 1978. Applicant: CURTIS, INC., 4810 Pontiac Street, Commerce City, CO 80022. Applicant's representative: Roger M. Shaner, 4810 Pontiac Street, Commerce City, CO 80022, 303-287-3211. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* (except commodities in bulk) from Espanola, NM, to points in the U.S. (except AL, HI, and NM), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Golden Temple Products, Inc., P.O. Box 3766, Fairview Station, Espanola, NM. Send protests to: Herbert C. Ruoff, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, 721 19th Street, Denver, CO 80202.

M Y 1 7 7 8 UMI

No. MC 113678 (Sub-No. 752TA), filed April 12, 1978. Applicant: CURTIS, INC., 4810 Pontiac Street, Commerce City, CO 80022. Applicant's representative: Roger M. Shaner (same address as applicant), 303-287-3211. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products*, and *meat byproducts* (except commodities in bulk) from the facilities of Daack's Portion Products, from Ponca City, OK to Denver, CO, and Seneca, IL, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Daak's Portion Products, Airport Road, Box 907, Ponca City, OK. Send protests to: Herbert C. Ruoff, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, 721 19th Street, Denver, CO 80202.

No. MC 114274 (Sub-No. 46TA), filed April 12, 1978. Applicant: VITALIS TRUCK LINES, INC., 137 Northeast 48th St. Place, Des Moines, IA 50306. Applicant's representative: William H. Towle, 180 North LaSalle Street, Chicago, IL 60601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuff* (except commodities in bulk), in vehicles equipped with mechanical refrigeration, from the facilities of Terminal Ice & Cold Storage Co. at or near Bettendorf, IA, to points in IL, IN, MI, OH, KY, MN, MO, NE, KS, and WI. Restricted to traffic originating at the named origin and destined to the named destination states, for 180 days. Supporting shipper(s): General Foods Corp., 250 North Street, White Plains, NY 10625. Send protests to: Herbert W. Allen, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 518 Federal Building, Des Moines, IA 50309.

No. MC 114632 (Sub-No. 162TA), filed April 12, 1978. Applicant: APPLE LINES, INC., 212 Southwest Second St., P.O. Box 287, Madison, SD 57042. Applicant's representative: Michael L. Carter, 212 Southwest Second St., Madison, SD 57042. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods and exempt commodities* when moving in the same vehicle with frozen foods from the facilities of Empire Freezers of Syracuse, Inc. at or near Syracuse, NY to points in CT, DE, DC, ME, MD, MA, NH, NJ, NY, PA, RI, VT, and VA, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Empire Freezers of Syracuse, Inc., Farrell Road, Syracuse, NY 13221, Charles A. Cleveland, Director of Sales and Customer Service. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 455, Federal Building, Pierre, SD 57501.

No. MC 115654 (Sub-No. 92TA), filed April 17, 1978. Applicant: TENNESSEE CARTAGE CO., INC., P.O. Box 23193, Nashville, TN 37202. Applicant's representative: Henry E. Seaton, 915 Pennsylvania Building, 13th and Pennsylvania Ave. NW., Washington, DC 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except in bulk), from the plantsite or facilities or Rich Products Corp. at or near Murfreesboro, TN to points in AL, GA, IL, IN, KY, LA, MS, MO, and OH. Supporting shipper: Rich Products Corp., Buffalo, NY. Send protests to: District Supervisor Joe J. Tate, Room A422, Federal Building, 801 Broadway, Nashville, TN. 37203. For 90 days.

No. MC 116175 (Sub-No. 9TA), filed April 12, 1978. Applicant: WILLIAM E. (BILLY) ONEY, d.b.a. WILLIAM E. ONEY, Route 7 Box 37, Kingsport, TN 37660. Applicant's representative: Authority sought to operate as a *common carrier*, by motor vehicle, over *irregular routes*, transporting: *Livestock Feed* in bags and containers, from Louisville, KY, to Wise, Dickenson and Lee Counties, VA, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): There are approximately (4) statements of support attached to the application which may be examined at the field office named below. Send protests to: Interstate Commerce Commission, Bureau of Operations, P.O. Box 210, Roanoke, VA 24011.

No. MC 116497 (Sub-No. 5TA), filed April 12, 1978. Applicant: CLANCY BROS. TRANSPORTATION CO., INC., 84 Bengal Terrace, Rochester, NY 14610. Applicant's representative: S. Michael Richards/Raymond A. Richards, P.O. Box 225, 44 North Avenue, Webster, NY 14580, phone, 716-872-3535. Authority sought to operate as a *contract carrier*, by motor vehicle, over *irregular routes*, transporting: *Fresh hanging meats and boxed meats*, in vehicles equipped with mechanical refrigeration, from Rochester, NY to Miami, FL, under a continuing contract, or contracts with Rochester Independent Packer, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Rochester Independent Packer, Inc., 11 Independence St., Rochester, NY 14611. Send protests to: Interstate Commerce Commission, U.S. Courthouse and Federal Building, 100 South Clinton St., Room 1259, Syracuse, NY 13260.

No. MC 119700 (Sub-No. 33TA), filed April 12, 1978. Applicant: STEEL HAULERS, INC., 306 Ewing Avenue, Kansas City, MO 64125. Applicant's representative: Frank W. Taylor, Jr., Suite 600, 1221 Baltimore Avenue, Kansas City, MO 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over *irregular routes*, transporting: *Iron and steel articles* (1) from Gerald, MO, to points in AR, IL, IN, IA, KS, OH, OK, and MI; and (2) from MI to Gerald, MO, restricted to shipments originating at or destined to Bullmoose Tube Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Bullmoose Tube Co., Highway 50, P.O. Box 214, Gerald, MO. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Building, 911 Walnut Street, Kansas City, MO 64106.

No. MC 126346 (Sub-No. 20TA), filed February 13, 1978, and published in the FEDERAL REGISTER issue of April 3, 1978, and republished as corrected this issue. Applicant: HAUPT CONTRACT CARRIERS, INC., P.O. Box 1023, Wausau, WI 54401. Applicant's representative: Daniel C. Sullivan, Singer & Sullivan, P.C. 10 South LaSalle Street, Suite 1600, Chicago, IL 60603. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Self-propelled material handling and construction equipment* (except self-propelled vehicles designed for transporting property or passengers on highways), *cranes*, and *hoisting equipment;* (2) *attachments, assemblies, sub-assemblies*, components and weldments for the commodities named in (1); (3) *parts* for the commodities named in (1) and (2), from the ports of entry at New York, NY; Baltimore, MD; Boston, MA; Charleston, SC; Cleveland, OH; Duluth, MN; Houston, TX; Milwaukee, WI; and New Orleans, LA; to points in the United States (except AK and HI), under a continuing contract or contracts with Drott Manufacturing, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Drott Manufacturing, Division of J. I. Case Co., P.O. Box 1087, Wausau, WI54401. Send protests to: District Supervisor, Ronald A. Morken, Interstate Commerce Commission, 139 West Wilson Street, room

202, Madison, WI 53703. The purpose of this republication is to correct the territorial description.

No. MC 135797 (Sub-No. 113TA), filed April 12, 1978. Applicant: J. B. HUNT TRANSPORT, INC., P.O. Box 200, U.S. Hwy 71, Lowell, AR 72745. Applicant's representative: Paul A. Maestri, P.O. Box 200, Lowell, AR 72745. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic, rubber, and wire housewares products and display racks* from Wooster, OH to points in AZ, CA, CO, ID, IA, KS, MN, MO, MT, NE, NV, ND, OR, SD, UT, WA, and WY, for 180 days. Supporting shipper(s): Rubbermaid Inc., Home Products Division, 1147 Akron Road, Wooster, OH 44691. Send protests to: District Supervisor, William H. Land, Jr., 3108 Federal Office Building, 700 West Capitol, Little Rock, AR 72201.

No. MC 139495 (Sub-No. 330TA), filed March 20, 1978. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, KS 67901. Applicant's representative: Herbert Alan Dubin, Sullivan, Dubin & Kingsley, 1320 Fenwick Lane, Silver Spring, MD 20910. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canoes* from Wichita, KS to USA, for 180 days. Supporting shipper: The Coleman Company, Inc., 250 North Street Francis, Wichita, KS 67201. Send protests to: M. E. Taylor, District Supervisor, Interstate Commerce Commission, 101A Litwin Building, 110 North Market, Wichita, KS 67202.

No. MC 139615 (Sub-No. 13TA), filed April 12, 1978. Applicant: D.R.S. TRANSPORT, INC., P.O. Box 29, Oskaloosa, IA 52577. Applicant's representative: Larry D. Knox, 600 Hubbell Building, Des Moines, IA 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Agricultural machinery, implements, and equipment;* (2) *industrial and construction machinery and equipment;* (3) *irrigation equipment;* (4) *drainage systems;* (5) *stump cutters, log splitters, and log chippers;* (6) *tree spades;* and (7) *parts, attachments and accessories* for (1) through (6) above, from Pella, IA to points in WA, ID, UT, NV, AZ, NM, MI, AL, GA, FL, SC, NC, VT, NH, ME, MA, CT, RI, DE, DC, TN, and KY, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Vermeer Manufacturing Co., P.O. Box 200, Pella, IA 50219. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

No. MC 139615 (Sub-No. 14TA), filed April 12, 1978. Applicant: D.R.S. TRANSPORT, INC., P.O. Box 29, Oskaloosa, IA 52577. Applicant's representative: Larry D. Knox, 600 Hubbell Building, Des Moines, IA 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pipe, fittings, valves, hydrants, and materials and supplies* used in the installation thereof (except in bulk) from the plantsite of Clow Corp. located at or near Buckhannon, WV to Des Moines, IA and Carol Stream, IL, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Clow Corp., 1211 West 22nd Street, Oak Brook, IL 60521. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

No. MC 142516 (Sub-No. 10TA), filed April 13, 1978. Applicant: ACE TRUCKING CO., INC., 1 Hackensack Avenue, Kearny, NJ 07032. Applicant's representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. Authority sought to operate as a *contract carrier* over irregular routes, transporting: *Window glass*, from the port of Newark, NJ and the Port of New York, NY and its commercial zone, to Chicago, IL., under a continuing contract or contracts with Amworth, Industries Corp. and Jazel Corp. for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Amworth Industries Corp., Jazel Corp., 42 Chasner Street, Hempstead, NY 11550. Send protests to: Robert E. Johnston, District Supervisor, Interstate Commerce Commission, 9 Clinton Street, Newark, NJ 07102.

No. MC 144246 (Sub-No. 3TA), filed April 12, 1978. Applicant: LARSEN TRUCKING, CO., 7703 Sunset Drive, Ralston, NE 68102. Applicant's representative: Kenneth P. Weiner, 608 Executive Building, Omaha, NE 68102. Authority sought to operate as a *common carrier*, by motor vehicle, over *irregular routes*, transporting: *Fresh meats*, except commodities in bulk and hides. From Armour and Co. at Omaha, NE to St. Louis, MO and its commercial zone, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Delbert W. Long, transportation manager, Armour & Co., 5025 South 33d Street, Omaha, NE 68107. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 Number 14th Street, Omaha, NE 68102.

By the Commission.

H. G. Homme, Jr.,
Acting Secretary.

[*Exception No. 5*—Corrected Service Order No. 1304]

VIRGINIA & MARYLAND RAILROAD

Waiver of Certain Provisions of Service Order

MAY 12, 1978.

Railroad Service Board, Members Joel E. Burns, Robert S. Turkington and John R. Michael.

The Virginia & Maryland Railroad (VAMD) has acquired 200 new jumbo covered hopper cars for use in unit-grain-trains originating on other railroads. That line originates little or no grain at stations on its line and, therefore, has no other immediate need for these cars.

It is ordered, That, pursuant to the authority vested in me by Section (a)(6) of Corrected Service Order No. 1304, the Virginia & Maryland Railroad is authorized to place two hundred (200) newly acquired jumbo covered hopper cars in unit-grain-train services regardless of the provisions of Section (a)(5) of the order.

Effective May 4, 1978.

Issued at Washington, D.C., May 4, 1978.

By the Board, member Joel E. Burns not participating.

Robert S. Turkington,
Acting Chairman,
Railroad Service Board.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

TIME AND DATE: 11a.m. (eastern time), Friday, May 19, 1978.

PLACE: Chairman's Conference Room, No, 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street NW., Washington, D.C. 20506.

STATUS: Parts of the meeting will be open to the public and part will be closed.

MATTERS TO BE CONSIDERED: Parts open to the public.

1. Proposed report on "Improving Government Regulations," in compliance with Executive Order 12044.
2. Report by Executive Director on Commission Operations. Part Closed to the public.

Litigation Authorization; General Counsel Recommendations: Matters closed to the public under Sec. 1612.13(a) of the Commission's regulations (42 FR 13830, March 14, 1977).

NOTE.—Any matter not discussed or concluded may be carried over to a later meeting.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat at 202-634-6748.

This notice issued May 12, 1978

2

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: 9:30 a.m., Thursday, May 18, 1978.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:
Portions open to the public:

Agenda, Item No., Subject

General—1—Amendment of Part 2 of the Commission's Rules to add a footnote to the table of frequency allocations (Docket No. 20154).
General—2—State of Washington Traffic Safety Commission's Request for experimental license to test anti-radar detector devices.
General—3—Ex parte communications in informal rule making proceedings.
Safety and Special Radio Services—1—Amendment of Parts 81 and 83 of the Commission's Rules assigning 156.875 MHz for use by pilots.
Safety and Special Radio Services—2—Federal policy on the use of Citizens Band Radio by motor vehicle operators.
Safety and Special Radio Services—3—Mutually exclusive applications for a Public Coast III-B frequency.
Common Carrier—1—Revisions to AT&T's Multi-schedule Private Line Tariff FCC No. 260, Transmittal No. 12927 and petition for reconsideration of the Commission's Order in Docket No. 20814, filed by MCI Telecommunications Corp.
Common Carrier—2—Order to show why the license of DPLMRS Station KV3501 should not be revoked or be subject to a forfeiture.
Common Carrier—3—Complaint of Department of Defense against AT&T (File No. TS 25-75).
Common Carrier—4—Applications to expand AT&T's Dataphone Digital Service (DDS) to serve a total of 96 cities, W-P-C 1420.
Cable Television—1—Application CAC-8852, filed by Cable Television Co. of Puerto Rico, to add WTCG-TV, Atlanta, Ga. to cable operations in San Juan, Puerto Rico.
Cable Television—2—Petitions for stay of effective date of order in Docket No. 19995 (Cable Television network nonduplication for significantly viewed signals).
Assignment of License and Transfer of Control—1—Assignment of licenses of stations WWJ-TV, Detroit, Mich. (BALCT-678) and WTOP-TV, Washington, D.C. (BALCT-677).
Renewal—1—Petition to deny renewal of WGRM, Greenwood, Miss.
Renewal—2—By Direction letters requiring certain California broadcast stations to submit periodic EEO progress reports.
Renewal—3—Renewal of Station WAIL, Baton Rouge, La.
Aural—1—Reconsideration of Commission action granting the application of Carroll E. Brock (Nevada County Broadcasters) for a new station in Grass Valley, Calif. (BP-20,079).
Television—1—Application (BPCT-5055) for a construction permit in Norfolk, Va. (Channel 33) filed by Television Corporation of Virginia.
Broadcast—1—Petition to require VHF-TV licensees to allow UHF-TV antennas on VHF-TV towers.
Broadcast—2—Petition for rule making to amend the TV table of assignments by reserving a VHF assignment in Los Angeles (RM-2806)
Complaints and Compliance—1—Violations by Southern Communications Corp. WCIR and WCIR-FM) of various Commission Rules.
Complaints and Compliance—2—Results of investigation into the affairs of WDAI-FM, Chicago, Ill.

Portions closed to the public:

Agenda, Item No., Subject

Complaints and Compliance—1—Results of investigation into the affairs of WACB, Kittanning, Pa.
Complaints and Compliance—2—Results of investigation into the affairs of WMOA and WMOA-FM, Marietta, Ohio.
Hearing—1—Appeal and exceptions to initial decision and related interlocutory matters in the Belo Broadcasting Corp./Maxwell Broadcasting Corp. comparative renewal hearing for WFAA(AM) and KZEW(FM) Dallas, Tex. (Docket Nos. 20945-8).
Hearing—2—Review of grant of Country-Politan Broadcasting's FM application (Docket Nos. 20343 and 20344).
Hearing—3—Reconsideration of Court of Appeals decision denying renewal of WLBB, Carrollton, Ga., Docket Nos. 19636-7.
Hearing—4—Motion to delete issue in the Burbank and Pasadena, Calif. KROQ and KROQ-FM comparative renewal proceeding (Docket Nos. 20629-31).

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

TENNESSEE VALLEY AUTHORITY.

TIME AND DATE: 10:30 a.m., Wednesday, May 17, 1978.

PLACE: Conference Room 8-32, West Tower, 400 Commerce Avenue, Knoxville, Tenn.

STATUS: Open.

MATTERS TO BE CONSIDERED:

A—Personnel Actions—None.

B—Consulting and Personal Service Contracts:

1. Renewal of consulting contract with the S. M. Stoller Corp., New York, N.Y.—Office of Power.
2. Renewal of consulting contract with John T. Boyd Co. Pittsburgh, Pa.– Office of Power.

C—Purchase Awards:

*1. Req. No. 821174—Direct-current distribution panels for Hartsville and Phipps Bend Nuclear Plants.
2. Req. No. 823065—24-kv, 3-phase, main generator bus system for proposed Yellow Creek Nuclear Plant.
*3. Req. No. 821625—Electrostatic fly ash collectors and auxiliary equipment, including installation for Paradise Steam Plant.
4. Rejection of bids received in response to Invitation No. 822877 for main steam condensing equipment for proposed Yellow Creek Nuclear Plant.
5. Rejection of bids received in response to Invitation No. 149223 for replacement fuel channels for Browns Ferry Units 1 and 3.
6. Rejection of bids received in response to Invitation No. 149682 for labor and material to shop fabricate Cyclone Tubes.

D—Project Authorizations:

1. No. 3341—Modify spillway gate hoists at the Wilson Hydro Plant.
2. No. 3338—Convert the Gundown, Miss., 46-kv Substation to 161-kv.

E—Fertilizer Items—None.

F—Power Items:

1. Resolution relating to short-term borrowings from the Federal Financing Bank.

H—Unclassified:

1. Settlement agreement with Allis-Chalmers Corp.—claims resulting from Allis-Chalmers' delivery of defective stay rings under contract for pump turbines for the Raccoon Mountain Pumped-Storage Project.

The Board will also complete its quarterly review of current and anticipated conditions and costs affecting TVA's power operation, and the adequacy of revenues to meet the requirements of the TVA Act and the tests and provisions of its bond resolutions. The Board will determene whether an adjustment of the rates and charges for the sale of electric power will be necessary during the quarter beginning July 1, 1978.

CONTACT PERSON FOR MORE INFORMATION:

John Van Kel, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call, 615-632-3257, Knoxville, Tenn. Information is also available at TVA's Washington Office, 202-566-1401.

DATE: May 12, 1978.

SUPPLEMENTARY INFORMATION:

TVA BOARD ACTION

The TVA Board of Directors has found, the public interest not requiring otherwise, that TVA business requires that this meeting be called at the time set out above and that no earlier announcement of the meeting was possible.

The members of the TVA Board have voted to approve the above findings and their approvals are recorded below:

Approved:S/AJW _____
Aubrey J. Wagner.

S/SDF _____
S. David Freeman.

ENVIRONMENTAL PROTECTION AGENCY

FUEL ECONOMY OF MOTOR VEHICLES

Fuel Economy Labeling Procedures for 1979 and Later Model Year Automobiles

MY 17 78
UMI

V 4 3 1 9 6

[6560-01]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL-895-7]

PART 600—FUEL ECONOMY OF MOTOR VEHICLES

Fuel Economy Labeling Procedures for 1979 and Later Model Year Automobiles

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: This notice changes the requirement for the format and contents of fuel economy labels which are required to be attached to new automobiles (cars and light trucks). These changes will go into effect beginning with the 1979 model year.

The modifications to the labeling requirements established by this rule are expected to improve the mileage information program by providing only the value previously labeled the "city" estimate, which more accurately reflects in-use mileage than either the highway or combined estimates, and by communicating the relative nature of the information more effectively than the current system, so that the potential for consumer misunderstanding of the data is reduced.

EFFECTIVE DATE: July 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Paula Machlin, U.S. Environmental Protection Agency, Office of Mobile Source Air Pollution Control (AW-455), 401 M Street SW., Washington, D.C. 20460, 202-755-0596.

SUPPLEMENTARY INFORMATION: This notice changes the requirements in 40 CFR Part 600 for the format and contents of fuel economy labels which are required to be attached to new model automobiles by § 506 of the Motor Vehicle Information and Cost Savings Act, as amended (15 U.S.C. 2006), hereinafter "the Act." This rule will go into effect in the 1979 model year.

The modifications to the labeling requirements established by this rule are expected to improve the mileage information program by providing only the value previously labeled the "city" estimate, which more accurately reflects in-use mileage than either the highway or combined estimates, and by communicating the relative nature of the information more effectively than the current system, so that the potential for consumer misunderstanding of the data is reduced.

Although it is EPA's judgment that this action is necessary to alleviate the problems caused by the deficiencies of the current program and that these changes can reasonably be expected to reduce these problems, this proceeding has not resulted in the development of information sufficient to satisfy EPA that, for the long term, this rule provides the best information in the best manner possible. In particular, EPA believes that it should be possible and may be useful to provide the public with a range of fuel economy values that most of the individual automobiles in a model will actually get in use, but data adequate to derive such ranges are not yet available.

Consequently, EPA and the other Federal agencies involved in the program [the Federal Trade Commission (FTC), the Department of Transportation (DOT) and the Department of Energy (DOE)] view this action as an interim measure and intend to cooperate in the coming year in the taking of the steps necessary to evaluate the effectiveness of the modified program and in developing such data and additional modifications as may be needed.

Background

EPA proposed changes to the manner in which mileage information was presented to the public on February 16, 1978 in the Federal Register (43 FR 6817) in response to what appears to be growing public dissatisfaction with the mileage estimates. The estimates are generally believed to be unrealistically high in comparison to fuel economy performance actually achieved on the road. EPA is concerned that this may result in reduced reliance on the EPA estimates in making new car purchasing decisions in the future. In addition, to the extent that the proper use, meaning, and limitations of the mileage information are not communicated effectively to new car buyers, the information may be used to make incorrect purchase decisions.

The Notice of Proposed Rulemaking (NPRM) recognized that the problem has two separate components: (1) Technical issues related to fuel economy testing which suggest that, in some cases, the fuel economy measured by the test may not be fully representative of the fuel economy experienced on that model in actual use; and (2) issues related to the difficulty of communicating technical information in a simple, readily usable form without being misinterpreted. The NPRM proposed and this notice promulgates means for addressing the latter issue. Actions that EPA is undertaking to address technical issues are discussed in the section entitled "Future Actions," below.

The NPRM proposed three basic alternatives to the present city, highway and combined [1] estimates for communicating fuel economy information generated from EPA testing:

1. *Publish only a single miles per gallon fuel economy rating.* The NPRM noted that a single value would emphasize the comparative value of the EPA estimates and suggested that it might be the city fuel economy estimate which agrees quite closely with average in-use fuel economy, although the combined number, or some derivation of either of these values could be used as the single rating.

2. *Publish three miles per gallon estimates, as at present, but adjust the values to account for driving conditions more adverse to fuel economy than those included in the EPA tests, and represent the estimates as low, mid-range and high fuel economy.* The NPRM pointed out that this option's low estimate would not represent the lowest fuel economy that could be experienced but would represent a number lower than would be typically achieved by the vast majority of drivers. Similarly the high value would not be the absolute maximum but would be typical of a mix of predominantly highway driving with some urban driving. The mid-range value would be one representative of the mean fuel economy for all in-use driving.

3. *Publish only a relative fuel economy performance index, which compares the measured results for each model to a common base, without providing miles per gallon values as such.* The advantage of this approach is that it completely gets away from miles per gallon and the expectations created by such data, and focuses attention exclusively on comparing the relative fuel economy performance of new model cars which is the intent of the mileage information program.

Discussion of Comments and Other Relevant Materials

The comments received on the NPRM reflected a wide variety of interests and opinions, but there was general agreement that there are deficiencies in the mileage labeling program that contribute to public misunderstanding of the mileage estimates and that, therefore, some action is needed to alleviate the consumer deception and dissatisfaction that may result from such misunderstandings.

Several Federal agencies and manufacturers expressed concern, however, that due to the short time remaining before production of most 1979 models begins (in August, 1978) and the desirability of gathering additional information, it may be best to make no changes until model year 1980.

While EPA recognizes that it would be desirable to gather additional information regarding which manner of presenting mileage ratings most effectively conveys useful information to new car-buyers, and agree with those who commented that frequent changes in format of the labels could lead to confusion and should be avoided, EPA disagrees that no changes should be made for model year 1979. EPA believes that the record is sufficient to support immediate implementation of some changes. It is EPA's judgment that the basic concerns expressed in comments received on the proposed rule and other information gathered in the course of this rulemaking provide a basis on which to establish a rule that at least partially addresses the problems noted above. Although this is clearly not the final action that EPA will be taking to improve the program, it is in the public's interest to implement these changes as soon as possible.

Industry comments indicated that at least two months lead time would be required to accommodate changes in label format. EPA believes this action to be timely for 1979 implementation even though some labels may be in use that do not comply with these modifications. Although some confusion may result from some limited use of the old formats and the combined and highway numbers on some labels, this action is being taken early enough so that this should be quite limited.

Summary of Industry Comments

With one exception, industry tended to favor an approach that would at least partially retain current numerical test values. The rationale for this preference was the need to maintain consistency between model years to permit comparison of different model year vehicles. In commenting on which value to use should a single number option be adopted, industry as a whole preferred the combined over the city estimate. The basis for that preference is that consistency among label values and the values used in enforcing average fuel economy standards would further serve to minimize potential public confusion. In addition, the combined value includes some credit for transmission improvements, such as overdrive, that are measured mainly in highway testing. Other recommendations by individual manufacturers included retention of the current ratings with changes only to the format of the labels, adoption of a single value, use of an index, use of a range based on correlation with in-use data, and simply dropping the highway number.

Summary of Consumer Group Comments

Consumer groups expressed a strong concern over the use of the EPA estimates in advertising and the impact of that on consumer expectations and subsequent dissatisfaction. From their viewpoint, changes in advertising policy were required in conjunction with this rulemaking in order for this action to have a significant effect on consumer perception of the use of the mileage information. There was also a definite consensus that the use of ratings in terms other than mpg is not desirable due to the low probability that most people would understand and use such an index. In commenting on which value should be used in the event that a single estimate is published, the groups that commented preferred the city test value since it corresponds most closely to average in-use mileage, thereby providing car-buyers with an absolute mpg value that will be achieved in-use by many drivers. The groups which favored the single estimate did so on the basis of its simplicity and emphasis on the comparative nature of the data. One group suggested that units of gallons-per-mile be used rather than miles-per-gallon to further emphasize consumption, but this presents the same problems as an index. The groups that favored a range did so on the basis of its greater accuracy in predicting in-use performance and its conveyance of the concept of in-use variability. On the other hand, the range approach was criticized for failing to relate to a specific type of driving which results in lack of meaning to an individual car-buyer.

Summary of Comments From Individuals

Of the letters received from individuals, very few favored either no change or the use of an index. More than half of the letters received expressed no clear preference for any of the alternatives proposed in the notice, but instead expressed the views that the use of the estimates in advertising by manufacturers and dealers is misleading and that the estimates are higher than in-use mileage and should be made more accurate. About 25 percent of the letters indicated preference for the single number, including one dealer who responded, and about an equal number favored the range option.

Summary of Results of Public Meetings

Public meetings were held on this rulemaking in Chicago, Boston, and Atlanta on March 2, 9, and 10, respectively to solicit public input and to publicize EPA's concerns. Similar to the letters received from individuals, the views expressed by individuals of the public meetings were diverse. Only one manufacturer made a public statement. Attendance at the meetings was limited, however, although press coverage was quite good and served to encourage written responses.

Summary of Results of Consumer Use (Focus Group) Study

A limited study of consumer perception was conducted in which marketing analysis techniques were used to explore car-buyers' views on how mileage information is best presented. The study consisted of a series of group discussions, referred to as "focus groups" for which a few individuals who had recently purchased new cars were randomly selected.

Six focus group sessions were held, two each in the cities of Philadelphia, New Orleans, and Los Angeles.

The participants in the study indicated that although mileage was an important factor in the purchase decision for a new car, other factors were frequently of more importance. The findings of that study indicated that consumers relate best to mpg figures; an index would not be likely to be perceived as useful. In addition, the groups indicated an interest in mileage information that would predict the mileage that they would achieve in driving. Group participants supported the use of a range of mpg performance as a means to communicate the variability of fuel economy in cars in use. Both the annual fuel cost information and the range of mileages for comparable cars were considered to be confusing and relatively useless. (Both pieces of information are being retained since they are required to be on the labels by § 506 of the Act.)

Summary of Comments From Other Federal Agencies

EPA consulted with DOT, FTC, and DOE in the preparation of this final rule as required by § 506 of the Act. A letter from the FTC dated April 17, 1978, noted the limited data with which EPA must make a decision and urged that action taken for the 1979 model year be a limited, interim action. The FTC specifically recommended that EPA drop the use of the highway and combined estimates and the label "city" for the remaining estimate for the 1979 model year. The FTC cautioned, however, that in view of the need for further study as discussed previously, care must be taken to portray whatever action is adopted as an interim measure. Otherwise, the action will be perceived by the public as a better solution than it was intended to be, and should the public be disappointed, it would be difficult to ever regain credibility. In order to avoid confusion regarding the meaning of the term "interim" as it might appear

[1] The combined estimate is defined as the harmonic average of the city and highway fuel economy tests weighted 0.55 and 0.45 respectively. The combined estimate is prescribed by the Act as the number to be used by the Secretary of Transportation in determining compliance with the passenger automobile fleet average fuel economy standards established under section 502(a) of the Act.

MAY 17 1978 UMI

V 43 96

on the labels (consumers might think that a more accurate estimate would be forthcoming in 1979 which will not be the case), the interim nature of the system in use in 1979 will be explained in the "1979 Gas Mileage Guide", the booklet listing mileage estimates which is required to be available free of charge to every prospective new automobile purchaser in the showrooms.

In informal discussions, DOE staff expressed the view that major action should be deferred due to the inadequacy of the data now available and that only changes to the caveat that appears on the labels be made at this time to more clearly communicate the limitations of the estimates. However, DOE staff recognized that EPA might nevertheless find it in the public interest to take more substantive action for the 1979 model year and recommended that any interim action entail the fewest changes from the current program to minimize public confusion should future changes be made. Specifically, DOE recommended the retention of the city, combined and highway estimates but with a correction factor applied to lower the values that would appear on the labels.

DOT's National Highway Traffic Safety Administration (NHTSA) staff expressed concerns similar to those expressed by DOE's staff. However, NHTSA staff had additional concerns due to their responsibilities in connection with the administration of average fuel economy standards established under § 502 of the Act. Although inclined toward the use of an adjustment factor, NHTSA urged that the program's nomenclature be changed so that there would not be confusion due to the use of one set of "city," "highway," and "combined" numbers on labels and different numbers with the same names in the fuel economy standards program. [Section 503(d) of the Act does not permit the use of other than the old values as the basis for the standards program.] DOT also expressed a concern that the simple use of and adjustment factor might make it appear that the 1979 cars will have poorer fuel economy than the 1978 cars, which will not be the case.

Clearly, the suggestions of each of the agencies could not simultaneously be adopted. However, EPA believes that the action adopted for 1979, essentially the FTC's suggestion, best addresses the concerns of all of the interested agencies: It is an interim, limited action involving the continued use of one of the estimates now in use. The estimate that will be used is the lowest and should reduce consumer dissatisfaction resulting from reliance on the combined and highway values. It does not conflict or appear inconsistent with the fuel economy standards program. The use of a single value simplifies comparisons. It does not appear to be more of an improvement than it is (as might be the case with a program that changed both nomenclature and mpg values) and can be readily communicated to the public. Without overstating the anticipated benefits of the adopted approach, it does appear to be the best action EPA can take at this time and for the short term.

Conclusions

There is no consensus of opinion on which option or variation thereof should be adopted, even among commenters expected to have similar interests and perspectives. Nevertheless, several problem areas in the current program were consistently identified, albeit with varying emphasis, throughout the comments.

In general, the common points raised were that the mileage information on new car labels does not effectively communicate either the comparative nature of the estimates or the concept of a wide range of in-use mileage for individual cars of the same model type. Rather, the program tends to imply that the estimates are predictions of in-use mileage for the individual driver, and relies on the individual car-buyer to recognize and consider the relationship between the type of driving defined as city and highway by the EPA test and his own. Current advertising practice and the fact that EPA estimates are higher than the average achieved in use were considered to exacerbate the problem and contribute to consumer misconceptions, particularly since advertising often plays a major role in forming a car-buyers' expectations and is the primary source of public exposure to EPA's fuel economy ratings.

The written comments and those provided by other Federal agencies in consultation with EPA tended to support the following more specific conclusions regarding the mileage information program.

1. To be perceived by most car buyers as useful, mpg values must be provided rather than an index in terms other than mpg;

2. Most car buyers who commented believe that the mpg values published by EPA should be "realistic" but currently are not (this generally translates into the belief that the values are too high);

3. The reminder on the label, the caveats required in advertising, and the information in the "Mileage Guide" have failed to communicate to most car buyers the appropriate information on what their expectations of in-use performance should be, how EPA's fuel economy ratings should be used and what variability may be expected in fuel economy actually experienced in use for nominally identical cars (cars of the same model with the same optional equipment);

4. The labels and advertising do not focus on the comparative nature of the estimates;

5. Use of the estimates in advertising often contributes to car buyers' unrealistic expectations and disappointment; and

6. The current program relies too heavily on the car buyer to collect and evaluate information on what the estimates mean.

It appears that the current mileage information program would be significantly improved by designing the labels to more clearly and simply convey to the user the concepts of comparison and in-use variability. Simplicity is particularly important for broadcast advertising purposes, since the message must be conveyed in a short time with minimum reliance on qualifiers. In addition, to consider the estimates useful, car-buyers apparently must be confident that they are reasonably accurate in reflecting achievable on-the-road mileage, i.e., it is not enough for the ranking provided by the ratings to be correct.

Thus, the action taken for 1979 is not likely to satisfy many of those who commented on the NPRM; indeed, it does not satisfy EPA in the sense that a better solution may be found for future model years. However, in EPA's judgment, the requirements described in the following section appear to be the best means available to EPA for addressing the concerns expressed and problems identified given the time and data available for the 1979 model year.

Discussion of Requirements Established by This Rulemaking

This regulation requires that the label contain a prominently displayed single estimate called the "Estimated mpg" which will be the value now called the "city" number. Information on the meaning of this estimate would be provided in a brief paragraph highlighted on the labels and in substantially more detail in the "Gas Mileage Guide." (The label verbiage would also refer readers to the "Guide" and inform them of its availability in dealer showrooms.) The FTC staff and EPA are also consulting on the revision of the FTC advertising guidelines as appropriate.

In addition to deleting two of the mpg values, these rules have deleted the terminology "city," "highway," and "combined" from the labels. Use of these terms has been found to be undesirable because they tend to imply a degree of accuracy in predicting a driver's in-use mileage under specific conditions (what he perceives as "city" and "highway" driving) which simply cannot be provided by any

standard test. Factors such as trip length, weather, a car's condition or individual options, and driver habits have a significant effect on mileage, and clearly the conditions under which a car is driven in use in many cases will not match those reflected in testing due to the tremendous variety of in-use conditions. But even where conditions are very similar, factors such as production and test-to-test variability would cause in-use mileage to range around a point estimate that is measured on a standard test. To put it another way, the current means for publishing mileage information do not effectively convey the idea of a range of in-use fuel economy, particularly as used in advertising, nor does it adequately warn the prospective new car purchaser that he cannot use the rating from any standard test to determine whether he will be getting better fuel economy with the car he is planning to buy than with his present car.

Equally important, the current labels do not focus on the comparative nature of the data, a problem that is also exacerbated in advertising. That is, EPA has not been successful in communicating that although a driver should not expect the mileage EPA measured, he can benefit by using the ratings to rank cars.

EPA is mindful of the manufacturers' concerns regarding the inability of the city test to demonstrate the advantages of vehicles with options whose main fuel economy benefits are seen on the highway (e.g., overdrive transmissions), or to provide an ideal ranking for highway driving. (This concern is relevant only to the labeling program; the combined number, which is based in part on the highway test, will still be the basis for standards compliance determinations.) However, the rankings are usually the same on the city and highway tests (particularly within classes of comparable vehicles), and even in those cases in which the rankings are not the same on the two tests, the difference in ranking would be relevant only to drivers who do predominantly highway driving. On the other hand, the absolute value of the city estimate is more likely to be actually achieved by, and less likely to deceive, car-buyers in general than the combined or highway values. Thus, use of the city estimate reduces the potential for consumer deception and this must outweigh minor inadequacies in the data for a fraction of a minority (those who do predominantly highway driving and who are choosing among model types with different highway and city rankings). In any case, labels are not the only means available to the industry to communicate with its customers; advertisements and promotional materials in the showrooms can be used to communicate the degree of benefit that can be expected in highway driving from options, or to otherwise compare qualitatively the highway performance of different models. Nevertheless, EPA will include information in the "1979 Gas Mileage Guides" pointing out such city/highway discrepancies as the effects of overdrive and the advantage of Diesels.

Thus EPA is renaming the "city" estimate simply "Estimated mpg" and deleting the "highway" and "combined" estimates. A number of studies (available on the public record of this rulemaking) have shown that, of the currently published values, the city number is closest to average in-use mileage. Thus, the city number is considered to provide the consumer the best single estimate of average overall performance. This should improve the system by simplifying the use of the estimated mileage for comparisons while eliminating the use of the mileage estimates least likely to be achieved in-use.

Retaining the current test value maintains some continuity with the 1975 through 1978 programs which is an advantage in light of the expectation that this will only be an interim action. In addition, it should be noted that some labels will be on model year 1979 cars under the old system since those cars will have been introduced early, precluding compliance with these amendments. By retaining one of the old values, comparisons will still be possible among cars labeled under the old and new rules.

EPA considered and still is favorably disposed to providing a more realistic range of in-use mileage than that conveyed by the current system, in view of the apparent desire for such information indicated by many consumers in their comments, and by the fact that no one value fully characterizes a car's fuel economy. However, the publication of such range is very likely to be interpreted by many consumers as a guarantee or promise that their cars will necessarily fall within that range (although § 506 of the Act specifically notes that the values on the label cannot be a guarantee). Such a range would be inteneded to show typical results, but there are many reasons why an individual might fall outside that range; EPA has no authority to investigate individual complaints or to take action on behalf of an individual for redress of such complaints. Thus, any range used by EPA must be carefully arrived at to minimize these problems. The data now available for developing such ranges are just not adequate to permit this attractive approach to be adopted for the 1979 model year.

These regulations also provide that the fuel cost information will now be based on the "estimated mpg" rather than the combined mileage and that this information will receive a somewhat less prominent position on the label than in previous years. This is in response to the focus group studies which indicated relatively little interest in these data, and the need to direct the public's attention to critical information while providing additional data to those who choose to read on. These data could not, however, be removed from the labels because § 506 requires that information to be displayed.

A detailed discussion of the choice of this action from among the options is on the public record.

Actions Planned for the Future

The EPA intends to review and improve the mileage information program established under the Act on a continuing basis. As noted previously, EPA views this rule as an interim action intended to alleviate problems with the program pending development of the information needed to design the best possible program. In conjunction with FTC and DOE, EPA is initiating an effort to evaluate the effectiveness with which the format adopted in this rule conveys appropriate mileage information so that refinements may be made if needed.

The Agency is also exploring, in coordination with DOE, means for collecting additional data on the relationship between EPA and test values and in-use fuel economy. It is expected that such data will be used in the future to establish ranges of in-use mileage for model types. Such data will also be of use in determining how well fuel economy improvements measured in testing correlate with improvements in use. Furthermore, as noted in the section entitled "Background," this rulemaking is one part of a broader effort to continuously improve the mileage information program. There are some technical issues related to fuel economy testing not addressed in this rulemaking which suggest that, in some cases, the fuel economy measured by the test may not be fully representative of the mileage experienced on the model type in actual use, and which may affect the accuracy of the ranking for that model type as well.

As noted in the NPRM, for small mpg differences among cars, technical considerations limit the degree to which the rankings established by the "Guide" can be interpreted as providing reasonable assurance that in-use performance will rank the same. For example, the relative ranking established in the "Guide" for a 20 mpg car as compared to a 21 mpg car is not highly significant because of the confounding effect that both production variability and test-to-test variability tend to have on the accuracy of the measured value. Neither of these factors can be readily controlled by any

MY 17 78 UMI

V 4 3 9 6

testing organization and, as such, represent technical limitations to the reliability of the data. However, for larger differences in estimated mpg, there is proportionally increasing confidence that the higher ranked car will provide the potential car buyer with better mileage than would the lower ranked car.

Some improvements to the test procedure have been made for model year 1979. For example, past testing procedures provided for testing of vehicles with manual transmissions at the speeds recommended by the manufacturers. There were some cases in which the recommended shift points were not those that would be likely to be used by the typical driver, but were those which would maximize fuel economy. EPA eliminated this practice for 1979 and later model years. Similarly, some manufacturers may have been able to have a limited number of their vehicles tested under conditions which gave them credit for better aerodynamic characteristics than the production vehicles actually have. EPA limited this practice as well.

Beginning in model year 1980, regulations become effective that require vehicles to be tested on the dynamometer with a setting that more accurately reflects their weight than the current procedure.

Other potentially significant problem areas in testing that cannot yet be addressed include the effect of tires on in-use mileage and the representativeness of tires used in testing of on-the-road mileage effects. The EPA currently has a program underway to evaluate the effects of tires so that solutions may be developed in the long term. The EPA is also investigating the potential differences between test and production cars and means for controlling such differences should they exist.

In addition, the EPA is currently considering (in consultation with DOE) means by which the "Gas Mileage Guide," which contains important fuel economy information, may receive earlier distribution.

AVAILABILITY OF MATERIAL

A copy of all public comments is available for inspection and copying at the U.S. EPA, Public Information Reference Unit, room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

NOTE.—The Environmental Protection Agency has determined that this regulation does not require preparation of an Economic Impact Analysis under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Dated: May 8, 1978.

DOUGLAS N. COSTLE,
Administrator.

Part 600 of Chapter I, Title 40 of the Code of Federal Regulations is hereby amended as follows:

§ 600.206-79 [Amended]

1. In § 600.206-79 paragraphs (b) and (c) are deleted.

2. In § 600.206-80 paragraph (b) and (c) are deleted. As amended the section reads as follows:

§ 600.206-80 Calculation of fuel economy values for a vehicle configuration.

(a) Fuel economy values determined for each vehicle and as approved in § 600.008 (b) or (f) are used to determine city, highway, and combined fuel economy values for each vehicle configuration (as determined by the Administrator) for which data are available.

(1) If only one city fuel economy and one highway fuel economy value exist for a vehicle configuration, those values, rounded to the nearest tenth of a mile per gallon, comprise the city fuel economy value and highway fuel economy value for that configuration.

(2) If more than one city and one highway fuel economy value exist for a vehicle configuration:

(i) All data shall be grouped according to each unique road load horsepower setting/test weight combination at which the data was generated.

(ii) Within each group of data, all values are harmonically averaged and rounded to the nearest 0.0001 of a mile per gallon for the city fuel economy values, and harmonically averaged and rounded to the nearest 0.0001 mile per gallon for the highway values, in order to determine a city and a highway fuel economy value for each road load horsepower setting/test weight at which the vehicle configuration was tested.

(iii) All city fuel economy values and all highway fuel economy values calculated in (ii) are (separately for city and highway) harmonically averaged in proportion to the relative sales within the vehicle configuration (as provided to the Administrator by the manufacturer) of vehicles of each tested road load horsepower setting/test weight combination. The resultant values, rounded to the nearest 0.0001 mile per gallon, are the city and highway fuel economy values for the vehicle configuration.

(3) The combined fuel economy value for a vehicle configuration is calculated by harmonically averaging the city and highway fuel economy values, as determined in § 600.206(a) (1) and (2), weighted 0.55 and 0.45, respectively, and rounding to 0.0001 of a mile per gallon. A sample of this calculation appears in Appendix II to this Part.

3. In § 600.207-79 paragraph (a)(2), (a)(2)(iii), and (a)(3)(iii) are amended; (c) and (d) are deleted. As amended the section reads as follows:

§ 600.207-79 Calculation of fuel economy values for a model type.

(a) Fuel economy values for a base level are calculated from vehicle configuration fuel economy values, as determined in § 600.206(a) for low altitude tests.

(1) If the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will calculate fuel economy values for each base level for vehicles intended for sale in California and for each base level for vehicles intended for sale in the rest of the states.

(2) The manufacturer shall supply model year sales projections for each road load/car line/vehicle configuration combination.

(i) Sales projections must be supplied separately for each vehicle configuration intended for sale in California and each configuration intended for sale in the rest of the states if required by the Administrator under paragraph (a)(1) of this section.

(ii) The sales projections must be updated as of the date a manufacturer requests that fuel economy calculations for a model type be made by the Administrator.

(iii) The requirements of this section may be satisfied by providing an amended application for certification, as described in § 86.079-21 of this chapter.

(3) Vehicle configuration fuel economy values, as determined in § 600.206(a), are grouped according to base level.

(i) If only one vehicle configuration within a base level has been tested, the fuel economy value from that vehicle configuration consitutes the fuel economy for that base level.

(ii) If more than one vehicle configuration within a base level have been tested, the vehicle configuration fuel economy values are harmonically averaged in proportion to the respective projected sales fraction (rounded to the nearest 0.0001) of each vehicle configuration and the resultant fuel economy value rounded to the nearest 0.0001 of a mile per gallon.

(iii) If the Administrator has not accepted fuel economy data derived from the testing of a certification vehicle (or a vehicle tested for running changes approved under §§ 86.079-32, 86.079-33, and 86.079-34) for at least one vehicle configuration within each base level, the manufacturer shall submit (on or before the date that the manufacturer requests the Administrator to calculate the respective general label values) data as specified in § 600.006. The fuel economy data submitted shall be for the vehicle configuration with the largest projected sales within the respective base level. The vehicle tested will be tested at the road load horsepower with the highest projected sales within the vehicle configuration.

(4) The procedure specified in § 600.207(a) will be repeated for each base level, thus establishing city, highway, and combined fuel economy values for each base level.

(5) For the purposes of calculating a base level fuel economy value, if the only vehicle configuration(s) within the base level are vehicle configuration(s) which are intended for sale at high altitude, the Administrator may use fuel economy data from test conducted on these vehicle configuration(s) at high altitude to calculate the fuel economy for the base level.

(b) For each model type, as determined by the Administrator, a city, highway, and combined fuel economy value will be calculated by using the projected sales and fuel economy values for each base level within the model type.

(1) If the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states; he will calculate fuel economy values for each model type separately for vehicles intended for sale in California and for those intended for sale in the rest of the states.

(2) The sales fraction for each base level is calculated by dividing the projected sales of the base level within the model type by the projected sales of the model type and rounding the quotient to the nearest 0.0001 mpg.

(3) The city fuel economy values of the model type (calculated to the nearest 0.0001 mpg) are determined by dividing one by a sum of terms, each of which corresponds to a base level and which is a fraction determined by dividing

(i) The sales fraction of the base level, by

(ii) The city fuel economy value for the respective base level.

(4) The procedure specified in paragraph (b)(3) of this section is repeated in an analogous manner to determine the highway and combined fuel economy values for the model type.

4. In § 600.207-80 paragraph (a)(2), (a)(2)(iii), and (a)(3)(iii) are amended; (c) and (d) are deleted. As amended the section reads as follows:

§ 600.207-80 Calculation of fuel economy values for a model type.

(a) Fuel economy values for a base level are calculated from vehicle configuration fuel economy values as determined in § 600.206(a) for low altitude tests.

(1) If the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will calculate fuel economy values for each base level for vehicles intended for sale in California and for each base level for vehicles intended for sale in the rest of the states.

(2) The manufacturer shall supply model year sales projections for each test weight/road load/car line/vehicle configuration combination.

(i) Sales projections must be supplied separately for each vehicle configuration intended for sale in California and each configuration intended for sale in the rest of the states if required by the Administrator under paragraph (a)(1) of this section.

(ii) The sales projections must be updated as of the date a manufacturer requests that fuel economy calculations for a model type be made by the Administrator.

(iii) The requirements of this section may be satisfied by providing an amended application for certification, as described in § 86.079-21 of this chapter.

(3) Vehicle configuration fuel economy values, as determined in § 600.206(a), are grouped according to base level.

(i) If only one vehicle configuration within a base level has been tested, the fuel economy value from that vehicle configuration constitutes the fuel economy for that base level.

(ii) If more than one vehicle configuration within a base level have been tested, the vehicle configuration fuel economy values are harmonically averaged in proportion to the respective projected sales fraction (rounded to the nearest 0.0001) of each vehicle configuration and the resultant fuel economy value rounded to the nearest 0.0001 of a mile per gallon.

(iii) If the Administrator has not accepted fuel economy data derived from the testing of a certification vehicle (or a vehicle tested for running changes approved under §§ 86.079-32, or 86.079-33, 86.079-34) for at least one vehicle configuration within each base level, the manufacturer shall submit (on or before the date that the manufacturer requests the Administrator to calculate the respective general label values) data as specified in § 600.000. The fuel economy data submitted shall be for the vehicle configuration with the largest projected sales within the respective base level. The vehicle will be tested at the road load horsepower/test weight combination which has the largest projected sales within the vehicle configuration.

(4) The procedure specified in § 600.207(a) will be repeated for each base level, thus establishing city, highway, and combined fuel economy values for each base level.

(5) For the purposes of calculating a base level fuel economy value, if the only vehicle configuration(s) within the base level are vehicle configuration(s) which are intended for sale at high altitude, the Administrator may use fuel economy data from tests conducted on these vehicle configuration(s) at high altitude to calculate the fuel economy for the base level.

(b) For each model type, as determined by the Administrator, a city, highway, and combined fuel economy value will be calculated by using the projected sales and fuel economy values for each base level within the model type.

(1) If the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will calculate fuel economy values for each model type separately for vehicles intended for sale in California and for those intended for sale in the rest of the states.

(2) The sales fraction for each base level is calculated by dividing the projected sales, of the base level within the model type by the projected sales of the model type and rounding the quotient to the nearest 0.0001.

(3) The city fuel economy values of the model type (calculated to the nearest 0.0001 mpg) are determined by dividing one by a sum of terms, each of which corresponds to a base level and which is a fraction determined by dividing:

(i) The sales fraction of the base level, by

(ii) The city fuel economy value for the respective base level.

(4) The procedure specified in paragraph (b)(3) of this section is repeated in an analogous manner to determine the highway and combined fuel economy values for the model type.

5. By amending § 600.306-79 (a) (1) and (2) to read as follows:

§ 600.306-79 Labeling requirements.

(a) Prior to being offered for sale, each manufacturer shall affix or cause to be affixed and each dealer shall maintain or cause to be maintained on each automobile:

(1) A general fuel economy label as described in §§ 600.307 and 600.308, or

(2) A specific label, as described in §§ 600.307 and 600.309, for those low altitude automobiles manufactured or imported before the date that occurs 15 days after general labels are approved for the manufacturer.

* * * * *

6. By adding a new § 600.307-79 to read as follows:

MY 17 78 UMI

V 4 3 5 9 6

§ 600.307-79 Format and contents of labels.

(a) Fuel economy labels must be rectangular in shape, contain the EPA and DOE logos and the title "Fuel Economy Rating," be printed in a color which contrasts with the paper color and in a type size that is easily readable and be large enough to allow inclusion of all required information.

(b) Fuel economy labels must contain the following information in the applicable format illustrated in Appendix VI or such other format as may be approved by the Administrator:

(1) The word "Model" or "Vehicle," as appropriate, for general and specific fuel economy labels, respectively, followed by the description of the labeled vehicle as described in the manner and degree of detail specified in § 600.308(a) or § 600.309(a), as applicable,

(2) The phrase "Estimated MPG: For Comparisons" followed by the fuel economy estimate specified in § 600.308(b) for general labels or § 600.309(b) for specific labels, as applicable, and a paragraph, circumscribed by a rectangular box, reading as follows: "The Estimated mileage for this model ('design' for specific labels),——, is to be used to compare cars (trucksor vehicles) of this model (design) with other cars (trucks or vehicles). Your own mileage may be poorer depending upon options, driving conditions, your driving habits and your car's (truck's or vehicle's) operating condition.

(3) The phrase "other (vehicle class as determined by the Administrator pursuant to § 600.315) models ('special vehicles' for Special purpose vehicles):" followed by a paragraph circumscribed by a rectangular box reading as follows: "The estimated mpg numbers for other similar sized cars (trucks or vehicles) ranges from—— to——mpg (as of (date)). By comparison, the estimated mpg of this model (design) is ——. Use these numbers to compare different models. Consult the 'Gas Mileage Guide' for further information."

(i) The fuel economy range required by this paragraph is calculated and supplied to the manufacturer by the Administrator in accordance with § 600.311.

(ii) If no fuel economy range for other models has been supplied to the manufacturer by the Administrator at the time a vehicle is to be labeled or within the time constraints permitted by § 600.306(b), the paragraph (a)(3) of this section shall be replaced by the statement: "A range of mpg numbers for other car (truck or vehicle) models of similar size was not available when this car was labeled (date)."

(4) The phrase "annual fuel cost:" followed by the annual fuel cost and the phrase "based on——mpg,——miles per year,——¢/gallon."

(i) The annual fuel cost, average miles driven per year, and cost of fuel will be calculated and supplied by the Administrator in accordance with § 600.308(c) for general labels or § 600.309(c) for specific labels, as applicable.

(ii) The mpg used in determining annual fuel cost is that given in subparagraph (2) of this paragraph.

(5) The paragraph "Ask the dealer for the free "1979 Gas Mileage Guide" to compare the Estimated MPG of other cars (trucks or vehicles). It will tell you how to use these numbers."

(c) The fuel economy estimate required by paragraph (b)(2) of this section shall be highlighted by being in type no less than four times the size of the next largest print on the label (excluding the title and logos) or by such other means as may be approved by the Administrator.

7. By adding a new § 600.308-79 to read as follows:

§ 600.308-79 General label contents.

(a) The vehicle description to be used on general labels shall include the following:

(1) Model year;

(2) Vehicle car line;

(3) Engine displacement, in cubic inches, cubic centimeters, or liters whichever is consistent with the customary description of that engine;

(4) Number of engine cylinders;

(5) Transmission class;

(6) Catalyst usage, if necessary to distinguish otherwise identical model type;

(7) Fuel metering system, including number of carburetor barrels, if applicable; and

(8) California emission control system usage, if applicable and if the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states.

(b) The "Estimated MPG" to be used on general labels shall be the city fuel economy value calculated in § 600.207(b)(3) and rounded to the nearest whole mile per gallon.

(c) The annual fuel cost estimate for operating an automobile included in a model type will be computed by the Administrator by using values for the fuel cost per gallon and average annual mileage, predetermined by the Administrator, and the fuel economy determined in paragraph (b).

(1) The annual fuel cost estimate for a model type is computed by multiplying:

(i) Fuel cost per gallon expressed in dollars to the nearest 0.05 dollar, by

(ii) Average annual mileage, expressed in miles per year to the nearest 1,000 miles per year, by

(iii) The inverse, rounded to the nearest 0.0001 gallons per mile, of the fuel economy value determined in paragraph (b) for a model type (expressed in miles per gallon rounded to the nearest whole mile per gallon).

(2) The product computed in (c)(1) and rounded to the nearest dollar per year will comprise the annual fuel cost estimate that appears on general labels for that model type.

8. By revising § 600.309-79 to read as follows:

§ 600.309-79 Specific label contents.

(a) The vehicle description to be used on specific labels shall include the following:

(1) Model year;

(2) Vehicle car line;

(3) Engine displacement, in cubic centimeters, or liters, whichever is consistent with the customary description of that engine;

(4) Number of engine cylinders;

(5) Transmission class;

(6) Catalyst usage, if so equipped;

(7) Fuel metering system, including number of carburetor barrels, if applicable;

(8) Inertia weight class;

(9) Axle ratio;

(10) Other engine or vehicle parameters; and

(11) California emission control system usage, where applicable, and if the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states.

(b) The "Estimated MPG" to be used on specific labels shall be the city fuel economy value calculated in § 600.206(a) (1) or (2) and rounded to the nearest whole mile per gallon.

(c) The annual fuel cost estimate for operating an automobile included in a vehicle configuration will be computed by the Administrator by using values for the fuel cost per gallon and average annual mileage and the fuel economy determined in paragraph (b).

(1) The annual fuel cost estimate for a vehicle configuration is computed by multiplying:

(i) The annual fuel cost per gallon (as obtained by the Administrator from the FEA Administrator), expressed in dollars to the nearest 0.05 dollar, by

(ii) Average annual mileage (as obtained by the Administrator from the Secretary), expressed in miles per year to the nearest 1,000 miles per year, by

(iii) The inverse, rounded to the nearest 0.0001 gallons per mile, of the fuel economy value determined in paragraph (b) for a vehicle configuration (expressed in miles per gallon rounded to the nearest whole mile per gallon).

(2) The product computed in (c)(1) and rounded to the nearest dollar per year will comprise the annual fuel cost estimate that appears on specific labels for that vehicle configuration.

9. By adding a new § 600.311-79 to read as follows:

§ 600.311-79 Range of fuel economy for comparable automobiles.

(a) The Administrator will determine the range of fuel economy values for each class of comparable automobiles.

(1) The range of fuel economy values within a class is the maximum "Estimated MPG" and the minimum "Estimated MPG" value for all general labels as determined in § 600.308(b) regardless of manufacturer.

(2) If the Administrator determines that automobiles intended for sale in California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will compute separate ranges of fuel economy values for each class of automobiles for California and for the other states.

(3) For high altitude vehicles determined under § 600.310, both general and specific labels will contain the range of comparable fuel economy computed in this paragraph.

(4) The range of comparable fuel economy values for a class of automobiles is derived from the latest available data approved by the Administrator for that class of automobiles.

(b) The manufacturer shall include the range of fuel economy determined by the Administrator in (a) on each label affixed to an automobile within that class except as provided in § 600.306.

10. By adding Appendix VI to read as follows:

M Y 1 7 7 8 UMI

APPENDIX VI—1979 MODEL YEAR FUEL ECONOMY LABEL FORMAT

A. GENERAL LABEL FOR PASSENGER CARS

EPA FUEL ECONOMY RATING

MODEL:

ESTIMATED MPG: FOR COMPARISONS

THE ESTIMATED MILEAGE FOR THIS MODEL, , IS TO BE USED TO COMPARE CARS OF THIS MODEL WITH OTHER CARS. YOUR OWN MILEAGE MAY BE POORER DEPENDING UPON OPTIONS, DRIVING CONDITIONS, YOUR DRIVING HABITS, AND YOUR CAR'S OPERATING CONDITION.

OTHER MODELS:

ANNUAL FUEL COST $, BASED ON MPG, 15,000 MILES PER YEAR, $0.70/GALLON.

ASK THE DEALER FOR THE FREE 1979 GAS MILEAGE GUIDE TO COMPARE THE ESTIMATED MPG OF OTHER CARS. IT WILL TELL YOU HOW TO USE THESE NUMBERS

APPENDIX VI—1979 MODEL YEAR FUEL ECONOMY LABEL FORMAT

B. GENERAL LABEL FOR TRUCKS

EPA FUEL ECONOMY RATING

MODEL:

ESTIMATED MPG: FOR COMPARISONS

THE ESTIMATED MILEAGE FOR THIS MODEL, , IS TO BE USED TO COMPARE TRUCKS OF THIS MODEL WITH OTHER TRUCKS. YOUR OWN MILEAGE MAY BE POORER DEPENDING UPON OPTIONS, DRIVING CONDITIONS, YOUR DRIVING HABITS, AND YOUR CAR'S OPERATING CONDITION.

OTHER MODELS:

ANNUAL FUEL COST $, BASED ON MPG, 15,000 MILES PER YEAR, $0.70/GALLON.

ASK THE DEALER FOR THE FREE 1979 GAS MILEAGE GUIDE TO COMPARE THE ESTIMATED MPG OF OTHER TRUCKS. IT WILL TELL YOU HOW TO USE THESE NUMBERS

APPENDIX VI—1979 MODEL YEAR FUEL ECONOMY LABEL FORMAT

C. GENERAL LABEL FOR SPECIAL PURPOSE VEHICLES

EPA FUEL ECONOMY RATING

MODEL:

ESTIMATED MPG: FOR COMPARISONS

THE ESTIMATED MILEAGE FOR THIS MODEL, , IS TO BE USED TO COMPARE VEHICLES OF THIS MODEL WITH OTHER VEHICLES. YOUR OWN MILEAGE MAY BE POORER DEPENDING UPON OPTIONS, DRIVING CONDITIONS, YOUR DRIVING HABITS, AND YOUR VEHICLE'S OPERATING CONDITION.

OTHER SPECIAL VEHICLES:

ANNUAL FUEL COST $, BASED ON MPG, 15,000 MILES PER YEAR, $0.70/GALLON.

ASK THE DEALER FOR THE FREE 1979 GAS MILEAGE GUIDE TO COMPARE THE ESTIMATED MPG OF OTHER VEHICLES. IT WILL TELL YOU HOW TO USE THESE NUMBERS

APPENDIX VI—1979 MODEL YEAR FUEL ECONOMY LABEL FORMAT

D. SPECIFIC LABEL FOR PASSENGER CARS

EPA FUEL ECONOMY RATING

MODEL:

ESTIMATED MPG: FOR COMPARISONS

THE ESTIMATED MILEAGE FOR THIS DESIGN, , IS TO BE USED TO COMPARE CARS OF THIS DESIGN WITH OTHER CARS. YOUR OWN MILEAGE MAY BE POORER DEPENDING UPON OPTIONS, DRIVING CONDITIONS, YOUR DRIVING HABITS, AND YOUR CAR'S OPERATING CONDITION.

OTHER MODELS:

ANNUAL FUEL COST $, BASED ON MPG, 15,000 MILES PER YEAR, $0.70/GALLON.

ASK THE DEALER FOR THE FREE 1979 GAS MILEAGE GUIDE TO COMPARE THE ESTIMATED MPG OF OTHER CARS. IT WILL TELL YOU HOW TO USE THESE NUMBERS

SUPPLEMENT TO THE 1977/78 UNITED STATES GOVERNMENT MANUAL

A Special Edition of the Official Handbook of the Federal Government

The *Supplement* contains the changes in personnel and organization of the Federal Government which have occurred since May 1, 1977, the revision date of the 1977/78 *Manual*. Updated personnel listings for all agencies are included in the *Supplement* as well as descriptions of the programs and activities of the recently established Department of Energy and the Office of Administration within the Executive Office of the President.

Also included is a listing in Appendix A of the Federal agencies and functions affected by President Carter's reorganization of the Executive Office of the President and the establishment of the Department of Energy.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month.

A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

List of Public Laws

This is a continuing listing of public bills that have become law, the text of which is not published in the FEDERAL REGISTER. Copies of the laws in individual pamphlet form (referred to as "slip laws") may be obtained from the U.S. Government Printing Office.

[Last Listing: May 17, 1978]

H.R. 6782 ..... Pub. L. 95-279
To provide emergency assistance to producers of wheat, feed grains, and upland cotton, and for other purposes. (May 15, 1978; 92 Stat. 240) Price: $.50.

S. 482 ..... Pub. L. 95-280
To direct the Secretary of the Interior to purchase and hold certain lands in trust for the Zuni Indian Tribe of New Mexico, and to confer jurisdiction on the Court of Claims with respect to land claims of such tribe. (May 15, 1978; 92 Stat. 244) Price: $.50.

S. 661 ..... Pub. L. 95-281
To reinstate the Modoc, Wyandotte, Peoria, and Ottawa Indian Tribes of Oklahoma as federally supervised and recognized Indian tribes. (May 15, 1978; 92 Stat. 246) Price: $.50.

Rules Going Into Effect Today

Interior/FWS—Listing of greenback cutthroat trout as a threatened species 16343; 4-18-78

DOT/MTB—Design of plastic pipelines for transporting natural and other gas ... 13880; 4-3-78

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES AND OTHER OPERATIONS

[1978 Crop Peanut Warehouse Storage Loan Supplement]

PART 1446—PEANUTS

Subpart—1978 Crop Peanut Warehouse Storage Loans

AGENCY: Commodity Credit Corporation, U.S. Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is, for the 1978 crop of peanuts, to announce (1) the national level of support for quota peanuts, (2) the national level of support for additional peanuts, (3) the use of services of approved area marketing associations in making warehouse storage loans and performing other activities relating to the program, (4) the definition of "eligible for domestic edible use" as it pertains to peanuts marketed or considered marketed from a farm, and (5) sales policy for peanuts received under loan or acquired by the Commodity Credit Corporation (hereinafter referred to as "CCC") under the 1978 program. The need for this rule is to satisfy the statutory requirements as provided for in Section 108 of the Agricultural Act of 1949 (hereinafter referred to as the "Act"), as added by the Food and Agriculture Act of 1977.

EFFECTIVE DATE: May 17, 1978.

ADDRESS: Price Support and Loan Division, ASCS, USDA, 3741 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Thomas A. VonGarlem (ASCS), 202-447-7954.

SUPPLEMENTARY INFORMATION: A notice that the Secretary was preparing to make determinations with respect to these provisions was published in the FEDERAL REGISTER on January 17, 1978 (43 FR 2404), in accordance with 5 U.S.C. 533. The written comment period ended January 31, 1978, but all comments received through February 7, 1978, were considered. There were 67 responses—one each from a sheller, and an association of manufacturers of peanut products; 10 from members of the Congress; 7 from peanut producer organizations; 3 from farm organizations; 3 from sheller organizations; and 51 from individual farmers. Following is a summary of comments received:

Quota price support level, 52 commentators. Twelve organizations and 4 individuals recommended $420 per ton, the legal minimum. Two organizations and 2 individuals recommended the legal minimum increased by cost of production (up to $450 per ton). Thirty-six individuals and no organizations recommended levels ranging from 75 percent of parity, to 100 percent of parity (currently estimated at $456 to $608 per ton).

Additional price support level, 44 commentators. Four organizations and 4 individuals recommended $300 per ton or less; 7 organizations and 14 individuals recommended $420 per ton; 19 individuals and no organizations recommended levels between $420 and 100 percent of parity.

Area marketing associations. Thirteen organizations and 23 individual commentators approved and none opposed continued use of the services of area marketing associations in carrying out price support and marketing activities. Of these commentators, 9 organizations recommended that the Secretary designate only the three area marketing associations which have participated in these activities under 1977 and prior peanut price support programs and which are organized primarily for the purpose of conducting such activities.

Definition of "peanuts eligible for domestic edible use", 46 commentators. Twelve organizations and 28 individuals recommended that both Segregation 2 and Segregation 3 peanuts be defined for program purposes as eligible for domestic edible use. Two organizations and 3 individuals recommended that Segregation 3 peanuts be eligible. One organization recommended that neither Segregation 2 nor Segregation 3 peanuts be eligible.

Sales policy. There were 12 organizations and 7 individual commentators on one or more aspects of sales policy. In general, commentators endorsed sales policies as set forth in the January 17 notice of this ruling, with the following major exceptions: Ten organizations recommended a minimum sales price of 100 percent of the quota loan rate plus costs for sales for edible export use; and 8 organizations and 2 individuals recommended that sales for crushing be made by competitive bid with no restrictions on exports.

After considering the comments received and the applicable provisions of the Act, the following determinations are being made with respect to the 1978 crop of peanuts.

1. *The national level of support for quota peanuts.* Subsection 108(a) of the Act provides that the Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts of the 1978 crop at such level as he finds appropriate, but not less than $420 per ton. In determining price support levels, subsection 108(a) of the Act directs the Secretary to take into consideration (a) any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period January 1 through December 31, 1977, inclusive, and (b) the eight factors specified in section 401(b) of the Act, namely: The supply of the commodity in relation to the demand therefor, the levels at which other commodities are being supported, the availability of funds, the perishability of the commodity, the importance of the commodity to agriculture and the national economy, the ability to dispose of stocks acquired through a support operation, the need for offsetting temporary losses of export markets, and the ability and willingness of producers to keep supplies in line with demand. Pursuant to the language of subsection 108(a) of the Act, the following data were considered:

(a) *Index of prices paid for production items, interest, taxes and wage rates.* The current estimate of the calendar year 1977 index (1910-1914) is 740 compared with 709 in calendar year 1976—an increase of 4.37 percent in 1977. A comparable increase in the minimum price support level of $420 per ton would result in a loan rate of about $440 per ton.

(b) The eight factors to be considered, as specified in section 401(b) of the Act, are as follows:

M Y 1 8 7 8

UMI

V 4 3 | 9 7

1. *Supply of the commodity in relation to demand.* In a ruling effective November 30 and published December 6, 1977 (42 FR 61585), the Department established the 1978-crop national poundage quota for peanuts at the statutory minimum of 1,680,000 tons. The determination that this minimum level was sufficient to meet total estimated requirements for domestic edible use and a reasonable carryover was based on the following data:

Projected requirements 1978 M Y	1,000 tons
Domestic edible	975
Seed	100
Crushing residual from edible millings	130
Subtotal 1978 requirements	1,205
Reasonable carryover (2 months supply)	200
Total requirements	1,405
Minimum national poundage quota	1,680
Percentage of requirements	119

2. *Price levels at which other commodities are being supported (1978 crop).*

Commodity	Price support	Target price
Upland cotton (lb)	$0.44	$0.52
ELS cotton (lb)	.83	
Corn (bu)	2.00	2.10
Sorghum (cwt)	3.39	4.07
Barley (bu)	1.63	2.25
Oats (bu)	1.03	
Rye (bu)	1.70	
Wheat (bu)	2.25	3.00

3. *Availability of funds.* Current estimates of fund availability for fiscal year 1979 indicate that funds will be insufficient to finance all corporation programs and activities. The Department has proposed legislation to increase the corporation's borrowing authority limitation from the authorized $14.5 billion to $20 billion, which was transmitted with the President's 1979 budget.

4. *The perishability of the commodity.* Shelled peanuts can be kept in cold storage for two years or more with little loss of weight or quality. It is hazardous, however, to hold peanuts in dry storage through the hot summer months because of danger of loss due to deterioration, insect infestation, or rodent damage.

5. *Importance of commodity to agriculture and the national economy.* Peanuts are grown on about 59,000 farms in 16 States. The value of picked and threshed production from the 1977 crop is estimated at $771 million, about $21 million higher than the value of the 1976 crop.

6. *The ability to dispose of stocks acquired through price support operations.* There is an immediate dollar market for peanuts for crushing at competitive prices.

7. *The need for offsetting temporary losses of export markets.* Because of a world shortage, U.S. exports of peanuts in the 1976-77 marketing year reached an all-time high of 392,000 tons. The shortage is expected to continue through the 1977-78 marketing year, and U.S. exports for that period are projected at a minimum of 440,000 tons. These totals include CCC sales for export (at prices equal to or above the loan rate) which were 150,000 tons in 1976-77 and are expected to be about the same, or higher in 1977-78. Whether this export volume can be sustained through the 1978-79 marketing year will depend largely on export availabilities from India and other producers of peanuts for edible use. The latest projection for 1977-78 U.S. exports is 365,000 tons, consisting of 42,000 tons of commercial quota peanuts and peanut products, 225,000 tons of additional peanuts grown under commercial contracts and 98,000 tons sold from loan stocks of quota and additional peanuts. If 1978-79 export demand is higher, or the supply of additional peanuts is lower than projected, an estimated 378,000 tons of surplus quota loan stocks will be available, at or above the quota loan rate plus costs, to make up the shortfall.

8. *The ability and willingness of producers to keep supplies in line with demand.* In a referendum held December 12 through 15, 1977, 93.6 percent of the growers voting approved marketing quotas and acreage allotments for the 1978 through 1980 crops of peanuts. The referendum was held subsequent to a determination by the Department on December 6, 1977 (42 FR 61588) that the national acreage allotment for 1978 crop peanuts will be 1,614,000 tons, the statutory minimum; and that the national poundage quota of 1978 crop peanuts which will be eligible for price support at the quota loan rate will be 1,680,000 tons, the statutory minimum. In so voting, the growers indicated acceptance of a ruling which will reduce the quantity of peanuts eligible for price support at the quota loan rate from 2,068,850 tons in 1977 to 1,680,000 tons in 1978—a reduction of 388,850 tons.

After consideration of the comments received and the above data, it has been determined by the Secretary that the national level of support for 1978-crop quota peanuts will be $420 per ton, the statutory minimum.

2. *The national level of support for additional peanuts.* Subsection 108(b) of the Act provides that the Secretary shall make price support available to producers through loans, purchases, or other operations on 1978-crop "additional peanuts", which are defined in the 1977 amendments to the Act as

M Y 1 8 7 8 UMI

any peanuts which are marketed from a farm and which are in excess of the marketings of quota peanuts from such farm for the marketing year but not in excess of the actual production from the farm acreage allotment. This subsection requires that the loan rate for 1978 crop additional peanuts shall be announced not later than February 15, 1978, and that in determining this rate the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets.

Historically, there is an immediate dollar market for peanuts for crushing and production of peanut oil and meal. Peanut oil prices usually have averaged about 4 cents to 5 cents per pound above soybean oil prices, with peanut meal prices averaging about $5 per ton below soybean meal prices. In recent months peanut oil prices have averaged almost double soybean oil prices due primarily to a short U.S. crop and heavy export volume, which has reduced domestic crushing availabilities. Current projections indicate a decline in peanut exports in the 1978-79 marketing year, a corresponding increase in domestic crushing availabilities, and a peanut domestic crushing value of $220 per ton, based on oil at 24 cents per pound (6 cents above estimated soybean oil price) and meal at $135 per ton.

The demand for U.S. peanuts in foreign markets is estimated at 365,000 tons in the 1978 marketing year compared with an estimated 440,000 tons in 1977. The projected reduction in exports is based on the expectation that peanut export availabilities from India and other world suppliers will recover from the abnormally low levels of 1976 and 1977. It is estimated that world demand, combined with the minimum sales policies established by this notice, will sustain an average export price of at least $400 per ton for U.S. peanuts and an additional loan rate, taking into consideration the estimated $220 per ton domestic crushing value, of $250 per ton.

Taking into consideration these factors and the comments received, it has been determined by the Secretary that the national level of support for 1978 crop additional peanuts will be $250 per ton.

3. *Area marketing associations.* Subsection 108(c) of the Act authorizes the Secretary to make loans available in each of the three producing areas (described in 7 CFR 1446.4 (1977 ed.)) to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily for the purpose of conducting such loan activities. Such associations may be used in administrative and supervisory activities relating to price support and marketing activities under section 108 and under the Agricultural Adjustment Act of 1938, as amended. Such loans shall include, in addition to the price support value of the peanuts, such costs as the associations may reasonably incur in carrying out such responsibilities.

It is hereby determined that the area marketing associations designated in § 1446.30 of this ruling will be used in making warehouse storage loans and performing other program activities.

Since 1937, such associations have participated in administering and supervising the peanut program in a manner generally similar to that described herein.

4. *Peanuts eligible for domestic edible use.* The 1977 amendment to Title I of the Act defines "domestic edible use" as use for milling to produce domestic food peanuts and seed and use on a farm. Only peanuts which are eligible for domestic edible use as determined by the Secretary may be marketed from a farm as quota peanuts in the 1978 marketing year.

Regulations currently in effect, contained in 7 CFR 1446.3 (1974 ed.) and the 1977 quality regulations issued pursuant to the Peanut Marketing Agreement classify farmers stock peanuts as follows:

Segregation 1 peanuts means farmers stock peanuts which (i) have at least 99 percent peanuts of one type, (ii) have not more than 2 percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold or decay, and (iii) are free from *A. flavus mold.*

Segregation 2 peanuts means farmers stock peanuts which (i) have less than 99 percent peanuts of one type, or (ii) have more than 2 percent damaged kernels or more than 1.00 percent concealed damage caused by rancidity, mold, or decay and (iii) are free from visible *A. flavus mold.* Segregation 3 peanuts means farmers stock peanuts which have visible *A. flavus mold.*

Under these regulations, only Segregation 1 peanuts may be milled and sold for the manufacture of peanut butter, roasted peanuts, salted peanuts and other edible products using the peanuts as peanuts. In common usage, the term "eligible for domestic edible use" has been applied only to these Segregation 1 peanuts, although other classes of peanuts may be crushed to obtain edible oil.

In defining the term "eligible for domestic use" as it applies to the definition of quota peanuts, the Department has considered whether to restrict eligibility to Segregation 1 peanuts or to broaden the term, for program purposes only, to include Segregation 2 and 3 peanuts under specified condi-

V 4 3 — 9 7

tions. The broader definition was under consideration primarily as a means of alleviating loss of farm income to growers whose crops were severely impaired by freeze damage, drought, *A. flavus* contamination, or similar disastrous crop conditions.

Accordingly, it is hereby determined, however, that for 1978-crop peanuts, only Segregation 1 peanuts will be defined as peanuts eligible for domestic edible use, and only Segregation 1 peanuts may be marketed from a farm as quota peanuts during the harvest season.

5. *Sales policy.* Section 407 of the Act provides that CCC may not sell peanuts at less than 105 percent of the support price plus reasonable carrying charges, except sales for new or by-product uses, extraction of oil, export, and prevention of deterioration or spoilage.

Section 359(j) of the Agricultural Adjustment Act of 1938, as added by the Food and Agriculture Act of 1977, provides that additional peanuts received under loan may be sold for domestic edible use at prices not less than those required to cover all costs incurred with respect to the peanuts sold, plus: (1) 100 percent of the quota loan value if the additional peanuts are sold and paid for during the harvest season upon delivery by the producer, or (2) 105 percent of the quota loan value if the additional peanuts are sold after delivery by the producer but on or before December 31 of the marketing year, or (3) 107 percent of the quota loan value if the additional peanuts are sold later than December 31 of the marketing year.

Sales of both quota and additional peanuts for domestic edible use will be made on the terms specified in items (2) and (3) of the preceding paragraph. Also, additional peanuts will be sold for domestic edible use on the terms specified in item (1) of the preceding paragraph. Under the discretionary authority provided by the Act, it has been determined that sales of quota peanuts for export will be made by CCC at not less than all costs incurred plus 100 percent of the quota loan value. Sales of additional peanuts from which edible grades are to be exported will be made by CCC at not less than $400 per ton. Sales of additional peanuts for export for crushing only will be made by CCC at not less than all costs incurred with respect to the peanuts sold, plus 100 percent of the additional loan value. Additional peanuts sold by CCC for export crushing will be required to be fragmented prior to export. Sales of quota and additional peanuts for domestic crushing only will be made by CCC at competitive prices with the use of oil being restricted to domestic markets if the price of the peanuts from which the oil is produced is less than the applicable loan rate, plus costs.

Under the 1977 and prior peanut programs, §§ 1446.1 through 1446.7 of this Subchapter B contained the general regulations governing peanut warehouse storage loans and §§ 1446.8 through 1446.13 contained the annual crop supplements to the general regulations. The general regulations are currently being revised and will require additional subsection numbers. Accordingly, part 1446 is renumbered, effective for the 1978 and subsequent crops, as follows: §§ 1446.1 through 1446.29 are designated for the general regulations and §§ 1446.30 through 1446.50 are designated for the annual crop supplements. Sections 1446.8 through 1446.13 are deleted effective as to the 1978 and subsequent crops. The material previously appearing in §§ 1446.8 through 1446.13 as subpart "1977 Crop Peanut Warehouse Storage Loan Supplement" remains in full force and effect as to the 1977 crop.

Effective, for the 1978 crop of peanuts, §§ 1446.30 through 1446.50 are added and the title of the subpart is amended to read as follows:

Subpart—1978-Crop Peanut Warehouse Storage Loans

Sec.

1446.30 Associations through which producers may obtain price support.
1446.31 Applicability.
1446.32 National average support value, quota peanuts.
1446.33 National average support value, additional peanuts.
1446.34 Sales for domestic edible use.
1446.35 Sales for export.
1446.36 Sales for domestic crushing.
1446.37 Definition of domestic edible use.
1446.38 through 1446.50 [Reserved]

Subpart—1978 Crop Peanuts Warehouse Storage Loan Supplement

§ 1446.30 Association through which producer may obtain price support.

Eligible producers may obtain price support by means of warehouse storage loans on eligible 1978 crop farmers stock peanuts through, in the Southeastern area, GFA Peanut Association, Camilla, Ga.; Southwestern area, Southwestern Peanut Growers' Association, Gorman, Tex.; and Virginia-Carolina area, Peanut Growers Cooperative Marketing Association, Franklin, Va.

§ 1446.31 Applicability.

The support prices specified in this subpart apply to 1978 crop farmers stock peanuts in bulk or in bags, net weight basis, eligible for price support advances under the General Regulations.

§ 1446.32 National average support value, quota peanuts.

The national average support value for 1978 crop quota peanuts is $420 per ton.

§ 1446.33 National average support value, additional peanuts.

The national average support value for 1978 crop additional peanuts is $250 per ton.

§ 1446.34 Sales for domestic edible use.

Sales of quota and additional peanuts for domestic edible use, including use as seed, will be made by CCC at not less than all costs incurred with respect to the peanuts sold plus: (a) 105 percent of the quota loan value if sold on or before December 31, 1978, or (b) 107 percent of the quota loan value if sold later than December 31, 1978, except that (c) sales of additional peanuts for domestic edible use, if sold and paid for during the harvest season and upon delivery buy the producer, will be made by CCC at not less than all costs incurred plus 100 percent of the quota loan value.

§ 1446.35 Sales for export.

Sales of quota peanuts for export will be made by CCC at not less than all costs incurred with respect to the peanuts sold plus 100 percent of the quota loan value. Sales of additional peanuts from which edible grades are to be exported will be made by CCC at not less than $400 per ton. Sales of additional peanuts for export crushing only will be made at not less than all costs incurred with respect to the peanuts sold plus 100 percent of the additional loan value, and such peanuts shall be fragmented prior to export in accordance with the General Regulations.

§ 1446.36 Sales for domestic crushing.

Sales of quota and additional peanuts for domestic crushing only will be made by CCC at competitive prices, and if such prices are less than all costs incurred plus the applicable loan rate for quota or additional peanuts, the use of the oil produced from such peanuts will be restricted to domestic markets.

§ 1446.37 Domestic edible use.

"Peanuts eligible for domestic edible use" means Segregation 1 peanuts, which are farmers stock peanuts having: (a) at least 99 percent peanuts of one type, (b) not more than 2 percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold or decay, and (c) are free from the A. flavus mold. Since peanuts must be eligible for domestic edible use to be quota peanuts, only Segregation 1 peanuts may be placed under loan at the quota loan rate.

NOTE.—The Commodity Credit Corporation has determined that this document contains a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A-107 and certifies that an economic impact statement has been prepared.

Signed at Washington, D.C., on May 9, 1978.

CAROL TUCKER FOREMAN,
Acting Secretary of Agriculture.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION [1]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Amendments To Include Synthetic Fuels Under the Entitlements Program

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby adopts amendments to the domestic crude oil "entitlements" program to permit refiners to earn entitlements for those volumes of a synthetic fuel obtained from oil shale that they utilize within their refineries as a feedstock, blending stock or fuel. In addition, the amendments set forth that the ERA may, on a case-by-case basis, grant entitlements treatment on the same basis as that adopted for shale oil to synthetic liquid fuels made from biomass, coal, solid waste materials or tar sands and used in refineries, as well as all such synthetic fuels, plus shale oil derivatives, which are used as boiler or engine fuels outside a refinery. The purpose of these amendments is to remove the inconsistency which currently exists regarding the treatment under the entitlements program of synthetic liquid fuels as compared to the treatment of imported crude oil.

DATES: Effective for refiners' crude oil runs to stills for July 1978. Further comments due on or before July 31, 1978.

ADDRESS: Send comments to: Department of Energy, Public Hearing Management, Room 2313, 2000 M Street, Box TJ, Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION:

I. General Discussion.
II. Background.
III. Discussion of Comments.
IV. Amendments Adopted:
A. Shale Oil.
B. Other Petroleum Substitutes.
C. Miscellaneous Provisions.
V. Oil Shale Plants.
VI. Additional Comments Requested.

I. General Discussion

We believe it is in the national interest to encourage further production of domestically-produced synthetic fuels, for these fuels offer a means of reducing the volume of crude oil presently imported by U.S. refiners. However, the means available to us to offer such encouragement are limited. One method clearly open to us, though, is to eliminate discriminations in current regulations in favor of foreign crude oil and against domestically-produced synthetic fuels. For this reason, we are adopting the amendments to the entitlements program which are set forth below. These amendments will permit synthetic fuels to receive the same treatment under the program that imported crude oil receives.

We recognize that these amendments, by themselves, will not result in the synthetic fuels covered by the rule being widely marketable. However, we believe the amendments will offer some encouragement to the production of substitutes for crude oil and refined products, since they should result in a producer of a synthetic fuel receiving approximately $2 per barrel (the current per barrel benefit received on imported oil from the entitlements program) more for the synthetic than he otherwise would.

II. Background

On July 26, 1977, the Federal Energy Administration (FEA), a predecessor agency of the DOE, issued a Notice of Proposed Rulemaking and Public Hearing which proposed amendments to the entitlements program to permit refiners to earn entitlements for those volumes of synthetic fuel processed from oil shale found within the United States that they utilize as a refinery feedstock (42 FR 38599, July 29, 1977). The notice also requested comments on whether synthetic fuels other than shale oil should be included within the scope of the rule.

Effective October 1, 1977, all functions previously performed by the FEA were transferred to the DOE under the Department of Energy Organization Act, Pub. L. 95-91 ("DOE Act") and Executive Order No. 12009 (42 FR 46267, September 15, 1977). Section 705(b)(1) of the DOE Act provides in part:

> The provisions of this Act shall not affect any proceedings • • • pending at the time this Act takes effect before any department, agency, commission, or component thereof, functions of which are transferred by this Act; but such proceedings • • • to the extent that they relate to functions so transferred, shall be continued. • • •

Pursuant to the above provision, this rulemaking proceeding, begun by the FEA prior to the activation of the DOE, was continued and transferred to the DOE.

In addition, by DOE Delegation Order No. 0204-4 (42 FR 60725, November 29, 1977), the Secretary of Energy delegated to the Administrator of the ERA the authority to take such action, including the adoption of rules, as is necessary and appropriate to administer several functions, among which are the allocation and pricing of crude oil and refined petroleum products, pursuant to the provisions of the Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159), as amended. Under the authority of this Delegation Order, we adopt the amendments to the entitlements program set forth below.

III. Discussion of Comments

The FEA received fourteen written comments on the amendments proposed in July 1977 from members of the petroleum industry, including several corporations actively engaged in programs for the development of a synthetic liquid fuel from domestic oil shale. (An opportunity for a hearing was also provided, but there were no requests to make oral presentations.) All comments supported amending the

[1] EDITORIAL NOTE: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Department of Energy.

V 4 3 | 9 7

entitlements program so as to grant entitlement benefits to refiners for the use of a synthetic liquid fuel obtained from domestic oil shale.

Some of the comments submitted in response to the July 1977 notice suggested that, in addition to the proposed rule, all volumes and prices of synthetic liquid fuel produced from oil shale should be exempted from computation of the composite price applicable to first sales of domestic crude oil under the Energy Policy and Conservation Act, Pub. L. 94-163, as amended ("EPCA"), in order that there be the least possible disincentive to the attainment of market-level prices by oil from oil shale. We are not adopting such an amendment because it is not necessary. For the reasons set forth in FEA Ruling 1976-4 (41 FR 25886, June 23, 1976), we believe Congress did not intend to treat a synthetic liquid fuel obtained from oil shale as domestic crude oil, and therefore it does not enter into the composite price calculations under the EPCA.

Several other comments raised points which we discuss below.

IV. Amendments Adopted

The amendments which were proposed in July 1977 only encompassed a synthetic fuel produced from oil shale, as that was the only crude oil substitute believed to be available in commercial quantities. The proposal also only applied to shale oil used as an input to a refinery distillation unit. The July 1977 notice requested comments, however, as to whether any other domestically-produced synthetic liquid fuels should be made eligible to receive entitlements benefits on a basis analogous to shale oil. Of those commenters addressing this question, all supported treating other synthetic liquid fules similarly to shale oil.

On the basis of information received in this rulemaking, we have reason to believe that in fact other synthetic fuels are currently being produced, or soon will be produced through processes currently being designed. We at present lack detailed information about such fuels and their production methods and whether all such fuels need the benefits of the entitlements program in order to be competitive with imported oil. We believe it is necessary, however, in order to provide appropriate incentives for the production of other forms of synthetic liquid fuels, that we adopt at this time a rule containing a mechanism by which such fuels can, if qualified, participate equally with imported oil and the more conventional synthetic, shale oil, in the entitlements program.

For these reasons, we are adopting a rule which has two aspects. One part of the rule will permit all shale oil which is used in a refinery to earn entitlements benefits automatically, without further review by ERA. The second part of the rule sets forth that synthetic liquid fuels other than shale oil (as well as shale oil in non-refining uses) may also earn entitlements benefits, following a brief review procedure whereby ERA determines eligibility on a case-by-case basis.

This case-by-case application procedure is being established on a trial basis, at least until more information and experience regarding synthetic fuel production and use is gained. We believe this application procedure will provide appropriate incentives for new technology while insuring that crude oil substitutes not needing entitlements benefits or not materially contributing to a reduction in imported oil do not participate in the program. As experience accumulates under the case-by-case aspect of the rule, we may place certain additional categories of synthetic liquid fuels under the first aspect of the rule.

The term adopted to describe all the synthetic fuels covered by these amendments is "petroleum substitute." For purposes of these amendments this term encompasses any domestically-produced synthetic liquid fuel which can be used as a substitute for petroleum in a refinery, as a fuel blendstock, or as a boiler fuel and which is eligible under the criteria set forth in this rule to earn the same benefits that imported crude oil used as a refinery feedstock now receives under the entitlements program.

A. SHALE OIL

Under the first aspect of the rule described above, the term "petroleum substitute" will include the liquid synthetic fuel derived from oil shale deposits located in the United States. All such shale oil will automatically be eligible for inclusion in the entitlements program if it is used in a refinery. Under the rule adopted, refiners will report domestically-produced shale oil as a separate item among their crude oil runs to stills.

There are two significant differences between the rule adopted today as it applies to shale oil and the rule as proposed in the July 1977 notice. The first is that the July 1977 notice proposed entitlements benefits for shale oil only if such oil were refined. We have decided to include also shale oil used in a refinery for blending purposes or as a refinery fuel, since in either case it has the same favorable impact on reducing import dependence as refining of the shale oil would have.

Second, the July 1977 proposal contained a technical definition of oil shale which is not adopted in today's amendments. We believe the term "oil shale" is self-explanatory and need not be further defined in the rule adopted. The proposed definition of oil shale did not encompass processes other than destructive distillation which may be utilized to extract a liquid from oil shale. Since other processes do exist or are being developed, liquid synthetic fuel obtained from domestic oil shale through any method will qualify for entitlements benefits; these methods will include, but not be limited to, destructive distillation, pyrolysis, and in situ pyrolysis.

B. OTHER PETROLEUM SUBSTITIUTES

The term "petroleum substitute" will additionally include certain liquid synthetic fuels other than those derived from oil shale and used in a refinery that are subsequently so designated by ERA. It will also include such liquid fuels, plus shale oil derivatives, that are used directly as boiler or engine fuels without undergoing refining, if so designated by ERA. This designation will be made pursuant to applications submitted to ERA's Office of Fuels Regulation, which applications will be reviewed on the basis of certain standards or criteria set forth in the regulation. The criteria are designed to maintain a consistent approach and policy in the implementation of this amendment. Each application for a synthetic fuel to be disignated as a petroleum substitute will be granted or denied through issuance of an order, after an expeditious review of the application.

In order to qualify for designation by the ERA as a petroleum substitute, the synthetic in question must be a liquid derived from domestic supplies of oil shale (if not otherwise automatically included in the entitlements program as described above), tar sands, coal, solid waste or biomass. Foreign sources of such liquids will not qualify.[2] In addition, the substitute must be used in the U.S. as a refinery feedstock, a blending feedstock or directly as a fuel in a refinery or elsewhere. The ERA has information that some fuels now being produced from oil shale and other potential petroleum substitutes are such that they are efficient fuel substitutes for petroleum products without having to undergo

[2] In this context, reference should be made to an amendment to the entitlements program which was adopted in August 1975 (40 FR 39847, August 29, 1975) that granted entitlements benefits to synthetic crude oil processed from Canadian tar sands. That amendment was adopted so that the effective cost of that crude oil would not be higher than imported crude oil. The primary reason for the amendment was to encourage continued imports and utilization of this crude oil in the face of severe curtailments in other Canadian crude oil imports and a potentially serious supply shortage in the Northern Tier States. The policy behind the Canadian synthetic crude oil entitlement amendments is thus distinguishable from that which supports restriction of the amendments adopted here to synthetic fuels from domestic source materials.

M Y 1 8 7 8 UMI

the refining process. Since direct consumption of such synthetics would reduce petroleum imports as much as the refining of synthetics, we have determined that they should also receive the benefits of the entitlements program if they otherwise qualify.

After determining whether a petroleum substitute meets these threshold requirements, the ERA will take into consideration whether production of the substitute results in a net gain of energy or a higher-valued fuel than those used in the production process. Those substitutes that can be produced with little expenditure of energy, particularly petroleum energy, relative to the energy produced will be considered more favorably than those that do not. Whether the consumption of energy in a particular case is too high to warrant inclusion of the liquid in the entitlements program will be dependent upon the circumstances of the case and cannot at this time be specified with precision in a general rule.

In approving an application, the ERA will structure its order so that only one party to a production, marketing, and consumption chain involving a petroleum substitute will receive entitlements benefits. This requirement prevents entitlements from being earned twice by, for example, both the producer and the refiner of a petroleum substitute. In those cases where a petroleum substitute is being used directly as a fuel, the ERA will determine on a case-by-case basis whether the party that participates in the entitlements program is the producer, the end-user, or some intervening reseller. Where one party in a distribution chain involving a petroleum substitute is a refiner or other firm that already is a participant in the entitlements program, for reasons of administrative simplicity it will in most cases be selected by the ERA as the one to participate in the entitlements program for purposes of the petroleum substitute transaction involved.

The regulation also addresses the amount of the entitlements benefits that will be given to a particular petroleum substitute. With the exception of petroleum substitutes derived from oil shale, which will receive entitlements benefits on the same per barrel basis as crude oil, entitlements will be granted on the basis of the gross heating value of the substitute as compared to the gross heating value of 40 degrees API crude oil. "Gross heating value" is a determination of heat content arrived at under the American Society for Testing and Materials test method D-240. The gross heating value for 40 degrees API crude oil (a very light, high quality crude oil) is 5.7 million Btu's per barrel. A barrel of petroleum substitute which contains 5.7 million Btu or more will receive the same entitlement benefit as a barrel of imported crude oil. A petroleum substitute containing less than 5.7 million Btu/bbl will receive a fractional entitlement benefit equal to its gross heating value divided by 5.7 million Btu/bbl.

We intend to administer the case-by-case application process described above in a way that will carry out the spirit of the regulation, which is to encourage the development and use of domestically-derived petroleum substitutes that have the potential of reducing our dependence on imported crude oil. Thus, the review process will be as expeditious as possible, and the definition of "petroleum substitute" will be read expansively. It is expected as a minimum that ERA will, assuming all other criteria are met, approve the inclusion in the entitlements program of such substitutes as ethanol used as a blending stock or shale oil derivations, such as kerogen, used directly as a powerplant boiler fuel.

Firms producing or contemplating production of a petroleum substitute are invited to file an application with the ERA requesting that it be granted entitlements program treatment. Applications should be submitted to the ERA Office of Fuels Regulation, 2000 M Street NW., Room 6128, Washington, D.C., 20461. We will consider applications even though construction of production facilities has not begun, since it is our belief that if investors know in advance that a particular petroleum substitute would receive imported oil entitlements treatment, they may be more likely to invest in the production process. Applications should address each of the elements set forth in the regulation and provide any other information which might be pertinent to the application. Orders granting applications will specify the terms under which the petroleum substitute in question will participate in the entitlements program, including the fraction of an entitlement to be received for each barrel of petroleum substitute and the firm that shall be eligible to participate in the entitlements program. An appeal of any decision on an application may be filed with the Office of Hearings and Appeals of the DOE.

C. MISCELLIANEOUS PROVISIONS

The amendment to § 211.67 is adopted in a form different from that which was proposed, for the following reasons. First, a subparagraph (5) is adopted for addition to paragraph (a) to set forth the method by which petroleum substitutes identified in the application procedure described above will earn entitlements. To act in conjunction with this provision, the definition of "national domestic crude oil supply ratio" in § 211.62 is also amended.

Second, the subparagraph (8) proposed for addition to paragraph (d) has been amended from that which was proposed. This subparagraph sets forth the method by which refiners will earn entitlements for the petroleum substitute obtained from oil shale which is used as a feedstock or as a fuel in a domestic refinery. The reference term "petroleum substitute" is substituted in this subparagraph for that which was proposed and reference to the Bureau of Mines Form 6-1300-M is omitted, since that form is no longer used. Also, the subparagraph is altered to reflect that the amendment adopted is applicable to nonrefining as well as refinery uses of shale oil.

The amendments will impose no entitlement obligation on a refiner or other firm under § 211.67(b) with respect to the inclusion of a petroleum substitute in its crude oil receipts. Thus, the treatment of petroleum substitutes under the entitlements program will be analagous to the treatment of imported crude oil under the program.

The amendments as they apply to shale oil are effective from crude oil runs to stills in July 1978 for which entitlements transactions will take place in September 1978.

V. Oil Shale Plants

Two of the written comments submitted in response to the July 1977 notice urged that the proposed amendments be revised to be applicable to oil shale facilities which are designed to both produce shale oil and upgrade that shale oil into refined petroleum products. One such facility has been designed and partially constructed. However, construction on the facility has been suspended, and apparently the facility has not yet proved to be commercially viable.

It is our intention under the rule adopted today that this type of facility would not automatically qualify its shale oil production as being subject to the entitlements program, without any prior review by the ERA. However, such a plant would appear to meet all of the criteria under the second aspect of the definition of petroleum substitute. Therefore, if a decision is made to proceed with construction of the plant described above or other similar plants we would encourage the parties involved to apply to us through the procedures described above to request entitlement benefits with respect to the products produced in the facility.

VI. Additional Comments Requested

Although within the scope of the July 1977 Notice of Proposed Rulemaking, we recognize that the amendments adopted today represent a significantly different solution to a regulatory inconsistency than other currently existing ERA regulations and

V 4 3 | 9 7

that they may require further fine-tuning to carry out their intended purpose as efficiently as possible. Thus, even though the amendments adopted today are effective beginning July 1, 1978, we are soliciting further comments on these amendments through July 31, 1978. Comments should address in particular the following points:

(1) Whether there will be significant administrative problems in implementing these amendments;

(2) Whether the application process adopted herein will be an adequate and satisfactory means of including new synthetic fuels within the entitlements program;

(3) Whether the criteria on which applications will be reviewed are appropriate, or whether different or additional criteria would be more appropriate;

(4) Whether the incentives granted by these amendments for the production of synthetic fuels are significant enough to result in increased production of such fuels; and

(5) Whether the ERA should adopt any other amendments to its regulatory programs which would provide additional encouragement to synthetic fuel production.

Written comments will be accepted and considered if received by July 31, 1978. Comments should be submitted to the address indicated in the "Addresses" section of this preamble and should be identified on the outside envelope with the designation "Synthetic Fuels." Fifteen copies should be submitted. All comments received will be available for public inspection in the DOE Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Any information considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of the information and to treat it according to our determination.

The proposal of July 26, 1977, was submitted to the Federal Energy Regulatory Commission on November 14, 1977, for review in accord with the provisions of Section 404(a) of the DOE Act. The Commission informed the ERA in a letter of December 20, 1977, that it had determined the proposed rule would not significantly affect any function within its jurisdiction pursuant to Section 402 (a)(1), (b), and (c)(1) of the Act.

Pursuant to interim guidelines adopted by the ERA for implementation of Executive Order 12044, "Improving Government Regulations" (43 FR 12661, March 24, 1978), it has been determined that a regulatory analysis need not be performed on the amendment hereby adopted.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-322, Pub. L. 94-385, Pub. L. 95-70, and Pub. L. 95-91; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385, and Pub. L. 95-70; Department of Energy Organization Act, Pub. L. 95-91; E.O. 11790, 39 FR 23785; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective July 1, 1978.

Issued in Washington, D.C., May 12, 1978.

DAVID J. BARDIN,
Administrator, Economic Regulatory Administration.

1. Section 211.62 is amended to revise the definition of "national domestic crude oil supply ratio" and to add a new definition of "petroleum substitute" in appropriate alphabetical order to read as follows:

§ 211.62 Definitions.

• • • • •

"National domestic crude oil supply ratio" means, for a particular month, the volume of deemed old oil (as defined in § 211.67(b)) included in the aggregate adjusted crude oil receipts of all refiners, decreased by a number of barrels of old oil equal to the number of entitlements issuable to small refiners under § 211.67(e) and the number of entitlements issuable under § 211.67(a)(5), divided by the sum of the total volume of the crude oil runs to stills for all refiners for that month and thirty (30 percent) percent of the total volume of imports of eligible products by eligible firms for that month. The calculation of the national domestic crude oil supply ratio for each month shall take into account entitlement purchase or sale requirements resulting from the correction of reporting errors pursuant to paragraph (j) of § 211.67.

• • • • •

"Petroleum substitute" means (a) a liquid produced from oil shale found in the United States and used as a feedstock or fuel in a domestic refinery, and (b) such other liquid synthetic fuels as are designated pursuant to orders issued by the ERA. Applications for such orders may be submitted to ERA under Subpart G of Part 205 of this Chapter. In order to be designated a petroleum substitute, a liquid synthetic fuel must be found by the ERA to be derived from domestic biomass, coal, oil shale, solid waste materials or tar sands, and used in the United States as a feedstock to a refinery, a blending feedstock or as a boiler fuel in a refinery or elsewhere. The ERA may, in its discretion, deny such designation if it determines that the liquid synthetic fuel in question does not result in a net gain of energy, considering the fuel consumption involved in its production, or requires the consumption of substantial quantities of a relatively scarce fuel for its production.

• • • • •

2. Section 211.67 is amended in paragraph (a) to add a new subparagraph (5) to read as follows:

§ 211.67 Allocation of domestic crude oil.

(a) *Issuance of entitlements.* • • •

(5) For each month, commencing with the month of July 1978, each firm that has been designated by the ERA as eligible to participate in the entitlements program by reason of its producing, selling or using a petroleum substitute, shall be issued a number of entitlements determined as follows:

(i) In the case of a petroleum substitute derived from oil shale, that number of entitlements that would be received by a refiner if each barrel of the petroleum substitute were a barrel of crude oil;

(ii) In the case of a petroleum substitute other than one derived from shale oil having a gross heating value of 5.7 million Btu's per barrel or more, that number of entitlements that would be received by a refiner if each barrel of the petroleum substitute were a barrel of crude oil; and

(iii) In the case of a petroleum substitute other than one derived from shale oil having a gross heating value of less than 5.7 million Btu's per barrel, that number of entitlements that would be received by a refiner if each barrel of the petroleum substitute were equal to a fraction of a barrel of crude oil, the numerator of which would be the gross heating value per barrel, in Btu's, of the petroleum substitute, and the denominator of which would be 5.7 million Btu's. Where a petroleum substitute is being used for purposes other than in a refinery, ERA will designate the firm to which entitlements will be issued and the manner in which the use of the petroleum substitute by that firm shall result in entitlement issuances.

• • • • •

3. Section 211.67 is amended in paragraph (d) to add a new subparagraph (8) to read as follows:

§ 211.67 Allocation of domestic crude oil.

• • • • •

(d) *Adjustments to volume of crude oil runs to stills.* • • •

(8) Commencing with the month of July 1978, the volume of a refiner's crude oil runs to stills in a particular month for purposes of the calculations in subparagraph (1) of paragraph (a) of this section and the calculations for the national domestic crude oil supply ratio shall include the total number of barrels of the liquid produced from oil shale that is found in the United States and used as a refining feedstock, blending feedstock or fuel in a domestic refinery in that month by a refiner.

• • • • •

[6749-02]

CHAPTER X—DEPARTMENT OF ENERGY (GENERAL PROVISIONS)

PART 1000—TRANSFER OF PROCEEDINGS TO THE SECRETARY OF ENERGY AND THE FEDERAL ENERGY REGULATORY COMMISSION

Amendment to Transfer Application Amendment

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) final rule of October 1, 1977, is amended to clarify the jurisdictional status of the November 11, 1977 Amendment to Application of Western LNG Terminal Associates, in "Pacific Indonesia LNG Co., et al.," FPC Docket No. CP74-160, et al., ERA Docket No. 77-001-LNG. The Amendment to Application will be transferred to the jurisdiction of the Federal Energy Regulatory Commission until the timely filing of all briefs, at which time the Commission shall forward a copy of the record of that proceeding to the Secretary of Energy for decision on those matters within his jurisdiction.

EFFECTIVE DATE: February 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Barry M. Smoler, Department of Energy, Office of General Counsel, Washington, D.C. 20461, 202-566-9380.

Brian J. Heisler, Office of General Counsel, Federal Energy Regulatory Commission, Washington, D.C. 20426, 202-275-4341.

SUPPLEMENTARY INFORMATION: The Department of Energy was established by the Department of Energy Organization Act (Pub. L. 95-91) (the DOE Act), which was made effective October 1, 1977 (42 FR 46267, September 15, 1977). In a final rule issued by DOE on October 1, 1977 (42 FR 55534, October 17, 1977), a regulation was promulgated in Title 10, Code of Federal Regulations, pursuant to Section 705(b)(2) of the Act, which provides:

(2) The Secretary and the Commission are authorized to promulgate regulations providing for the orderly transfer of (pending) proceedings to the Department or the Commission.

Subsection (b)(16) of this regulation (10 CFR 1000.1(b)(16)) transferred to the jurisdiction of the Secretary of Energy certain proceedings which were pending with the Federal Power Commission (FPC). Subsection (c)(2) of the regulation provided that certain proceedings would remain with the Federal Energy Regulatory Commission through the issuance of an Administrative Law Judge's initial decision and the filing of briefs thereon, with transfer thereafter to the Secretary of Energy for decision.

The Amendment to Application of Western LNG Terminal Associates was filed on November 11, 1977, in the Economic Regulatory Administration's Docket No. 77-001-LNG, as an amendment to applications originally filed with the Federal Power Commission in their Dockets No. CP75-83 and No. CP75-83-3. Those dockets had been consolidated into Pacific Indonesia LNG Co., et al., Docket No. CP74-160, et al. Pursuant to the final rule of October 1, 1977, the record in that consolidated proceeding had been transferred to the Secretary of Energy subsequent to the filing of all briefs on and opposing exceptions to the Initial Decision of Presiding Administrative Law Judge Samuel Gordon; this occurred prior to the filing of the Amendment to Application on November 11, 1977.

The Amendment to Application is integrally related to the various matters pending and decided in Docket No. CP74-160, et al. Accordingly, decisions with respect to the Amendment to Application should be based on a record compiled in the same manner as the record compiled by the Federal Power Commission with respect to the applications originally filed in that consolidated docket.

The Amendment to Application pertains to the siting of an LNG terminal facility at Point Conception, Calif., for the receipt and processing of LNG from Indonesia. The Commission currently has pending an application pertaining to the siting of additional LNG terminal facilities at Point Conception for the receipt and processing of LNG from Alaska. Thus, the amendment herein to the final rule of October 1, 1977, will also be conducive to efficient evaluation of all related terminal facilities at Point Conception. The Environmental Impact Statement that the Commission is presently preparing on LNG facilities at Point Conception will be prepared for all purposes within the Department of Energy.

Accordingly, pursuant to section 705(b)(2) of the DOE Act, the final rule of October 1, 1977, is hereby amended so as to provide that the Amendment to Application of Western LNG Terminal Associates will be transferred to the jurisdiction of the Federal Energy Regulatory Commission until the timely filing of all briefs on and opposing exceptions to the Initial Decision of the presiding Administrative Law Judge on that Amendment, at which time the Commission shall forward a copy of the record of that proceeding to the Secretary of Energy for decision on those matters within his jurisdiction. (If the Commission waives the preparation of an initial decision, the Commission will forward a copy of the record after completion of the hearing, or after the timely filing of any briefs submitted to the Commission, whichever occurs later.)

To the extent that section 501 of the Act is applicable to these regulations, it has been determined that no substantial issue of fact or law exists and that these regulations are unlikely to have a substantial impact on the nation's economy or large numbers of individuals or businesses. Therefore, this amendment to the regulations is being promulgated in accordance with section 553 of Title 5, United States Code. The amendment relates to Department of Energy management and personnel and is therefore being made final without notice and comment (5 U.S.C. 553(a)(2)).

(Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 1000, Chapter II, Title 10, Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C., on May 10, 1978.

By order of the Commission.

JAMES R. SCHLESINGER,
Secretary of Energy.

KENNETH F. PLUMB,
Secretary, Federal Energy Regulatory Commission.

Section 1000.1 is amended by revising paragraph (c)(2)(vi) and by adding a new paragraph (c)(3):

§ 1000.1 Transfer of Proceedings.

• • • • •

(c) *Proceedings transferred to the Commission.* • • •

(2) *To remain with the Commission until forwarding to the Secretary;*

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. A Docket No. R-0135]

INTERPRETATION OF REGULATION A

Eligible Bankers' Acceptances

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final interpretation.

SUMMARY: This Interpretation provides that a bankers' acceptance secured by a field warehouse receipt covering readily marketable staples is eligible for discount by a Federal Reserve Bank even though the warehouse manager is an employee of the owner of the goods. This supersedes an Interpretation adopted by the Board in 1933. (¶1445 Published Interpretations). This review of the Interpretation was desirable in light of the changes in commercial practice and law since the publication of the old Interpretation.

DATE: Effective immediately.

ADDRESS: Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

FOR FURTHER INFORMATION CONTACT:

Allen L. Raiken, Associate General Counsel, Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3625.

SUPPLEMENTARY INFORMATION: (1) The Board was recently asked to review its 1933 Interpretation concerning the eligibility for discount of bankers' acceptances secured by field warehouse receipts. Under that Interpretation, such acceptances were determined to be not eligible for discount because the actual custodian of the goods was so closely identified with the owner of the goods that, in the Board's view, the lending bank's security might be impaired. The Board concluded that a review of the Interpretation was desirable in light of the changes in commercial practice and commercial law in the 45 years since the publication of the old Interpretation. Furthermore, this matter is of significance to member banks because, under the Board's Regulation D, the sale of such acceptances by member banks could result in additional reserve liability for the member bank if the acceptance sold were not eligible for discount.

(2) A proposed Interpretation was issued for public comment in December, 1977 (42 FR 63897-8). Comments were received from all 12 Federal Reserve Banks, 7 commercial banks, 2 law firms, a bankers association, and a field warehousing company. All of the comments except two were favorable to adoption of the proposed Interpretation.

As a result of the comments received, certain technical changes have been made to the proposed Interpretation. The Interpretation stated that if a bankers' acceptance were offered for discount or as collateral for an advance, a Reserve Bank could require proof of adequate insurance and proof of the existence of a written security agreement and a filed financing statement. This language has been deleted from the final Interpretation for two reasons: (1) A Reserve Bank has broad discretion in accepting collateral that may be presented at its discount window and the deleted provisions could have been misinterpreted as somehow limiting the types of inquiry that a Reserve Bank could make regarding acceptances; and (2) the deleted language, which pertained only to the acceptability of the acceptance as collateral, might have been misinterpreted as also having an impact on the eligibility of the acceptance for discount. In other words, a bankers' acceptance that meets the requirements of the Interpretation is eligible for discount even though it may be subject to further scrutiny before a Reserve Bank would find it acceptable as collateral for an advance.

The proposed Interpretation indicated that a warehouse receipt issued pursuant to a properly conducted field warehousing operation provides the lending bank with a perfected security interest in the goods and that a perfected security interest satisfies the "securing title" requirement of the Federal Reserve Act, Section 13, ¶7. These statements may have led some readers to the erroneous conclusion that if the lender has a perfected security interest (regardless of how the interest was created and perfected), the acceptance is properly secured. The Act, however, clearly requires that an acceptance be secured "by a warehouse receipt or other such document," and contemplates that at the time of acceptance the goods will be held in the custody of a third party. Consequently, the Board has determined that receipts issued by an independent custodian of the goods may be treated as warehouse receipts (¶1470 Published Interpretations), but has reached the opposite conclusion in regard to documents such as a chattel mortgages that leave the borrower in possession of the goods (¶1475 Published Interpretations). Therefore, while it may be desirable for a lending bank to seek the added protection of a security interest created by a written security agreement and perfected by the filing of a financing statement, this perfected security interest alone, without a field warehouse receipt, does not satisfy the requirements of the Act.

Finally it should be noted that not all field warehousing operations will necessarily satisfy the requirements of the Interpretation and it is incumbent upon each lender to insure that the policies and procedures adopted and followed by a field warehousing company provide the lender with satisfactory security.

(3) This action is taken pursuant to the Board's authority under section 13 of the Federal Reserve Act (12 U.S.C. 342 et seq.).

INTERPRETATION OF REGULATION A

¶1445—*Goods held by persons employed by owner* (12 CFR 201.110)

(a) The Board has been asked to review an Interpretation it issued in 1933 concerning the eligibility for rediscount by a Federal Reserve Bank of bankers' acceptances issued against field warehouse receipts where the custodian of the goods is a present or former employee of the borrower. [¶ 1445 Published Interpretations, 1933 BULLETIN 188] The Board determined at that time that the acceptances were not eligible because:

such receipts do not comply with the requirement of section 13 of the Federal Reserve Act that a banker's acceptance be "secured at the time of acceptance by a warehouse receipt or other such document *conveying or securing title* covering readily marketable staples," nor with the requirement of section XI of the Board's Regulation A that it be "secured at the time of acceptance by a warehouse, terminal, or other similar receipt, conveying security title to such staples, *issued by a party independent of the customer.*"

The requirement that the receipt be "issued by a party independent of the customer" was deleted from Regulation A in 1973, and thus the primary issue for the Board's consideration is whether a field warehouse receipt is a document "securing title" to readily marketable staples.

(b) While bankers' acceptances secured by field warehouse receipts are rarely offered for rediscount or as collateral for an advance, the issue of "eligibility" is still significant. If an ineligible acceptance is discounted and then sold by a member bank, the proceeds are deemed to be "deposits" under section 204.1(f) of Regulation D and are subject to reserve requirements.

(c) In reviewing this matter, the Board has taken into consideration the changes that have occurred in commercial law and practice since 1933. Modern commercial law, embodied in the Uniform Commercial Code, refers to "perfecting security interests" rather than "securing title" to goods. The Board believes that if, under State law, the issuance of a field warehouse receipt provides the lender with a perfected security interest in the goods, the receipt should be regarded as a document "securing title" to goods for the purposes of § 13 of the Federal Reserve Act. It should be noted, however, that the mere existence of a perfected security interest alone is not sufficient; the Act requires that the acceptance be secured by a warehouse receipt or its equivalent.

(d) Under the U.C.C., evidence of an agreement between the secured party and the debtor must exist before a security interest can attach. [U.C.C. § 9-202.] This agreement may be evidenced by: (1) a written security agreement signed by the debtor, or (2) the collateral being placed in the possession of the secured party or his agent [U.C.C. § 9-203]. Generally, a security interest is perfected by the filing of a financing statement. [U.C.C. § 9-302.] However, if the collateral is in the possession of a bailee, then perfection can be achieved by: (1) Having warehouse receipts issued in the name of the secured party; (2) notifying the bailee of the secured party's interest; or (3) having a financing statement filed. [U.C.C. § 9-304(3).]

(e) If the field warehousing operation is properly conducted, a security interest in the goods is perfected when a warehouse receipt is issued in the name of the secured party (the lending bank). Therefore, warehouse receipts issued pursuant to a bona fide field warehousing operation satisfy the legal requirements of section 13 of the Federal Reserve Act. Moreover, in a properly conducted field warehousing operation, the warehouse manager will be trained, bonded, supervised and audited by the field warehousing company. This procedure tends to insure that he will not be impermissibly controlled by his former (or sometimes present) employer, the borrower, even though he may look to the borrower for reemployment at some future time. A prudent lender will, of course, carefully review the field warehousing operation to ensure that stated procedures are satisfactory and that they are actually being followed. The lender may also wish to review the field warehousing company's fidelity bonds and legal liability insurance policies to ensure that they provide satisfactory protection to the lender.

(f) If the warehousing operation is not conducted properly, however, and the manager remains under the control of the borrower, the security interest may be lost. Consequently, the lender may wish to require a written security agreement and the filing of a financing statement to insure that the lender will have a perfected security interest even if it is later determined that the field warehousing opeation was not properly conducted. It should be noted, however, that the Federal Reserve Act clearly requires that the bankers' acceptance be secured by a warehouse receipt in order to satisfy the requirements of eligibility, and a written security agreement and a filed financing statement, while desirable, cannot serve as a substitute for a warehouse receipt.

(g) This Interpretation is based on facts that have been presented in regard to field warehousing operations conducted by established, professional field warehouse companies, and it does not necessarily apply to all field warehousing operations. Thus ¶ 1430 and ¶ 1440 of the Published Interpretations [1918 BULLETIN 31 and 1918 BULLETIN 862] maintain their validity with regard to corporations formed for the purpose of conducting limited field warehousing operations. Furthermore, the prohibition contained in ¶ 1435 Published Interpretations [1918 BULLETIN 634] that "the borrower shall not have access to the premises and shall exercise no control over the goods stored" retains its validity, except that access for inspection purposes is still permitted under ¶ 1450 [1928 BULLETIN 666]. The purpose for the acceptance transaction must be proper and cannot be for speculation [¶ 1400, 1919 BULLETIN 858] or for the purpose of furnishing working capital [¶ 1405, 1922 BULLETIN 52].

(h) This interpretation supersedes only the previous ¶ 1445 of the Published Interpretations [1933 BULLETIN 188], and is not intended to affect any other Board Interpretation regarding field warehousing.

By order of the Board of Governors, May 10, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[Regulation Q; Docket No. R-0161]

PART 217—INTEREST ON DEPOSITS

Maximum Rates of Interest Payable

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board has amended its regulations to authorize member banks to offer to depositors two new categories of time deposits. The first new category permits member banks to pay interest at a maximum ceiling rate up to 7¾ percent on time deposits of $1,000 or more with maturities of eight years or more. The second new category established by the Board authorizes member banks to pay interest on nonnegotiable time deposits of $10,000 or more with maturities of six months (26 weeks) at a maximum rate equal to the discount yield on the most recently issued six-month United States Treasury bills (auction average). The Board's actions increase returns for savers by providing deposit categories that are competitive with interest rates available in the market on instruments possessing similar characteristics.

EFFECTIVE DATE: June 1, 1978.

FOR FURTHER INFORMATION, CONTACT:

Allen L. Raiken, Associate General Counsel, 202-452-3625 or Gilbert T. Schwartz, Senior Attorney, 202-452-3623 Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Effective June 1, 1978, the Board has amended Regulation Q to establish two new categories of time deposits. Under the provisions of the first new deposit category, member banks will be permitted to pay interest to depositors at a maximum rate of 7¾ percent on deposits of $1,000 or more maturing in eight or more years. This new deposit category should enable savers to obtain higher rates on their funds.

The second new deposit category established by the Board authorizes member banks to pay interest on nonnegotiable time deposits of $10,000 or more with maturities of six months (26 weeks) at a maximum rate equal to the discount yield on the most recently issued six-month United States Treasury bills (auction average). United States Treasury bills maturing in six months (26 weeks) are auctioned weekly by the Treasury Department, normally on Monday, and are issued three business days later, normally on Thursday. Beginning on the date the six-month United States Treasury bills are issued (normally on Thursday), member banks may pay interest on deposits of $10,000 or more maturing in six months at a rate not more than the auction average rate (discount basis) established for such bills and may continue to pay that rate for new deposits until new six-month United States Treasury bills are issued, at which time the rate paid on such bills becomes the ceiling rate for new deposits. The six-month United States Treasury bill rate is published widely in many newspapers throughout the country.

The deposits must be issued in nonnegotiable form and must possess a maturity of six months (26 weeks). Maturities of more than six months are not permitted. During the six months the deposit remains outstanding, the rate paid by member banks may not exceed the ceiling rate in effect on the date of deposit. If such deposits are renewed, automatically or otherwise, the maximum rate that may be paid may not exceed the six-month Treasury bill rate (discount

MY 18 78 UMI

V 43 | 97

M Y 18 78

UMI

basis) in effect at the time of renewal of the deposits.

Member banks will be permitted to pay up to the average auction rate paid (discount basis). Should a member bank desire to round off the ceiling rate, such rate may only be rounded down. For example, if the auction average rate for six month Treasury bills is 6.4638 percent on a discount basis, a member bank may round the rate to 6.463 percent, 6.46 percent or 6.4 percent. The rate may not be rounded up. However, in accordance with § 217.3 of Regulation Q, in ascertaining the rate of interest that may be paid, the effects of compounding of interest may be disregarded and interest may be computed in accordance with any of the methods authorized by § 217.3(e) of Regulation Q.

In accordance with § 217.4(d) of Regulation Q (12 CFR 217.4(d)), if the deposit, or any portion, is paid before maturity, the member bank may pay interest on the amount withdrawn at a rate not to exceed that prescribed for savings deposits (currently 5 percent) and, in addition, a forfeiture of three months interest at such rate is required. If the amount withdrawn has been on deposit for three months or less, all interest shall be forfeited. All member banks, however, are permitted to lend on the collateral of their time deposits so long as the rate charged for the loan is at least one percent higher than the rate being paid on the deposit pledged.

Existing provisions of Regulation Q provide that member banks may pay interest on governmental unit time deposits under $100,000 with maturities of 30 days or more (12 CFR 217.7(d)) and Individual Retirement Account and Keogh (H.R. 10) Plan deposits of less than $100,000 with maturities of three years or more (12 CFR 217.7(e)) at a rate not in excess of the highest of any of the permissible rates that can be paid on time deposits under $100,000 by any Federally insured commercial bank, mutual savings bank, or savings and loan association. Since the Federal Home Loan Bank Board and the Federal Deposit Insurance Corporation are taking action to establish a new category of time deposit for Federally insured savings and loan associations and mutual savings banks at a ceiling rate of 8 percent, member banks may pay 8 percent on governmental unit time deposits and IRA/Keogh time deposits with three year maturities. The higher 8 percent rate may be paid only on new time deposits or additional funds deposited to existing accounts. Rates paid by member banks on funds currently on deposit in governmental unit and IRA/Keogh time deposits may not be increased prior to the maturity of such funds. The maximum rates that may be paid on governmental unit and IRA/Keogh time deposits will not be determined by the ceiling rates established for the new six-month $10,000 deposit category whose ceiling rate is associated with the six month Treasury bill rate.

The Board's actions were taken at this time, after consultation with the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board and the United States Department of the Treasury, in order to increase returns for savers by providing deposit categories that are competitive with interest rates available in the market on instruments possessing similar characteristics. Creation of the new deposit categories at this time should increase the flow of mortgage credit and assist the housing market. In order to facilitate the achievement of these objectives as rapidly as possible, the Board finds that application of the notice and public participation provisions of 5 U.S.C. § 553 to these actions would be contrary to the public interest and that good cause exists for making the amendments effective in less than 30 days.

Pursuant to its authority under § 19(j) of the Federal Reserve Act (12 U.S.C. § 371b), effective June 1, 1978, the Board amends § 217.7 of Regulation Q (12 CFR 217.7) as follows:

§ 217.7 Maximum rates of interest payable by member banks on time and savings deposits.

* * * * *

(b) *Time deposits of less than $100,000.*

* * * * *

(4) Member banks may pay interest on any time deposit of $1,000 or more, with a maturity of eight years or more, at a rate not to exceed 7¾ percent.[2]

* * * * *

(d) *Governmental unit time deposits of less than $100,000.* Except as provided in paragraphs (a) and (f), no member bank shall pay interest on any time deposit which consists of funds deposited to the credit of, or in which the entire beneficial interest is held by, the United States, any State of the United States, or any county, municipality, or political subdivision thereof, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, or political subdivision thereof, at a rate in excess of the highest of any of the permissible rates that can be paid on time deposits under $100,000 with maturities in excess of six months (26 weeks) by any Federally insured commercial bank, mutual savings bank, or savings and loan association.[3]

(e) *Individual Retirement Account and Keogh (H.R. 10) Plan deposits of less than $100,000.* Except as provided in paragraph (a), a member bank may pay interest on any time deposit with a maturity of three years or more that consists of funds deposited to the credit of, or in which the entire beneficial interest is held by, an individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. (I.R.C. 1954) §§ 408, 401, at a rate not in excess of the highest of any of the permissible rates that can be paid on time deposits under $100,000 with maturities in excess of six months (26 weeks) by any Federally insured commercial bank, mutual savings bank, or savings and loan association.[3]

(f) *Variable rate time deposits of less than $100,000.* Member banks may pay interest on any nonnegotiable time deposit of $10,000 or more, with a maturity of six months (26 weeks), at a rate not to exceed the rate established (auction average on a discount basis) for United States Treasury bills with maturities of six months issued on or immediately prior to the date of deposit. Rounding such rate to the next higher rate is not permitted.

By order of the Board of Governors, May 11, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 78-13555 Filed 5-17-78; 8:45 am]

[2] * * *

[3] The highest permissible rate is currently 8.00 percent per annum (12 CFR 329.7 and 12 CFR 526.5).

[6714-01]

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

SUBCHAPTER B—REGULATIONS AND STATEMENTS OF GENERAL POLICY

PART 329—INTEREST ON DEPOSITS

Maximum Rates of Interest Payable on Time Deposits

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation (FDIC) has amended its regulations to authorize insured nonmember banks (including mutual savings banks) to offer to depositors two new categories of time deposits. The first new category permits nonmember banks to pay interest at a maximum rate of 7¾ percent (8 percent for mutual savings banks) on time deposits of $1,000 or more with maturities of eight years or more. The second new category authorizes nonmember banks to pay interest on nonnegotiable time deposits of $10,000 or more with maturities of six months at a maximum rate equal to the discount yield on the most recently issued six-month United States Treasury bills (auction average). (Mutual savings banks will be allowed to pay ¼ of 1 percent more than the discount yield.) This action is designed to increase returns for savers by authorizing deposit rate ceilings that are competitive with interest rates available in the market on instruments possessing similar characteristics.

EFFECTIVE DATE: June 1, 1978.

FOR FURTHER INFORMATION CONTACT:

F. Douglas Birdzell, Senior Attorney, Bank Regulation Section, Legal Division, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, D.C. 20429, 202-389-4324.

SUPPLEMENTARY INFORMATION: Effective June 1, the FDIC has amended Part 329 of its regulations to establish two new categories of time deposits. This action is concurrent with corresponding action taken by the Board of Governors of the Federal Reserve System for Federal Reserve member banks and the Federal Home Loan Bank Board with respect to Federally insured savings and loan associations. Under the provisions of the first new deposit category, nonmember banks will be permitted to pay interest to depositors at a maximum rate of 7¾ percent (8 percent in the case of mutual savings banks) on deposits of $1,000 or more maturing in eight years or more. This new deposit category should enable savers to obtain higher rates on their funds than those presently authorized (7½ percent and 7¾ percent for commercial banks and mutual savings banks, respectively, on time deposits of six years or more).

The second new deposit category established by the FDIC authorizes nonmember banks to pay interest on nonnegotiable time deposits of $10,000 or more with maturities of six months (26 weeks) at a maximum rate equal to the discount yield on the most recently issued six-month United States Treasury bills (auction average). (Mutual savings banks may pay ¼ of 1 percent more than the discount yield.) United States Treasury bills maturing in six months (26 weeks) are auctioned weekly by the Treasury Department, normally on Monday, and are issued three business days later, normally on Thursday. Beginning on the date the six-month United States Treasury bills are issued (normally on Thursday), nonmember banks may pay interest on deposits of $10,000 or more maturing in six months at a rate not to exceed the auction average rate (discount basis) established for such bills and may continue to pay that rate for new deposits until new six-month United States Treasury bills are issued, at which time the rate paid on such bills becomes the ceiling rate for this category of deposits. The six-month United States Treasury bill rate is published widely in many newspapers throughout the country.

Once established, the maximum rate nonmember banks have contracted to pay to depositors may not be increased during the six months the deposits remain outstanding. If such deposits are renewed, automatically or otherwise, the maximum rate that may be paid may not exceed the six-month Treasury bill rate (discount basis) in effect at the time of renewal. The deposits must be issued in nonnegotiable form and must mature in six months (26 weeks). Maturities of more than six months are not permitted. In accordance with § 329.4(d) of FDIC's regulations (12 CFR 329.4(d)), if the deposit, or any portion, is withdrawn before maturity, the nonmember bank may pay interest on the amount withdrawn at a rate not to exceed that prescribed for savings deposits and, in addition, require that the depositor forfeit three months interest at the savings deposit rate. If the amount withdrawn has been on deposit for three months or less, all interest must be forfeited.

Nonmember banks will be permitted to pay up to the average auction rate paid (discount basis). Should a nonmember bank desire to round off the ceiling rate, such rate may only be rounded down. For example, if the auction average rate for six-month Treasury bills is 7.4638 percent on a discount basis, a nonmember bank may round the rate to 7.463 percent, to 7.46 percent, or 7.4 percent. The rate may not be rounded up. However, in accordance with §§ 329.3(e) and 329.7(c) of FDIC's regulations (12 CFR 329.3(e) and 329.7(c)), in ascertaining the rate of interest that may be paid, the effects of compounding of interest may be disregarded and interest may be computed in accordance with any of the methods authorized by § 329.3(e).

FDIC's actions were taken at this time, after consultation with the Board of Governors of the Federal Reserve System and the Federal Home Loan Bank Board, in order to increase returns for savers by authorizing deposit rate ceilings that are competitive with interest rates available in the market on instruments possessing similar characteristics. Creation of the new deposit categories at this time should increase the flow of mortgage credit and assist the housing market. In order to facilitate the achievement of these objectives as rapidly as possible, particularly in view of the rapid rise in money market rates relative to deposit rate ceilings, which could result in substantial disintermediation by placing financial institutions at a competitive disadvantage, FDIC's Board of Directors finds that application of the notice and public participation provisions of 5. U.S.C. § 553 to these actions would be contrary to the public interest and that good cause exists for making the amendments effective on June 1.

Pursuant to its authority under §§ 9 and 18 of the Federal Deposit Insurance Act (12 U.S.C. §§ 1819 and 1828), effective on June 1 §§ 329.6 and 329.7 of FDIC's regulations are amended by adding a new last line to subsections 329.6(b)(2) and 329.7(b)(4), by amending subsections 329.6(b) (3) and (4) and 329.7(b) (5) and (6), and by adding new subsections 329.6(b)(5) and 329.7(b)(7), as follows:

§ 329.6 Maximum rates of interest payable by insured nonmember banks other than insured nonmember mutual savings banks.[13]

* * * * *

(b) Deposits of less than $100,000. (1) * * *

* * * * *

(2) *Deposits of $1,000 or more with maturities of four years or more.*[13a]

* * * * *

eight years or more—7¾ percent.

(3) *Time deposits of public units.* Except as provided in paragraph (a), no insured nonmember bank shall pay interest on any time deposit of a public unit as defined in section 3(m) of the Federal Deposit Insurance Act at a rate in excess of the maximum rate that can be paid on any time deposit of less than $100,000 with a maturity in excess of six months by any insured nonmember mutual savings bank subject to the provisions of this Part.

(4) *Individual Retirement Account and Keogh (H.R. 10) plan deposits.* Except as provided in paragraph (a), a nonmember bank may not pay interest on any time deposit with a maturity of three years or more that consists of funds deposited to the credit of, or in which the entire beneficial interest is held by, an individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. § 408 or § 401, at a rate in excess of the highest of any of the permissible rates that may be paid on time deposits of under $100,000 with maturities in excess of

[13] * * *

[13a] * * *

V 4 3 7 | 9 7

six months by any insured nonmember mutual savings bank subject to the provisions of this Part.

(5) *Variable rate time deposits of less than $100,000.* Nonmember banks may pay interest on any nonnegotiable time deposit of $10,000 or more, with a maturity of six months (26 weeks), at a rate not to exceed the rate (auction average on a discount basis) established for the most recently issued six-month Treasury bills. Rounding such rate to the next higher rate is not permissible.

• • • • •

§ 329.7 Maximum rates of interest on dividends payable on deposits of insured nonmember mutual savings banks.[14]

• • • • •

(b) Maximum rates payable.

• • • • •

(4) *Time deposits of $1,000 or more with maturities of four years of more.*[14b]

• • • • •

eight years or more—8 percent.

(5) *Time deposits of public units.* Except as provided in paragraph (b)(2), no insured nonmember mutual savings bank shall pay interest or dividends on any time deposit of a public unit as defined in section 3(m) of the Federal Deposit Insurance Act at a rate in excess of the highest of any of the permissible rates that may be paid on time deposits of less than $100,000 with maturities in excess of six months by any insured nonmember mutual savings bank subject to the provisions of this Part.

(6) *Individual Retirement Account and Keogh (H.R. 10) plan deposits.* Except as provided in paragraph (b)(2), no insured nonmember mutual savings bank may pay interest on any time deposit with a maturity of three years or more that consists of funds deposited to the credit of, or in which the entire beneficial interest is held by, an individual pursuant to an Individual Retirement Account agreement or Keogh (H.R. 10) Plan established pursuant to 26 U.S.C. § 408 or § 401, at a rate in excess of the highest of any of the permissible rates that may be paid on time deposits of under $100,000 with maturities in excess of six months by any insured nonmember mutual savings bank subject to the provisions of this Part.

(7) *Variable rate time deposits of less than $100,000.* Nonmember mutual savings banks may pay interest on any nonnegotiable time deposit of $10,000 or more, with a maturity of six months (26 weeks), at a rate not to exceed the rate (auction average on a discount basis) plus one quarter of one percent established for the most recently issued six-month Treasury bills. Rounding such rate to the next higher rate is not permissible.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 78-286]

PART 526—LIMITATIONS ON RATE OF RETURN

New Certificate Accounts

MAY 10, 1978.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Bank Board has amended its regulations to authorize member institutions to offer two new categories of certificate accounts. The first permits members to pay a rate of return up to eight percent on accounts with minimum deposits of $1,000 and minimum maturities of eight years. The other new category allows nonnegotiable certificates with minimum deposits of $10,000 and maturities of six months (26 weeks) at a rate of return equal to one-quarter of one percent above the discount yield on the most recently issued six-month United States Treasury bills (auction average). These new categories should increase the flow of mortgage credit and assist the housing market while enabling savers to obtain higher rates on their funds.

EFFECTIVE DATE: June 1, 1978.

FOR FURTHER INFORMATION, CONTACT:

Nancy L. Feldman, Assistant General Counsel, Federal Home Loan Bank Board, 1700 G Street NW., Washington, D.C. 20552, 202-377-6443.

SUPPLEMENTARY INFORMATION: Effective June 1, 1978, the Bank Board has amended §§ 526.2 and 526.5 of its regulations for the Federal Home Loan Bank System (12 CFR 526.2 and 526.5) to establish two new categories of certificate accounts. Under the provisions of the first category, member institutions are permitted to pay interest to savers at a maximum rate of eight percent on accounts of $1,000 or more maturing in eight or more years.

The second new category authorizes members to pay interest on nonnegotiable deposits of $10,000 or more with required maturities of six months (26 weeks), at a rate of return equal to one-quarter of one percent more than the discount yield on the most recently issued six-month United States Treasury bills (auction average). United States Treasury bills maturing in six months (26 weeks) are auctioned weekly by the Treasury Department, normally on Monday, and are issued three business days later, normally on Thursday. Beginning on such issuance date, member institutions may pay the above-described interest on such certificates and may continue to pay that rate for new certificates until new six-month United States Treasury bills are issued, at which time the rate paid on such bills (plus one-quarter of one percent) becomes the ceiling rate for this category of account. The six-month United States Treasury bill rate is published widely in many newspapers throughout the country.

Once established, the maximum rate of return member institutions have contracted to pay to savers may not be increased during the six months the accounts remain outstanding. If such accounts are renewed, automatically or otherwise, the maximum rate that may be paid may not exceed one-quarter of one percent above the six-month Treasury bill rate (discount basis) in effect at the time of renewal. The certificate accounts must be issued in nonnegotiable form with maturity of six months (26 weeks); maturities in excess of, or less than, six months are not permitted. The usual early-withdrawal penalties and compounding rules apply to these accounts.

Member institutions will be permitted to base payment calculations on the average auction rate paid (discount basis). Rounding off may only be done by rounding down. For example, if the auction average rate is 6.4638 percent on a discount basis, it may be rounded down to 6.463 percent, 6.46 percent, or 6.4 percent. The one-quarter of one percent additional amount will be added to such figure. The higher rates may be paid only on new deposits or additional funds deposited to existing accounts; rates on existing certificate accounts, including governmental unit and IRA/Keogh accounts, may not be increased prior to the maturity of such accounts. Public unit accounts may be invested in the new six-month certificate account, provided that the $10,000 minimum amount and six-month maturity requirements are met.

The Bank Board's actions were taken at this time after consultation with the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, and the United States Department of the Treasury in order to increase returns for savers by providing deposit categories competitive with interest rates available in the market on instruments possessing similar characteristics. Creation of the new deposit categories at this time should increase the flow of mortgage credit and assist the housing market. In order to facilitate achievement of these objectives as rapidly as possible, and because these amendments relieve restriction and it is in the public interest that they become effective without delay, the Bank Board hereby finds that notice and public procedure with respect to such amendments is contrary to the public interest and unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); and since publication of such amendments for the period of time specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date of such amendments would, in the opinion of the Bank Board, likewise be unnecessary for the same reasons, the Bank Board hereby provides that such amendments shall become effective as stated below.

Accordingly, the Bank Board hereby revises § 526.2(b)(2), and amends § 526.5 by adding new paragraphs (a)(6) and (a)(7) thereto and revising paragraph (c) thereof, to read as set forth below:

1. Section 526.2 is amended by revising subparagraph (b)(2) to read as follows:

§ 526.2 Maximum rate of return.

• • • • •

(b) • • •

(2) Notwithstanding any reduction in the prescribed maximum rate, a member institution may continue to pay the announced rate of return on any certificate account outstanding on the date such reduction became effective as to the institution for such period, including any renewal period (except that certificate accounts under § 526.5(a)(7) may not be renewed at rates in excess of one-quarter of one percent above the Treasury bill rate in effect at time of renewal), as the certificate account may remain outstanding.

• • • • •

2. Section 526.5 is amended by adding new paragraphs (a) (6) and (7) and revising paragraph (c), to read as follows:

§ 526.5 Maximum rates of return on certificate accounts of less than $100,000.

(a) *Maximum rates.* Except as otherwise provided in this section or in § 526.5-1:

• • • • •

(6) *Maximum rate of 8 percent.* A member institution may pay a return at a rate not in excess of 8 percent per annum on any certificate account of $1,000 or more having a fixed or minimum term or qualifying period of not less than 8 years.

(7) *Maximum rate on six-month certificate.* A member institution may pay a return, at a per annum rate not in excess of one-quarter of one percent above the rate established (auction average on a discount basis) for six-month United States Treasury bills issued on or immediately prior to the date of deposit, on any certificate account of $10,000 or more having a fixed or minimum term or qualifying period of six months (26 weeks). Rounding off such rate may be done only by rounding down.

• • • • •

(c) *Exception as to fixed or minimum term or qualifying period.* A member institution may pay a return at a rate not in excess of the highest rate permitted under paragraph (a) of this section on any certificate account which is a public unit account of $1,000 or more having a fixed or minimum term or qualifying period of not less than 30 days, except that certificate accounts under paragraph (a)(7) of this section must meet the minimum amount and maturity requirements set forth therein.

(Sec. 4, Stat. 823 (12 U.S.C. 1425b); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Comp. 1071.)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

PART 107—SMALL BUSINESS INVESTMENT COMPANIES

Statement of Policy Concerning a Pilot Program To Permit Licensees To Specialize in the Financing of Movie Production and Distribution

AGENCY: Small Business Administration.

ACTION: Revised statement of general policy.

SUMMARY: This statement revises a statement of general policy published on November 29, 1977 (42 FR 60729), concerning a pilot program to permit licensees (SBICs) to specialize in the financing of movie production and distribution. SBA has received a number of inquiries and license applications relating to proposed SBICs which would be organized to specialize in the financing of production and distribution of motion pictures, classified respectively under the Standard Industrial Classification Manual (prepared by the Office of Management and Budget) as Industry Nos. 7813, 7814, 7823, and 7824. SBA has adopted a general policy to undertake a pilot program to test the feasibility of licensing SBICs to specialize in such financing. The pilot program will provide appropriate safeguards to assure full compliance with SBA-approved investment standards and practices and special conditions applicable to such specialized licensees.

DATE: This revised statement of general policy will become effective on May 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter F. McNeish, Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416, telephone 202-653-6584.

SUPPLEMENTARY INFORMATION: Several comments were received following publication of the statement of general policy on November 29, 1977. Major subjects covered were: (1) The 3.1 maximum leverage restriction on pilot SBICs, including 301(d) pilot licensees; (2) restrictions on aggregate levels of leverage funds; (3) the restriction that not more than 50 percent of the financing of any single film may be undertaken by one or more pilot SBICs without prior SBA approval; (4) the requirement that pilot SBICs organized as limited partnerships furnish an IRS ruling of partnership classification before obtaining SBA leverage; (5) the requirement that tax credits generated by partnership SBIC investments must be applied first to taxable income of the portfolio company before being passed through to the SBIC; (6) the requirement that partnership SBICs must include individual general partners subject to personal liability; (7) the prohibitions against investments in the production or distribution of X-rated films or films of a political or religious nature.

(1) *The 3:1 maximum leverage restriction on pilot licensees, including 301(d) pilot licensees.* Some of the comments asserted that the 3:1 leverage limitation should not apply to

MY 18 78 UMI

V 4 3 | 9 7

301(d) pilot licensees, but rather that they should have access to the same 4:1 leverage available to all other 301(d) licensees. After due consideration of the high risk attributes of this pilot program, SBA has concluded that the 3:1 leverage ratio should be retained for all pilot SBICs, including any pilot 301(d) licensees.

(2) *Restrictions on aggregate levels of leverage funds.* Several comments asserted that any uncertainty as to the availability of the full amount of leverage would result in the nonavailability of private capital investment in pilot SBICs. In view of the SBA's inherent exposure, the potential budget impact and the other implicit uncertainties associated with the pilot program which must be recognized by private investors, SBA has determined it is appropriate to restrict the aggregate and individual levels of leveraged funds available to pilot SBICs in any one Federal fiscal year. Therefore, in addition to the 3:1 leverage ratio (discussed in (1) above), SBA has determined that the following leverage restrictions shall apply to regular pilot SBICs. Aggregate leverage for regular pilot SBICs shall not exceed $25 million in any one Federal fiscal year. In addition, individual leverage for any single regular pilot SBIC shall not exceed $5 million in any one Federal fiscal year unless a special exception is granted by SBA. Special exceptions shall be determined on the basis of the aggregate demand for leverage (actual and projected) from all regular pilot SBICs during that fiscal year. These additional leverage restrictions shall not apply to 301(d) pilot licensees.

(3) *Restriction that not more than 50 percent of the financing of any single film may be undertaken by one or more pilot SBICs without SBA's prior approval.* The comments asserted that this restriction would cause a severe hardship to section 301(d) pilot licensees in terms of their ability to negotiate profit participation for the portfolio company and such licensees. After due consideration SBA has determined that the single financing restriction for section 301(d) pilot licensees should be not more than 75 percent without SBA's prior approval.

(4) *IRS ruling of partnership classification before a limited partnership pilot SBIC can obtain SBA leverage.* The comments asserted that compliance with this requirement would be difficult, time consuming and would implicitly impose certain requirements that are more stringent than the statutory requirements for qualification as a partnership for tax purposes. SBA's reason for the requirement was to assure that the partnership would not at a later time, after obtaining leverage, be disqualified for partnership taxation, resulting in a tax liability of the partnership adverse to SBA's creditor position. SBA has determined to retain this requirement. However, in order to provide relief from any hardship which may occur due to delays in obtaining an IRS ruling, SBA will entertain interim financial arrangements with a partnership pilot SBIC which will protect SBA's credit position until such time as an IRS ruling can be obtained.

(5) *Requirement that tax credits must be applied first to taxable income of the portfolio company.* The comments asserted that the tax credit is an economic benefit which (a) should be subject to free negotiation between the SBIC and the portfolio concern; (b) may be beneficial to either party depending on the circumstances; (c) could be lost to both parties under SBA's requirement and (d) should be treated similarly as to a partnership SBIC as well as a corporate SBIC. After due consideration, SBA has determined to modify its requirement relating to tax credits to the extent of relieving these problems while protecting the small concerns access to such tax credits.

(6) *Requirement that limited partnership pilot SBICs have individual general partners who are subject to personal liability.* In light of a recent decision of the U.S. Comptroller General to the effect that SBA has authority to make nonrecourse loans to limited partnership pilot SBICs, SBA has determined to eliminate this requirement.

(7) *Restriction prohibiting the financing of X-rated, religious, or political films.* The comments asserted that a blanket prohibition against X-rated films would eliminate a category of films which were serious, creative, and thoughtful, yet not pornographic, and that the determination of "religious or political" films would be difficult to ascertain. SBA has determined to retain a prohibition of pornographic films, and to limit the descriptive language related to political or religious films.

Certain miscellaneous technical corrections are made in the statement of general policy.

This notice is published in accordance with section 3 of the Administrative Procedure Act (5 U.S.C. 552 (a)(1)(D)) requiring Federal agencies to publish in the FEDERAL REGISTER for the guidance of the public "* * * statements of general policy * * * formulated and adopted by the agency."

STATEMENT OF GENERAL POLICY: PILOT PROGRAM TO TEST THE FEASIBILITY OF LICENSEES SPECIALIZING IN THE FINANCING OF MOVIE PRODUCTION AND DISTRIBUTION

SBA has received numerous inquiries and several license applications for proposed SBICs which would specialize in the financing of movie production and distribution. Although the Small Business Investment Act does not prohibit the licensing of SBICs for such purposes, it has become apparent to SBA that the licensing of SBICs to specialize in such financing raises several major issues of public policy for the Agency. These policy issues include such matters as: the actual impact the financing would have on the development of independent small business participation in the field of movie production and distribution; the validity of employing Government leverage funds in a specialized field of endeavor generally considered to have high risk attributes; the effective risk reduction techniques that might be applied to such special-purpose SBICs; the SBIC program budgetary impact which might result from such specialization; and the assurance of independence of operation on the part of the portfolio small firms.

In order to resolve these policy issues, SBA has determined to undertake a pilot program for a minimum period of three (3) years, to test the feasibility of SBICs specializing in the field of movie production and distribution.

The pilot program will apply to "movie-specialist" SBICs, defined as those SBICs having more than one-third of their portfolio (as of the close of any full fiscal year) invested in the financing of movie production and distribution. A limited number of such specialized SBICs, not to exceed six, will be licensed under the pilot program. Six qualified applicants filed on or before December 29, 1977, on the basis of experience, management capability, financial soundness, economic feasibility, probability of success, and similar factors, pursuant to section 301 of the Small Business Investment Act (15 U.S.C. 681). These selected applicants are:

Crescent Film Capital Corp., Los Angeles, Calif.

Entertainment Capital Corp., Los Angeles, Calif.

Filmworks Capital Corp., New York, N.Y.

Independent Film Ventures, Inc. (MESBIC), Los Angeles, Calif.

International Film Investors, New York, N.Y.

Jermyn Venture Capital Corp., Beverly Hills, Calif.

Should any of the selected applicants fail to qualify for a license, no alternative or substitute selections will be made by the SBA. Moreover, in order to eliminate any possibility of trafficking in this limited group of specialized licenses, SBA will not grant approval to any changes in ownership or control of such licensees (as required by § 107.701) during the period of this pilot program.

Maximum leverage available to pilot SBICs (including 301(d) licensees) will be limited to 3:1 under section 303 of the Act. Aggregate leverage for regular pilot SBICs shall not exceed $25 million in any one Federal fiscal year. In addition, individual leverage for any single regular pilot SBIC shall not exceed $5 million in any one Federal fiscal year unless a special exception is granted by SBA. Special exceptions shall be determined on the basis of the aggregate demand for leverage (actual and projected) from all regular pilot SBICs during that fiscal year. These additional leverage restrictions shall not apply to 301(d) pilot licensees.

In addition, participating pilot SBICs will be subject to special conditions related to the following: SBA-approved investment practices and risk reduction standards; preservation of the independence of the portfolio concern; and special provisions for SBICs organized as limited partnerships.

Pilot SBICs will be required to enter into an agreement with SBA pursuant to § 107.1008 of the SBIC regulations incorporating the special conditions which will be relied on to achieve the foregoing objectives. These special conditions will include: (1) not more than 50 percent of the aggregate financing of any single film production may be undertaken by one or more pilot SBICs without prior SBA approval, *Provided, however,* That not more than 75 percent of the aggregate financing of any single film production may be undertaken exclusively by one or more pilot section 301(d) SBICs without prior SBA approval; (2) not more than 10 percent of the investment in any one film may be in preproduction financings; (3) funds committed to film production financings must be protected by insurance coverage standard in the film industry (for example, catastrophic loss); (4) where the SBIC's capital impairment reaches 25 percent of private capital, additional investments will be subject to prior SBA approval, and restrictions will be placed on salaries, fees, and other expenditures; (5) borrowings from outside sources senior to SBA's creditor-position will require prior SBA approval; (6) pilot SBICs organized as limited partnerships must furnish an IRS ruling of partnership classification before obtaining SBA leverage, *Provided, however,* That where a delay in obtaining an IRS ruling would cause a hardship to the pilot SBIC, SBA may, pending receipt of such a ruling, make leverage funds available to the pilot SBIC under interim financial arrangements which, in SBA's judgment, are satisfactory to protect SBA's creditor position from an adverse IRS determination; (7) tax credits available to portfolio concerns as a result of pilot SBIC investments must be brought to the attention of the portfolio concerns and, unless otherwise negotiated by the parties to the financing, must be applied to taxable income of the portfolio company before being passed through to the SBIC; and (8) pilot SBICs will be prohibited from making any investments relating to the production or distribution of X-rated or unrated films regardless of the method of their exhibition (other than educational or industrial films) or of films having a predominant theme of a political or religious nature.

The agreement incorporating special conditions for pilot SBIC operations will also include specific conditions for fair investment and profitsharing practices as well as assurance that the portfolio enterprise will have freedom of action as in independent small concern, without tying, reciprocal, or other restrictive arrangements (for example, with major film production or distribution companies). Prior to licensing, each pilot SBIC will be required to submit to SBA prototype financing documents to be utilized, showing flow of funds to all parties, including associates of the SBIC. Prior SBA approval will be required for any material deviation from the approved prototype financing, and from the foregoing criteria.

The agreement will also incorporate a condition that, should SBA decide, in its discretion, to terminate the pilot program as a whole, or the participation of any single pilot SBIC, each affected SBIC would acknowledge SBA's nonliability for alleged damages due to termination and agree that such termination will be accomplished by: (a) A settlement agreement under which the SBIC would cease to make new investments, and would place existing assets in liquidation, as a condition precedent to repayment of SBA leverage and license surrender; or (b) an agreement under which the pilot SBIC would continue to operate as a nonspecialist SBIC, and would transfer its film assets to a wholly owned liquidating subsidiary.

Progress of the pilot program will be monitored closely by SBA with the assistance of a working group of experts in film production and distribution. These experts will conduct periodic reviews and make recommendations concerning the achievement of program objectives.

Dated: May 11, 1978.

A. VERNON WEAVER,
Administrator.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINSTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-EA-18; Amdt. 39-3212]

PART 39—AIRWORTHINESS DIRECTIVES

Piper Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule (AD) cancels AD 77-09-09 applicable to Piper J-3, J-4, J-5, PA-11, PA-12, PA-14, PA-16, PA-18, PA-20, and PA-22 type airplanes, but reissues with minor changes its alteration and inspection requirements for the fuel caps to preclude venting problems. The amendment will give clarification to the former AD.

EFFECTIVE DATE: May 23, 1978.

ADDRESS: Piper Service Bulletins may be acquired from the manufacturer at Piper Aircraft Corp., 820 East Bald Eagle Street, Lock Haven, Pa. 17745.

FOR FURTHER INFORMATION CONTACT:

F. Covelli, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-2894.

SUPPLEMENTARY INFORMATION: AD 77-09-09 concerned problems of inadequate fuel flow due to defective venting of the fuel tank. It required a drilling of two vent holes in the cap and inspection of the gaskets. This amendment and revision will require all of the foregoing and an additional two vent holes. Further, the AD is being rewritten for clarification. Since fuel exhaustion affects air safety, the same need exists as originally for expeditious publishing of the rule. Thus, notice and public procedure hereon are impractical and cause exists for making the rule effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are F. Covelli, Flight Standards Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, as follows:

§ 39.13 [Amended]

1. Delete the reference to AD 77-09-09.

MY 18 78
UMI

V 4 3 | 9 7

2. Amend and revise former AD 77-09-09 to read as follows:

PIPER.—Applies to all J-3, J-4, J-5, PA-11, PA-12, PA-14, PA-16, PA-18, PA-20 and PA-22 type aircraft.

Compliance required within the next 10 hours in service after effective date of this AD unless already accomplished.

In order to prevent inadequate fuel venting, accomplish the following:

(a) Modify fuel caps and inspect fuel tank inlet rubber seal in accordance with Piper Service Bulletin No. 522 dated September 28, 1976 (former AD 77-09-09 Sketch 1) or approved equivalent.

(b) Drill 2 additional vent holes .098 inch diameter through locking cam of fuel cap (Sketch 2) in accordance with instructions of Piper Service Bulletin No. 573 dated February 8, 1978, or approved equivalent.

(c) Upon compliance with (b), vibro-etch Part No. 60707-04 as shown in Sketch 2.

(d) Equivalent alterations must be approved by Chief, Engineering and Manufacturing Branch, FAA Eastern Region.

(Piper Service Bulletins Nos. 522 and 573 pertain to this subject.)

Effective Date: This amendment is effective May 23, 1978.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421 and 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on May 9, 1978.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc. 78-13445 Filed 5-17-78; 8:45 am]

[4910-13]

[Docket No. 78-NE-11; Amdt. 39-3214]

PART 39—AIRWORTHINESS DIRECTIVES

Pratt & Whitney Aircraft Models JT8D -15, -17, and -17R Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspection of high pressure compressor disks, Stages 9 through 12, for tierod hole cracking on Models JT8D -15, -17, and -17R turbofan engines. The AD is needed to detect cracks in disk tierod holes which have resulted in rupture of a disk and engine failure.

DATES: Effective June 2, 1978. Compliance schedule as prescribed in body of AD.

ADDRESSES: The applicable service bulletin may be obtained from: Pratt & Whitney Aircraft, Division of United Technologies Corp., 400 Main Street, East Hartford, Conn. 06108. A copy of the service bulletin is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket, Office of the Regional Counsel, New England Region, 12 New England Executive Park, Burlington, Mass. 01803.

FOR FURTHER INFORMATION CONTACT:

Jay J. Pardee, Propulsion Section (ANE-214), Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Mass. 01803, telephone 617-273-7347.

SUPPLEMENTARY INFORMATION: The FAA has determined that cracks have occurred in the tierod holes in high pressure compressor disks, Stages 9 through 12, of JT8D engines which, in one instance on a Model JT8D-17, progressed and caused a disk rupture and engine failure. Since this condition is likely to exist or develop on other engines of the same type design, an airworthiness directive is being issued which requires inspection of high pressure compressor disks, Stages 9 through 12, for tierod hole cracking on Models JT8D -15, -17, and -17R turbofan engines.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Jay J. Pardee, Propulsion Section, Engineering and Manufacturing Branch, and George L. Thompson, Office of the Regional Counsel, New England Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

PRATT & WHITNEY AIRCRAFT: Applies to Pratt & Whitney Aircraft Models JT8D -15, -17, and -17R turbofan engines.

Compliance required as indicated, unless already accomplished.

To prevent crack propagation and possible disk failure, inspect Stages 9 through 12 high pressure compressor disks at the tierod holes in accordance with Pratt & Whitney Aircraft Alert Service Bulletin No. 4723, Revision 3, dated May 3, 1978, or later FAA approved revision, or equivalent means approved by the Chief, Engineering and Manufacturing Branch, New England Region.

Accomplish first inspection prior to the first inspection limits given by stage and engine model in Tables I through III of Alert Service Bulletin 4723, Revision 3, dated May 3, 1978, or later FAA approved revision, or within the next 1,000 cycles after the effective date of this AD, whichever is later. Reinspect disks at the intervals specified in Tables I through III of Alert Service Bulletin 4723, Revision 3, dated May 3, 1978, or later FAA approved revision. Disks inspected prior to the first inspection limit must be reinspected before reaching the specified reinspection interval, or the first inspection limit, whichever is later. In no case shall the established life limit of the disk be exceeded.

Remove cracked disks from service. They may be returned to service if repaired in accordance with Paragraph 6 of Alert Service Bulletin 4723, Revision 3, Dated May 3, 1978, or later FAA approved revision.

Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, New England Region, may adjust the inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

The manufacturer's service bulletins, maintenance manuals, and overhaul manuals identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Pratt & Whitney Aircraft, Division of United Technologies Corp., 400 Main Street, East Hartford, Conn. 06108. These documents may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Mass. 01803, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at New England Region.

This amendment becomes effective June 2, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85).)

Issued in Burlington, Mass., on May 10, 1978.

ROBERT E. WHITTINGTON,
Director,
New England Region.

NOTE.—The incorporation by reference provisions of this document was approved by the Director of the Federal Register on June 19, 1967.

General Electric Co. CF6-6D, CF6-6D1 Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) applicable to General Electric Co. CF6-6D and CF6-6D1 engines, requiring periodic inspection and modification of certain stage compressor spools. This amendment is needed to correct serial errors and add additional serials that were omitted from the existing AD.

DATES: Effective—May 22, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from: General Electric Co., Cincinnati, Ohio 45215. Copies of the service information incorporated in this AD are contained in the Rules Docket, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Ill. 60018; and at FAA Headquarters, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FUTHER INFORMATION CONTACT:

M. Mixell, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Ill. 60018; telephone 312-694-4500, extension 308.

SUPPLEMENTARY INFORMATION: This notice amends Amendment 39-3164, 43 FR 13867, AD 78-07-03 which currently requires periodic inspection and modification of 11-13 Stage Compressor Spool, Part Number (P/N) 9021M66 (all assembly part numbers). After issuing Amendment 39-3164, the FAA has determined that there were errors and omissions in the serial numbers specified. Therefore, the FAA is amending Amendment 39-3164 by correcting the errors and adding the serial numbers that were inadvertently omitted.

Since this amendment provides a clarification only and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and good cause exists for making amendment effective in less than 30 days.

In accordance with Departmental Regulatory Reform, dated March 23, 1976 an evaluation of the anticipated impacts has been made and it is expected that within a usual range of pertinent considerations the proposal will be neither costly nor controversial.

DRAFTING INFORMATION

The principal authors of this document are M. Mixell, Flight Standards Division, Great Lakes Region, and J. Brennan, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment 39-3164, 43 FR 13867, AD 78-07-03 as follows:

Delete serial numbers:

MP00268, MP024832, MP024833, MP025436, MP034484, MP035323, MP035345, MP035346, MP035829, MP037109, MP0A0141, MP0A0459.

Add serial numbers:

MP0A0273, MP0A0379, MP0A0383, MP0A0400, MP0A0402, MP0A0404, MP0A0430, MP0A0579, MP0A0591, MP0A0811, MPA00830, MP024432, MP024433, MP025463, MP034332, RP024401, MP035351, MP035353.

This amendment becomes effective: May 22, 1978.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on May 3, 1978.

JOHN M. CYROCKI,
Great Lakes Region.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

[Airspace Docket No. 78-RM-14]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Redesignation of Control Zone, Aberdeen, S. Dak.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the effective time for the Aberdeen, S. Dak. control zone from continuous to part-time to establish effectiveness for this control zone which coincides with the availability of weather reporting service at this location. The National Weather Service is reducing their hours of operation at Aberdeen, S. Dak., making this amendment necessary.

EFFECTIVE DATE: July 13, 1978, 0501 G.m.t.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colo. 80010, telephone 303-837-3937.

HISTORY

The National Weather Service at Aberdeen, S. Dak., currently provides full time weather reporting service supporting the full time control zone at Aberdeen, S. Dak. Beginning July 13, 1978, operational hours for the National Weather Service at Aberdeen, S. Dak., will be changed from full time to periods from 0600 to 2200 hours local time daily and weather reporting service will not be available for an 8-hour period. Therefore, the present continuous effective period of the Aberdeen, S. Dak., control zone must be revised to establish effective times for this control zone coincidental with the availability of weather reporting service by the National Weather Service.

Since effective periods for the Aberdeen, S. Dak., control zone are contingent on the availability of weather reporting service at this location, it was further determined that issuance of a notice of proposed rulemaking for this amendment would be impractical and not within the public interest.

RULE

This amendment to Part 71 of the Federal Aviation regulations (14 CFR Part 71) revises the control zone at Aberdeen, S. Dak. The reduced hours of weather reporting service by the National Weather Service at Aberdeen, S. Dak., necessitates the changing of the effective hours of operation for the Aberdeen, S. Dak., control zone.

DRAFTING INFORMATION

The principal authors of this document are Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Division, and Mr. Daniel J. Peterson, Office of Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation

V 4 3 | 9 7

regulations (14 CFR Part 71) is amended effective July 13, 1978 as follows:

§ 71.171 [Amended]

By amending Subpart F, § 71.171 by adding the following:

ABERDEEN, S. DAK.

This control zone is effective during specific dates and times as established in advance by a Notice to Airmen. The effective date and time, thereafter, will be continuously published in the Airport Facility Directory.

(Sec. 307(a) Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c) and 14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Aurora, Colo., on May 8, 1978.

ISAAC H. HOOVER,
Acting Director,
Rocky Mountain Region.

[FR Doc. 78-13447 Filed 5-17-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-ASW-18]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone; Enid, Okla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment divides the Enid, Okla., control zone into two separate portions to provide controlled airspace to the surface at the Enid Woodring Municipal Airport whenever the Woodring Airport Traffic Control Tower is in operation and Vance Air Force Base (the airport on which the control zone is designated) is closed.

EFFECTIVE DATE: July 13, 1976.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart F, 71.171 (43 FR 355) of FAR Part 71, Enid, Okla., control zone is designated around the primary airport, Vance Air Force Base (AFB). The control zone also encompasses Woodring Municipal Airport. Hourly and special weather observations, requirements for control zone operation, are taken from Vance AFB and coincide with the base's hours of operation. When this weather service is not available, control zone designation also terminates at Woodring Municipal Airpoort, even if the .Woodring Airport Traffic Control Tower is operating.

Specialists at the Woodring Airport Traffic Control Tower will be certified to take weather observations and this amendment will allow that portion of the control zone accommodating Woodring Airport operations, to be designated coincident with the control tower hours of operation.

The alteration will also allow for control zone designation to exist when Vance AFB is operational and Woodring Control Tower is closed. The affected airspace configuration remains unchanged and continues as a part-time designation. Consequently, we have determined to omit circularization of the change for comment.

THE RULE

This amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR 71) alters the Enid, Okla., control zone by redescribing it into two separate portions. The action allows controlled airspace to exist down to the runway surface at Woodring Municipal Airport coincident with the airport traffic control tower hours of operation.

DRAFTING INFORMATION

The principal authors of this document are David Gonzalez, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 355) is amended, effective 0901 G.m.t., July 13, 1978, as follows:

§ 71.171 [Amended]

In Subpart F, 71.171 (43 FR 355), the Enid, Okla., control zone is amended as follows:

ENID, OKLA. (VANCE AFB)

That airspace within a 5-mile radius of Vance AFB (latitude 36°20'20" N., longitude 97°55'00" W.) and within 3 miles west and 3 miles east of the Vance VORTAC (latitude 36°20'43" N., longitude 97°55'04" W.) 178.5° radial extending from the 5-mile radius zone to the 7 DME fix; and within 4 miles west and 5 miles east of the Vance VORTAC 358.5° radial extending from the 5-mile radius zone to the 6 DME fix; and within a 5-mile radius of Enid Woodring Municipal Airport (latitude 36°22'46" N., longitude 97°47'28" W.) and within 2 miles each side of the Woodring VOR (latitude 36°22'26" N., longitude 97°47'17" W.) 354.5° radial, extending from the 5-mile radius zone to 8 miles north of the VOR; and within 2 miles east and 4 miles west of the Woodring VOR 184.5° radial, extending from the 5-mile zone to 8 miles south of the VOR; excluding that portion of airspace east of longitude 97°51'00" W. when the Woodring Municipal Airport control zone is in effect. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continously published in the Airport/Facility Directory.

In Subpart F, 71.171 (43 FR 355) the following control zone is added:

ENID, OKLA. (WOODRING MUNICIPAL AIRPORT)

That airspace within a 5-mile radius of Enid Woodring Municipal Airport (latitude 36°22'46" N., longitude 97°47'28" W.) and within 2 miles each side of the Woodring VOR (latitude 36°22'26" N., longitude 97°47'17" W.) 354.5° radial, extending from the 5-mile radius zone to 8 miles north of the VOR; and within 2 miles east and 4 miles west of the Woodring VOR 184.5° radial, extending from the 5-mile zone to 8 miles south of the VOR; excluding that portion of airspace west of longitude 97°51'00" W. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on May 8, 1978.

PAUL J. BAKER,
Acting Director,
Southwest Region.

[Airspace Docket No. 77-PC-3]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters a VOR Federal airway identified as V-17 in the State of Hawaii. This action provides for the safe and efficient use of the navigable airspace by reducing the amount of chart clutter south of the Island of Maui and deleting a segment of V-17 that is no longer needed.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On February 21, 1978, the FAA proposed to amend Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter Hawaiian VOR Federal Airway V-17 in the State of Hawaii. (43 FR 7244). The purpose of the alteration is to facilitate the reading and publication of charts by reducing the amount of chart clutter. Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. We received one response to the NPRM in which the commenter posed no objection to the proposal. Section 71.127 was republished in the FEDERAL REGISTER on January 3, 1978, (43 FR 343).

THE RULE

This amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) adopts the airspace action proposed in the NPRM (43 FR 7244).

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 343) is amended, effective 0901 G.m.t., July 13, 1978, as follows:

§ 71.127 [Amended].

In § 71.127 under V-17 "118° and Maui, Hawaii, 201°" is deleted and "106° and Maui, Hawaii, 197°" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 11, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[4910-13]

[Airspace Docket No. 77-WE-26]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes a control zone at San Nicolas Island, Calif. This action provides protected airspace for aircraft making instrument approaches to San Nicolas Island Outlying Field (OLF).

EFFECTIVE DATE: July 13, 1978.

FOR FUTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On March 23, 1976, the FAA published for comment a proposal to establish a control zone at San Nicolas Island, Calif. (43 FR 12026). Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. The only comment received expressed no objection. Section 71.171 of Part 71 was published in the FEDERAL REGISTER on January 3, 1978 (43 FR 355). Since this action involved, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provision of Executive Order 10854.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations designates a control zone (CZ) at San Nicolas Island, Calif. This action provides controlled airspace for the protection of aircraft executing TACAN Runway 30 and the NDB Runway 30 instrument approaches to the San Nicolas Island (OLF).

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.171 of Part 71 of the Feredal Aviation Regulations (14 CFR Part 71) as republished (43 FR 355) is amended, effective 0901 GMT, July 13, 1978, by adding the following:

§ 71.171 [Amended].

SAN NICOLAS ISLAND, CALIF. (SAN NICOLAS ISLAND OLF)

Within a 5-mile radius of the San Nicolas Island Outlying Field (Lat. 33°13'30" N., Long. 119°27'50" W.) and within one mile each side of the 135° and 315° bearings from the Navy San Nicolas Island NDB (Lat. 33°14'10" N., Long. 119°26'56" W.) extending from seven miles southeast to seven miles northwest of the NDB. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport Facility Directory.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510; Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 10, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[4910-13]

[Airspace Docket No. 78-WE-3]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Airway Floor

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment lowers a portion of the airway floor of Victor Airway No. 165 between Reno, Nev., and Lakeview, Oreg. This action pro-

MY 18 78
UMI

V 4 3 | 9 7

vides controlled airspace for aircraft departing Alturas Municipal Airport, Calif., and proceeding via V-165 airway.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

HISTORY

On March 20, 1978 (43 FR 11586) the FAA proposed to amend Part 71 of the Federal Aviation Regulations (FARs) (14 CFR Part 71) to alter a portion of the airway floor of V-165 between Reno, Nev., and Lakeview, Oreg. Interested persons were invited to participate in the rule making proceeding by submitting comments on the proposal to the FAA. No comments were received. This amendment is the same as that proposed in the notice. Section 71.123 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 307).

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) lowers a portion of the airway floor of V-165 between Reno, Nev., and Lakeview, Oreg. The Alturas, Calif., Municipal Airport is located 15 miles west of V-165. Transition areas around the airport provide sufficient controlled airspace for Alturas departures until reaching the edge of V-165 where the floor of controlled airspace is 13,500 feet MSL. Alturas departures cannot reach 13,500 feet MSL before entering the airway and exiting the controlled airspace unless a circling climb is executed. This amendment establishes an airway floor of 1,200 feet AGL in this vicinity so that Alturas departures can climb to cruising altitude without leaving controlled airspace.

DRAFTING INFORMATION

The principal authors of this document are Mr. Lewis Still, Air Traffic Service, and Mr. Richard Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR part 71) as republished (43 FR 307) is amended, effective 0901 GMT, July 13, 1978, as follows:

§ 71.123 [Amended]

Under V-165 "Reno, Nev.; 40 miles, 7 miles, 115 MSL, 87 miles, 135 MSL, Lakeview, Oreg.;" is deleted and "Reno, Nev.; 40 miles 12 AGL, 7 miles 115 MSL, 54 miles 135 MSL, 81 miles 12 AGL, Lakeview, Oreg.;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 10, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 78-SW-3]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters V-17, V-17E, V-68S, V-161, and V-163W airway segments in the vicinity of San Antonio, Tex. The airway alterations are associated with a new navigation aid (VORTAC) located at Center Point, Tex. Air traffic flow will be improved and congestion will be reduced by this action.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On April 24, 1978, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter V-17, V-17E, V-68S, V-161 and V-163W in the vicinity of San Antonio, Tex. (43 FR 17367). Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. The comments received expressed no objection. This amendment is the same as proposed in the notice. Section 71.123 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 307).

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) realigns the following airway segments:

1. V-17 between Cotulla, Tex. and San Antonio, Tex., via the INT of the Cotulla 046°T (037°M) and the San Antonio 198°T (189°M) radials.
2. V-17E between Cotulla and San Antonio via the INT of Cotulla 046°T (037°M) and the San Antonio 183°T (174°M) radials.
3. V-68S between Junction, Tex. and San Antonio via Center Point.
4. V-161 to begin at Three Rivers, Tex., via Center Point to Llano, Tex., thence as presently designated.
5. V-163W between Three Rivers and San Antonio via the INT of Three Rivers 327°T (318°M) and San Antonio 183°T (174°M) radials.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 307) and amended (42 FR 63167 and 43 FR 3549) is further amended, effective 0901 G.m.t., July 13, 1978, as follows:

1. Under V-17 "INT Cotulla 047° and San Antonio, Tex., 198° radials; San Antonio, including an east alternate via the INT Cotulla 047° and San Antonio 183° radials;" is deleted and "INT Cotulla 046° and San Antonio, Tex., 198° radials; San Antonio, including an east alternate via the INT Cotulla 046° and San Antonio 183° radials;" is substituted therefor.
2. Under V-68 "INT Junction 144° and San Antonio 290° radials;" is deleted and "Center Point, Tex.;" is substituted therefor.
3. Under V-161 "From Llano, Tex., via" is deleted and "From Three Rivers, Tex., via Center Point, Tex.; Llano, Tex.;" is substituted therefor.
4. Under V-163 "INT Three Rivers 326° and San Antonio 183° radials;" is deleted and "INT Three Rivers 327° and San Antonio 183° radials;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Extension of Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates an extension of V-421 airway to overlie a route that is extensively used from Gunnison, Colo. to Kremling, Colo., via an intersection near Aspen, Colo. This action permits the use of additional services that can be provided by FAA to promote safety and convenience for users of the route.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On April 10, 1978, the FAA published for comment a proposal to designate an extension of V-421 airway from Gunnison, Colo., to Kremling, Colo., via the INT of Gunnison 010°T (356°M) and Kremling 203°T (189°M) radials (43 FR 14971). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The only comment received expressed no objection. Section 71.123 of Part 71 was republished in the FEDERAL REGISTER on January 3, 1978, (43 FR 307).

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations designates an extensively used direct route as an airway. This route is presently used without the benefit of charted radials and minimum flight altitudes. Its designation as an airway will provide valuable charted information, as well as reduce the coordination and communication time required for the use of this route.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 307) is amended, effective 0901 GMT, July 13, 1978, as follows:

Under V-421 "Gunnison, Colo." is deleted and "Gunnison, Colo.; INT Gunnison 010° and Kremling, Colo., 203° radials; to Kremling." is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 11, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[4910-13]

[Airspace Docket No. 78-EA-1]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Victor Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases exclusions currently made to several airways near Tidioute, Pa. The portions of these airways which are within the Youngstown, Ohio, Military Operations Area (MOA) are currently excluded when the MOA is activated so that Air Force jets may operate off airways within the MOA. This amendment increases the airway exclusions to coincide with the increase in the size of the MOA.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

HISTORY

On March 20, 1978, (43 FR 11585) the FAA proposed to amend Part 71 of the Federal Aviation Regulations (FAR's) (14 CFR Part 71) to increase exclusions currently made to several airways near Tidioute, Pa. Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. Two public comments were received and due consideration has been given to all matters presented. This amendment is the same as that proposed in the notice. Section 71.123 was republished in the FEDERAL REGISTER on January 3, 1978, (43 FR 307).

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FAR's) increases exclusions currently made to several airways near Tidioute, Pa., which penetrate the Youngstown MOA. The Youngstown MOA extends within a 15 mile radius of the Tidioute VORTAC and extends from 10,000 feet MSL to and including 15,000 feet MSL. The vertical extent of the MOA is being increased through nonrulemaking procedures to include the airspace from 10,000 feet MSL to and including 17,000 feet MSL. Simultaneously with that action, the name of the MOA will be changed from Youngstown MOA to Tidioute MOA. Those portions of Victor Airways Nos. V-72, V-115, V-116, V-126, V-170, V-184 and V-188 which penetrate Youngstown MOA are currently excluded from 10,000 feet MSL to 15,000 feet MSL during the time the Youngstown MOA is activated by NOTAM. The action taken herein increases this exclusion of these airways to 17,000 feet MSL concurrently with the vertical increase of the MOA.

DISCUSSION OF COMMENTS

One commenter objected to the proposal stating that the increased airways exclusions would impose undue operating restrictions on air carrier aircraft traversing the area. However, the MOA is normally used 2 days per week in VFR conditions only, and a review of airline schedules between Philadelphia and Erie, Pa., and between Buffalo, N.Y., and Erie, Pa., reveals that only five flights are scheduled during the times the MOA is normally used. The altitudes generally filed by air carriers in the Tidioute area are FL 200 and FL 210 which is well above the highest altitude authorized for the MOA. The FAA believes the MOA exclusions will have minimal effect on airline operations. The only other comment expressed no objections.

V 4 3 | 9 7

DRAFTING INFORMATION

The principal authors of this document are Mr. Lewis W. Still, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 307) and amended (43 FR 3545 and 4421) is further amended, effective July 13, 1978, as follows:

In § 71.123 in the text of V-72, V-115, V-116, V-126, V-170, V-184 and V-188, "The airspace within a 15 NM radius of Tidioute, Pa., at and above 10,000 feet MSL to and including 15,000 feet MSL is excluded during the times that the Youngstown Military Operations Area (MOA) is activated by NOTAM." is deleted and "The airspace within a 15 NM radius of Tidioute, Pa., at and above 10,000 feet MSL to and including 17,000 feet MSL is excluded during the times that the Tidioute Military Operations Area (MOA) is activated by NOTAM." is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 11, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 78-ASW-7]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area: Follett, Tex.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of the action being taken is to designate a transition area at Follett, Tex. The intended effect of the action is to provide controlled airspace for aircraft executing a proposed instrument approach procedure to the Follett/Lipscomb County Airport, utilizing the Gage, Okla., navigation facility (VORTAC). The circumstance which created the need for the action was a requirement to provide capability for flight under instrument flight rules (IFR) procedures to the airport.

DATE: Effective date: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

HISTORY

On April 6, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 14518) stating that the Federal Aviation Administration proposed to designate the Follett, Tex., transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments received contained no objections. Except for editorial changes this amendment is that proposed in the notice.

THE RULE

This amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) designates the Follett, Tex., transition area. This action provides controlled airspace from 700 feet above the ground for the protection of aircraft executing instrument approach procedures to the Follett/Lipscomb County Airport. Coincident with this action, the airport is changed from VFR to IFR status.

DRAFTING INFORMATION

The principal authors of this document are David Gonzalez, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 GMT, July 13, 1978 as follows.

In Subpart G, § 71.181 (43 FR 440), the following transistion area is added:

FOLLETT, TEX.

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Follett/Lipscomb County Airport, Follett, Tex. (latitude 36°26'25" N., longitude 100°07'20" W.).

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on May 10, 1978.

PAUL J. BAKER,
Acting Director, Southwest Region.

[FR Doc. 78-13516 Filed 5-17-78; 8:45 am]

[4910-13]

[Airspace Docket No. 77-GL-9]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Terminal Control Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Chicago O'Hare Terminal Control Area (TCA) in order to insure that all operations of large turbine powered aircraft are fully contained within the TCA airspace on all instrument approach and departures at O'Hare International Airport, to raise the floor in the outer portion of the present TCA Area, and to clarify the TCA boundary. The action was based on a study of actual operations. This rule will return to general aviation use a significant amount of presently restricted navigable airspace and make slight adjustments in the present TCA configuration to insure that all high performance aircraft are fully contained within the TCA limits.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 456.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rule Making was published in the FEDERAL REGISTER on June 13, 1977 (42 FR 30213) proposing to alter the terminal control area at Chicago, Ill.

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

DISCUSSION OF COMMENTS

All comments submitted with respect to the proposed amendment were given due consideration. Substantial aeronautical objections were received to the proposal from the Department of Navy and from the Department of Army. The Department of Navy and Army objections were based upon the fact that the alteration of the TCA would involve lowering the floor in the vicinity of NAS Glenview, having a substantial adverse affect to the mission requirements of the Naval Training Station and affecting the Army Reserve and USMC Reserve helicopter operations from that base. On the basis of a review and study of these objections, it was determined that the TCA could be revised from that proposed to accommodate the airspace requirements of NAS Glenview and that a special Letter of Agreement could be initiated between NAS Glenview and the O'Hare ATCT wherein the requirements of the Military and the Operations at O'Hare would be more compatible. The alteration to the TCA involves an adjustment of the boundary of Area A. Area A as defined in the Notice of Proposed Rule Making was described as that airspace extending upward from the surface to and including 7,000' AMSL within 5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC from the 347° radial clockwise to the 052° radial then within a 6.5 DME (NM) radius to the 242° radial, etc. The alteration will now redescribe Area A as follows:

(1) Area A. That airspace extending upward from the surface to and including 7,000' AMSL within 5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC from the 347° radial clockwise to the 070° radial then within the 6.5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC from the 070° radius clockwise to the 242° radial. The remainder of Area A is as described in the Notice of Proposed Rule Making.

A comment was received from Chicagoland Airport, Inc. expressing concern that the lowering of the TCA floor to the north of the Chicagoland Airport from 4,000' to 3,600' would require student pilots to fly a greater distance from the airport in order to conduct pilot training. Aeronautical study by the FAA reveals that only a very small portion of the basic and advanced flight training by pilots at Chicagoland Airport would be affected, (basic and advanced training involving steep turns, stalls and inadvertent spins) by the adjustment in the TCA floor. In addition, the boundary of existing federal low altitude airways is such that this type of pilot training is normally conducted outside the area of the TCA. Therefore, the alteration is not considered to have a significant adverse affect.

This alteration has the effect of a further reduction of the TCA with the result of additional airspace being returned to general aviation use. Accordingly, notice and public procedure with regard to this change is not considered necessary.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective July 13, 1978, as follows:

In § 71.401 (43 FR 647), the following Terminal Control Area is amended to read:

CHICAGO, ILL., TERMINAL CONTROL AREA

a. *Primary airport:* (1) Chicago O'Hare International Airport (latitude 41°58'57" N., longitude 87°54'25" W.).

(2) Chicago O'Hare VORTAC (latitude 41°59'16" W., longitude 87°54'17" W.).

b. *Boundaries:* (1) Area A. That airspace extending upward from the surface to and including 7,000' MSL within 5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC from the 347° radial clockwise to the 070° radial then within the 6.5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC from the 070° radial clockwise to the 052° radial then within the 6.5 DME (NM) radius to the 347° radial, thence via the 347° radial to the point of origin.

Area B. That airspace extending upward from 1,900' MSL to and including 7,000' MSL within 10.5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC, excluding Area A previously described and that area bounded on the southeast by a line 2 nautical miles northwest and parallel to the extended centerline of Runway 22R, on the south by the Chicago O'Hare (ORD) VORTAC 5 DME (NM) radius, and southwest by the southwest boundary of Glenview, Ill. control zone, on the north by a 10.5 DME (NM) radius of the Chicago O'Hare (ORD) VORTAC, and excluding Area E described hereinafter.

Area C. That airspace extending upward from 3,000' MSL to and including 7,000' MSL within 15 DME (NM) radius of Chicago O'Hare (ORD) VORTAC, excluding Areas A and B, previously described, Area E, described hereinafter.

Area D. That airspace extended upward from 3,600' MSL to and including 7,000' MSL within 25 DME (NM) radius of Chicago O'Hare (ORD) VORTAC, excluding Areas A, B, and C, previously described, Area E described hereinafter, and excluding the area between the 20 and 25 DME (NM) radii of Chicago O'Hare (ORD) VORTAC from a line 7 nautical miles southwest of and parallel to the extended centerline of Rwy 32L, clockwise to a line 7 nautical miles southeast of and parallel to the extended centerline of Rwy 4R, and excluding the area between the 20 and 25 DME (NM) radii of Chicago O'Hare (ORD) VORTAC from a line 7 nautical miles northwest of and parallel to the extended centerline of Rwy 4L clockwise to a line extending from a point on the 20 DME (NM) radius of Chicago O'Hare (ORD) VORTAC 7 nautical miles southwest of the extended centerline of Rwy 14R and a point on the 25 DME (NM) radius of Chicago O'Hare (ORD) VORTAC 6 nautical miles southwest of the extended centerline of Rwy 14R.

Area E. That airspace northeast of Chicago extending upward from 2,500' MSL to and including 7,000' MSL bounded on the northeast by the 10.5 DME (NM) radius of Chicago O'Hare (ORD) VORTAC, on the south by the extended centerline of Rwy 9/27 at NAS Glenview and on the northwest of and parallel to the extended centerline of Rwy 22R at Chicago O'Hare International Airport.

This amendment is made under the authority of section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); section 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); section 11.61 of the Federal Aviation Regulations (14 CFR 11.61).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on May 1, 1978.

JOHN M. CYROCKI,
Director, Great Lakes Region.

[Airspace Docket No. 78-WA-5]

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the name of the designated facility under the controlling agency (FAA) of two restricted areas identified as R-3101A PMRFAC Four, Hawaii and R-3120 PMRFAC Five, Hawaii. This action reflects the correct identity of the designated facility under the FAA.

EFFECTIVE DATE: May 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart B of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is to change the name of the designated facility under the controlling agency (FAA). This action assures that the appropriate facility under the controlling agency is identified. Since this amendment is an administrative matter in which the public would have no particular interest, notice and public procedure thereon are unnecessary.

MY 18 78 UMI

V 4 3 | 9 7

Further, since it is essential that the designated facility under the controlling agency be correctly identified, good cause exists for making this amendment effective immediately.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart B of Part 73 of the Federaal Aviation Regulations (14 CFR Part 73) as republished (43 FR 680) is amended, effective May 18, 1978, as follows:

§ 73.31 [Amended]

In § 73.31 under R-3101 PMRFAC Four, Hawaii and R-3129 PMRFAC Five, Hawaii, "Lihue Combined Station/Tower" is deleted and "Honolulu ARTC Center" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354 (a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 10, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 78-13457 Filed 5-17-78; 8:45 am]

[4910-13]

[Airspace Docket No. 77-EA-59]

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases the designated time of use of Indiantown Gap, Pa., Restricted Area R-5802 by extending the hours of use on Saturdays to 2400 hours local time during the summer months. This action eliminates the necessity for the U.S. Army to issue NOTAMs each time training requirements cannot be completed within the currently designated time of use.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-426-8525.

SUPPLEMENTARY INFORMATION:

HISTORY

On January 30, 1978, (43 FR 3919) the FAA proposed to amend Part 73 of the Federal Aviation Regulations (FARs) (14 CFR Part 73) to alter the time designation of Fort Indiantown Gap, Pa., Restricted Area R-5802. Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. No objectionable comments were received. This amendment is the same as that proposed in the notice. Section 73.58 was republished in the FEDERAL REGISTER on January 3, 1978, (43 FR 703).

THE RULE

This amendment to Part 73 of the Federal Aviation Regulations alters the designated time of use for Fort Indiantown Gap, Pa., Restricted Area R-5802. Time of designation for this restricted area is staggered throughout the year and currently includes 0800 to 2000 local time every day from May 11 to August 31. This amendment increases this time of designation on Saturdays, between May 11 and August 31 from 0800 to 2400 local time.

DRAFTING INFORMATION

The principal authors of this document are Mr. Lewis W. Still, Air Traffic Service, and Mr. Richard Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, the time of designation for R-5802 under § 73.58 of Part 73 of the Federal Aviation Regulations (14 CFR Part 73), as republished (43 FR 703), is amended, effective 0901 GMT July 13, 1978, to read as follows:

§ 73.58 Pennsylvania.

R-5802 Fort Indiantown Gap, Pa.

Time of designation. February 15 through May 10 and September 1 through December 15, 0800-2300 local time on Saturdays and 0800-1200 local time on Sundays; May 11 through August 31, 0800-2400 local time on Saturdays and 0800-2000 local time on all other days; other times by Notice to Airmen (NOTAM) issued at least 48 hours in advance.

(Sec. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 11, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 78-13511 Filed 5-17-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-SO-21]

PART 73—SPECIAL USE AIRSPACE

Change in Using Agencies

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment updates the name of the using agency for several restricted areas in the Jacksonville, Fla., and the Virginia Beach, Va., areas. The U.S. Navy requested this name change and the FAA concurs. These changes will cause aeronautical charts and publications to accurately reflect the using agencies of the affected restricted areas.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

THE RULE

The purpose of this amendment to Subpart B of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is to amend the name of the using agency of Restricted Areas R-2906, R-2907A & B and R-2910, in the Jacksonville, Fla., area and the name of the using agency for Restricted Areas R-5301A, B, C and R-5313 in the Virginia Beach, Va., area. The U.S. Navy has requested these amendments and the FAA concurs and such action is taken herein. Subpart B of Part 73 of the Federal Aviation Regulations was republished in the FEDERAL REGISTER on January 3, 1978, (43 FR 672 and 697). Since this amendment is a minor matter in which the public would have no particular interest, notice and public procedure thereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. Lewis W. Still, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart B of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as republished (43 FR 672 and 697) is amended, effective 0901 GMT, July 13, 1978, as follows:

§ 73.29 Florida.

R-2906, Rodman, Fla.
R-2907, Lake George, Fla. (Subarea A.)
R-2907, Lake George, Fla. (Subarea B.)
R-2910, Pinecastle, Fla.

Using agency. Fleet Area Control and Surveillance Facility (FACSFAC JAX), NAS Jacksonville, Fla.

§ 73.53 North Carolina.

R-5301 A/B/C, Albemarle Sound, N.C.
R-5313, Long Shoal Point, N.C.

Using agency. Fleet Area Control and Surveillance Facility (FACSFAC VACAPES), NAS Oceana, Virginia Beach, Va.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 11, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[4910-13]

[Airspace Docket No. 78-SW-14]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of Jet Route No. J-138

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment realigns Jet Route No. J-138 between Fort Stockton, Tex., and San Antonio, Tex., via the Center Point, Tex., VORTAC (an air navaid) which is located slightly north of the centerline of the present route. Use of the Center Point VORTAC will improve the radio navigation signal by reducing the distance between VORTACs and will assist in reducing the congestion and improving the traffic flow in the San Antonio area.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Adminstration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Part 75 is to realign J-138 from Fort Stockton to San Antonio via Center Point. The new Center Point navaid at Lat. 29°55'20" N., Long. 99°12'50" W., is approximately 2.5 miles north of the present direct route between Fort Stockton and San Antonio. The use of the new navaid will improve both the en route and terminal traffic flow in the area of San Antonio. Because this action merely realigns J-138 a very small amount (almost 4°), this is a minor amendment which will enhance the public use of the navigable airspace if it is charted during the current charting cycle. However, its benefits would be delayed if it were not adopted immediately. Thus, notice and public procedure on this action is impractical and is not necessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Adminstrator, § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (43 FR 714) is amended, effective 0901 GMT, July 13, 1978, as follows:

§ 75.100 [Amended]

In Jet Route No. 138, "From Fort Stockton, Tex.;" is deleted and "From Fort Stockton, Tex., via Center Point, Tex.;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 11, 1978.

B. KEITH POTTS,
Acting Chief, Airspace and Air Traffic Rules Division.

[Docket No. 17908; Amdt. No. 1111]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

FOR EXAMINATION

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

FOR PURCHASE

Individual SIAP copies may be obtained from: 1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

BY SUBSCRIPTION

Copies of all SIAPs, mailed once every 2 weeks, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.

V 4 3 | 9 7

Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8277

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantage of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flights Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

• • • Effective July 13, 1978:

Indianapolis, IN—Indianapolis Brookside Airpark, VOR Rwy 36, Amdt. 3.
Llano, TX—Llano Municipal, VOR-A, Amdt. 1.
Charleston, WV—Kanawha, VOR-A, Amdt. 10.
Parkersburg, WV— Wood County Gill Robb Wilson Field, VOR Rwy 21, Amdt. 11.
Sheboygan, WI—Sheboygan County Memorial, VOR Rwy 3, Amdt. 2.
Sheboygan, WI—Sheboygan County Memorial, VOR Rwy 21, Amdt. 2.

• • • Effective June 29, 1978:

Torrance, CA– Torrance Municipal, VOR Rwy 11L, Amdt. 11.
Kissimmee, FL—Kissimmee Municipal, VOR/DME-A, Amdt. 3.
Rochelle, IL—Rochelle Municipal, VOR-A, Amdt. 4.
Ames, IA—Ames Muni., VOR Rwy 31, Amdt. 3.
Wichita, KS—Beech Factory, VOR-B, Amdt. 9.
Baltimore, MD—Baltimore-Washington Int'l, VOR Rwy 28, Amdt. 17.
Salem, MI—Salem, VOR-A, Amdt. 1.
St. Lous, MO—Lambert-St. Louis Int'l, VOR Rwy 12R, Amdt. 17.
Ashland, OH—Ashland County, VOR-A, Original.
DuBois, PA—DuBois-Jefferson County, VOR/DME Rwy 7, Amdt. 1.
Port Angeles, WA—Port Angeles CGAS, VOR-B, Amdt. 1.
Port Angeles, WA—Port Angeles CGAS, VOR-D, Original.
Richland, WA—Richland, VOR/DME-A, Original.

• • • Effective June 1, 1978:

Tuscaloosa, AL—Tuscaloosa Muni., VOR Rwy 4, Amdt. 7.

The FAA Published an amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol. 43, FR No. 77, page 16711, dated April 20, 1978) § 97.23 effective June 1, 1978, which is hereby amended as follows:

Austin, TX—Robert Mueller Municipal VOR/DME or TACAN Rwy 12R, Amdt. 4, effective date changed to July 13, 1978.
Austin, TX—Robert Mueller Minicipal VOR/DME or TACAN Rwy 16R, Amdt. 3, effective date changed to July 13, 1978.

The FAA published an amendment in Docket No. 17695, Amdt. No. 1107, to Part 97 of the Federal Aviation Regulations (43 FR No. 57, page 11973; dated March 23, 1978) under § 97.23 effective May 18, 1978, which is hereby amended as follows:

Grundy, VA—Grundy Muni., VOR Rwy 4, Original, effective date changed to June 29, 1978.

The FAA published an amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol. 43, FR No. 77, page 16711; dated April 20, 1978) under § 97.23, effective June 15, 1978, which is hereby amended as follows:

LaCrosse, WI—LaCrosse Municipal, VOR Rwy 13, Amdt. 17, and VOR Rwy 36, Amdt. 19, effective date changed to July 13, 1978.

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

• • • Effective July 13, 1978:

Anderson, IN—Anderson Municipal, LOC (BC) Rwy 12, Amdt. 1.

The FAA published an amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol. 43, FR No. 77, page 16712; dated April 20, 1978) under § 97.25 effective June 15, 1978, which is hereby amended as follows:

LaCrosse, WI—LaCrosse Municipal LOC (BC) Rwy 36, Amdt. 5, effective date changed to July 13, 1978.

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

• • • Effective July 13, 1978:

Spirit Lake, IA—Spirit Lake Muni., NDB Rwy 16, Amdt. 2.
Wahoo, NE—Wahoo Muni., NDB Rwy 20, Original.
Columbus, OH—Port Columbus International, NDB Rwy 28L, Amdt. 10.
Parkersburg, WV—Wood County Gill Robb Wilson Field, NDB Rwy 3, Amdt. 3.
Milwaukee, WI—General Mitchell Field, NDB Rwy 1L, Amdt. 2.
Sheboygan, WI—Sheboygan Co. Memorial, NDB Rwy 21, Amdt. 3.

• • • Effective June 29, 1978:

Kissimmee, FL—Kissimmee Municipal, NDB Rwy 15, Amdt. 5.
Ames, IA—Ames Muni., NDB Rwy 31, Amdt. 5.
St. Louis, MO—Lambert-St. Louis Int'l, NDB Rwy 12R, Amdt. 8.
St. Louis, MO—Lambert-St. Louis Int'l, NDB Rwy 24, Amdt. 31.
Sikeston, MO—Sikeston Memorial Muni., NDB Rwy 20, Amdt. 5.
Wilkesboro, NC—Wilkes County, NDB Rwy 24, Amdt. 2.
Port Angeles, WA—Port Angeles CGAS, NDB-C, Amdt. 1.

• • • Effective May 7, 1978:

Greenville, AL–Greenville Muni., NDB Rwy 33, Amdt. 1.

The FAA published an Amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol 43 FR No. 77, page 16712; dated April 20, 1978) under § 97.27, effective June 1, 1978, which is hereby amended as follows:

Austin, TX—Robert Mueller Municipal NDB Rwy 30L, Amdt 28, effective date changed to July 13, 1978.

The FAA published an amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol 43 FR No. 77, page 16712; dated April 20, 1978) under § 97.27, effective June 15, 1978, which is hereby amended as follows:

LaCrosse, WI—LaCrosse Municipal, NDB Rwy 18, Amdt 6, effective date changes to July 13, 1978.

4. By amending § 97.29 ILS-MLS SIAPS identified as follows:

Effective July 13, 1978:

Titusville, FL—Titusville-Cocoa, ILS Rwy 36, Amdt. 5.
Columbus, OH—Port Columbus International, ILS Rwy 28L, Amdt. 23.
Charleston, WV—Kanawha, ILS Rwy 23, Amdt. 24.
Parkersburg, WV—Wood County Gill Robb Wilson Field, ILS Rwy 3, Amdt. 6.
Milwaukee, WI—General Mitchell Field, ILS Rwy 1L, Amdt. 2.
Milwaukee, WI—General Mitchell Field, ILS Rwy 19R, Amdt. 4.

Effective June 29, 1978:

Detroit, MI—Detroit Metropolitan Wayne County, ILS Rwy 3L, Amdt. 2.
Detroit, MI—Detroit Metropolitan Wayne County, ILS Rwy 21R, Amdt. 12.
St. Louis, MO—Lambert-St. Louis Int'l, ILS Rwy 12R, Amdt. 13.
St. Louis, MO—Lambert-St. Louis Int'l, ILS Rwy 24, Amdt. 35.

The FAA published an amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol 43 FR No. 77, page 16712; dated April 20, 1978) under § 97.29, effective June 15, 1978, which is hereby amended as follows:

Austin, TX—Robert Mueller Municipal ILS Rwy 12R, Amdt 2, effective date changed to July 13, 1978.
Austin, TX—Robert Mueller Municipal ILS Rwy 30L, Amdt 27, effective date changed to July 13, 1978.

The FAA published an amendment in Docket No. 17830, Amdt. No. 1109, to Part 97 of the Federal Aviation Regulations (Vol 43 FR No. 77, page 16712; dated April 20, 1978) under § 97.29 effective June 15, 1978, which is hereby amended as follows:

LaCross, WI—LaCrosse Municipal, ILS Rwy 18, Amdt 6, effective date changed to July 13, 1978.

5. By amending § 97.31 RADAR SIAPs identified as follows:

Effective July 13, 1978:

Greenville, SC—Greenville-Downtown, RADAR-1, Amdt. 10.
Charleston, WV—Kanawha, RADAR-1, Amdt. 10.

Effective June 29, 1978:

St. Louis, MO—Lambert-St. Louis Int'l, RADAR-1, Amdt. 20.

6. By amending § 97.33 RNAV SIAPs identified as follows:

Effective July 13, 1978:

Oxford, MS—University-Oxford, RNAV Rwy 9, Original.
Oxford, MS—University-Oxford, RNAV Rwy 27, Original.
Charleston, WV—Kanawha, RNAV Rwy 14, Amdt. 4.

Effective June 29, 1978:

Kissimmee, FL—Kissimmee Muni., RNAV Rwy 15, Amdt. 1.
Ames, IA—Ames Muni., RNAV Rwy 13, Original.
Ames, IA—Ames Muni., RNAV Rwy 31, Original.
Morganton, NC—Morganton-Lenoir, RNAV Rwy 3, Original.
Jacksboro, TN—Campbell County, RNAV-A, Amdt. 1.

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); delegation: 25 FR 6489 and paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring prepartion of an economic impact statment under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 12, 1978

JAMES M. VINES,
Chief,
Aircraft Programs Division.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

CHAPTER II—CIVIL AERONAUTICS BOARD

[Reg. ER-1048, Amdt. 1]

PART 202—CERTIFICATES AUTHORIZING SCHEDULED ROUTE SERVICE: TERMS, CONDITIONS, AND LIMITATIONS

Notice of Approval by Comptroller General

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule gives notice of approval by the Comptroller General of the reporting requirements contained in Part 202 concerning the terms, conditions, and limitations of a certificate held by a route air carrier under section 401 of the Federal Aviation Act of 1958, as amended. This approval is required by the Federal Reports Act and was transmitted to the Civil Aeronautics Board by letter dated May 1, 1978.

DATES: Effective: May 11, 1978. Adopted: May 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Raymond Kurlander, Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5270.

Accordingly, the Civil Aeronautics Board amends Part 202 of its Economic Regulations (14 CFR 202) by adding the following note at the end of Part 202:

NOTE.—The application requirements contained in §§ 202.13(a), 202.13(b), 202.14(b) and 202.15 and the reporting requirements contained in §§ 202.13(c), 202.13(d) and 202.16(a)(b) have been approved by the U.S. General Accounting Office under No. B-180226 (R0523).

This amendment is issued by the undersigned pursuant to the delegation of authority from the Board to the Secretary in 14 CFR 385.24(b).

(Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; (U.S.C. 1324).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. (549)]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Bad debt reserves of thrift institutions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to additions to reserves for losses on loans of mutual savings banks, domestic building and loan associations, and cooperative banks. Changes in the applicable tax law were made by the Tax Reform Act of 1969. These regulations provide neccessary guidance to certain finan-

MY 18 78 UMI

V 4 3 | 9 7

cial institutions for compliance with the Act.

DATE: The regulations are effective for taxable years beginning after July 11, 1969.

FOR FURTHER INFORMATION CONTACT:

Lawrence M. Axelrod of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T (202-566-3295, not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 12, 1971, a notice of proposed rulemaking to conform the Income Tax Regulations (26 CFR Part 1) under section 593 of the Internal Revenue Code of 1954 to a portion of the amendment made by section 432 (a) and (b) of the Tax Reform Act of 1969 (83 Stat. 620, 622) was published in the FEDERAL REGISTER (36 FR 15050). Amendments to conform the Income Tax Regulations to the balance of the amendment made by section 432(a) of the Tax Reform Act of 1969 will be published in the FEDERAL REGISTER at a later date with a notice of proposed rulemaking. After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the amendment of the regulations as proposed is adopted by this document, subject to the changes set forth below.

A taxpayer that is a mutual savings bank, domestic building and loan association, or cooperative bank (hereinafter referred to as a "thrift institution") is allowed to determine its reasonable addition to a reserve for bad debts for the taxable year under section 593(b). For taxable years beginning after July 11, 1969, section 593 (b) provides for an experience method of determining the amount of the reasonable addition to a reserve for losses on non-qualifying loans and three optional methods (the percentage of taxable income method, the percentage method, and the experience method) of determining the amount of the reasonable addition to a reserve for losses on qualifying real property loans.

Regulations relating to the experience method and the percentage method are reserved and will be published in the FEDERAL REGISTER at a later date with a notice of proposed rulemaking.

Under the percentage of taxable income method, a thrift institution determines its reasonable addition to a reserve for qualifying real property loans by multiplying the amount of taxable income computed under section 593(b)(2)(E) and § 1.593-6A(b) (5) by the "applicable percentage" for the taxable year as provided in section 593(b)(2) (A) and (B) and § 1.593-6A(b)(1) and (2). The amount of the reasonable addition to a reserve is subject to the overall limitation of section 593(b)(2)(D) and § 1.593-6A(b)(4).

Section 1.593-6A(a)(2) as proposed has been clarified to indicate that the amount finally determined to be a reasonable addition to a reserve for qualifying real property loans is controlling as to whether the taxpayer is deemed to have computed its reasonable addition under the percentage of taxable income method for purposes of section 596 and § 1.596-1 (relating to limitation on dividends received deduction).

Section 1.593-6A(b)(2) as proposed provided that the applicable percentage for a taxable year was reduced by 1½ percentage points in the case of a mutual savings bank or three-fourths of 1 percentage point for other thrift institutions for each percentage point "or fraction thereof" by which the thrift institution's percentage of assets described in section 7701(a)(19)(C) fell below a specified percentage of total assets. Section 1.593-6A(b)(2) has been changed to provide that the applicable percentage is reduced only for each full percentage point by which the percentage of assets described in section 7701(a)(19)(C) falls below the specified percentage of total assets.

Section 1.593-6A(b)(5)(i) has been modified to change the reference to "section 593(f)" to "section 593(e)" to reflect a redesignation made by the Tax Reform Act of 1976 (Pub. L. 94-455, section 1901(a)(84)(C)).

Section 1.593-6A(b)(5)(iii) as proposed has been clarified to indicate that for purposes of computing taxable income under the percentage of taxable income method all losses and gains from the sale or exchange of corporate stock and tax-exempt obligations are offset against each other and that the computation is made without regard to the long- or short-term character of the stocks and obligations. An example is added to illustrate the rule.

Section 1.593-6A(b)(5) has been changed to implement the decision to compute taxable income, for purposes of section 593(b)(2), by taking into account deductions such as the charitable contribution deduction and any net operating loss carryback deduction only for taxable years beginning after December 31, 1977.

Section 1.593-11 has been modified to include as a qualifying real property loan a loan secured by an interest in a mobile unit if such mobile unit is permanently fixed to real property.

DRAFTING INFORMATION

The principal author of this regulation was Lawrence M. Axelrod of the legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, the amendments to 26 CFR Part 1 are adopted as proposed subject to the following changes:

Paragraph 1. Section 1.593 is deleted.

Par. 2. Section 1.593-6A, as set forth in paragraph 5 of the appendix to the notice of proposed rulemaking, is changed as follows:

1. Paragraph (a)(1)(i) is revised.
2. The last sentence of paragraph (a)(1) is deleted.
3. Paragraph (a)(2) is revised.
4. Paragraph (b)(2) is revised.
5. Paragraph (b)(3) is amended by deleting the reference to "§ 301.7701-13A" in each of the four places where it appears and inserting in each place "§ 402.1-2".
6. Paragraphs (b)(5)(i) and (b)(5)(iii) are revised.
7. Paragraph (b)(5) is amended by deleting the flush material at the end and by adding new paragraphs (b)(5)(vi) and (b)(5)(vii).

Par. 3. The amendment to § 1.593-11, as set forth in paragraph 9 of the appendix to the notice of proposed rulemaking, is withdrawn and § 1.593-11 is changed as follows:

1. Three new sentences are added at the end of paragraph (b)(1).
2. Paragraph (b)(3) is revised.
3. Paragraph (b)(4) is revised.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: March 3, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

§ 1.593 [Deleted]

PARAGRAPH 1. Section 1.593 is deleted.

* * * * *

PAR. 2. Section 1.593-4 is revised to read as follows:

§ 1.593-4 Organizations to which section 593 applies.

The provisions of section 593 and §§ 1.593-5 through 1.593-11 (except subsection (f) of section 593 and § 1.593-10) apply to any mutual savings bank not having capital stock represented by shares, any domestic building and loan association, and any cooperative bank without capital stock organized and operated for mutual purposes and without profit. The term "thrift institution", as used in this section and §§ 1.593-5 through 1.593-11, refers to any such financial institution. For definition of the terms "domestic building and loan association" and "cooperative bank", see paragraphs (19) and (32), respectively, of section 7701(a).

M Y 1 8 7 8 UMI

PAR. 3. Section 1.593-5 is amended by revising paragraph (a) to read as follows:

§ 1.593-5 Addition to reserves for bad debts.

(a) *Amount of addition.* As an alternative to a deduction from gross income under section 166(a) for specific debts which become worthless in whole or in part, a thrift institution is allowed a deduction under section 166(c) for a reasonable addition to a reserve for bad debts. In the case of a thrift institution, the amount of the reasonable addition to such reserve for a taxable year may not exceed:

(1) For taxable years beginning after July 11, 1969, the sum of (i) the amount determined to be the reasonable addition to the reserve for losses on nonqualifying loans, determined in the same manner as is provided with respect to additions to the reserve for losses on qualifying real property loans under paragraph (d) of § 1.593-6A (relating to the experience method), and (ii) the amount determined under § 1.593-6A to be the reasonable addition to the reserve for losses on qualifying real property loans, or

(2) For taxable years beginning before July 12, 1969, the sum of (i) the amount determined under § 1.166-4 to be the reasonable addition to the reserve for losses on nonqualifying loans, and (ii) the amount determined under § 1.593-6 to be the reasonable addition to the reserve for losses on qualifying real property loans.

* * * * *

PAR. 4. Section 1.593-6 is amended by revising so much thereof as precedes subparagraph (1) of paragraph (a) to read as follows:

§ 1.593-6 Pre-1970 addition to reserve for losses on qualifying real property loans.

(a) *In general.* For purposes of paragraph (a)(2)(ii) of § 1.593-5, the amount of the addition to the reserve for losses on qualifying real property loans for any taxable year beginning before July 12, 1969, is the amount which the taxpayer determines to constitute a reasonable addition to such reserve for such year. However, the amount so determined for such year—

* * * * *

PAR. 5. Immediately after § 1.593-6, the following new section is added:

§ 1.593-6A Post-1969 addition to reserve for losses on qualifying real property loans.

(a) *In general*—(1) *Amount of addition determined for the taxable year.* For purposes of paragraph (a)(1)(ii) of § 1.593-5, the amount of the addition to the reserve for losses on qualifying real property loans for any taxable year beginning after July 11, 1969, is the amount which the taxpayer determines to constitute a reasonable addition to such reserve for such year. However, the amount so determined for such year—

(i) Cannot exceed the largest of the amount determined under section 593 (b) (2), (3), or (4) (relating, respectively, to the percentage of taxable income method, the percentage method, and the experience method), and

(ii) Shall be determined without regard to any amount charged for any taxable year against the reserve for losses on qualifying real property loans pursuant to § 1.593-10 (relating to certain distributions to shareholders by a domestic building and loan association).

For each taxable year the taxpayer must include in its income tax return for such year a computation of the amount of the addition determined under this section. The use of a particular method in the return for a taxable year is not a binding election by the taxpayer to apply such method either for such taxable year or for subsequent taxable years. Thus, in the case of a subsequent adjustment described in paragraph (b)(2) of § 1.593-5 which has the effect of permitting an increase, or requiring a reduction, in the amount claimed in the return for a taxable year as an addition to the reserve for losses on qualifying real property loans, the amount of such addition may be recomputed under whichever method the taxpayer selects for the purpose of such recomputation, irrespective of the method initially applied for such taxable year.

(2) *Method of determination.* For purposes of this section and §1.596-1 (relating to limitation on dividends received deduction), a thrift institution is deemed to have determined the addition to its reserve for losses on qualifying real property loans for the taxable year under the percentage of taxable income method provided by section 593(b)(2) and paragraph (b) of this section if the amount finally determined to be a reasonable addition for such year to such reserve exceeds the amount determined for such year under section 593(b)(3) (relating to the percentage method) and exceeds the amount determined for such year under section 593(b)(4) (relating to the experience method).

(b) *Percentage of taxable income method*—(1) *In general.* Subject to the limitations described in subparagraph (4) of this paragraph and in paragraph (e) of this section, the amount determined under section 593(b)(2) and this paragraph for the taxable year, if such section and paragraph are applicable, is an amount equal to the applicable percentage of the taxable income for such year, reduced by the amount determined under subparagraph (3) of this paragraph. For this purpose, taxable income is computed as provided in subparagraph (5) of this paragraph, and the applicable percentage (except as reduced under subparagraph (2) of this paragraph) is determined under the following table:

For a table year beginning in—	*The applicable percentage under this subparagraph is—*
1969	60 percent.
1970	57 percent.
1971	54 percent.
1972	51 percent.
1973	48 percent.
1974	47 percent.
1975	45 percent.
1976	43 percent.
1977	42 percent.
1978	41 percent.
1979 or thereafter	40 percent.

(2) *Reduction of applicable percentage in certain cases*—(i) *General rule.* If for the taxable year the percentage of the assets of a thrift institution, which are assets described in section 7701(a) (19)(C) (relating to assets of a domestic building and loan association) is less than—

(*a*) 82 percent of the total assets in the case of a thrift institution other than a mutual savings bank, the applicable percentage for such year provided by subparagraph (1) of this paragraph is reduced by three-fourths of 1 percentage point for each 1 percentage point of such difference; or

(*b*) 72 percent of the total assets in the case of a thrift institution which is a mutual savings bank, the applicable percentage for such year provided by subparagraph (1) of this paragraph is reduced by 1½ percentage points for each 1 percentage point of such difference.

If such percentage is less than 60 percent of the total assets in the case of any thrift institution (less than 50 percent of the total assets for a taxable year beginning before 1973 in the case of a thrift institution which is a mutual savings bank), section 593(b)(2) and this paragraph are not applicable. The percentage of total assets specified in this subparagraph is computed as of the close of the taxable year or, at the option of the taxpayer, may be computed on the basis of the average assets outstanding during the taxable year. Such average is determined by computing such percentage either as of the close of each month, as of the close of each quarter,

V 4 3 | 9 7

or as of the close of each semiannual period during the taxable year and by using the yearly average of the monthly, quarterly, or semiannual percentages. A thrift institution which is a mutual savings bank and which determines the amount of the reasonable addition for the taxable year to the reserve for losses on qualifying real property loans under this paragraph shall file for such taxable year a statement which shall show the amount of assets defined in paragraph (e) of § 402.1-2 (Temporary Regulations On Procedure and Administration under Tax Reform Act of 1969) as of the close of the taxable year and a brief description and the amount of all other assets, together with a description of the method used in determining such amounts. If the percentage specified in this subparagraph is computed by such thrift institution on the basis of the average assets outstanding during the taxable year, the statement shall also show such information as of the end of each month, each quarter, or each semiannual period and the manner of calculating the average.

(ii) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example. M is a cooperative bank to which section 593 applies. For its taxable year beginning in 1970, 80.4 percent of M's assets (computed as of the close of such year) constitute assets described in section 7701(a)(19)(C). M's assets which are assets described in section 7701(a)(19)(C), when computed on semiannual, quarterly, and monthly bases, constitute 79.8, 79.6, and 79.5 percent, respectively, of its total assets computed on the corresponding bases. M's applicable percentage for 1970 is 56.25 percent, determined as follows:

	Percent
Percentage of total assets specified in (*a*) of subdivision (i) of this subparagraph	82.0
Percentage of total assets constituting assets described in section 7701(a)(19)(C)	80.4
Difference	1.6
Applicable percentage determined under table in subparagraph (1) of this paragraph	57.0
Reduction of applicable percentage required by (*a*) of subdivision (i) of this subparagraph (¾ of 1 percentage point for each full percentage point of difference)	.75
Applicable percentage	56.25

(3) *Reduction for addition to reserve for nonqualifying loans*—(i) *General rule.* Subparagraph (1) of this paragraph provides that, subject to certain limitations, the amount determined under the percentage of taxable income method provided by section 593(b)(2) and this paragraph for the taxable year is an amount equal to the applicable percentage of the taxable income for such year, reduced by the amount determined under this subparagraph. In the case of a thrift institution other than a mutual savings bank, the amount determined under this subparagraph is an amount equal to the amount determined under paragraph (a)(1)(i) of § 1.593-5 to be a reasonable addition for the taxable year to the reserve for losses on nonqualifying loans multiplied by a fraction—

(*a*) The numerator of which is 18 percent, and

(*b*) The denominator of which is the percentage (in no case less than 18 percent) of the assets of the taxpayer for such year which are not assets defined in paragraph (e) of § 402.1-2 of this chapter.

In the case of a thrift institution which is a mutual savings bank, the amount determined under this subparagraph is an amount determined in the manner described in the preceding sentence, except that the numerator of the fraction described therein is 28 percent, and the denominator of such fraction shall not be less than 28 percent. For purposes of this subparagraph, the percentage of assets for a taxable year which are not assets defined in paragraph (e) of § 402.1-2 of this chapter is determined upon the same annual or average basis as is used in determining the percentage specified in subparagraph (2) of this paragraph.

(ii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example (1). K is a domestic building and loan association to which section 593 applies. The amount determined under subparagraph (1) of this paragraph (before reduction by the amount determined under this subparagraph) to be the reasonable addition for the taxable year to K's reserve for losses on qualifying real property loans is $100,000. The amount determined under paragraph (a)(1)(i) of § 1.593-5 as the reasonable addition for the taxable year to the association's reserve for losses on nonqualifying loans is $10,000. The percentage of K's assets which are not assets defined in paragraph (e) of § 402.1-2 is 24 percent. The amount determined under subparagraph (1) of this paragraph ($100,000) must be reduced by $7,500.

$10,000×18 percent/24 percent.

Therefore, subject to the limitations described in subparagraph (4) of this paragraph and in paragraph (e) of this section, the amount determined under this paragraph to be the reasonable addition for the taxable year to K's reserve for losses on qualifying real property loans is $92,500 ($100,000 less $7,500).

Example (2). The facts are the same as in example (1), except that the percentage of K's assets which are not assets defined in paragraph (e) of § 402.1-2 is 12 percent. The amount determined under subparagraph (1) of this paragraph (before reduction by the amount determined under this subparagraph) to be the reasonable addition for the taxable year to K's reserve for losses on qualifying real property loans must be reduced by $10,000.

$10,000×18 percent/18 percent.

Because the denominator of the fraction may not be less than 18 percent, the fraction used in determining the amount of such reduction is equal to 1.

(4) *Overall limitation.* The amount determined under this paragraph shall not exceed the amount necessary to increase the balance (as of the close of the taxable year) of the reserve for losses on qualifying real property loans to 6 percent of such loans outstanding at such time.

(5) *Computation of taxable income.* For purposes of this paragraph, taxable income is computed—

(i) By excluding from gross income any amount included therein by reason of the application of section 593(e) and § 1.593-10 (relating to certain distributions to shareholders by a domestic building and loan association).

(ii) Without regard to any deduction allowable under section 166(c) (whether or not determined under section 593) and the regulations thereunder for an addition to a reserve for bad debts.

(iii) (*a*) By excluding from gross income an amount equal to the excess (if any) or (*I*) the total gains of the taxable year arising from sales and exchanges at a gain of (*i*) obligations the interest on which is excludable from gross income under section 103, and (*ii*) corporate stock, over (*2*) the total losses of such year arising from sales and exchanges at a loss of such obligations and stock.

(*b*) The provisions of this subdivision (iii) may be illustrated by the following example:

Example. For its taxable year beginning in 1971, the gains and losses of a domestic building and loan association from sales of stock and securities (all of which were made on December 31, 1971) were as follows:

	Gain	Loss
Municipal bonds acquired July 1, 1969, the interest on which is excludable from income under sec. 103	$25,000	
Stock of Corporation A, acquired July 14, 1971		$6,000
Stock of Corporation B, acquired Dec. 22, 1970	$3,000	

For purposes of this paragraph, the association's taxable income for 1971 is computed by excluding $22,000 ($25,000+$3,000−$6,000) from its gross income.

(vi) By excluding from gross income an amount equal to the lesser of (*a*) three-eighths of the net long-term capital gain for the taxable year or (*b*) three-eighths of the net long-term capital gain for the taxable year from the sale or exchange of property other than property described in subdivision (iii) of this subparagraph.

(v)(*a*) By excluding from gross income so much of the amount of dividends with respect to which a deduction is allowable under part VIII, subchapter B, chapter 1, subtitle A of the Code (section 241 and following) as is in excess of the applicable percentage (determined under subparagraphs (1) and (2) of this paragraph) of the dividends received deduction (determined under part VIII, subchapter B, chapter 1, subtitle A of the Code, without regard to section 596) for the taxable year.

(*b*) The provisions of this subdivision (v) may be illustrated by the following example:

Example. For its taxable year beginning in 1977, a domestic building and loan association receives dividends of $100 with respect to which a dividends received deduction of $85 is allowable under section 243(a)(1). The association receives no other dividends for the taxable year. The association's applicable percentage for the taxable year, as determined under subparagraphs (1) and (2) of this paragraph, is 42 percent. For purposes of this paragraph, the association's taxable income is computed by excluding from gross income the excess of the amount of dividends received ($100) over the applicable percentage of the allowable dividends received deduction (42 percent of $85, or $35.70), computed without regard to section 596. Thus, for purposes of this paragraph, $64.30 ($100 less $35.70) is excluded from gross income. See section 596 and § 1.596-1 with respect to the computation of the dividends received deduction for purposes of determining taxable income under section 63(a).

(vi) For taxable years beginning before January 1, 1978, without regard to any deduction the amount of which is computed upon, or may be subject to a limitation computed upon, the amount of taxable income, and without regard to any net operating loss carryback to such year under section 172. (For purposes of this subparagraph, a net operating loss deduction under section 172 is not a deduction the amount of which may be subject to a limitation computed upon the amount of taxable income.)

(vii) For taxable years beginning after December 31, 1977, by taking into account any deduction the amount of which is computed upon or may be subject to a limitation computed upon the amount of taxable income, and any other deduction or loss allowed under subtitle A of the Code, such as any deduction allowable under section 172 or any loss allowable under section 1212 (a), unless otherwise provided in this subparagraph.

(c) *Percentage method.* [Reserved]

(d) *Experience method.* [Reserved]

(e) *Percentage of deposits limitation where percentage of taxable income method or percentage method is applied.* If the amount determined by the taxpayer to constitute a reasonable addition for the taxable year to the reserve for losses on qualifying real property loans is greater than the amount determined under paragraph (d) of this section (relating to the experience method), the amount so determined cannot exceed an amount which, when added to the amount determined under paragraph (a)(1)(i) of § 1.593-5 to be a reasonable addition for such year to the reserve for losses on nonqualifying loans, equals the amount by which 12 percent of the total deposits or withdrawable accounts of depositors of the taxpayer at the close of such year exceeds the sum of the taxpayer's surplus, undivided profits, and reserves at the begining of such year (taking into account any portion thereof which is attributable to the period before the first taxable year beginning after December 31, 1951. The terms "surplus, undivided profit, and reserves" and "total deposits or withdrawable accounts" have the same meanings as are assigned to them in paragraph (f) of § 1.593.6.

PAR. 6. Section 1.593-7 is amended by revising paragraph (a)(2)(ii) to read as follows:

§ 1.593-7 Establishment and treatment of reserves for bad debts.

(a) *Establishment of reserves.* • • •

(2) *Accounting for reserves.* • • •

(ii) Any credit or charge to a reserve established pursuant to subparagraph (1) of this paragraph must be made to such reserve irrespective of whether the amount thereof is also credited or charged to any surplus, reserve, or other account which the taxpayer may be required or permitted to maintain pursuant to any Federal or State statute, regulation, or supervisory order. Minimum amounts credited in compliance with such Federal or State statutes, regulations, or supervisory orders to reserve or similar accounts, or additional amounts credited to such reserve or similar accounts and permissible under such statutes, regulations, or orders, against which charges may be made for the purpose of absorbing losses sustained by the taxpayer, may also be credited to the reserve for losses on nonqualifying loans or the reserve for losses on qualifying real property loans, provided that the total of the amounts so credited to the reserve for losses on nonqualifying loans, or to the reserve for losses on qualifying real property loans, for any taxable years does not exceed the amount described in subparagraph (1) or (2) of § 1.593-5(a) (whichever applies) as the addition to such reserve for such year.

• • • • •

PAR. 7. Section 1.593-8 is amended by revising paragraph (d) to read as follows:

§ 1.593-8 Allocation of pre-1952 surplus to opening balance of reserve for losses on qualifying real property loans.

• • • • •

(d) *Treatment of pre-1952 surplus.* Any portion of the taxpayer's pre-1952 surplus which, pursuant to paragraph (a) of this section, is deemed to be included in the opening balance of the reserve for losses on qualifying real property loans shall not be treated as a reserve for bad debts for any purpose other than computing for any taxable year the amount determined under the method described in paragraph (b), (c), or (d) of § 1.593-6 (relating, respectively, to the percentage of taxable income method, the percentage of real property loans method, and the experience method) or paragraph (b), (c), or (d) of § 1.593-6A (relating, respectively, to the percentage of taxable income method, the percentage method, and the experience method). For such limited purpose, such portion shall be deemed to remain in, and constitute a part of, the reserve for losses on qualifying real property loans. For all other purposes, such portion will retain its character as part of the taxpayer's pre-1952 surplus.

• • • • •

PAR. 8. Section 1.593-10 is amended by revising paragraphs (a) and (b)(3) to read as follows:

§ 1.593-10 Certain distributions to shareholders by a domestic building and loan association.

(a) *In general.* Section 593(f) provides that if a domestic building and loan association (as defined in section 7701(a)(19) and the regulations thereunder) distributes property after December 31, 1962, to a shareholder with respect to its stock and if the amount of such distribution is not allowable to the association as a deduction under section 591 (relating to deduction for dividends paid on deposits), then, notwithstanding any other provision of the Code, the distribution shall be treated as provided in paragraphs (b) and (c) of this section. For purposes of the preceding sentence, the term "distribution" includes any distribution in redemption of stock to which section 302(a) or 303 applies, or in partial or complete liquidation of the association, as well as any other distribution which the association may make to a shareholder with respect to its stock. For definition of the term "property", see section 317(a). For determination of the amount of a distribution, see section 301(b). For taxable years beginning after July 11, 1969, this paragraph is not applicable to any transaction to which section 381 (relating to carryovers in certain corporate acquisitions) and the regulations thereunder apply.

(b) *Distributions out of certain reserves.* • • •

(3) *Special rule.* • • •

(i) The balance if such reserve determined as of the close of the taxable year after all adjustments for such

MY 18 78 UMI

V 4 3 7 9 7

year have been made (including the addition for such year determined under § 1.593-6 or § 1.593-6A (whichever is applicable)), minus.

(ii) • • •

(*b*) The total amount of the annual additions which would have been made to such reserve under section 166(c) for taxable years ending after December 31, 1962, if each such addition had been determined under the experience method described in paragraph (d) of § 1.593-6 or paragraph (d) of § 1.593-6A, whichever is applicable for the taxable year of such addition.

For purposes of subdivision (i) of this subparagraph, the balance of the reserve for losses on qualifying real property loans shall include the total amount of any pre-1963 reserves allocated thereto under paragraph (b)(2) of § 1.593-7, but shall not include any pre-1952 surplus which is deemed to be included therein under paragraph (a) of § 1.593-8 (relating to allocation of pre-1952 surplus to the opening balance of the reserve for losses on qualifying real property loans).

• • • • •

Par. 9. Section 1.593-11 is amended by adding three new sentences at the end of paragraph (b)(1) and by revising paragraphs (b)(3) and (b)(4) to read as follows:

§ 1.593-11 Qualifying real property loan and nonqualifying loan defined.

• • • • •

(b) *Qualifying real property loan defined*—(1) *General rule.* • • • The term "real property" also includes a mobile unit which is permanently fixed to real property. The determination of whether a mobile unit is permanently fixed to real property shall be made on the basis of facts and circumstances in each particular case. For example, a mobile unit is permanently fixed to real property during a taxable year if, except for a brief period during which the unit is transported to a site, such unit was placed upon a foundation at a site with wheels and axles removed, affixed to the ground by means of straps, and connected to water, sewer, gas, and electric facilities.

• • • • •

(3) *Meaning of "interest".* The word "interest" means an interest in real property which, under the law of the jurisdiction in which such property is situated, constitutes either (i) an interest in fee in such property (or in the case of a mobile unit, an ownership interest), (ii) a leasehold interest in such property extending or renewable automatically for a period of at least 30 years, or at least 10 years beyond the date scheduled for the final payment on the loan secured by such interest, (iii) a leasehold interest in improved residential real property consisting of a structure or structures containing, in the aggregate, no more than four family units extending for a period of at least 2 years beyond the date scheduled for the final payment on the loan secured by such interest, or (iv) a leasehold interest in such property held subject to a redeemable ground rent defined in section 1055(c).

(4) *Meaning of "qualifying real property".* The term "qualifying real property" means any real property which is improved real property, or which from the proceeds of the loan will become improved real property. As used in the preceding sentence, the term "improved real property" means—

(i) Land on which is located any building of a permanent nature (such as a house, mobile unit, apartment house, office building, hospital, shopping center, warehouse, garage, or other similar permanent structure), provided that the value of such building is substantial in relation to the value of such land,

(ii) Any building lot or site which, by reason of installations and improvements that have been completed in keeping with applicable governmental requirements and with general practice in the community, is a building lot or site ready for the construction of any building of a permanent nature within the meaning of paragraph (b)(4)(i) of this section,

(iii) Real property which, because of its state of improvement, produces sufficient income to maintain such real property and retire the loan in accordance with the terms thereof, or

(iv) A mobile unit which is permanently fixed to real property.

Title 30—Mineral Resources

CHAPTER VII—OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT, DEPARTMENT OF THE INTERIOR

PART 715—GENERAL PERFORMANCE STANDARDS

PART 717—UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS

Surface Mining Reclamation Enforcement Provisions Rescission of Rule Relating to Regulation of Manganese in Alkaline Waters

AGENCY: Office of Surface Mining Reclamation and Enforcement.

ACTION: Rescission of rule relating to regulation of manganese in alkaline waters.

SUMMARY: The Office of Surface Mining is withdrawing the manganese effluent limitations for alkaline waters for surface and underground coal mining and reclamation operations. This action is taken under section 201(c) of the Surface Mining Control and Reclamation Act of 1977. The Secretary has concluded that there are insufficient data to justify effluent liminations for manganese in alkaline waters during the interim regulatory program.

DATES: This rescission is effective May 18, 1978.

ADDRESS: Director, Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Washington, D.C. 20240, 202-343-4237.

FOR FURTHER INFORMATION CONTACT:

Walter N. Heine, 202-343-4237.

SUPPLEMENTARY INFORMATION: Pursuant to section 201(c) of the Surface Mining Control and Reclamation Act of 1977, Pub. L. 95-87, the Secretary has reconsidered the regulation of manganese in alkaline waters. Based upon a review of the administrative record supporting this rule, the Secretary has conluded that there are insufficient data to justify effluent limitations for manganese in alkaline waters during the interim regulatory program. Therefore, the Secretary hereby rescinds that portion of §§ 715.17(a) and 717.17(a) which requires the removal of manganese in alkaline water. The effluent limitations regulating manganese in acidic water remain unchanged.

DRAFTING INFORMATION: Principal authors of this regulation are Walter N. Heine, Director, Office of Surface Mining and Gerald P. Dodson, Attorney, Office of the Solicitor.

Dated: May 10, 1978.

WALTER N. HEINE,
Director, Office of Surface Mining Reclamation and Enforcement.

In 30 CFR § 715.17, paragraph (a) is amended by adding a new subparagraph (3) to read as follows:

§ 715.17 Protection of the hydrologic system.

(a) • • •

(3) The effluent limitations for manganese shall be applicable only to acid drainage.

• • • • •

In 30 CFR § 717.17, paragraph (a) is amended by adding a new subparagraph (3) to read as follows:

§ 717.17 Protection of the hydrologic system.

(a) • • •

(3) The effluent limitations for manganese shall be applicable only to acid drainage.

• • • • •

[4910-14]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77-144]

PART 110—ANCHORAGE REGULATIONS

Anchorage Grounds, Prince William Sound, Alaska

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes an anchorage ground in Prince William Sound, Alaska. This anchorage is needed because of increased vessel traffic transiting these waters to and from the oil terminal at Port Valdez. This anchorage is intended to provide a safe haven for these vessels when there are adverse weather conditions, they have navigation problems, or they must wait because of delays at Port Valdez.

EFFECTIVE DATE: This amendment is effective on June 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: On September 12, 1977, the Coast Guard published a proposed rule (42 FR 45693). Interested persons were given until October 27, 1977, to submit comments. One comment was received.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are: Lieutenant Commander H. E. Snow, Project Manager, Office of Marine Environment and Systems, and Mr. S. D. Jackson, Project Attorney, Office of Chief Counsel.

DISCUSSION OF MAJOR COMMENTS

The Department of Environmental Conservation, State of Alaska, recommended that the proposed anchorage be relocated approximately one mile south of the proposed site. A survey of vessel use to date indicates that vessels presently anchor from one and one-half to two and one-half miles offshore. The average use of this anchorage, at present, is only one to two vessels per week. The Vessel Traffic Center, Valdez, has been advised to prescribe a minimum distance offshore during the dates May 1 through September 15 so as to minimize disturbance to the sea lion rookeries and bird colonies.

The Department of Environmental Conservation further recommended that the anchorage location be charted on appropriate charts and published in a Notice to Mariners. When this proposal is published in the FEDERAL REGISTER, the area will be marked on the next issuance of the appropriate charts and published in the U.S. Coast Pilot.

In consideration of the foregoing, Part 110 of Title 33 Code of Federal Regulations is amended by adding § 110.233 to read as follows:

§ 110.233 Prince William Sound, Alaska.

(a) *The anchorage grounds.* In Prince William Sound, Alaska, beginning at a point at latitude 60°40'00" N., longitude 146°40'00" W.; thence south to latitude 60°38'00" N., longitude 146°40'00" W.; thence east to latitude 60°38'00" N., longitude 146°30'00" W.; thence north to latitude 60°39'00" N., longitude 146°30'00" W.; thence northwesterly to the beginning point.

(b) *The regulations.* (1) This anchorage area is for the temporary use of vessels during:

(i) Adverse weather or tidal conditions;

(ii) Vessel equipment failure; or

(iii) Delays at Port Valdez;

(2) No vessel may anchor in this anchorage without notifying the vessel traffic center in Valdez; and

(3) Each vessel anchored shall notify the vessel traffic center in Valdez when it weighs anchor.

(Sec. 7, 38 Stat. 1053, as amended (33 U.S.C. 471); sec. 6(g)(1), 80 Stat. 940 (49 U.S.C. 1655(g)(1)); 49 CFR 1.46(c)(1).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: May 9, 1978.

O. W. SILER,
Admiral, U.S. Coast Guard, Commandant.

[4910-14]

[CGD 77-214]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Pocomoke River, Md.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amended regulation will provide that from 10 p.m. to 6 a.m., the draw of the bridge across the Pocomoke River, Pocomoke City, Md., need not open for the passage of vessels. This change is being made because of limited vessel traffic. This action will relieve the bridge owner of maintaining constant attendance at this bridge.

EFFECTIVE DATE: This amendment is effective on June 19, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-0942.

SUPPLEMENTARY INFORMATION: On January 9, 1978, the Coast Guard published a proposed rule (43 FR 1363) concerning this amendment. The Commander, Fifth Coast Guard District, also published these proposals as a Public Notice dated January 10, 1978. Interested persons were given until February 8, 1978 to submit comments.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Edward J. Gill, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

Two comments were received which had no objection to the proposal.

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by adding a new § 117.245(f)(18) to read as follows:

§ 117.245 Navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.

• • • • •

(f) • • •

(18) Pocomoke River, Md.; Maryland Department of Transportation draw-

Title 36—Parks, Forests, and Public Property

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

Yellowstone National Park, Wyo.; Traffic

AGENCY: National Park Service.

ACTION: Final rule.

SUMMARY: This regulation is intended to change the speed limit on U.S. Highway 191 in the park from 60 mph to 55 mph. This would bring that speed limit into compliance with Federal and State law.

EFFECTIVE DATE: Effective May 18, 1978.

FOR FURTHER INFORMATION, CONTACT:

John A. Townsley, Superintendent, Yellowstone National Park, Wyo. 82190.

SUPPLEMENTARY INFORMATION: This change in Yellowstone National Park Special Regulation 36 CFR 7.13(b)(2) is for the purpose of conforming the speed limit on U.S. Highway No. 191 within the boundaries of Yellowstone National Park with the speed limit in Pub. L. 93-239, the Emergency Highway Energy Conservation Act of January 2, 1974 (87 Stat. 1046) and applicable Montana and Wyoming Statutes. For this reason good cause exists to make this change effective immediately.

In consideration of the foregoing, paragraph (b), subparagraph (2) of 36 CFR 7.13 is amended to read as follows:

§ 7.13 Yellowstone National Park.

• • • • •

(b) • • •

(2) The Speed Limit on U.S. Highway 191 in the park is 55 miles per hour.

Dated: April 5, 1978.

LYNN H. THOMPSON,
Regional Director,
Rocky Mountain Region.

PART 35—STATE AND LOCAL ASSISTANCE

Subpart E—Grants for Construction of Treatment Works

Subpart F—State Management Assistance Grants

Correction

The following corrections are being made to Part III of the FEDERAL REGISTER of Tuesday, April 25, 1978.

In FR Doc. 78-11024, make the following changes:

1. In the 3rd column of page 17700, in the 15th and 16th lines of the first full paragraph, replace "(insert 90 days after the effective date)" with "July 24, 1978".

2. On page 17704, the introductory text of paragraph (b), and paragraph (b)(1) was omitted from § 35.909; that material should read as set forth below:

§ 35.909 Step 2+3 grants.

• • • • •

(b) *Limitations.* A step 2+3 grant may be awarded only if the Regional Administrator determines that:

(1) The population is twenty-five thousand or less for the applicant municipality (according to most recent United States Census information or disaggregations thereof); and

• • • • •

3. On page 17708, in § 35.928, in paragraph (b), replace "(insert effective date of this publication)" with "April 25, 1978".

4. On page 17711, in § 35.935-13, make the following changes:

(A). In paragraph (a)(2), replace "(90 days after the effective date of this interim regulation)" with "July 24, 1978".

(B). In the italicized language of paragraph (b), replace "(insert effective date of this regulation)" with "April 25, 1978".

5. In the 3rd column of page 17712, in Appendix A, in paragraph 3— *Applicability,* replace "(insert 60 days after publication)" with "June 26, 1978" in the first and second sentences.

In FR Doc. 78-11022, make the following changes:

1. On page 17718, in paragraph (a)(2) of § 35.1016, replace "(insert the effective date of this regulation)" with "April 25, 1978".

2. On page 17718 in the second column, the title and paragraph (a) for § 35.1020 were inadvertently omitted. The paragraph in this column designated as "(b)" which appears to be paragraph (b) of § 35.1016 is actually paragraph (b) of § 35.1020 for which the title and paragraph (a) are missing. In addition, the correct paragraph (b) for § 35.1016 should be added. As corrected, the full text of § 35.1016 and § 35.1020 reads as set forth below:

§ 35.1016 Limitations on Award.

(a) *Maintenance of effort.* (1) No construction management assistance grant will be awarded in any fiscal year unless the Regional Administrator is satisfied that the expenditure of non-Federal funds for recurrent expenses of its water pollution control programs in that year will be at least equal to the non-Federal expenditures for recurrent expenses for water pollution control programs during fiscal year 1977, unless the Regional Administrator determines that a reduction in State expenditures is attributable to a general nonselective reduction in the programs of all executive branch agencies of the State.

(2) The limitation in paragraph (a)(1) of this section does not apply to a construction management assistance grant awarded in any fiscal year for which, as of (insert the effective date of this regulation), a State budget for environmental protection which contains lower recurrent expenditures than those of fiscal year 1977, was (i) already adopted by the State legislature, or (ii) already formally submitted to the State legislature by the Governor, provided that the State makes no further reduction in that budget.

(b) Upon award of the construction management assistance grant, unexpended section 106 funds (State and Federal) committed to activities which will be covered under the construction management assistance grant will be reprogramed. The reprograming of these funds in the 106 grant agreement shall be discussed in the delegation agreement. The Regional Administrator will review the reprograming for approval in accordance with priorities established by the Agency. Such funds shall be used for section 402 activities such as pretreatment program development assistance and approval, support of enforcement litigation, permitting and compliance monitoring; section 404 regulatory programs to control discharge of dredge or fill material; and activities under section 208(b)(4).

§ 35.1020 Grant amount and award.

(a) As provided in § 35.915-1(a), the Administrator may reserve up to two percent of each State's fiscal year allotment for construction grants or $400,000, whichever is greater, for State management assistance grants. Within these limits, the Regional Administrator may award a construction management assistance grant for 100 percent of the estimated allowable cost of (1) managing, or preparing to manage, under § 35.103-5, sections 201, 203, 204, and 212 of the Act, (2) obtaining and reviewing information on behalf of the Regional Administrator, and (3) performing other essential functions associated with managing the construction grants program as noted in § 35.1030-1.

(b) State programs funded under § 35.913 prior to the effective date of these regulations may continue to be funded under that provision for a period of one year after that effective date, or until a construction management assistance grant is awarded under these regulations, whichever occurs first. In addition, States charging fees under § 35.913 may, with the approval of the Administrator, be reimbursed for efforts carried out under those agreements for the period between October 1, 1977, and the date of execution of an initial construction management assistance grant if the State demonstrates that insufficient funds were available under § 35.913 to support its delegated activities during that period.

(c) Funds for State management assistance grants may be obligated by a grant award at any time during the two year period in which the construction grant allotment is available for obligation.

(d) Funds from initial and subsequent construction management assistance grants which have been awarded will remain available for expenditure for a period not to exceed five years from the date of award of each grant.

(e) Unobligated balances in paragraph (c) of this section and unliquidated balances in paragraph (d) of this section remaining at the end of the period for which they are available will be added to the amount last allotted to a State under section 205(c) of the Act, and will be immediately available for funding the construction of treatment works in the same manner and to the same extent as the last allotment.

Title 45—Public Welfare

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

[CSA Notice 6143-7]

PART 1061—EMERGENCY ENERGY CONSERVATION PROGRAM

Subpart—Funding Requirements for Emergency Energy Assistance Program

EXTENSION

AGENCY: Community Services Administration.

ACTION: Final Rule.

SUMMARY: The Community Services Administration is amending its rule on the Emergency Energy Assistance Program published at 43 FR 9476 (CSA Notice 6143-7) March 8, 1978. This change extends the time during which funds may be obligated under the supplemental appropriation and extends the termination date for obligation to specific eligible households from May 1, 1978 to May 20, 1978. This change is in consonance with a request from the Director of the Community Services Administration to the Senate Appropriations Committee asking that they approve an extension of the Emergency Energy Assistance Program so that additional unobligated funds as appropriate, of the $200 Million Appropriation could be used to assist eligible households who were still in crisis from declared Energy Related Emergencies. The Committee reacted favorably to this request and agreed to the extension from May 1, to May 20, 1978.

DATE: As this rule was intended to relieve a restriction, it is effective May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard M. Saul, Community Services Administration, Office of Program Development, Energy Programs, 1200 19th Street, NW., Washington, D.C. 20506, Tel: 202-632-6503.

(Sec. 602, 78 Stat. 530 (42 U.S.C. 2942).)

GRACIELA (GRACE) OLIVAREZ,
Director.

In Subpart 1061.51-8, all references to "May 1, 1978" are hereby changed to "May 20, 1978".

[Docket HM-139; Amdt. No. 173-116]

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

Conversion of Individual Exemptions to Regulations of General Applicability; Correction

AGENCY: Materials Transportation Bureau, Department of Transportation.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule in Docket HM-139; Amdt. 173-116 (43 FR 17942, April 27, 1978) by adding the following sentence in § 173.302(a)(3) which was erroneously omitted: "As used in this paragraph methane is a nonliquefied gas which has a minimum purity of 98.0 percent methane and which is commercially free of corroding components."

EFFECTIVE DATE: April 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Alan I. Roberts, Director, Office of Hazardous Materials Operations, 2100 Second Street SW., Washington, D.C. 20590, 202-426-0656.

SUPPLEMENTAL INFORMATION: In FR Docket 78-11462 beginning on page 17942 in the FEDERAL REGISTER of April 27, 1978, Item 11 is corrected to include the above sentence in § 173.302(a)(3) which was added in Docket HM-99; Amdt. 173-115 (43 FR 13382, March 30, 1978). The paragraph now reads:

§ 173.302 Charging of cylinders with nonliquefied compressed gases.

(a) • • •

(3) Specification 3AX, 3AAX, or 3T (§§ 178.36, 178.37, 178,45 of this subchapter) cylinders are authorized only for the following nonliquefied gases: Air, argon, boron trifluoride, carbon monoxide, ethane, ethylene, helium, hydrogen, methane, neon, nitrogen, or oxygen, except that specification 3T is not authorized for hydrogen. As used in this paragraph methane is a nonliquefied gas which has a minimum purity of 98.0 percent methane and which is commerically free of corroding components.

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e).)

Issued at Washington, D.C., on May 9, 1978.

L. D. SANTMAN,
Acting Director,
Materials Transportation Bureau.

[4910-60]

SUBCHAPTER D—PIPELINE SAFETY

[Amdt. 192-31A; Docket No. OPSO-42]

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE

Design of Plastic Pipe

AGENCY: Materials Transportation Bureau (MTB).

ACTION: Postponement of effective date.

SUMMARY: This action defers the effective date of the marking requirement of § 192.63(b) for thermoplastic pipe manufactured after May 17, 1978, from May 18, 1978, until August 16, 1978. The new effective date will allow additional time needed by some plastic pipe manufacturers to obtain equipment needed to mark pipe in accordance with section 9.2 of ASTM D2513 (1975b edition).

EFFECTIVE DATE: This action is effective immediately.

FOR FURTHER INFORMATION CONTACT:

Paul J. Cory, 202-426-2082.

SUPPLEMENTARY INFORMATION: As a result of Amendment 192-31 (43 FR 13880, April 3, 1978), which established § 192.63(b), thermoplastic pipe manufactured after May 17, 1978, and installed in gas pipelines must be marked in acccordance with the coded system contained in section 9.2 of ASTM D2513 (1975b ed.). Under this system, pipe is marked by letters to show its hydrostatic strength and related temperature basis.

When Amendment 192-31 was adopted, MTB did not anticipate any delay by manufacturers in obtaining marking equipment needed to implement the new marking procedures. Since then, however, a large manufacturer of plastic pipe has contacted MTB and advised that despite having placed orders as soon as Amendment 192-31 was published, it will not receive equipment for marking certain sizes of thermoplastic pipe in time to enable its customers to meet the present May 18, deadline. Checking with a sample group of other plastic pipe manufacturers, MTB determined that while some manufacturers anticipated no problems, others are facing an 8 to 10 week delay in delivery of needed equipment. Therefore, to allow sufficient time for manufacturers to obtain the necessary equipment and put it into operation, the effective date of § 192.63(b) with respect to thermoplastic pipe manufacturered after May 17, 1978, is hereby extended until August 16, 1978.

In addition to the new marking requirements in § 192.63(b), Amendment 192-31 established in §§ 192.121 and 192.123 more appropriate limitations on the temperature for operating and testing thermoplastic pipe. Those limitations are not altered by this amendment and still take effect as scheduled on May 18, 1978. Although the temperature and marking requirements are deliberately related to provide assurance in the field that correct material is being installed, MTB believes that operators should nevertheless be allowed to take advantage of the safety and economic benefits of the new temperature limitations in the interim until August 16, 1978. Also, to postpone the effective date of the new temperature limitations would be unfair to those few manufacturers and operators who are now able to meet § 192.63(b). Operators who install thermoplastic pipe before August 16, 1978, for use at temperatures above 38° C (100° F) which is not marked in accordance with section 9.2 of ASTM D2513 (1975b ed.) are reminded that the pipe can be used only within the actual temperature and stress limits for which it has been tested and qualified.

(49 U.S.C. 1672; 49 U.S.C. 1804; App. A of Part 1 and App. A of Part 102 of 49 CFR.)

Issued in Washington, D.C., on May 16, 1978.

CESAR DELEON,
Acting Director, Office of Pipeline Safety Operations.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-02]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 987]

DOMESTIC DATES PRODUCED OR PACKED IN RIVERSIDE COUNTY, CALIF.

Extension of Time for Filing of Written Data, Views, or Arguments

AGENCY: Agricultural Marketing Service (USDA).

ACTION: Extension of time.

SUMMARY: Extending the time for receiving written data, views, or arguments is necessary in order to allow interested persons time to review the proposed administrative rules and make appropriate comments. The additional time was requested by the California Date Administrative Committee.

DATES: Comments on the proposed rules will be extended to May 24, 1978.

ADDRESS: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250, where they will be available for inspection during business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), a notice of proposed rulemaking was published in the April 28, 1978, issue of the FEDERAL REGISTER (43 FR 18188) regarding proposed changes in the administrative rules and regulations under the Federal marketing order for California dates (7 CFR 987).

The notice afforded interested persons an opportunity to submit written data, views, or arguments until May 15, 1978. The California Date Administrative Committee which administers the marketing order requested additional time to file its comments on the proposed rule changes. In order to consider these comments, the time for receipt of written data, views, or arguments on the proposal is extended to May 24, 1978.

Dated: May 12, 1978.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

[4910-13]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 78-NE-09]

AIRWORTHINESS DIRECTIVES

Pratt & Whitney JT8D-9, -9A, -11, -15, -17, and -17R Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice (NPRM) proposes to adopt an Airworthiness Directive (AD) that would require eddy current inspection for cracks of certain front compressor front hub blade slots. The proposed AD is needed to detect cracks, originating in the blade slot, which could result in complete fracture of blade retention lugs and liberation of first stage fan blades, posssibly causing massive aircraft engine damage.

DATE: Comments must be received on or before July 24, 1978.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, New England Region, Attn: Rules Docket No. 78-NE-09, 12 New England Executive Park, Burlington, Mass. 01803. The applicable service bulletin may be obtained from: Pratt and Whitney Aircraft, Division of United Technologies Corp., 400 Main Street, East Harford, Conn. 06108.

A copy of the service bulletin is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20519, or Rules Docket, Office of the Regional Counsel, New England Region, 12 New England Executive Park, Burlington, Mass. 01803.

FOR FURTHER INFORMATION CONTACT:

Jay J. Pardee, Propulsion Section (ANE-214), Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Mass. 01803; telephone, 617-273-7347.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

The FAA has determined that cracks have occurred in the blade slots of certain part numbered front compressor front hubs. These cracks have progressed from multiple origins near the center of the blade slot pressure face at the edge of a galled area caused by blade root contact. In one instance a complete fracture of a blade retention lug occurred liberating two adjacent first stage fan blades which caused massive engine damage. Two additional front compressor front hubs were found cracked at retirement. Other front compressor front hubs, inspected as part of a sampling program, were uncracked but had galled areas in the center of the blade slot pressure face. Since this condition is likely to exist or develop in other engines of the same type design, the proposed AD would require a repetitive eddy current inspection of front compressor front hubs, in accordance with Pratt and Whitney Aircraft Alert Service Bulletin No. 4841, Revision 1, for cracks in the blade slot pressure face area. The repetitive eddy current inspection requirements of this AD will apply to front compressor front hubs, P/Ns 594301, 791801, 640601, 743301, 750101, and 749801. The proposed intitial inspection at 13,000 cycles is based on known failure statistics. The repetitive inspection interval of 6,000 cycles is based on crack propagation analysis.

V 4 3 9 7

DRAFTING INFORMATION

The principal authors of this document are Jay J. Pardee, Propulsion Section, Engineering and Manufacturing Branch, and George L. Thompson, Office of the Regional Counsel, New England Region.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Pratt and Whitney Aircraft: Applies to Pratt and Whitney Aircraft JT8D-9, -9A, -11, -15, -17, and -17R turbofan engine models.

Compliance required as indicated, unless already accomplished.

To detect cracks in front compressor front hubs, P/Ns 594301, 791801, 640601, 743301, 750101, and serial numbered P/N 749801 except those listed in Pratt and Whitney Aircraft Alert Service Bulletin No. 4841, Revision 1, dated March 15, 1978, or later FAA approved revision, which could result in fracture of the retention lugs and release of first stage fan blades, accomplish the following:

Inspect front compressor front hubs for cracks in the blade slots in accordance with Pratt and Whitney Aircraft Alert Service Bulletin No. 4841, Revision 1, dated March 15, 1978, or later FAA approved revision, or equivalent means approved by the Chief, Engineering and Manufacturing Branch, New England Region, prior to the accumulation of 13,000 cycles, since new, or within 2,000 cycles time in service after the effective date of this AD, whichever is later. Disks inspected prior to 13,000 cycles must be reinspected prior to accumulating an additional 6,000 cycles, or upon reaching 13,000 cycles, whichever is later.

Inspect thereafter at intervals not to exceed 6,000 cycles in service since last inspection. Remove cracked front compressor front hubs before further flight.

Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA New England Region, may adjust the inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

The manufacturer's alert service bulletin identified and described in this directive is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Pratt and Whitney Aircraft, Division of United Technologies Corp., 400 Main Street, East Hartford, Conn. 06108. This document may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Mass. 01803, and at FAA Headquarters, 800 Independence Aveue SW., Washington, D.C. 20591. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at New England Region.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85.)

Issued in Burlington, Mass., on May 9, 1978.

NOTE.—The incorporation by reference provisions of this document was approved by the Director of the FEDERAL REGISTER on June 19, 1967.

ROBERT E. WHITTINGTON,
Director,
New England Region.

[4910-13]

[14 CFR Part 71]

[Airspace Docket No. 78-GL-8]

TRANSITION AREA

Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The nature of this Federal action is to designate controlled airspace near Kenton, Ohio to accommodate a new (VOR-A) instrument approach procedure into the Hardin County Airport, Kenton, Ohio, established on the basis of a request from the Hardin County Airport officials to provide that facility with instrument approach capability. The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions.

DATES: Comments must be received on or before July 13, 1978.

ADDRESSES: Send comments on the proposal to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 78-GL-8, 2300 East Devon Avenue, Des Plaines, Ill. 60018. A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Ill. 60018.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 456.

SUPPLEMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1,200 feet above ground. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700 foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Regional Counsel, AGL-7, Great Lakes Region, Rules Docket No. 78-GL-8, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Ill. 60018. All communications received on or before July 13, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a 700-foot controlled airspace transition area near Kenton, Ohio. Subpart C of Part 71 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 440).

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations as follows:

In § 71.181 (43 FR 440), the following transition area is added:

KENTON, OHIO

That airspace extending upward from 700 feet above the surface within a 7.5 mile radius of the center, latitude 40°36'48" N, longitude 83°38'39" N of Hardin County Airport, Kenton, Ohio.

This amendment is proposed under the authority of section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); section 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.61 of the Federal Aviation Regulations (14 CFR 11.61).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on May 8, 1978.

JOHN M. CYROCKI,
Director,
Great Lakes Region.

[EDR-350A, ODR-15A; Docket No. 32318; dated May 11, 1978]

LIBERALIZED REGULATION OF INDIRECT CARGO CARRIERS

Supplemental Notice of Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: This notice extends until June 23, 1978, the date for filing comments and until July 24, 1978, the date for filing replies in a rulemaking proceeding proposing a revised Part 296 which substantially liberalizes the Board's procedures in authorizing the indirect air carrier operations of air freight forwarders, international air freight forwarders, and cooperative shippers associations; and removes some of the requirements and restrictions currently imposed on the operations of these carriers.

DATES: Comments by June 23, 1978. Reply comments by July 24, 1978.

FOR FURTHER INFORMATION CONTACT:

John V. Coleman, Special Authorities Division, Bureau of Pricing and Domestic Aviation, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5088.

SUPPLEMENTAL INFORMATION: By Notice of Proposed Rulemaking EDR-350/ODR-15, dated March 30, 1978, (43 FR 15720, April 14, 1978), the Civil Aeronautics Board gave notice of its proposed revision of Part 296 of the Board's Economic Regulations (14 CFR Part 296) to significantly reduce the requirements and restrictions imposed upon various types of indirect air carriers of property. The proposal was made on the Board's own initiative in recognition of the passage of Pub. L. 95-163 enacting deregulation of the air freight industry, and in consideration of changes in the air freight forwarder industry that have occurred in the last 20 years. Comments were requested to be filed by May 23, 1978, and reply comments to be filed by June 12, 1978.

The Board has now received a letter from the shippers National Freight Claim Council, Inc., stating that because of the short period of time between the date of publication and the dates that responses are due, they would be unable to contact the membership of the association and prepare a reply. They believe that adoption of the revised procedural dates would allow sufficient time for notice, comments, and replies.

Upon consideration of the above, the undersigned finds good cause to grant the request for an extension of the time for filing comments and replies. Accordingly, acting under authority delegated in § 385.20(d) of the Board's Organization Regulations (14 CFR 385.20(d)), the time for filing comments in this proceeding is extended to June 23, 1978, and reply comments to July 24, 1978.

In light of this early notice of the extension of the time to submit comments and replies, we will grant further extensions only upon showing of significant and unusual circumstances which necessitate such a request.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, (49 U.S.C. 1324).)

SIMON J. EILENBERG,
Associate General Counsel,
Rules Division.

[LR-181-74]

[26 CFR Parts 1, 20, and 25]

CERTAIN ARMED FORCES SURVIVOR ANNUITIES

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to certain armed forces survivor annuities. Changes in the applicable tax law were made by the Employee Retirement Income Security Act of 1974 ("ERISA"). The regulations would conform existing regulations with ERISA and would affect all personnel contributing to armed forces survivor annuities.

DATES: Written comments and requests for a public hearing must be delivered or mailed by July 17, 1978. The amendments are proposed to be effective for taxable years ending, and to apply to individuals dying, after September 20, 1972.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Thomas Rogan of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T-181-74), 202-566-3478 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 122 of the Internal Revenue Code of 1954, to the Estate Tax Regulations

MY 18 78 UMI

V 4 3 | 9 7

(26 CFR Part 20) under section 2039 of the Code, and to the Gift Tax Regulations (26 CFR Part 25) under section 2517. These proposals would conform the regulations to section 2008 of the Employee Retirement Income Security Act of 1974 (88 Stat. 994) and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

PRE-ERISA DEVELOPMENTS

Prior to ERISA, section 122 of the Code applied to a reduction in retired or retainer pay of armed forces personnel attributable to a survivor annuity benefit under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431). Complementary provisions existed under other sections of the Code.

On September 21, 1972, Pub. L. 92-425 established similar benefits under the Survivor Benefit Plan (10 U.S.C. 1447). This Act continued the Retired Serviceman's Family Protection Plan merely to provide for the continuation of rights of persons already retired and their survivors.

EFFECT OF ERISA

Section 2008 of ERISA amends section 122 of the Code and other complementary Code provisions to apply prior tax treatment to armed forces survivor annuities under the Survivor Benefit Plan. The proposed amendments to the regulations under sections 122, 2039, and 2517 of the Code similarly apply prior tax treatment under the regulations to these annuities. Therefore, these proposals are merely conforming in nature.

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations was Thomas Rogan of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 122, the Estate Tax regulations (26 CFR Part 20) under section 2039, and the Gift Tax Regulations (26 CFR Part 25) under section 2517 are as follows:

PART 1—INCOME TAX REGULATIONS

§ 1.122 [Deleted]

Paragraph 1. Section 1.122 is deleted.

§ 1.122-1 [Amended]

Par. 2. Paragraph (a) of § 1.122-1 is amended by inserting "subchapter I of" immediately preceding "chapter 73 of title 10 of the United States Code".

Par. 3. Paragraph (b)(1) of § 1.122-1 is amended to read as follows:

§ 1.122-1 Applicable rules relating to certain reduced uniformed services retirement pay.

* * * * *

(b) *Rule applicable after December 31, 1965.*—(1) In a case of a member or former member of the uniformed services of the United States (as defined in 37 U.S.C. 101 (3)), gross income shall not include the amount of any reduction made in his or her retired or retainer pay after December 31, 1965, by reason of—

(i) An election made under the Retired Serviceman's family Protection Plan (10 U.S.C. 1431), or

(ii) The provisions of subchapter II of chapter 73 of title 10 of the United States Code (also referred to in this section as the Survivor Benefit Plan (10 U.S.C. 1447)).

* * * * *

Par. 4. Paragraph (b)(2)(iii) of § 1.122-1 is amended by inserting in subdivision (*a*) "subchapter I of" immediately preceding "chapter 73 of title 10 of the United States Code"; and by substituting in subdivision (*b*) "sections 1438 or 1452 (d)" for "section 1438".

Par. 5. Paragraph (c) of § 1.122-1 is amended by inserting in subparagraphs (1), (3), and (4) "or the Survivor Benefit Plan (10 U.S.C. 1447)" immediately after "Retired Servicemen's Family Protection Plan (10 U.S.C. 1431)" and by inserting in subparagraph (4) "or Survivor Benefit Plan" after "whether or not reduced under the Retired Serviceman's Family Protection Plan".

Par. 6. Paragraph (d) of § 1.122-1 is amended by deleting "(as defined in § 1.79-2(b)(3))" in Example (5) and by revising the material immediately preceding "Example (1)" to read as follows:

§ 1.122-1 Applicable rules relating to certain reduced uniformed services retirement pay.

* * * * *

(d) *Examples with respect to the Retired Serviceman's Family Protection Plan.* The rules discussed in this section relating to the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) may be illustrated by the following examples:

* * * * *

Par. 7. Section 1.122-1 is amended by adding at the end thereof a new paragraph (e) to read as follows:

§ 1.122-1 Applicable rules relating to certain reduced uniformed services retirement pay.

* * * * *

(e) *Principles Applicable to the Survivor Benefit Plan.* The principles illustrated by the examples set forth in paragraph (d) of this section apply to an annuity under the Survivor Benefit Plan (10 U.S.C. 1447).

PART 20—ESTATE TAX REGULATIONS

§ 20.2039 [Deleted]

Par. 8. Section 20.2039 is deleted.

§ 20.2039-2 [Amended]

Par. 9. Paragraph (b)(4) of § 20.2039-2 is amended by deleting ", also referred to as the Retired Serviceman's Family Protection Plan".

PART 25—GIFT TAX REGULATIONS

§ 25.2517 [Deleted]

Par. 10. Section 25.2517 is deleted.

§ 25.2517-1 [Amended]

Par. 11. Paragraph (b)(1)(iv) of § 25.2517-1 is amended by deleting ", also referred to as the Retired Serviceman's Family Protection Plan".

JEROME KURTZ,
Commissioner of Internal Revenue.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 879-5]

[40 CFR Part 51]

INTERGOVERNMENTAL CONSULTATION

Requirements for Preparation, Adoption, and Submittal of Implementation Plans

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

M Y 1 8 7 8 UMI

SUMMARY: This rule proposes to consolidate existing regulations requiring intergovernmental cooperation in the development of State plans to achieve national ambient air quality standards and to combine the consolidated regulations with new regulations required by the Clean Air Act Amendments of 1977. The resultant regulations require more comprehensive coverage of air quality programs and additional involvement of affected individuals and groups on a consultation process. The regulations also define the process for designation of a lead planning organization in carbon monoxide and photochemical oxidant nonattainment areas. The new regulations are necessary to meet the requirements of sections 121 and 174 of the revised Clean Air Act. Section 121 requires that the States provide a satisfactory process of consultation with local governments, designated organizations of local elected officials, and Federal land managers. Section 174 requires the designation of a lead organization for coordinating plan revisions in areas with oxidant and carbon monoxide problems and joint State-local determination of responsibilities for plan development, implementation, and enforcement.

DATES: Comments by: June 23, 1978; public hearing: June 19, 1978; proposed publication for final regulations: July 21, 1978; proposed effective date for final regulations: January 1, 1979.

ADDRESSES: Send comments to: Office of Transportation and Land Use Policy (AW-445), Room 931 West Tower, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Jerry Kurtzweg, Office of Transportation and Land Use Policy (AW-445), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-0570.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1977 require increased coordination and consultation among State and local officials in the achievement of national ambient air quality standards. The amended Act (section 121) requires States to include in their State implementation plans (SIP's) procedures for consulting with local governments and Federal land managers. A "satisfactory process of consultation" must be included for transportation controls, air quality maintenance, preconstruction review of direct sources of air pollution, nonattainment areas, prevention of significant deterioration, and certain compliance orders. EPA is required by the amended Act to promulgate regulations to assure adequate consultation.

Such coordination is essential given the complex nature of many control measures, especially transportation control measures, which require the involvement of both State and local governments in their design, implementation, and enforcement. Those organizations and individuals that would be affected by the SIP, (1) because of implementation or enforcement responsibilities, (2) because of the effect of the SIP on other planning responsibilities, or (3) because of the impact of poor air quality and the imposition of sanctions in the absence of an acceptable SIP, should be involved in SIP development. Only with such involvement can a successful program be developed.

In nonattainment areas for carbon monoxide and photochemical oxidants, States have additional consultation requirements under section 174 of the amended Act. States are required to determine jointly with local governments the division of responsibility for development, implementation, and enforcement of the SIP's for these areas. Local governments were provided an opportunity to designate by agreement an organization to prepare the plan for these nonattainment areas, if they did so by February 7, 1978. EPA and the Department of Transportation issued in December 1977 joint guidelines on the process and criteria to be used for such designations. The Governor is required to either certify a locally designated organization or to designate an organization or State agency. The Governor's designation must be made after consultation with local officials and in accordance with the joint determination of responsibilities.

Existing EPA regulations pertaining to intergovernmental cooperation in developing, implementing, and enforcing SIPs are now found primarily in §§ 51.21 and 51.58 of Title 40, Code of Federal Regulations. These sections deal with transference of information from one agency to another (51.21 (a) and (c)), identification of responsibilities (51.21(b)), and coordination of air quality maintenance planning with other planning programs (51.58). The Clean Air Act Amendments of 1977 require a more comprehensive approach in terms of involvement of affected programs and individuals than is required under the existing regulations.

The regulations proposed below reflect a new structure designed to make Part 51 of the Code of Federal Regulations more readable and understandable. All of Part 51 will eventually be rewritten. This new structure incorporates the use of more subparts in which regulatory material currently contained in sections will be placed. The new format also allows the use of more headings than the current format. The additional headings will enable the reader to more readily find pertinent requirements.

These proposed regulations have combined the existing regulations with the new requirements of the Clean Air Act Amendments under a new Subpart M entitled "Intergovernmental Cooperation" within Part 51. Within Subpart M, §§ 51.243 through 51.246 deal primarily with the new requirements for continuing consultation. Section 51.241 includes the process required by Section 174 of the amended Act for designation of an organization for coordinating plan revisions for carbon monoxide and photochemical oxidant nonattainment areas.

Detailed guidelines for implementing Section 174 were issued jointly by EPA and the Department of Transportation (DOT) on December 14, 1977, and were distributed to state and local governments. Because the Amendments require local designation of a planning organization by February 7, 1978, there was insufficient time to issue the information in these guidelines as regulations.

Under the 174 guidelines and the regulations contained in the proposed § 51.241, States are required to submit to the Administrator through EPA regional offices a list of all designated organizations, including a description of their boundaries and responsibilities, and brief discussion of the reasons for the designation. The guidelines request that States identify for EPA by April 1, 1978, the organization responsible for each carbon monoxide and/or photochemical oxidant nonattainment area. A list of the organizations and other related information requested by the regulations must be included in the implementation plan revision submitted by January 1, 1979.

Through the 174 guidelines and these regulations, EPA is also encouraging further coordination and consolidation of Federally sponsored planning programs. Under the guidelines, the State must consider, before designating a lead planning organization, whether the organization has other areawide planning responsibilities. Coordination or integration of common plan elements is required by Section 51.247. This encouragement is consistent with President Carter's Environmental Message of May 1977 and with subsequent actions taken by the President to eliminate, consolidate, or simplify Federal planning requirements. The Environmental Message in part stressed the need for improved implementation of environmental laws through more efficient delivery of Federally funded programs. The need to consolidate Federal planning requirements was reiterated by President Carter in his March 27, 1978, announcement of a national urban policy.

Certain requirements in these regulations related to the transportation

V 4 3 | 9 7

air quality planning processes are being proposed by both EPA and DOT. These requirements will be reflected in revisions to DOT's joint regulations for the Federal Highway Administration (FHWA) and the Urban Mass Transportation Administration (UMTA) on the transportation planning process. The revisions to the FHWA-UMTA regulations will be proposed and adopted in a separate rulemaking action.

A process of consultation is not more specifically defined in these regulations because a satisfactory process may vary depending upon the program or action affected and upon established channels of communication within each State and local area. The regulations do describe the objectives of a satisfactory process of consultation. These objectives include providing for information dissemination and education, the opportunity for collaboration on development of the SIP, and joint determination of key issues in SIP development. As used in these regulations education means more than just dissemination of written information materials and may include workshops, question and answer sessions, personal visits or other techniques. Key issues include the selection of control strategies, especially those that require local enforcement, implementation or commitment of resources.

The regulations are not designed to require the replacement of existing consultation procedures. However, such procedures should be augmented or improved where necessary to ensure that affected organizations or individuals have substantial opportunity to express their opinion and concern during development of the SIP. A satisfactory process of consultation is a necessary component of an approvable SIP.

More specific guidance describing consultation procedures pertaining to the Clean Air Act requirements for a transportation planning process and prevention of significant deterioration (PSD) will be issued in the future. The transportation planning process guidelines will be published shortly. PSD regulations were proposed November 3, 1977 (42 FR 57480).

These regulations are procedural in nature and affect mainly governmental personnel. Because the required level of effort will not necessitate an appreciable increase in resources, these regulations do not meet the minimum criteria for significant regulations requiring a regulatory analysis as described in Executive Order 12044.

The relationship of Indian governing bodies to the States in implementation of EPA programs, including the air pollution control programs affected by these regulations, is currently under consideration by an EPA working group. Thus, this issue was not explicitly addressed in these regulations.

Comments and Opportunity for Public Hearing

Interested parties are encouraged to participate in this proposed rulemaking action by submitting written comments, to Jerry Kurtzweg at the address given above. All relevant comments received no later than June 23, 1978, will be considered. Comments will be available for public inspection during normal business hours at the Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street SW., Washington, D.C. 20460.

EPA will also hold a public hearing on today's actions. The hearing will be of the informal, legislative type. Persons desiring to appear at such a hearing should, no later than June 9, 1978, file a written statement with Jerry Kurtzweg at the address given in the introduction of this preamble. Each statement should indicate the person's name and address, the nature of the person's interest in the rulemaking proceedings, and the group or business entity (if any) such person represents. The hearing will be held on June 19, 1978, in Room 3906, 401 M Street SW., Washington, D.C. 20460. Comments filed in writing will be given equal weight to statements made at public hearings. The EPA official responsible for drafting these regulations is John Hidinger, Director, Office of Transportation and Land Use Policy.

Dated: May 10, 1978.

Douglas M. Costle,
Administrator.

EPA proposes to amend Title 40 of the Code of Federal Regulations, Chapter I, Part 51, as follows:

§ 51.21 [Reserved].

§ 51.58 [Amended].

1. Sections 51.21 and 51.58(b)-(h) are revoked and reserved.

2. Section 51.61, paragraph (d) is revised to read as follows:

§ 51.61 AQMA plan: Submittal format.

• • • • •

(d) AQMA plan. Applicable information required under §§ 51.52(b), 51.53, 51.54, 51.55, 51.56, 51.58, 51.59, 51.60 and Subpart M.

• • • • •

§ 51.63 [Amended].

3. In § 51.63 paragraph (a) the reference to "51.58(h)" is deleted from the first sentence.

Subparts E-L—[Reserved]

4. New Subparts E to L are added and reserved.

5. A new Subpart M is added as follows:

Subpart M—Intergovernmental Cooperation

Agency Designation

Sec.

Authority: Secs. 110, 121, 174(a), 301(a) Clean Air Act as amended (42 U.S.C. 7410, 7421, 7504, and 7601(a)).

SUBPART M—INTERGOVERNMENTAL COOPERATION

Agency Designation

§ 51.240 General plan requirements.

Each State implementation plan must identify organizations, by official title, that will participate in developing, implementing, and enforcing the plan and the responsibilities of such organizations. The plan shall include any related agreements or memoranda of understanding between the organizations.

§ 51.241 Nonattainment areas for carbon monoxide and photochemical oxidants.

(a) For each region or portion of a region in which the national primary standard for carbon monoxide or photochemical oxidants will not be attained by July 1, 1979, the Governor (or Governors for interstate areas) shall certify the organization of elected officials of local governments designated by agreement of affected local governments, or he or she shall designate, after consultation with local officials, the organization responsible for developing the revised implementation plan or portions thereof for such region. The procedures described in the "Section 174 Guidelines" issued jointly in 1977 by EPA and the Department of Transportation should be consulted in this process.

(b) The Governor shall certify the locally designated organization unless no agreement was reached by affected local governments by February 7, 1978, or the locally designated organization does not meet the criteria for a lead planning organization contained in the "Section 174 Guidelines." In making a designation, the governor shall take into consideration any on-going process of local designation in existence on February 7, 1978. The designation shall be in accordance with the joint determination of responsibilities for plan development, implementation, and enforcement required by section 174(a) of the Clean Air Act, as amended.

(c) The Governor shall certify or designate, where feasible, the metropolitan planning organization responsible for the continuing, cooperative, and comprehensive transportation planning process required under section 134 of Title 23, United States Code; the organization responsible for air quality maintenance planning; or the organization responsible for both. In determining the feasibility of certifying or designating such an organization, the Governor shall also consider whether the organization gives adequate representation to local elected officials of general purpose governments and has areawide planning responsibilities in other Federal environmental or community development planning programs which could contribute to integration and consolidation of planning functions. Where possible, preference should be given to organizations with several programs responsibilities such as comprehensive planning or water quality management. Attention is directed to Part IV of the Office of Management and Budget Circular A-95 (41 FR 2052) which encourages the designation of established, substate comprehensive planning agencies as the agencies to carry out Federally assisted or required areawide planning.

(d) The Governor shall submit the following information to the Administrator of the EPA through the appropriate EPA regional office. The information shall be submitted as part of the State implementation plan revision required on January 1, 1979.

(1) A list of all air quality planning organizations certified or designated within the State.

(2) A description of the geographic jurisdictions of these organizations.

(3) A general description of the responsibilities of the designated or certified organizations.

(4) A brief discussion of the alternatives investigated for consolidation of environmental and other planning functions, and the basis for the selection of the designated organization.

(5) A brief description of the consultative process leading to the selection of a certified or designated organization, including the disposition of significant concerns raised by participants.

§ 51.242 [Reserved]

Continuing Consultation Process

§ 51.243 Consultation process objectives.

Any governmental organization that has the lead responsibility for development of one of the State implementation plan elements listed in § 51.244 shall provide for a continuing intergovernmental consultation process in carrying out those responsibilities. Already established consultation processes, such as those established under § 51.241, may be used, and supplemented if necessary, to meet the requirements of this subpart. A satisfactory consultation process must include provisions to meet the following objectives:

(a) Provide for information dissemination to and education of relevant organizations and individuals.

(b) Provide an opportunity for involvement of affected governmental organizations and elected officials in development of the revised implementation plan.

(c) Provide an opportunity for joint resolution by affected governmental organizations and individuals of key issues in the development of the revised implementation plan. Key issues include the selection of control strategies, especially those that require local enforcement, implementation or commitment of resources.

§ 51.244 Plan elements affected.

The consultation process must ensure consultation during preparation of the following measures:

(a) Procedures for preconstruction review of direct sources of air pollution.

(b) Transportation-related control measures.

(c) Control measures, other than transportation-related measures, applicable to nonattainment areas.

(d) Measures for prevention of significant deterioration of air quality, and protection of visibility in Federal Class I areas.

(e) Air quality maintenance measures.

(f) Delayed compliance orders described in Section 113(d) of the Clean Air Act Amendments of 1977.

§ 51.245 Organizations and officials to be consulted.

A continuing intergovernmental consultation process established in accordance with § 51.243 shall ensure the involvement, where appropriate, of the following organizations or individuals:

(a) State agencies responsible for air pollution control, transportation planning, energy planning, community development and housing planning, solid waste management, and water quality management.

(b) Elected officials of local governments.

(c) Federal land managers having authority over lands affected by State implementation plans.

(d) Affected local and areawide agencies, responsible for air pollution control, comprehensive, community development, transportation or energy planning, and water quality, solid waste or coastal zone management.

(e) Public interest organizations having a major interest in the program.

§ 51.246 Timing

The continuing intergovernmental consultation process shall apply to any measure related to the plan elements in § 51.244 adopted after August 7, 1978. The State implementation plan shall be revised to include such a consultation process no later than January 1, 1979.

Relationship of Plan to Other Planning and Management Programs

§ 51.247 Coordination with other programs.

(a) A governmental organization that has a major responsibility for developing any of the State implementation plan elements listed in § 51.244 shall coordinate with other planning and management programs substantially affecting or affected by such elements through the development of procedures to ensure the following:

(1) Use of common data.

(2) Coordination, and where possible, integration of work programs.

(3) Use, where possible, of common policy advisory bodies.

(4) Coordinated, and where possible, common public participation and information programs.

(5) Incorporation of appropriate air quality criteria as a factor in other planning programs.

(6) Consideration of other planning objectives in development of control strategies.

(b) The coordination procedures shall include a process for determining consistency between the State implementation plan and other plans and programs, such as those pertaining to transportation, land use, solid waste, water quality, or community development substantially affecting or affected by the implementation plan. It shall include a list of any memoranda of understanding developed, as part of that process, between the agencies responsible for development, implementation, or enforcement of air quality plans. The provisions of items 3a through d, Part IV of the Office of Management and Budget Circular A-95 shall be considered in the preparation of memoranda of understanding.

§ 51.248 [Reserved]

§ 51.249 Transmittal of information.

Each plan shall provide assurances that the governmental organization having primary responsibility for implementing national air quality standards in any region, or portion thereof, will promptly transmit to other orga-

M Y 1 8 7 8
UMI

V 4 3 | 9 7

nizations having similar or related responsibility in the same or other States, information on factors (e.g., construction of new industrial plants) which may signficantly affect air quality in any portion of such region or in any adjoining region.

§ 51.250 A-95 clearinghouse review.

A draft of any major implementation plan revision including any of the six elements listed in § 51.244 shall be submitted to the cognizant State and areawide clearinghouse as established under the Office of Management and Budget Circular A-95, for review and comment for a period of 45 days. Comments received from the clearinghouses within that 45-day period shall be considered. Copies of these comments shall be retained by the organization initiating the plan revision for inspection by the Administrator and the public.

§ 51.251 Summary of plan development participation.

An organization with responsibility for the development of all or a portion of the implementation plan elements listed in § 51.244 shall include in the plan:

(a) A summary of the procedure used to involve the public, local and areawide governmental organizations, State agencies and the State legislature, and Federal land managers in the development of the plan revision.

(b) A discussion of any significant comments raised during the consultation process, including those received in the A-95 clearinghouse review or in any public hearing held on the plan. The discussion shall include a description of the final disposition of such points.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 74-9; Notice 04]

CHILD RESTRAINT SYSTEMS; SEAT BELT ASSEMBLIES AND ANCHORAGES

Proposed Rulemaking and Invitation for Applications for Financial Assistance

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Notice of proposed rulemaking and invitation for applications for financial assistance in commenting on the notice.

SUMMARY: This notice is being issued in response to public requests. It would amend the existing child restraint standard by extending its applicability to all types of child restraints designed for use in motor vehicles. It would also upgrade existing child restraint performance requirements by improving the performance criteria and by replacing static tests with dynamic tests using anthropomorphic child dummies. The amendments are intended to reduce the number of children under 5 years of age that are killed or injured in motor vehicle accidents.

DATES: Comments must be received on or before December 1, 1978. Applications for financial assistance in commenting on this notice must be received on or before June 19, 1978. Proposed effective dates: The date of publication of the final rule in the FEDERAL REGISTER for optional compliance with Standard No. 213-80 instead of existing Standard 213, and May 1, 1980, for Standard No. 213-80 and for the deletions from Standard No. 209.

ADDRESSES: Comments should refer to the docket number and must be submitted in writing to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. Applications for financial assistance should be submitted in writing to: Ms. Jeanette Feldman, Public and Consumer Affairs, National Highway Traffic Safety Administration, Room 5232, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-0670.

FOR FURTHER INFORMATION CONTACT:

Mr. Jere Medlin, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-2244.

SUPPLEMENTARY INFORMATION:

APPLICATIONS FOR FINANCIAL ASSISTANCE

The National Highway Traffic Safety Administration (NHTSA) invites all qualified individuals, organizations and other parties financially unable to participate in this proceeding to apply for financial assistance. The agency is particularly interested in applications that will innovatively address the problems of improving child restraint usage rates and the prevention of misuse.

Each applicant should specify in its application which issued it proposes to address if it receives assistance and describe the nature of its proposed work product. The agency urges applicants to indicate whether and how they will address the following issues in their comments:

(1) The impact, if any, on the cost of child restraints that would be caused by the amendments proposed in this notice and by any additional amendments advocated by the applicant;

(2) The highest practicable level of safety that child restraints can be required to achieve without causing the cost of those restraints to increase to the point that a significant number of consumers are inhibited from voluntarily purchasing child restraints; and

(3) Whether the proposed amendments alone would adequately address the problem of misuse of child restraints or whether those amendments should be replaced or supplemented by alternative nonregulatory (educational) measures. Descriptions of ideas for specific alternative measures are invited. Examples of such measures include sample labels for restraints, pamphlets to be distributed in places such as obstetricians' and pediatricians' offices, scripts for films to be shown in childbirth classes of maternity wards or on television, spot media announcements, and educational materials for groups such as medical students. Applicants who indicate that they will address the alternative measures should outline their plans for explaining why they think those measures will be effective.

All applications submitted before the deadline specified at the beginning of this notice will be examined by an evaluation board of NHTSA and Department of Transportation officials to determine whether each applicant is eligible to receive funding. Consideration of late applications is at the discretion of the evaluation board.

In general, an applicant is deemed eligible if it demonstrates in its application that: (1) It represents an interest whose representation can be reasonably expected to contribute to a full and fair determination of the issues in the proceeding; (2) its participation is reasonably necessary to represent that interest; (3) it can competently represent that interest; and (4) it lacks financial resources to participate in the absence of such assistance. If more than one applicant representing the same or similar interest is deemed eligible, the board will either select more than one applicant if the eligible applicants seek to present significantly different points of view regarding this notice or select the applicant which demonstrates that it can make the strongest presentation.

Payment may be made as soon as possible after the selected applicant has completed its work and submitted its claim. Each applicant must submit as part of its application all information required by section 5 of the financial assistance regulation which governs the operation of the Department's public participation program (42 FR 2864, January 13, 1977). Failure to submit the required information may result in delays in evaluation and possible disqualification of an application. A copy of the regulation may be obtained from Ms. Jeanette Feldman at the address and telephone number indicated at the beginning of this notice.

M Y 1 8 7 8 UMI

BACKGROUND

NHTSA data indicate that approximately 1,000 children up to age 5 are killed and approximately 100,000 children in this age group are injured yearly as occupants of motor vehicles. Many of these deaths and injuries could be prevented or reduced in severity by restraining the child so that he or she is not thrown against the vehicle interior during a crash. Safety belts, air bags, and other devices are or will be available in motor vehicles. However, these safety devices are generally not designed for use by infants and small children and, as a consequence, offer them limited protection. The size and fragility of infants and small children makes their use of safety belts alone impractical in many cases.

Car beds, infant carriers, child seats, and child harnesses are the commonly available means of providing restraint in motor vehicles for children under 5 years of age. These child restraint systems are not mandatory safety equipment in passenger cars, but are purchased by parents voluntarily for use in motor vehicles. In addition to providing the benefit of restraint in collisions, use of these systems prevents children from falling and being injured during vehicle turns and stops. Use also prevents the children from distracting or interfering with the driver by moving around inside the vehicle while it is in motion.

Before the issuance of existing Standard No. 213, there were numerous inexpensive child seats that offered very limited protection. Standard No. 213 required the elimination or improvement of those seats.

There is substantial room for improvement in Standard No. 213 and in the provisions of Standard No. 209 regulating child harnesses. Neither standard regulates car beds or infant carriers. Both standards rely upon static instead of dynamic tests for measuring the performance of child restraints.

Further, a concerted effort needs to be made to reduce the problem of misuse of child restraints. Misuse substantially reduces the safety value of these restraints. The misuse typically takes the form of incorrect attachment of the restraint to the vehicle or incorrect securing of the child in the restraint.

Any move to upgrade Federal standards regulating child restraints is complicated by the possible price sensitivity of such restraints. The NHTSA has learned from data supplied by child seat manufacturers that approximately 20 percent of child seat sales are in the lowest price brackets. This suggests that any amendment that would significantly raise the price of the cheapest seats could potentially have a substantial adverse effect on the sales of these voluntarily purchased items of safety equipment. The net effect on safety could be negative if the effect of sales losses exceeds the benefit of the improved performance of the restraints which are purchased. Thus, to maximize the total safety benefits of its efforts to extend and upgrade its restraint requirements, the agency must balance those improvements against impacts on the price of restraints.

The agency must also consider the effects of improved performance on the ease of using child restraints. If either the attaching of restraints to vehicles or securing of children in the restraints becomes overly complex, the already substantial problem of misuse could be greatly exacerbated.

In response to the need for an improved Federal child restraint safety standard, the NHTSA published a proposal to expand the scope of the standard to cover all forms of infant and child restraints, require dynamic crash simulation tests of the restraints with anthropomorphic test dummies, and specify the dummies to be used for those tests (39 FR 7959; March 1, 1974). Further action on that proposal was delayed pending additional work on dummy specifications and calibration. Based on recent child restraint misuse studies and a desire to improve usage of child restraints while improving safety, and on evaluation of the comments concerning the 1974 proposal, the NHTSA has decided to issue a modified proposal for a revised child restraint system standard and seek further public comment.

In a separate notice appearing elsewhere in this issue of the FEDERAL REGISTER, the agency is proposing specifications and performance criteria for test dummies that simulate a 3-year old child and a 6-month old infant to Part 572, Anthropomorphic Test Dummies. The comment closing date for this notice has been set for December 1, 1978, to allow child restraint manufacturers to procure, test, and evaluate their restraints using the proposed dummies. The agency would, however, appreciate receiving any preliminary comments on the proposed child restraint standard by manufacturers before testing and by other concerned individuals or organizations who will not be conducting any testing.

SUMMARY OF PROPOSED AMENDMENTS

The most significant amendments proposed by this notice are set forth below:

(1) Dynamic tests would be used to evaluate the performance of the child seating system in a manner which simulates an actual vehicle crash. The simulated crash would be straight forward (0 degree frontal) at 30 mph. The seating systems would be anchored in accordance with the manufacturers' instructions. For restraints equipped with supplementary anchorage belts or tether straps, an additional frontal test at 20 mph would be conducted with the child restraint secured by the lap belt only, and without the tether strap attached. This test is intended to ensure a minimum level of safety performance when the tether strap is not used as data indicate happens about 50 percent of the time.

(2) A standard seat assembly, specified by drawings in docket 74-9, would be used to represent the typical vehicle bench seat and thereby avoid the cost of testing child restraints on numerous production vehicle bench seats.

(3) Injury criteria would be specified for both the head and chest of the dummy for child restraints recommended by their manufacturers for children over 20 pounds. Padding requirements would have to be met by restraints to be used by children weighing not more than 20 pounds.

(4) Frontal head and knee excursion limits would be specified for front-facing child restraints and for harnesses.

(5) During and after dynamic testing, each child restraint would have to retain the dummy within the system; exhibit no complete separation of any load-bearing structural element; if adjustable, remain in its pre-test adjusted position; and limit the collapse of the restraint seat back.

(6) To prevent child restraint surfaces from injuring children or other vehicle occupants during crashes, size, shape and energy absorption requirements would be specified for those surfaces.

(7) Requirements would be set forth for the construction of belt restraints and for the provision of belts in certain child restraint systems.

(8) The amount of force necessary to open belt buckles and release a child from a child restraint system would be specified.

(9) Child seating systems would have to be attachable to the vehicle by means of the vehicle seat belts.

(10) Specified information, such as installation instructions, and the height and weight limits for children which should use the child restraint, would have to be both on the restraint and in an accompanying information booklet or sheet.

MAJOR DIFFERENCES BETWEEN CURRENT AND 1974 PROPOSALS

(1) The current proposal proposes dynamic frontal test only while the 1974 proposal proposed dynamic frontal, lateral and rear tests.

(2) The current proposal would require child seats with tethers to be

V 4 3 | 9 7

tested at 30 mph with the tether attached and at 20 mph without it attached, while the 1974 proposal would have required only the former test.

(3) The current proposal specifies less stringent limits than the 1974 proposal specified for the distance which the child dummy head can move forward during restraint tests. However, knee excursion limits to prevent "submarining" of occupants are included in this proposal.

(4) The current proposal specifies tha use of a standard vehicle bench seat assembly for testing instead of the provision in the 1974 proposal for testing on production vehicles bench seats.

(5) The current proposal sets forth three alternative ranges of permissible force levels necessary to release buckles on child restraint harnesses while the 1974 proposal used the level in existing FMVSS No. 213.

(6) The current proposal does not itself propose specifications regarding the dummies to be used for dynamic testing but is premised upon the issuance of a separate notice which will contain those specifications.

Proposal for Standard No. 213-80

Applicability

Standard No. 213-80 would impose requirements on all types of child restraints used in motor vehicles. Currently, the Federal safety standards cover only child seats, i.e., restraints for children weighing up to 50 pounds who are capable of remaining erect when seated (Standard No. 213), and type 3 belt assemblies, known as child harnesses, which are combination pelvic and upper torso restraints for children who weigh not more than 50 pounds and are capable of sitting upright by themselves (Standard No. 209). In addition to these restraints, the proposed standard would also regulate restraints, such as car beds and infant seats, used by children unable to sit erectly.

Standard No. 213 would be amended to permit, at the manufacturer's option, compliance with the current requirements of that standard or with the new requirements beginning on the date that the final rule is published in the Federal Register. Beginning on May 1, 1980, compliance with the new requirements (i.e., Standard 213-80) would become mandatory.

In 1974, the Juvenile Products Manufacturers Association (JPMA) recommended postponement of the requirements for infant carriers because the JPMA believes that there is a lack of sufficient data regarding the biomedical characteristics, such as cranial impact tolerance, of very small children to determine the proper criteria to be used for infant restraints. The NHTSA estimates indicate that approximately 225 deaths and 22,100 injuries occurred to children under 1 year of age during 1975 in crashes where restraints could have prevented death or serious injury. Therefore, the NHTSA considers such requirements essential and cannot justify further delay in their issuance. This proposal does not establish the criteria discussed by JPMA, but instead adopts the approach of specifying padding requirements for restraints used by children 20 pounds or under.

Volvo of America argued that "vehicle specific" child restraints (systems uniquely designed for installation in a particular make and model automobile but which do not utilize vehicle seat belts for anchorage) should be exempt from the new regulation. The agency has considered the currently available vehicle specific systems and concluded that when used properly they would provide an adequate level of dynamic and other performance characteristics. Despite this advantage, the agency is concerned that allowing a device which is uniquely designed for specific vehicles would result in misuse; i.e., use in other than those specific vehicles. It is traditional in the United States for families with children to "hand down" the paraphenalia, such as child restraints, needed for infants and small children to other families with infants. Thus, it can be expected that a vehicle specific child restraint would be handed down to someone with a different make and model of car who would then attempt to use it dispite its inappropriateness for that vehicle. The safety value of a restraint used improperly is greatly diminished. Also the installation of these devices even in Volvos varies from model to model and requires complex instructions. All of these factors make the possibility of improper use very high.

Standardization of the means of anchoring a child restraint to a vehicle is vital to prevent misuse. By requiring all restraints to be attachable to vehicle seats by the vehicle seat belt, consumers will be assured of a uniform method of attaching the restraint and there will be less confusion regarding that aspect of use. For similar reasons, the agency requires that all vehicle seat belts have push button releases.

A simple, effective way of testing vehicle specific seats has not been devised. Therefore the agency is concerned that if an exemption were allowed for vehicle specific seats, the absence of control over their manufacture could result in the design and production of relatively unsafe seats which do not securely attach to the vehicle, and do not provide an adequate level of child protection.

For these reasons, the agency proposes that vehicle specific child restraints must comply with the new standard.

Dynamic Tests

One of the most significant prerequisites for a safe, useful child restraint system is that is use means that do not injure the child for providing restraint and preventing occupant impact with the vehicle interior. Other significant prerequisites are that restraints not concentrate excessive loads on the soft portions of a child's body, or collapse, separate, or fold to compress or otherwise injure a child during a crash.

The static force test currently in Standard 213 can only partially ensure that these prerequisites are met. In these tests, forces that are in the range of those encountered in a crash are gradually applied to the restraint system by means of a laboratory tensioning device. While this method of testing measures the strength of the device, it does not evaluate the performance of the system under conditions similar to those found in an actual vehicle crash.

A superior way of evaluating the performance of a child restraint is to do so in a dynamic simulation of a vehicle impact. This way provides greater assurance that the restraint will withstand and actual crash without injuring the child. The dynamic simulation involves securing a test dummy in the child restraint which in turn is attached to a representative three position vehicle bench seat. The assembly is then subjected to acceleration to simulate a vehicle crash.

Dynamic testing such as this is routinely used to evaluate the performance of both experimental and mass-produced vehicles and equipment. For example, the agency's Standards Nos. 204, 208, 212, and 301-75 employ dynamic testing to evaluate vehicle systems.

The NHTSA has drawn upon substantial work on dynamic testing in developing this proposal. Several organizations and the NHTSA have undertaken research and testing to develop a suitable dynamic test requirement for child restraint systems. An existing Canadian standard specifies dynamic test requirements. The Economic Commission of Europe and some member countries have developed drafts of dynamic test standards. As noted above, the NHTSA issued and received comment on a proposed dynamic test standard. Further, Consumers Union has conducted comparative dynamic tests of child restraint systems available in this country.

A standard vehicle seat assembly with three seating positions would be used in the dynamic testing. It was developed by the Highway Safety Research Institute at the University of Michigan. The standard seat, which has replaceable foam cushions, would save the restraint system manufacturers the expense which they would have borne under the 1974 proposal of

M Y 1 8 7 8 UMI

testing their restraints on a variety of production vehicle bench seats. Use of the standard seat will also greatly simplify the testing program. The seat is representative of production bench seats. For example, the standard seat back deflects a programmed amount in frontal crash simulations to reflect the performance of production seats. This standard seat has already been used in three child restraint system testing programs. Copies of the Drawing Package SAD-100-1000 for the standard seat assembly may be purchased from the NHTSA's Technical Reference Division at the same address given above for the Docket Room or by calling Mr. Robert Hornickle at 202-426-2768. The original report regarding the seat's development is available under Contract No. DOT-HS-4-00865, "Fabrication of a Standard Vehicle Bench Seat."

The child restraints would be tested in the center seating position of the standard seat. Available data indicate that the center position is generally the safest position in which to install a child restraint system and is consequently the position recommended by this agency for use by motorists.

In response to Hamill's request to know the number of tests necessary as a basis for certification, the agency notes that the Act requires that each vehicle and item of equipment comply with applicable standards, and that the manufacturer must certify compliance with those standards "in the exercise of due care" (15 U.S.C. 1397 (b)(2)). The NHTSA's longstanding position is that a manufacturer is free, within the limits of due care, to choose any means to determine that a vehicle or item of equipment would comply if tested by the agency in the manner specified in the standard. Thus, the chosen means must be reasonably calculated to establish compliance. What constitutes due care varies with the circumstances of each manufacturer. All manufacturers must make the initial determination of what is sufficient as part of their duty to certify. The final determination is made by the agency.

Questor Corporation asked for a tolerance for the impact velocity at which a child restraint system must comply. As the agency has stated in its interpretations on similar issues, the safety standards do not set forth instructions, but performance levels that vehicles and equipment are required by law to be capable of meeting. The use of any tolerance for this purpose would be meaningless and confusing. For example, stating that a product must meet a performance requirement while traveling at 30 mph, plus or minus 1 mph, is the legal equivalent of specifying 29 mph with no tolerance. Manufacturers can accommodate any problems they may have in this regard by testing at a speed sufficiently higher than the speed specified in the standard. Questor's suggestion has, therefore, not been adopted.

Test Dummies

A six-month old dummy and a three-year old dummy have been tentatively selected for testing child restraint systems under the proposed standard. The six-month old dummy was specified in the 1974 proposal as being of "sailcloth construction filled with plastic pellets and lead shot for correct weight distribution." The dummy has since been dynamically tested, modified, and retested in infant carriers of three different maufacturers. The new dummy represents and advance in the state-of-the-art and is vastly superior to the former dummy. Very precise definitions of the new dummy are contained in a set of five blueprints and an engineering description which are available in docket 74-9 to all interested persons.

The tentatively selected three-year old dummy is the NHTSA test dummy SA103C, a slightly modified version of the Alderson Model VIP-3C dummy. The NHTSA test dumy SA103C is available for purchase from at least one dummy manufacturer and blueprints are available in docket 74-9 for use by any manufacturer wishing to produce these dummies. An operation and maintenance manual for the dummy is also available in the docket. Detailed instructions for clothing the three-year old dummy are specified in the proposal to ensure that the test conditions are carefully controlled.

Drawing Packages for both the six-month old dummy and the three-year old dummy may be obtained from: Cooper-Trent Operation, Keuffel-Esser Co., 15251 N. Danville St., Arlington, Va. 22201, Attention: V. Cascio 703-524-9000.

As noted above, a proposal to incorporate the specifications and performance criteria for the tentatively selected six-month and three-year-old dummies in Part 572, Anthropomorphic Test Dummy, of Title 49 of the Code of Federal Regulations appears in today's issue of the Federal Register. The December 1, 1978, comment closing date will permit child restraint manufacturers to procure the proposed dummies and test and evaluate their restraints during the comment period.

Dynamic Performance

In the simulated crash tests, the child restraint would be required to maintain system integrity (i.e., not fracture or separate) and limit excursion of the torso, head, and knees. These requirements would reduce the likelihood that a child using a child restraint system would be injured by the collapse or disintegration of the system or by contact with the interior of the passenger compartment. A head injury criterion (HIC) and maximum acceleration level for the chest would be specified to limit forces on the child to tolerable levels.

One objective of the system integrity requirements is to prevent ejection from the restraint system. Another is to ensure that the system does not fracture or separate in such a way as to harm the child. To this end, this notice proposes that when a restraint system is dynamically tested with the appropriate dummy (some systems, such as ones convertible from infant carriers to child seats, would be tested with both dummies) seated in it, there would not be any complete separation of any load bearing structural element of the system or any partial separation exposing surfaces with sharp edges that may contact an occupant. This proposal is a modification of the 1974 one which would have prohibited any separation. This change was made in response to the comment by most child restraint manufacturers that some separation might be purposely designed into a restraint system to improve its energy absorption performance.

This proposal specifies that an adjustable-position restraint would have to be able to meet the system integrity requirements at any designated adjustment position recommended by the restraint's manufacturer for use in motor vehicles and that it remain in its adjusted position during the test. USI West Company suggested that "controlled change of adjustment" or limited movement from one adjustment position to another be permitted. Dynamic tests have shown that the movement of adjustable or reclinable restraints can trap a child's finger between the moving parts and sever it. Therefore, USI West's suggestion has not been adopted.

Some front-facing restraint systems have seat backs that could collapse during a crash and injure children by compressing them. Accordingly, this proposal would require that front-facing restraints be construed so that the angle between the child restraint seat back and the restraint seating surface is not less than 45° after the test.

Injury criteria (expressed in terms of limits on resultant acceleration) are proposed for both the head and chest of the three-year-old test dummy to allow a quantitative evaluation of the dynamic performance of the child restraints to be made. This approach permits the measurement of padding effectiveness during the dynamic test, thus eliminating any need for a separate test for that purpose and the costs associated with such a test. Since the construction of the six-month-old

V 4 3 | 9 7

dummy prevents installing accelerometers so that they will stay in place within the dummy during a test and give accurate measurements, the injury criteria would apply only to restraints recommended by their manufacturers for use by children weighing over 20 pounds.

This notice proposes forward head and knee excursion limits (i.e., limits on how far these portions of the body may move forward) for front-facing child restraints and harnesses. The head excursion limits reflect the maximum available distance for safe forward movement available in cars today.These limits are greater than those proposed in 1974. The increase is proposed to encourage child restraint designs that are easy for motorists to use properly. The knee excursion limits would prevent restraint manufacturers from controlling head excursion by designing their restraints so that their occupants submarine excessively during a crash, i.e., so that their bodies slide down and foward, legs first.

Further, front-facing child restraints and child harnesses would be required to retain the torso of the dummy within their confines during the dynamic testing. In the case of child harnesses and front-facing child restraints with harnesses, the retention requirement would be met if after the dynamic testing the belts of the harness were still located across the appropriate areas of the torso. In the case of front-facing systems without harnesses, the agency is considering defining retention as not permitting the center of each head target point on either side of the dummy head to touch or pass through a horizontal plane 4 inches vertically above the center of the head target points when the dummy is places in accordance with the proposal in the system before the dynamic testing.

When dynamically tested, rear-facing restraints (i.e., infant carriers) would be required to retain the dummy's head within the confines of the restraint and the back support surface would not be allowed to tip forward far enough for the angle between it and the vertical to exceed 60 degrees. If the support surface were allowed to tip more, the infant in the restraint could slide headfirst out of the shoulder straps because of the rounded shape of an infant's shoulders. Retention here would have the same meaning suggested above for child harnesses. Child beds would be required to retain the dummy's head and torso within its confines during the dynamic testing. The typical car bed is rectangular and has an open top and sides of uniform height. Retention in the case of these car beds would mean not permitting any portion of the dummy head or torso to pass through a plane tangent to the tops of the car bed sides.

Unlike the 1974 proposal, this proposal does not contain requirements for lateral dynamic tests and for limits on lateral excursion. During 1977, the NHTSA tested a number of child restraints and found that in outside seating positions only one of those restraints, one which required a tether, could meet the lateral head excursion limits necessary to prevent head contact with the door and other interior vehicle side surfaces in a 20 mph test at a horizontal angle of 60 degrees from the direction of the test platform travel. Some restraints with impact shields, which performed well in frontal crashes and which are rarely misused, could not pass the lateral test even when placed in the center seating position. Because of the cost of the design changes necessary to meet the lateral test, the problems with misuse of tethers, and the possible price sensitivity of child restraint sales, the agency decided not to repropose lateral requirements now.

Rear dynamic tests too have not been reproposed. One reason for not doing so is that child restraint systems having head restraints meeting the requirements proposed in this notice present virtually no problem related to protecting a child in a rear crash. To require the balance of the restraint systems to have such head restraints would raise the same price concerns posed by lateral test requirements without commensurate benefits.

All restraints would be required to meet the applicable proposed performance requirements at 30 mph, the same speed used in Standard No. 208 for testing occupant restraints for children over the age of 5 and adults. Adjustable restraints would be in any position intended for use in a motor vehicle. The restraints would be secured by a vehicle lap belt and, if provided with the restraint, a supplementary tether strap.

The agency is also proposing an additional dynamic test at 20 mph for child restraint systems equipped with tether straps as a supplemental means of attaching the system to a car. The test would be conducted with the system secured by a vehicle lap belt, but the tether would be left unattached. When the tethers on these restraints are properly attached and the lap belt properly tightened, these restraints generally provide superior protection against striking the side of the vehicle interior. They are also among the most effective in preventing children from striking interior surfaces in front of the child restraint. However, surveys show that the tether straps are unused by motorists about 50 percent of the time. The agency is concerned that a single 30 mph test of these systems with the tether attached would therefore be inadequate. The additional test would assure that at least a minimum level of protection is provided when the tether is not used to attach these systems to the vehicle. The NHTSA has tested existing child restraints and determined that the proposed 20 mph test requirement can be met without the use of a tether.

Comment is requested on whether all restraints, including those equipped with tethers, should be required to meet the performance requirements when tested at 30 mph while secured by means of a vehicle lap belt only. Such a requirement would provide increased assurance of safe performance even when child restraints with tethers are installed without the use of the tethers.

Energy Absorption and Distribution

Child restraint systems can be designed so that they do not present hostile or hard surfaces capable of injuring a child during a crash. The primary means for accomplishing this goal is to ensure that restraint surfaces absorb and distribute crash forces.

There are two categories of force distribution requirements proposed by this notice. The first relates to the support surfaces that would have to be provided in most restraints other than car beds to control the rearward movement of a child's head during a crash. Unless the child restraint enabled a child to sit low enough so that the vehicle seat back would provide rearward head restraint, child restraints other than car beds would have to have a seat back of a minimum height and width.

The second category of force distribution requirements specifies minimum surface area requirements for forward and side restraint surfaces and contour requirements for forward, side, and rear surfaces which are provided in restraints other than car beds. It should be emphasized that these provisions would not require the provision of such surfaces. They would simply regulate those that the manufacturers decide to provide.

Back supports would have to have at least 85 square inches of surface area. This figure represents the minimum torso contact area, based on calculations utilizing the three-year old dummy, that should be provided to keep force levels within an acceptable range. The torso dimensions of that dummy are also the basis of the proposed minimum areas and contours of the side and forward support surfaces.

To eliminate one way in which motorists misuse forward facing child restraints, this proposal would prohibit restraints from having any surface or component that is or can be adjusted or moved so that it is directly in front of the child, except for surfaces and components designed to restrain the child in a forward crash. This provision would eliminate arm rests that flip down in front of a child and that are not designed to provide restraint. Typically, these arm rests are present on child restraint systems that are equipped with harnesses and that are designed for use by children who sit erect. These arm rests are often mistaken by motorists as means by themselves of adequately restraining the child and are partially responsible for the low usage rate (46 percent) of harnesses in child seats.

Child restraints recommended for children who weigh 20 pounds or less cannot be tested with the three-year old dummy. Thus, no quantifiable performance evaluation can be made of those restraints. Therefore, the agency proposes for these restraints that surfaces that are contacted by the dummy head during dynamic testing must meet a padding requirement and static compression test.

Injury from contacting protrusions, such as the pointed ends of screws mounted in flexible materials, would be prevented by this proposal. The height of such protrusions would be limited to not more than three-eighths of an inch above any immediately adjacent surface. Further, an exposed edge with a radius of less than one-fourth of an inch would be prohibited. Also, restraints would not be permitted to separate and create jagged edges that could injure a child during a crash.

Child Restraint Belt Systems

To ensure the safe performance of the belts and associated hardware used to attach the child restraint to the vehicle, or to hold the child in the restraint, the agency is proposing requirements for the construction of belts, where provided, and for the provision of belts in certain restraints. A minimum width of 1½ inches would be required if the belt is contactable by the dummy during test procedures. Standard No. 209's belt and buckle requirements, such as those relating to abrasion, resistance to light, resistance to microorganisms, color fastness, corrosion resistance and temperature resistance, would also be required to be met. Belt elongation and strength would not be specifically regulated in new Standard No. 213-80. However, these factors would have to be considered by manufacturers of child restraints equipped with belts to ensure that the webbing abrasion and the proposed acceleration and excursion limits are met.

In addition to these construction requirements, the agency is proposing requirements for the provision of a minimum number and configuration of belts. Any restraint system belt that contacts the dummy during the test procedure would be prohibited from also being used for attachment of the restraint to the vehicle if it allows inertial forces from the child seat or vehicle seat back to impose a load on the child. Over-the-shoulder belts and a pelvic-crotch belt combination would be required for child harnesses. The harness would also prevent a child from standing while harnessed so that he or she would not be subjected to whiplash. Other child restraints would be required to provide upper and lower torso restraint that could be satisfied by over-the-shoulder belts and a pelvic-crotch belt if the restraint is recommended for use only by children weighing over 20 pounds.

In the interest of preserving system integrity, this notice proposes also that buckles used in restraint systems be operable following the prescribed dynamic tests. JPMA, Volvo, and USI West suggested that a 30-pound maximum be established as the force necessary to release a buckle so that a buckle could be designed to discourage release by the child while the vehicle is in motion. USI West also suggested a minimum lower release force of 15 pounds. Other commenters indicated that the buckle release force on child restraints should be sufficiently low to assure that children could escape from the restraints in emergencies without the help of an adult. The Economic Commission of Europe (ECE) Group or Rapporteurs on Protective Devices proposed in March 1977 that the release force for buckles on child restraints be between 2.25 pounds and 13.5 pounds. This range, the Group said, allows the restraint manufacturer flexibility in designing his restraint system buckles to meet whichever of the two goals described above he believes is perferred by consumers. The National Swedish Road and Traffic Institute conducted a 1975 study entitled, "Handling Performance of Buckles on Child Seats with Regard to Opening Force Requirements." This study suggests the desirability of 12 pound minimum and 20 pound maximum requirements.

To maintain rulemaking flexibility, three alternatives for buckle release force are proposed. The first adopts the 12 pound minimum and 20 pound maximum force requirements indicated by the Swedish Road and Traffic Institute study. The second adopts force requirements in the CEC proposal. The third option is that the maximum force necessary to operate the buckle cannot be greater than 20 pounds. This is the existing Standard No. 213 requirement.

Orientation and Method of Installation

Experience with early child seating systems demonstrated that the means for attaching the systems to a vehicle is crucial to the safety of their performance in a crash. For example, a seating system which hooks over the back of a vehicle seat could come loose in a crash. One reason for that problem is that the vehicle seat back is not strong enough to anchor a restraint unless the seat back is anchored by auxiliary means. Standard No. 213 currently prohibits attaching child restraints to vehicle seat backs by such over-the-seat means. This prohibition has not proven sufficient to ensure that child restraints are properly attached to vehicles. Recent surveys show that only about half of the child restraints are anchored in the vehicle properly, i.e., with a vehicle lap belt. A factor which contributes to this problem is the designing of child restraints so that they have a component which is inserted between the vehicle seat and seat back. As these components are often used as the only means of attaching the restraints to the vehicle, motorists appear to believe that the components are adequate by themselves for that purpose. Such is not the case. To prevent this improper installation, this proposal would prohibit child restraints from having any components that are designed to be used to attach the restraints to a vehicle seat or seat back or any components (other than belts) that can be inserted between a vehicle seat and seat back.

All child restraints, with the exception of child harnesses, must be capable of being secured to a vehicle with a Type I (lap) seat belt as specified in Standard No. 209. The restraint must be capable of being anchored tightly to the vehicle with the lap belts specified in Standard No. 208 for passenger seats. One auxiliary anchorage strap (tether) would be permitted to be supplied with the child restraint.

This proposal would also require that car beds be designed to be installed so that their longitudinal axis is perpendicular to the longitudinal axis of the vehicle in which it is installed. This requirement would ensure that an infant lies crosswise in the vehicle so that the crash loads in frontal crashes would not be imposed along the direction of the infant's spinal cord and would be distributed over the maximum body area.

Labeling and Instructions for Users

Commenters on the 1974 proposal generally agreed that one of the most significant problems in improving child safety through child restraints is the incorrect use of the restraints by motorists. This notice proposes new labeling requirements to encourage proper use of child restraints. So that the information would serve as a constant reminder, information on the correct use of the child restraint would be required to be visible on the system as it is installed in a vehicle.

M Y 1 8 7 8 UMI

V 4 3 9 7

Such information is currently often placed on the bottom or backs of child restraint systems. The agency recognizes that some child restraint systems may have limited space for displaying the instructions and warnings in the manner proposed in this notice. Comment is requested on the relative importance of displaying each of the instructions and warnings so that it is visible when the system is installed. A diagram showing the restraint correctly installed in a vehicle would be included in the labeling information. The labeling information would also contain items such as the height and weight limits of the children for which the restraint is designed, and warnings to use and snugly adjust all belts, to secure the restraint according to its manufacturer's instructions, to use any supplemental anchorage strap (tether) for attaching the restraint to a vehicle, and not to use any restraint adjustment position specified as being inappropriate for use in a motor vehicle. The proposal would also require that the manufacturer indicate the manufacturer and model of the child restraint, and the month, year, and place of manufacture, and state that the restraint complies with all applicable Federal motor vehicle safety standards.

Another means for encouraging proper use of child restraints is the instruction sheet or booklet that accompanies restraints. Consequently, the agency is proposing that all restraints be accompanied by instructions, including diagrams, for installing the restraints in any passenger seat in motor vehicles. The instructions would not necessarily have to address each type of motor vehicle expressly or separately. However, they must provide sufficient information to enable a user of a restraint in any type of vehicle to install the restraint in any passenger seat in that vehicle. For example, general information on installation of tether anchorages in vehicle floors may be sufficient to inform users of station wagons, vans, and hatchbacks how to install such anchorages. The instructions would also be required to state that the center rear seating position in passenger cars is the safest seating position and that child restraints should therefore be installed in that position. Comments are invited on what additional instructions manufacturers should be required to give to ensure proper use of child restraints. Questions include what advice should be given consumers using cars without a center rear seating position and to consumers having 2 or more children using child restraints. Comments are also requested on whether a brief explanation should be given of the primary consequences of not following the warnings and instructions provided by the manufacturer on the restraint. An example of such an explanation is that failure to attach the tether on systems having top tethers may result in the top part of the system bending forward during a crash and striking the dashboard or back of the front seat, depending on where the restaint is installed. Another example would be explain that failure to adjust belts snugly may result in the child coming entirely out of the restraint during a crash or in crash forces being placed on the wrong portions of the child's body.

Vehicle Seat Belts and Child Restraint Belt Anchorages

This rulemaking action raises a number of tangential issues regarding motor vehicle seat belts and anchorages for child restraint belts or tethers. Comment is invited on these issues. One issue concerns the compatibility of inertial reels for seat belts with child restraints. The agency has conducted tests of properly positioned child restraints anchored with inertial reel belts and has found no significant problem in crash environments. However, information is desired on the extent to which inertial reels may permit child restraints to move out of position during turns, slow stops and the initial phases of a quick stop.

The Physicians for Automotive Safety has raised another issue. That organization has petitioned to amend Standard 208, relating to occupant restraints, to require that lap belts be provided with passive belts in order that child restraints may be installed in any passenger seat equipped with passive belts. Volkswagen has submitted information to the public docket indicating that their passive belt restraint system performs better in a frontal crash without a lap belt than with one. Therefore, they do not want that seating positions equipped with a passive belt to be required to have a lap belt also. At the same time, the NHTSA is concerned that the absence of a lap belt in the front seat of passenger cars might further discourage the use of child restraints. It is clear that child restraints are more effective when properly used in the center rear seating position than in the front seat. However, the agency anticipates that some motorists will nevertheless install child restraints in the front seat. Comments are requested on this issue.

There are two issues regarding anchorages for tethers supplied with some child restraints. One additional way of prompting proper use of the tethers would be to require vehicle manufacturers to install anchorages as standard equipment. Another way would be to require vehicle manufacturers to inform new vehicle purchasers of the best places for installing tether anchorages for each passenger seat. Comments on these issues should include a discussion of the benefits and other impacts of rulemaking to address the underlying problems. The agency also requests comments on the cost and desirability of requiring child restraints to meet the flammability requirements of Federal Motor Vehicle Safety Standard No. 302.

Costs and Benefits

The NHTSA has conducted a preliminary evaluation of the economic and other consequences of this proposal on the public and private sectors. An environmental impact assessment and an economic evaluation have been placed in the docket for this rulemaking.

The benefits from the existing child restraint standard are severely limited by the low rate of child restraint use and by the even lower rate of proper use of the restraint. Surveys indicate that adults properly restrain at best 20 percent of infants in motor vehicles and a mere 5 percent of children aged 1-4 years.

The projected benefits for this proposal are similarly affected by use rates. The agency estimates that the extensive requirements for label warnings and installation instructions will result in slightly higher use rates and projects that the proposal would result in 5 newer fatalities and 980 fewer injuries annually. Should those restraints being improved to meet the new standard undergo some loss in sales due to their expected higher prices, the NHTSA still estimates benefits of 4 fewer fatalities and 725 fewer injuries per year. Because of the large difference in effectiveness between restraints that can pass the proposed dynamic test and those which have passed only a static test, there would have to be five lost sales for every restraint being upgraded to completely offset the safety gains. The agency finds no indication that there will be any sales loss even approaching this magnitude.

Because of this proposal, restraints which have already been designed to pass dynamic tests are expected to increase in price by about $1. Those now failing the dynamic test would be expected to increase in price by approximately $14. The average price increase would be about $3.70.

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information is likely to result in substantial competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition, the commenter or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4) and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been released to the public.

The agency has reviewed the impacts of this regulation and determined that it is not a significant regulation within the meaning of Executive Order 12044.

The principal authors of this notice are Mr. Jere Medlin, Office of Vehicle Safety Standards, and Ms. Kathleen DeMeter, Office of the Chief Counsel.

In consideration of the foregoing, it is proposed that the following amendments be made in Part 571, Chapter V of Title 49, Code of Federal Regulations:

1. Standard No. 209, Seat Belt Assemblies (49 CFR 571.209), would be revised as follows:

§ 571.209 Standard No. 209; Seat belt assemblies.

S1. *Purpose and Scope.* This standard specifies requirements for seat belt assemblies.

S2. *Application.* This standard applies to seat belt assemblies for use in passenger cars, multipurpose passenger vehicles, trucks, and buses.

S3. *Definitions.* "Seat belt assembly" means any strap, webbing, or similar device designed to secure a person in a motor vehicle in order to mitigate the results of any accident, including all necessary buckles and other fasteners, and all hardware designed for installing such seat belt assembly in a motor vehicle.

"Pelvic restraint" means a seat belt assembly or portion thereof intended to restrain movement of the pelvis.

"Upper torso restraint" means a portion of a seat belt assembly intended to restrain movement of the chest and shoulder regions.

"Hardware" means any metal or rigid plastic part of a seat belt assembly.

"Buckle" means a quick release connector which fastens a person in a seat belt assembly.

"Attachment hardware" means any or all hardware designed for securing the webbing of a seat belt assembly to a motor vehicle.

"Adjustment hardware" means any or all hardware designed for adjusting the size of a seat belt assembly to fit the user, including such hardware that may be integral with a buckle, attachment hardware, or retractor.

"Retractor" means a device for storing part or all of the webbing in a seat belt assembly.

"Nonlocking retractor" means a retractor from which the webbing is extended to essentially its full length by a small external force, which provides no adjustment for assembly length, and which may or may not be capable of sustaining restraint forces at maximum webbing extension.

"Automatic-locking retractor" means a retractor incorporating adjustment hardware by means of a positive self-locking mechanism which is capable when locked of withstanding restraint forces.

"Emergency-locking retractor" means a retractor incorporating adjustment hardware by means of a locking mechanism that is activated by vehicle acceleration, webbing movement relative to the vehicle, or other automatic action during an emergency and is capable when locked of withstanding restraint forces.

"Seat back retainer" means the portion of some seat belt assemblies designed to restrict forward movement of a seat back.

"Webbing" means a narrow fabric woven with continuous filling yarns and finished selvages.

"Strap" means a narrow nonwoven material used in a seat belt assembly in place of webbing.

"Type 1 seat belt assembly" is a lap belt for pelvic restraint.

"Type 2 seat belt assembly" is a combination of pelvic and upper torso restraints.

"Type 2a shoulder belt" is an upper torso restraint for use only in conjunction with a lap belt as a Type 2 seat belt assembly.

S4 *Requirements.*

S4.1 (a) *Single occupancy.* A seat belt assembly shall be designed for use by one, and only one, person at any one time.

(b) *Pelvic restraint.* A seat belt assembly shall provide pelvic restraint whether or not upper torso restraint is provided, and the pelvic restraint shall be designed to remain on the pelvis under all conditions, including collision or roll-over of the motor vehicle. Pelvic restraint of a Type 2 seat belt assembly that can be used without upper torso restraint shall comply with requirement for Type 1 seat belt assembly in S4.1 to S4.4.

(c) *Upper torso restraint.* A Type 2 or Type 3 seat belt assembly shall provide upper torso restraint without shifting the pelvic restraint into the abdominal region. An upper torso restraint shall be designed to minimize vertical forces on the shoulders and spine. Hardware for upper torso restraint shall be so designed and located in the seat belt assembly that the possibility of injury to the occupant is minimized.

A Type 2a shoulder belt shall comply with applicable requirements for a Type 2 seat belt assembly in S4.1 to S4.4, inclusive.

(d) *Hardware.* All hardware parts which contact under normal usage a person, clothing, or webbing shall be free from burrs and sharp edges.

(e) *Release.* A Type 1 or Type 2 seat belt assembly shall be provided with a buckle or buckles readily accessible to the occupant to permit his easy and rapid removal from the assembly. Buckle release mechanism shall be designed to minimize the possibility of accidental release. A buckle with release mechanism in the latched position shall have only one opening in which the tongue can be inserted on the end of the buckle designed to receive and latch the tongue.

(f) *Attachment hardware.* A seat belt assembly shall include all hardware necessary for installation in a motor vehicle in accordance with SAE Recommended Practice J800B, Motor Vehicle Seat Belt Installations, September 1965. However, seat belt assemblies designed for installation in motor vehicles equipped with seat belt assembly anchorages that do not require anchorage nuts, plates, or washers, need not have such hardware, but shall have 7/16-20 UNF-2A or 1/2-13UNC-2A attachment bolts or equivalent hardware. The hardware shall be designed to prevent attachment bolts and other parts from becoming disengaged from the vehicle while in service. Reinforcing plates or washers furnished for universal floor installations shall be of steel, free from burrs and sharp edges on the peripheral edges adjacent to the vehicle, at least 0.06 inch in thickness and at least 4 square inches in projected area. The distance between any edge of the plate and the edge of the bolt hole shall be at least 0.6 inch. Any corner shall be rounded to a radius of not less than 0.25 inch or cut so that no corner angle is less than 135° and no side is less than 0.25 inch in length.

(g) *Adjustment.* (1) A Type 1 or Type 2 seat belt assembly shall be capable of adjustment to fit occupants whose dimensions and weight range from those of a 5th-percentile adult female to those of a 95th-percentile adult male. The seat belt assembly shall have either an automatic-locking retractor, an emergency-locking retractor, or an adjusting device that is within the reach of the occupant.

MY 18 78 UMI

FEDERAL REGISTER, VOL. 43, NO. 97—THURSDAY, MAY 18, 1978

V 4 3 | 9 7

(2) A Type 1 or Type 2 seat belt assembly for use in a vehicle having seats that are adjustable shall conform to the requirements of S4.1(g)(1) regardless of seat position. However, if a seat has a back that is separately adjustable, the requirements of S4.1(g)(1) need be met only with the seat back in the manufacturer's nominal design riding position.

(3) The adult occupants referred to in S4.1(g)(1) shall have the following measurements:

	5th-percentile adult female	95th-percentile adult male
Weight	102 lbs	215 lbs.
Erect sitting height	30.9 in	38 in.
Hip breadth (sitting)	12.8 in	16.4 in.
Hip circumference (sitting).	36.4 in	47.2 in.
Waist circumference (sitting).	23.6 in	42.5 in.
Chest depth	7.5 in	10.5 in.
Chest circumference:		
Nipple	30.5 in	44.5 in.
Upper	29.8 in	44.5 in.
Lower	26.8 in	44.5 in.

(h) *Webbing.* The ends of webbing in a seat belt assembly shall be protected or treated to prevent raveling. The end of webbing in a seat belt assembly having a metal-to-metal buckle that is used by the occupant to adjust the size of the assembly shall not pull out of the adjustment hardware at maximum size adjustment. Provision shall be made for essentially unimpeded movement of webbing routed between a seat back and seat cushion and attached to a retractor located behind the seat.

(i) *Strap.* A strap used in a seat belt assembly to sustain restraint forces shall comply with the requirements for webbing in S4.2, and if the strap is made from a rigid material, it shall comply with applicable requirements in S4.2, S4.3, and S4.4.

(j) *Marking.* Each seat belt assembly shall be permanently and legibly marked or labeled with year of manufacture, model, and name or trademark of manufacturer or distributor, or of importer if manufactured outside the United States. A model shall consist of a single combination of webbing having a specific type of fiber weave and construction, and hardware having a specific design. Webbings of various colors may be included under the same model, but webbing of each color shall comply with the requirements for webbing in S4.2

(k) *Installation instructions.* A seat belt assembly or retractor shall be accompanied by an instruction sheet providing sufficient information for installing the assembly in a motor vehicle except for a seat belt assembly installed in a motor vehicled by an automobile manufacturer. The installation instructions shall state whether the assembly is for universal installation or for installation only in specifically stated motor vehicles, and shall include at least those items in SAE Recommended Practice, Motor Vehicle Seat Belt Installations—SAE J800b, published by the Society of Automotive Engineers.

(l) *Usage and maintenance instructions.* A seat belt assembly or retractor shall be accompanied by written instructions for the proper use of the assembly, stressing particularly the importance of wearing the assembly snugly and properly located on the body, and on the maintenance of the assembly and periodic inspection of all components. The instructions shall show the proper manner of threading webbing in the hardware of seat belt assemblies in which the webbing is not permanently fasted. Instructions for a nonlocking retractor shall include a caution that the webbing must be fully extended from the retractor during use of the seat belt assembly unless the retractor is attached to the free end of webbing which is not subjected to any tension during restraint of an occupant by the assembly. Instructions for Type 2a shoulder belt shall include a warning that the shoulder belt is not to be used without a lap belt.

(m) *Workmanship.* Seat belt assemblies shall have good workmanship in accordance with good commercial practice.

S4.2 *Requirements for webbing.*

(a) *Width.* The width of the webbing in a seat belt assembly shall be not less than 1.8 inches, except for portions that do not touch a 95th percentile adult male with the seat in any adjustment position and the seat back in the manufacturer's nominal design riding position when measured under the conditions prescribed in S5.1(a).

(b) *Breaking strength.* The webbing in a seat belt assembly shall have not less than the following breaking strength when tested by the procedures specified in S5.1(b): Type 1 seat belt assembly—6,000 pounds or 2,720 kilograms; Type 2 seat belt assembly—5,000 pounds or 2,270 kilograms for webbing pelvic restraint and 4,000 poinds or 1,810 kilograms for webbing in upper torso restraint.

(c) *Elongation.* The webbing in a seat belt assembly shall not extend to more than the following elongation when subjected to the specified forces in accordance with the procedure specified in S5.1(c): Type 1 seat belt assembly—20 percent at 2,500 pounds or 1,130 kilograms; Type 2 seat belt assembly—30 percent at 2,500 pounds or 1,130 kilograms for webbing in pelvic restraint and 40 percent at 2,500 pounds or 1,130 kilograms for webbing in upper torso restraint.

(d) *Resistance to abrasion.* The webbing of a seat belt assembly, after being subjected to abrasion as specified in either S5.1(d) or S5.3(c), shall have a breaking strength of not less than 75 percent of the breaking strength listed in S4.2(b) for that type of belt assembly.

(e) *Resistance to light.* The webbing in a seat belt assembly after exposure to the light of a carbon arc and tested by the procedure specified in S5.1(e) shall have a breaking strength not less than 60 percent of the strength before exposure to the carbon arc and shall have a color retention not less than No. 2 on the Geometric Gray Scale published by the American Association of Textile Chemists and Colorists, Post Office Box 886, Durham, N.C.

(f) *Resistance to micro-organisms.* The webbing in a seat belt assembly after being subjected to micro-organisms and tested by the procedures specified in S5.1(f) shall have a breaking strength not less than 85 percent of the strength before subjection to micro-organisms.

(g) *Colorfastness to crocking.* The webbing is a seat belt assembly shall not transfer color to a crock cloth either wet or dry to a greater degree than Class 3 on the AATCC Chart for Measuring Transference of Color published by the American Association of Textile Chemists and Colorists, when tested by the procedure specified in S5.1(g).

(h) *Colorfastness to staining.* The webbing in a seat belt assembly shall not stain to a greater degree than Class 3 on the AATCC Chart for Measuring Transference of Color published by the American Association of Textile Chemists and Colorists, when tested by the procedure specified in S5.1(h).

S4.3 *Requirements for hardware.*

(a) *Corrosion resistance.* (1) Attachment hardware of a seat belt assembly after being subjected to the conditions specified in S5.2(a) shall be free of ferrous corrosion on significant surfaces except for permissible ferrous corrosion at peripheral edges or edges of holes on underfloor reinforcing plates and washers. Alternatively, such hardware at or near the floor shall be protected against corrosion by at least a Type KS electrodeposited coating of nickel, or copper and nickel, and other attachment hardware shall be protected by a Type QS electrodeposited coating of nickel or copper and nickel, in accordance with Tenative Specifications for Electrodeposited Coatings of Nickel and Chromium on Steel, ASTM Designation: A166-61T, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103, but such hardware shall not be racked for electroplating in locations subjected to maximum stresses.

(2) Surfaces of buckles, retractors and metallic parts, other than attachment hardware, of a seat belt assembly after subjection to the conditions specified in S5.2(a) shall be free of ferrous or nonferrous corrosion which may be transferred, either directly or by means of the webbing, to the occupant or his clothing when the assembly is worn. After test, buckles shall conform to applicable requirements in paragraphs (d) to (g) of this section.

(b) *Temperature resistance.* Plastic or other nonmetallic hardware parts of a seat belt assembly when subjected to the conditions specified in S5.2(b) shall not warp or otherwise deteriorate to cause the assembly to operate improperly or fail to comply with applicable requirements in this section and S4.4.

(c) *Attachment hardware.* (1) Eye bolts, shoulder bolts, or other bolts used to secure the pelvic restraint of a seat belt assembly to a motor vehicle shall withstand a force of 9,000 pounds or 4,080 kilograms when tested by the procedure specified in S5.2(c)(1), except that attachment bolts of a seat belt assembly designed for installation in specific models of motor vehicles in which the ends of two or more seat belt assemblies can not be attached to the vehicle by a single bolt shall have a breaking strength of not less than 5,000 pounds or 2,270 kilograms.

(2) Other attachment hardware designed to receive the ends of two seat belt assemblies shall withstand a tensile force of at least 6,000 pounds or 2,720 kilograms without fracture of any section when tested by the procedure specified in S5.2(c)(2).

(3) A seat belt assembly having single attachment hooks of the quick-disconnect type for connecting webbing to an eye bolt shall be provided with a retaining latch or keeper which shall not move more than 0.08 inch or 2 millimeters in either the vertical or horizontal direction when tested by the procedure specified in S5.2(c)(3).

(d) *Buckle release.* (1) The buckle of a Type 1 or Type 2 seat belt assembly shall release when a force of not more than 30 pounds or 14 kilograms is applied and the buckle of a Type 3 seat belt assembly shall release when a force of not more than 20 pounds or 9 kilograms is applied as prescribed in S5.2.

(2) A buckle designed for pushbutton application of buckle release force shall have a minimum area of 0.7 square inch or 4.5 square centimeters with a minimum linear dimension of 0.4 inch or 10 millimeters for applying the release force, or a buckle designed for lever application of buckle release force shall permit the insertion of a cylinder 0.4 inch or 10 millimeters in diameter and 1.5 inches or 38 millimeters in length to at least the midpoint of the cylinder along the cylinder's entire length in the actuation portion of the buckle release. A buckle having other design for release shall have adequate access for two or more fingers to actuate release.

(3) The buckle of a Type 1 or Type 2 seat belt assembly shall not release under a compressive force of 400 pounds applied as prescribed in paragraph S5.2(d)(3). The buckle shall be operable and shall meet the applicable requirement of paragraph S4.4 after the compressive force has been removed.

(e) *Adjustment force.* The force required to decrease the size of a seat belt assembly shall not exceed 11 pounds or 5 kilograms when measured by the procedure specified in S5.2(e).

(f) *Tilt-lock adjustment.* The buckle of a seat belt assembly having tilt-lock adjustment shall lock the webbing when tested by the procedure specified in S5.2(f) at an angle of not less than 30 degrees between the base of the buckle and the anchor webbing.

(g) *Buckle latch.* The buckle latch of a seat belt assembly when tested by the procedure specified in S5.2(g) shall not fail, nor gall or wear to an extent that normal latching and unlatching is impaired, and a metal-to-metal buckle shall separate when in any position of partial engagement by a force of not more than 5 pounds or 2.3 kilograms.

(h) *Nonlocking retractor.* The webbing of a seat belt assembly shall extend from a nonlocking retractor within 0.25 inch or 6 millimeters of maximum length when a tension is applied as prescribed in S5.2(h). A nonlocking retractor on upper torso restraint shall be attached to the nonadjustable end of the assembly, the reel of the retractor shall be easily visible to an occupant while wearing the assembly, and the maximum retraction force shall not exceed 1.1 pounds or 0.5 kilogram in any strap or webbing that contacts the shoulder when measured by the procedure specified in S5.2(h), unless the retractor is attached to the free end of webbing which is not subjected to any tension during restraint of an occupant by the assembly.

(i) *Automatic-locking retractor.* The webbing of a seat belt assembly equipped with an automatic locking retractor, when tested by the procedure specified in S5.2(i), shall not move more than 1 inch or 25 millimeters between locking positions of the retractor, and shall be retracted with a force under zero acceleration of not less than 0.6 pound or 0.27 kilogram when attached to pelvic restraint, and not less than 0.45 pound or 0.2 kilogram nor more than 1.1 pounds or 0.5 kilogram in any strap or webbing that contacts the shoulders of an occupant when the retractor is attached to upper torso restraint. An automatic locking retractor attached to upper torso restraint shall not increase the restraint on the occupant of the seat belt assembly during use in a vehicle traveling over rough roads as prescribed in S5.2(i).

(j) *Emergency-locking retractor.* An emergency-locking retractor of a Type 1 or Type 2 seat belt assembly, when tested in accordance with the procedures specified in paragraph S5.2(j)—

(1) Shall lock before the webbing extends 1 inch when the retractor is subjected to an acceleration of 0.7g;

(2) Shall not lock, if the retractor is sensitive to webbing withdrawal, before the webbing extends 2 inches when the retractor is subjected to an acceleration of 0.3g or less;

(3) Shall not lock, if the retractor is sensitive to vehicle acceleration, when the retractor is rotated in any direction to any angle of 15° or less from its orientation in the vehicle;

(4) Shall exert a retractive force of at least 0.6 pound under zero acceleration when attached only to the pelvic restraint.

(5) Shall exert a retractive force of not less than 0.2 pound and not more than 1.1 pounds under zero acceleration when attached only to an upper torso restraint;

(6) Shall exert a retractive force of not less than 0.2 pound and not more than 1.5 pounds under zero acceleration when attached to a strap or webbing that restrains both the upper torso and the pelvis.

(k) *Performance of retractor.* A retractor used on a seat belt assembly after subjection to the tests specified in S5.2(k) shall comply with applicable requirements in paragraphs (h) to (j) of this section and S4.4, except that the retraction force shall be not less than 50 percent of its original retraction force.

S4.4 Requirements for assembly performance.

(a) *Type 1 seat belt assembly.* The complete seat belt assembly including webbing, straps, buckles, adjustment and attachment hardware, and retractors shall comply with the following requirements when tested by the procedures specified in C5.3(a):

(1) The assembly loop shall withstand a force of not less than 5,000 pounds or 2,270 kilograms; that is, each structural component of the assembly shall withstand a force or not less than 2,500 pounds or 1,130 kilograms.

(2) The assembly loop shall extend not more than 7 inches or 18 centimeters when subjected to a force of 5,000 pounds or 2,270 kilograms; that is, the length of the assembly between achorages shall not increase more than 14 inches or 36 centimeters.

(3) Any webbing cut by the hardware during test shall have a breaking strength at the cut of not less than 4,200 pounds of 1,910 kilograms.

(4) Complete fracture through any solid section of metal attachment hardware shall not occur during test.

M Y 1 8 7 8 UMI

V 43 | 97

(b) *Type 2 seat belt assembly.* The components of a Type 2 seat belt assembly including webbing, straps, buckles, adjustment and attachment hardware, and retractors shall comply with the following requirements when tested by the procedure specified in S5.3(b):

(1) The structural components in the pelvic restraint shall withstand a force of not less than 2,500 pounds or 1,139 kilograms.

(2) The structural components in the upper torso restraint shall withstand a force of not less than 1,500 pounds or 680 kilograms.

(3) The structural components in the assembly that are common to pelvic and upper torso restraints shall withstand a force of not less than 3,000 pounds or 1,360 kilograms.

(4) The length of the pelvic restraint between anchorages shall not increase more than 20 inches or 50 centimeters when subjected to a force of 2,500 pounds or 1,130 kilograms.

(5) The length of the upper torso restraint between anchorages shall not increase more than 20 inches or 50 centimeters when subjected to a force of 1,500 pounds or 680 kilograms.

(6) Any webbing cut by the hardware during test shall have a breaking strength of not less than 3,500 pounds or 1,590 kilograms at a cut in webbing of the pelvic restraint, or not less than 2,800 pounds or 1,270 kilograms at a cut in webbing of the upper torso restraint.

(7) Complete fracture through any solid section of metal attachment hardware shall not occur during test.

S5 *Demonstration Procedures.*

S5.1 *Webbing.* (a) *Width.* The width of webbing from three seat belt assemblies shall be measured after conditioning for at least 24 hours in an atmosphere having relative humidity between 48 and 67 percent and a temperature of 23°±2° C. or 73.4±3.6° F. The tension during measurement of width shall be not more than 5 pounds or 2 kilograms on webbing from a Type 1 seat belt assembly, and 2,200±100 pounds or 1,000±50 kilograms on webbing from a Type 2 seat belt assembly. The width of webbing from a Type 2 seat belt assembly may be measured during the breaking strength test described in paragraph (b) of this section.

(b) *Breaking strength.* Webbing from three seat belt assemblies shall be conditioned in accordance with paragraph (a) of this section and tested for breaking strength in a testing machine of suitable capacity verified to have an error or not more than 1 percent in the range of the breaking strength of the webbing by the Tentative Methods of Verification of Testing Machines, ASTM Designation: E4-64, published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.

The machine shall be equipped with split drum grips illustrated in Figure 1, having a diameter between 2 and 4 inches or 5 and 10 centimeters. The rate of grip separation shall be between 2 and 4 inches per minute or 5 and 10 centimeters per minute. The distance between the centers of the grips at the start of the test shall be between 4 and 10 inches or 10 and 25 centimeters. After placing the specimen in the grips, the webbing shall be stretched continuously at a uniform rate to failure. Each value shall be not less than the applicable breaking strength requirement in S4.2(b), but the median value shall be used for determining the retention of breaking strength in paragraphs (d), (e), and (f) of this section.

(c) *Elongation.* Elongation shall be measured during the breaking strength test described in paragraph (b) of this section by the following procedure: A preload between 44 and 55 pounds or 20 and 25 kilograms shall be placed on the webbing mounted in the grips of the testing machine and the needle points of an extensometer, in which the points remain parallel during test, are inserted in the center of the specimen. Initially the points shall be set at a known distance apart between 4 and 8 inches or 10 and 20 centimeters. When the force on the webbing reaches the value specified in S4.2(c), the increase in separation of the points of the extensometer shall be measured and the percent elongation shall be calculated to the nearest 0.5 percent. Each value shall be not more than the appropriate elongation requirement in S4.2(c).

(d) *Resistance to abrasion.* The webbing from three seat belt assemblies shall be tested for resistance to abrasion by rubbing over the hexagon bar prescribed in Figure 2 in the following manner: The webbing shall be mounted in the apparatus shown schematically in Figure 2. One end of the webbing (A) shall be attached to a weight (B) which has a mass of 5.2±0.1 pounds or 2.35±0.05 kilograms. The webbing shall be passed over the two new abrading edges of the hexagon bar (C) and the other end attached to an oscillating drum (D) which has a stroke of 13 inches or 33 centimeters. Suitable guides shall be used to prevent movement of the webbing along the axis of hexagonal bar C. Drum D shall be oscillated for 5,000 strokes or 2,500 cycles at a rate of 60±2 strokes per minute or 30±1 cycles per minute. The abraded webbing shall be conditioned as prescribed in paragraph (a) of this section and tested for breaking strength by the procedure described in paragraph (b) of this section. The median values for the breaking strengths determined on abraded and unabraded specimens shall be used to calculate the percentage of breaking strength retained.

(e) *Resistance to light.* Webbing at least 20 inches or 50 centimeters in length from three seat belt assemblies shall be suspended vertically on the inside of the specimen rack in a Type E carbon-arc light-exposure apparatus described in recommended Practice for Operation of Light- and Water-Exposure Apparatus (Carbon-Arc Type) for Artificial Weathering Test, ASTM Designation: E42-64, published by the American Society for Testing and Materials. The apparatus shall be operated without water spray at an air temperature of 60°±2° C. or 140°±3.6° F. measured at a point 1±0.2 inch or 25±5 millimeters outside the specimen rack and midway in height. The temperature sensing element shall be shielded from radiation. The specimens shall be exposed to the light from the carbon arc for 100 hours and then conditioned as prescribed in paragraph (a) of this section. The colorfastness of the exposed and conditioned specimens shall be determined on the Geometric Gray Scale issued by the American Association of Textile Chemists and Colorists. The breaking strength of the specimens shall be determined by the procedure prescribed in paragraph (b) of this section. The median values for the breaking strengths determined on exposed and unexposed specimens shall be used to calculate the percentage of breaking strength retained.

(f) *Resistance to micro-organisms.* Webbing at least 20 inches or 50 centimeters in length from three seat belt assemblies shall be subjected successively to the procedures prescribed in Section 1C1—Water Leaching, Section 1C2—Volatilization, and Section 1B3—Soil Burial Test of AATCC Tentative Test Method 30—1957T, Fungicides, Evaluation of Textiles; Mildew and Rot Resistance of Textiles, published by American Association of Textile Chemists and Colorists. After soil-burial for a period of 2 weeks, the specimen shall be washed in water, dried and conditioned as prescribed in paragraph (a) of this section. The breaking strengths of the specimens shall be determined by the procedure prescribed in paragraph (b) of this section. The median values for the breaking strengths determined on exposed and unexposed specimens shall be used to calculate the percentage of breaking strength retained.

NOTE.—This test shall not be required on webbing made from material which is inherently resistant to micro-organisms.

(g) *Colorfastness to crocking.* Webbing from three seat belt assemblies shall be tested by the procedure specified in Standard Test Method 8—1961, Colorfastness to Crocking (Rubbing) published by the American Association of Textile Chemists and Colorists.

(h) *Colorfastness to staining.* Webbing from three seat belt assemblies shall be tested by the procedure specified in Standard Test Method 107—1962, Colorfastness to Water, published by the American Association of Textile Chemists and Colorists, with the following modifications: Distilled water shall be used, perspiration tester shall be used, the drying time in paragraph 4 of procedures shall be 4 hours, and section entitled "Evaluation Method for Staining (3)" shall be used to determine colorfastness to staining on the AATCC Chart for Measuring Transference of Colors.

S5.2 *Hardware*—(a) *Corrosion resistance.* Three seat belt assemblies shall be tested by Standard Method of Salt Spray (Fog) Testing, ASTM Designation: B 117-64, published by the American Society for Testing and Materials. The period of test shall be 50 hours for all attachment hardware at or near the floor, consisting of two periods of 24 hours exposure to salt spray followed by 1 hour drying and 25 hours for all other hardware, consisting of one period of 24 hours exposure to salt spray followed by 1 hour drying. In the salt spray test chamber, the parts from the three assemblies shall be oriented differently, selecting those orientations most likely to develop corrosion on the larger areas. At the end of test, the seat belt assembly shall be washed thoroughly with water to remove the salt. After drying for at least 24 hours under standard laboratory conditions specified in S5.1(a) attachment hardware shall be examined for ferrous corrosion on significant surfaces, that is, all surfaces that can be contacted by a sphere 0.75 inch or 2 centimeters in diameter, and other hardware shall be examined for ferrous and nonferrous corrosion which may be transferred, either directly or by means of the webbing, to a person or his clothing during use of a seat belt assembly incorporating the hardware.

NOTE.—When attachment and other hardware are permanently fastened, by sewing or other means, to the same piece of webbing, separate assemblies shall be used to test the two types of hardware. The test for corrosion resistance shall not be required for attachment hardware made from corrosion-resistant steel containing at least 11.5 percent chromium or for attachment hardware protected with an electrodeposited coating of nickel, or copper and nickel, as prescribed in S4.3(a). The assembly that has been used to test the corrosion resistance of the buckle shall be used to measure adjustment force, tilt-lock adjustment, and buckle latch in paragraphs (e), (f), and (g), respectively, of this section, assembly performance in S5.3 and buckle release force in paragraph (d) of this section.

(b) *Temperature resistance.* Three seat belt assemblies having plastic or nonmetallic hardware or having retractors shall be subjected to the conditions prescribed in Procedure IV of Standard Methods of Test for Resistance of Plastics to Accelerated Service Conditions published by the American Society for Testing and Materials, under designation D 756-56. The dimension and weight measurement shall be omitted. Buckles shall be unlatched and retractors shall be fully retracted during conditioning. The hardware parts after conditioning shall be used for all applicable tests in S4.3 and S4.4.

(c) *Attachment hardware.* (1) Attachment bolts used to secure the pelvic restraint of a seat belt assembly to a motor vehicle shall be tested in a manner similar to that shown in Figure 3. The load shall be applied at an angle of 45° to the axis of the bolt through attachment hardware from the seat belt assembly, or through a special fixture which simulates the loading applied by the attachment hardware. The attachment hardware or simulated fixture shall be fastened by the bolt to the anchorage shown in Figure 3, which has a standard 7/16-20 UNF-2B or ½-13 UNC-2B threaded hole in a hardened steel plate at least 0.4 inch or 1 centimeter in thickness. The bolt shall be installed with two full threads exposed from the fully seated position. The appropriate force required by S4.3(c) shall be applied. A bolt from each of three seat belt assemblies shall be tested.

(2) Attachment hardware, other than bolts, designed to receive the ends of two seat belt assemblies shall be subjected to a tensile force of 6,000 pounds or 2,720 kilograms in a manner simulating use. The hardware shall be examined for fracture after the force is released. Attachment hardware from three seat belt assemblies shall be tested.

(3) Single attachment hook for connecting webbing to any eye bolt shall be tested in the following manner: The hook shall be held rigidly so that the retainer latch or keeper, with cotter pin or other locking device in place, is in a horizontal position as shown in Figure 4. A force of 150±2 pounds or 68±1 kilograms shall be applied vertically as near as possible to the free end of the retainer latch, and the movement of the latch by this force at the point of application shall be measured. The vertical force shall be released, and a force of 150±2 pounds or 68±1 kilograms shall be applied horizontally as near as possible to the free end of the retainer latch. The movement of the latch by this force at the point of load application shall be measured. Alternatively, the hook may be held in other positions, provided the forces are applied and the movements of the latch are measured at the points indicated in Figure 4. A single attachment hook from each of three seat belt assemblies shall be tested.

(d) *Buckle release.* (1) Three seatbelt assemblies shall be tested to determine compliance with the maximum buckle release force requirements, following the assembly test in S5.3. After subjection to the force applicable for the assembly being tested, the force shall be reduced and maintained at 150 pounds on the assembly loop of a Type 1 seatbelt assembly, 75 pounds on the components of a Type 2 seatbelt assembly. The buckle release force shall be measured by applying a force on the buckle in a manner and direction typical of those which would be employed by a seatbelt occupant. For pushbutton-release buckles, the force shall be applied at least 0.125 inch from the edge of the pushbutton access opening of the buckle in a direction that produces maximum releasing effect. For lever-release buckles, the force shall be applied on the centerline of the buckle level or finger tab in a direction that produces maximum releasing effect.

(2) The area for application of release force on pushbutton actuated buckle shall be measured to the nearest 0.05 square inch or 0.3 square centimeter. The cyliner specified in S4.3(d) shall be inserted in the actuation portion of a lever released buckle for determination of compliance with the requirement. A buckle with other release actuation shall be examined for access of release by fingers.

(3) The buckle of a Type 1 or Type 2 seatbelt assembly shall be subjected to a compressive force of 400 pounds applied anywhere on a test line that is coincident with the centerline of the belt extended through the buckle or on any line that extends over the center of the release mechanism and intersects the extended centerline of the belt at an angle of 60°. The load shall be applied by using a curved cylindrical bar having a cross section diameter of 0.75 inch and a radius of curvature of 6 inches, placed with its longitudinal centerline along the test line and its center directly above the point on the buckle to which the load will be applied. The buckle shall be latched, and a tensile force of 75 pounds shall be applied to the connected webbing during the application of the compressive force. Buckles from three seatbelt assemblies shall be tested to determine compliance with paragraph S4.3(d) (3).

(e) *Adjustment force.* Three seat belt assemblies shall be tested for adjustment force on the webbing at the buckle, or other manual adjusting device normally used to adjust the size of the assembly. With no load on the anchor end, the webbing shall be drawn through the adjusting device at a rate of 20±2 inches per minute or 50±5 centimeters per minute and the maximum force shall be measured to

MAY 18 1978
UMI

V 43 | 97

the nearest 0.25 pound or 0.1 kilogram after the first 1 inch or 25 millimeters of webbing movement. The webbing shall be precycled 10 times prior to measurement.

(f) *Tilt-lock adjustment.* This test shall be made on buckles or other manual adjusting devices having tilt-lock adjustment normally used to adjust the size of the assembly. Three buckles or devices shall be tested. The base of the adjustment mechanism and the anchor end of the webbing shall be oriented in planes normal to each other. The webbing shall be drawn through the adjustment mechanism in a direction to increase belt length at a rate of 20±2 inches per minute or 50±5 centimeters per minute while the plane of the base is slowly rotated in a direction to lock the webbing. Rotation shall be stopped when the webbing locks, but the pull on the webbing shall be continued until there is a resistance of at least 20 pounds or 9 kilograms. The locking angle between the anchor end of the webbing and the base of the adjustment mechanism shall be measured to the nearest degree. The webbing shall be precycled 10 times prior to measurement.

(g) *Buckle latch.* The buckles from three seat belt assemblies shall be opened fully and closed at least 10 times. Then the buckles shall be clamped or firmly held against a flat surface so to permit normal movement of buckle part, but with the metal mating plate (metal-to-metal buckles) or webbing and (metal-to-webbing buckles) withdrawn from the buckle. The release mechanism shall be moved 200 times through the maximum possible travel against its stop with a force of 30±3 pounds or 14±1 kilograms at a rate not to exceed 30 cycles per minute. The buckle shall be examined to determine compliance with the performance requirements of S4.3(g). A metal-to-metal buckle shall be examined to determine whether partial engagement is possible by means of any technique representative of actual use. If partial engagement is possible, the maximum force of separation when in such partial engagement shall be determined.

(h) *Nonlocking retractor.* After the retractor is cycled 10 times by full extension and retraction of the webbing, the retractor and webbing shall be suspended vertically and a force of 4 pounds or 1.8 kilograms shall be applied to extend the webbing from the retractor. The force shall be reduced to 3 pounds or 1.4 kilograms when attached to a pelvic restraint, or to 1.1 pounds or 0.5 kilogram per strap or webbing that contacts the shoulder of an occupant when retractor is attached to an upper torso restraint. The residual extension of the webbing shall be measured by manual rotation of the retractor drum or by disengaging the retraction mechanism. Measurements shall be make on three retractors. The location of the retractor attached to upper torso restraint shall be examined for visibility of reel during use of seat belt assembly in a vehicle.

NOTE: This test shall not be required on a nonlocking retractor attached to the free-end of webbing which is not subjected to any tension during restraint of an occupant by the assembly.

(i) *Automatic-locking retractor.* Three retractors shall be tested in a manner to permit the retraction force to be determined exclusive of the gravitational forces on hardware or webbing being retracted. The webbing shall be fully extended from the retractor. While the webbing is being retracted, the average force or retraction within plus or minus 2 inches or 5 centimeters of 75 percent extension (25 percent retraction) shall be determined and the webbing movement between adjacent locking segments shall be measured in the same region of extension. A seat belt assembly with automatic locking retractor in upper torso restraint shall be tested in a vehicle in a manner prescribed by the installation and usage instructions. The retraction force on the occupant of the seat belt assembly shall be determined before and after traveling for 10 minutes at a speed of 15 miles per hour or 24 kilometers per hour or more over a rough road (e.g., Belgian block road) where the occupant is subjected to displacement with respect to the vehicle in both horizontal and vertical directions. Measurements shall be made with the vehicle stopped and the occupant in the normal seated position.

(j) *Emergency-locking retractor.* A retractor shall be tested in a manner that permits the retraction force to be determined exclusive of the gravitational forces on hardware or webbing being retracted. The webbing shall be fully extended from the retractor, passing over or through any hardware or other material specified in the installation instructions. While the webbing is being retracted, the lowest force of retraction within plus or minus 2 inches of 75 percent extension shall be determined. A retractor that is sensitive to webbing withdrawal shall be subjected to an acceleration of 0.3g within a period of 50 ms. while the webbing is at 75 percent extension, to determine compliance with S4.3(j)(2). The retractor shall be subjected to an acceleration of 0.7g within a period of 50 milliseconds, while the webbing is at 75 percent extension, and the webbing movement before locking shall be measured under the following conditions: For a retractor sensitive to webbing withdrawal, the retractor shall be accelerated in the direction of webbing retraction while the retractor drum's central axis is oriented horizontally and at angles of 45°, 90°, 135°, and 180° to the horizontal plane. For a retractor sensitive to vehicle acceleration, the retractor shall be—

(1) Accelerated in the horizontal plane in two directions normal to each other, while the retractor drum's central axis is oriented at the angle at which it is installed in the vehicle; and,

(2) Accelerated in three directions normal to each other while the retractor drum's central axis is oriented at angles of 45°, 90°, 135°, and 180° from the angle at which it is installed in the vehicle, unless the retractor locks by gravitational force when tilted in any direction to any angle greater than 45° from the angle at which it is installed in the vehicle.

(k) *Performance of retractor.* After completion of the corrosion-resistance test described in paragraph (a) of this section, the webbing shall be fully extended and allowed to dry for at least 24 hours under standard laboratory conditions specified in S5.1(a). The retractor shall be examined for ferrous and non-ferrous corrosion which may be transferred, either directly or by means of the wedding, to a person or his clothing during use of a seat belt assembly incorporating the retractor, and for ferrous corrosion on significant surfaces if the retractor is part of the attachment hardware. The webbing shall be withdrawn manually and allowed to retract for 25 cycles. The retractor shall be mounted in an apparatus capable of extending the webbing fully, applying a force of 20 pounds or 9 kilograms at full extension, and allowing the webbing to retract freely and completely. The webbing shall be withdrawn from the retractor and allowed to retract repeatedly in this apparatus until 2,500 cycles are completed. The retractor and webbing shall then be subjected to the temperature resistance test prescribed in paragraph (b) of this section. The retractor shall be subjected to 2,500 additional cycles of webbing withdrawal and retraction. Then, the retractor and webbing shall be subjected to dust in a chamber similar to one illustrated in Figure 8 containing about 2 pounds or 0.9 kilogram of coarse grade dust conforming to the specification given in SAE Recommended Practice, Air Cleaner Test Code—SAE J726a, published by the Society of Automotive Engineers. The dust shall be agitated every 20 minutes for 5 seconds by compressed air, free of oil and moisture, at a gage pressure of 80±8 pounds per square inch or 5.6±0.6 kilograms per square centimeter entering through an orifice 0.060±0.004 inch or 1.5±0.1 millimeters in diameter. The webbing shall be

MY 18 78 UMI

extended to the top of the chamber and kept extended at all times except that the webbing shall be subjected to 10 cycles of complete retraction and extension within 1 to 2 minutes after each agitation of the dust. At the end of 5 hours, the assembly shall be removed from the chamber. The webbing shall be fully withdrawn from the retractor manually and allowed to retract completely for 25 cycles. An automatic-locking retractor or a nonlocking retractor attached to pelvic restraint shall be subjected to 5,000 additional cycles of webbing withdrawal and retraction. An emergency-locking retractor or a nonlocking retractor attached to upper torso restraint shall be subjected to 45,000 additional cycles of webbing withdrawal and retraction between 50 and 100 percent extension. The locking mechanism of an emergency locking retractor shall be actuated at least 10,000 times within 50 to 100 percent extension of webbing during the 50,000 cycles. At the end of test, compliance of the retractors with applicable requirements in S4.3 (h), (i), and (j) shall be determined. Three retractors shall be tested for performance.

S5.3 *Assembly Performance*—(a) *Type 1 seat belt assembly.* Three complete seat belt assemblies, including webbing, straps, buckles, adjustment and attachment hardware, and retractors, arranged in the form of a loop as shown in Figure 5, shall be tested in the following manner:

(1) The testing machine shall conform to the requirements specified in S5.1(b). A double-roller block shall be attached to one head of the testing machine. This block shall consist of two rollers 4 inches or 10 centimeters in diameter and sufficiently long so that no part of the seat belt assembly touches parts of the block other than the rollers during test. The rollers shall be mounted on antifriction bearings and spaced 12 inches or 30 centimeters between centers, and shall have sufficient capacity so that there is no brinelling, bending or other distortion of parts which may affect the results. An anchorage bar shall be fastened to the other head of the testing machine.

(2) The attachment hardware furnished with the seat belt assembly shall be attached to the anchorage bar. The anchor points shall be spaced so that the webbing is parallel in the two sides of the loop. The attaching bolts shall be parallel to, or at an angle of 45° or 90° to the webbing, whichever results in an angle nearest to 90° between webbing and attachment hardware except that eye bolts shall be vertical, and attaching bolts or nonthreaded anchorages of a seat belt assembly designed for use in specific models of motor vehicles shall be installed to produce the maximum angle in use indicated by the installation instructions, utilizing special fixtures if necessary to simulate installation in the motor vehicle. Rigid adapters between anchorage bar and attachment hardware shall be used if necessary to locate and orient the adjustment hardware. The adapters shall have a flat support face perpendicular to the threaded hole for the attaching bolt and adequate in area to provide full support for the base of the attachment hardware connected to the webbing. If necessary, a washer shall be used under a swivel plate or other attachment hardware to prevent the webbing from being damaged as the attaching bolt is tightened.

(3) The length of the assembly loop from attaching bolt to attaching bolt shall be adjusted to about 51 inches or 130 centimeters, or as near thereto as possible. A force of 55 pounds or 25 kilograms shall be applied to the loop to remove any slack in webbing at hardware. The force shall be removed and the heads of the testing machine shall be adjusted for an assembly loop between 48 and 50 inches or 122 and 127 centimeters in length. The length of the assembly loop shall then be adjusted by applying a force between 20 and 22 pounds or 9 and 10 kilograms to the free end of the webbing at the buckle, or by the retraction force of an automatic-locking or emergency-locking retractor. A seat belt assembly that cannot be adjusted to this length shall be adjusted as closely as possible. An automatic-locking or emergency-locking retractor when included in a seat belt assembly shall be locked at the start of the test with a tension on the webbing slightly in exccess of the retractive force in order to keep the retractor locked. The buckle shall be in a location so that it does not touch the rollers during test, but to facilitate making the buckle release test in S5.2(d) the buckle should be between the rollers or near a roller in one leg.

(4) The heads of the testing machine shall be separated at a rate between 2 and 4 inches per minute or 5 and 10 centimeters per minute until a force of 5,000±50 pounds or 2,270±20 kilograms is applied to the assembly loop. The extension of the loop shall be determined from measurements of head separation before and after the force is applied. The force shall be decreased to 150±10 pounds or 68±4 kilograms and the buckle release force measured as prescribed in S5.2(d).

(5) After the buckle is released, the webbing shall be examined for cutting by the hardware. If the yarns are partially or completely severed in a line for a distance of 10 percent or more of the webbing width, the cut webbing shall be tested for breaking strength as specified in S5.1(b) locating the cut in the free length between grips. If there is insufficient webbing on either side of the cut to make such a test for breaking strength, another seat belt assembly shall be used with the webbing repositioned in the hardware. A tensil force of 2,500±25 pounds or 1,135±10 kilograms shall be applied to the components or a force of 5,000±50 pounds or 2,270±20 kilograms shall be applied to an assembly loop. After the force is removed, the breaking strength of the cut webbing shall be determined as prescribed above.

(6) If a Type 1 seat belt assembly includes an automatic-locking retractor or an emergency-locking retractor, the webbing and retractor shall be subjected to a tensile force of 2,500±25 pounds or 1,135±10 kilograms with the webbing fully extended from the retractor.

(7) If a seat belt assembly has a buckle in which the tongue is capable of inverted insertion, one of the three assemblies shall be tested with the tongue inverted.

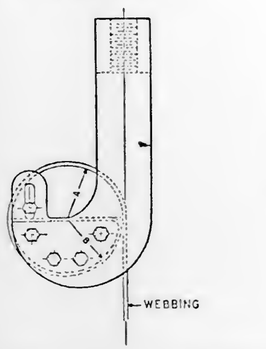
(b) *Type 2 seat belt assembly.* Components of three seat belt assemblies shall be tested in the following manner:

(1) The pelvic restraint between anchorages shall be adjusted to a length between 48 and 50 inches or 122 and 127 centimeters, or as near this length as possible if the design of the pelvic restraint does not permit its adjustment to this length. An automatic-locking or emergency-locking retractor when included in a seat belt assembly shall be locked at the start of the test with a tension on the webbing slightly in excess of the retractive force in order to keep the retractor locked. The attachment hardware shall be oriented to the webbing as specified in paragraph (a)(2) of this section and illustrated in Figure 5. A tensile force of 2,500±25 pounds or 1,135±10 kilograms shall be applied on the components in any convenient manner and the extension between anchorages under this force shall be measured. The force shall be reduced to 75±5 pounds or 34±2 kilograms and the buckle release force measured as prescribed in S5.2(d).

(2) The components of the upper torso restraint shall be subjected to a tensile force of 1,500±15 pounds or 680±5 kilograms following the procedure prescribed above for testing pelvic restraint and the extension between anchorages under this force shall be measured. If the testing apparatus permits, the pelvic and upper torso restraints may be tested simultaneously. The force shall be reduced to 75±5 pounds or 34±2 kilograms and

V 4 3 | 9 7

the buckle release force measured as prescribed in S5.2(d).



(3) Any component of the seat belt assembly common to both pelvic and upper torso restraint shall be subjected to a tensile force of 3,000±30 pounds or 1,360±15 kilograms.

(4) After the buckle is released in tests of pelvic and upper torso restraints, the webbing shall be examined for cutting by the hardware. If the yarns are partially or completely severed in a line for a distance of 10 percent or more of the webbing width, the cut webbing shall be tested for breaking strength as specified in S5.1(b) locating the cut in the free length between grips. If there is insufficient webbing on either side of the cut to make such a test for breaking strength, another seat belt assembly shall be used with the webbing repositioned in the hardware. The force applied shall be 2,500±25 pounds or 1,135±10 kilograms for components of pelvic restraint, and 1,500±15 pounds or 680±5 kilograms for components of upper torso restraint. After the force is removed, the breaking strength of the cut webbing shall be determined as prescribed above.

(5) If a Type 2 seat belt assembly includes an automatic-locking retractor or an emergency-locking retractor, the webbing and retractor shall be subjected to a tensile force of 2,500±25 pounds or 1,135±10 kilograms with the webbing fully extended from the retractor, or to a tensile force of 1,500±15 pounds or 680±5 kilograms with the webbing fully extended from the retractor if the design of the assembly permits only upper torso restraint forces on the retractor.

(6) If a seat belt assembly has a buckle in which the tongue is capable of inverted insertion, one of the three assemblies shall be tested with the tongue inverted.

(d) *Resistance to buckle abrasion.* Seatbelt assemblies shall be tested for resistance to abrasion by each buckle or manual adjusting device normally used to adjust the size of the assembly. The webbing of the assembly to be used in this test shall be exposed for 4 hours to an atmosphere having relative humidity of 65 percent and temperature of 70° F. The webbing shall be pulled back and forth through the buckle or manual adjusting device as shown schematically in Figure 9. The anchor end of the webbing (A) shall be attached to a weight (B) of 3 pounds. The webbing shall pass through the buckle (C), and the other end (D) shall be attached to a reciprocating device so that the webbing forms an angle of 8° with the hinge stop (E). The reciprocating device shall be operated for 2,500 cycles at a rate of 18 cycles per minute with a stroke length of 8 inches. The abraded webbing shall be tested for breaking strength by the procedure described in paragraph S5.1(b).

§ 571.213 [Amended]

2. Section S4 of Standard No 213, Child Seating Systems (49 CFR 571.213), would be amended to read as follows:

S4. *Requirements.* Each child seating system manufacturer before May 1, 1980, shall meet, at the option of the manufacturer, either the requirements of S4.1 through S4.11 of this standard, or the requirements of § 571.213-80 of this part (Standard No. 213-80).

3. A new Federal Motor Vehicle Safety Standard No. 213-80, Child Restraint Systems, would be added to read as set forth below.

§ 571.213-80 Standard No. 213-80; child restraint systems.

S1. *Scope.* This standard specifies requirements for child restraint systems used in motor vehicles.

S2. *Purpose.* The purpose of this standard is to reduce the number of children killed or injured in motor vehicle crashes.

S3. *Application.* This standard applies to child restraint systems for use in motor vehicles.

S4. *Definitions.*

"Car bed" means a child restraint system designed to restrain or position a child in the supine or prone position on a continuous flat surface.

"Child restraint system" means any device, except Type I or Type II seat belts, designed for use in a motor vehicle to restrain, seat, or position children who weigh not more than 50 pounds.

"Contactable surface" means any child restraint system surface (other than that of a belt, belt buckle, or belt adjustment hardware) that may contact any part of the head or torso of the appropriate test dummy, specified in S7, when a child restraint system is tested in accordance with S6.1.

"Seat orientation reference line" or "SORL" means the horizontal line through Point Z as illustrated in Figure 1A.

S5. *Requirements.* Each child restraint system shall meet the requirements in this section when, as specified, tested in accordance with S6.1.

S5.1 *Dynamic performance.*

S5.1.1 *Child restraint system integrity.* When tested in accordance with S6.1, each child restraint system shall:

(a) Exhibit no complete separation of any load bearing structural element and no partial separation exposing either surfaces with a radius of less than ¼ inch or surfaces with protrusions greater than ⅜ inch above the immediate adjacent surrounding contactable surface of any structral element of the system;

(b) If adjustable to different positions, remain in the same adjustment position during the testing as it was immediately before the testing; and

(c) If a front facing child restraint system, not allow the angle between the system's back support surfaces for the child and the system's seating surface to be less than 45 degrees at the completion of the test.

S5.1.2 *Injury criteria.* When tested in accordance with S6.1, each child restraint system that, in accordance with S5.5.2(f), is recommended for use by children weighing more than 20 pounds, shall—

(a) Limit the resultant acceleration at the location of the accelerometer mounted in the test dummy head as specified in Part 572 such that the expression:

$$\left[\frac{1}{t_2-t_1}\int_{t_1}^{t_2} a\,dt\right]^{2.5}(t_2-t_1)$$

shall not exceed 1,000, where a is the resultant acceleration expressed as a multiple of g (the acceleration of gravity), and t_1 and t_2 are any two moments during the impacts.

(b) Limit the resultant acceleration at the location of the accelerometer mounted in the test dummy upper thorax as specified in Part 572 to not more than 60 g's, except for intervals whose cumulative duration is not more than 3 milliseconds.

S5.1.3 *Occupant excursion.* When tested in accordance with S6.1 and adjusted in any position which the manufacturer has not, in accordance with S5.5.2(i), specifically warned against using in motor vehicles, each child restraint system shall meet the applicable excursion limit requirements specified in S5.1.3.1–S5.1.3.3.

S5.1.3.1 *Child restraint systems other than rear-facing ones and car beds.* In the case of each child restraint system other than a rear-facing child restraint system or a car bed, the test dummy's torso shall be retained within the system and no portion of the test dummy's head nor of either knee pivot point shall pass through the vertical transverse plane that is 30 inches forward of point z on the standard seat assembly, measured along the center SORL (as illustrated in Figure 1B).

S5.1.3.2 *Rear-facing child restraint systems.* In the case of rear-facing child restraint system, all portions of the test dummy's torso shall be retained within the system and no portion of the target point on either side of the dummy's head shall pass through the vertical transverse or horizontal planes which contain, respectively, the forward-most and top-most points on the child restraint system surfaces (illustrated in Figure 1C).

S5.1.3.3 *Car beds.* In the case of car beds, all portions of the test dummy's head and torso shall be retained within the confines of the car bed.

S5.1.4 *Back support angle.* When a rear-facing child restraint system is tested in accordance with S6.1, the angle between the system's back support surface for the child and the vertical shall not exceed 60 degrees.

S5.2 *Force distribution.*

S5.2.1 *Minimum head support surface—child restraints other than car beds.*

S5.2.1.1 Except as provided in S5.2.1.2, each child restraint system other than a car bed shall provide restraint against rearward movement of the head of the child (rearward in relation to the child) by means of a continuous seat back which is an integral part of the system and which—

(a) Has a height, measured along the system seat back surface for the child in the vertical longitudinal plane passing through the longitudinal centerline of the child restraint systems from the lowest point on the system

M Y 1 8 7 8
UMI

V 4 3 — 9 7

seating surface that is contacted by the buttocks of the seated dummy, as follows:

Weight [1] (in pounds)	Height [2] (in inches)
Less than 20 lb	18
20 lb or more, but not more than 40 lb	20
More than 40 lb	22

[1] When a child restraint system is recommended under S5.5(f) for use by children of the above weights.

[2] The height of the portion of the system seat back providing head restraint shall not be less than the above.

(b) Has a width of not less than 8 inches, measured in the horizontal plane at the height specified in paragraph (a) of this section.

(c) Limits the rearward rotation of the test dummy head so that the angle between the head and torso of the dummy specified in S7 when tested in accordance with S6.1 is not more than 45 degrees greater than the angle between the head and torso after the dummy has been placed in the system in accordance with S6.1.2.3 and before the system is tested in accordance with S6.1.

S5.2.1.2 A front-facing child restraint system is not required to comply with S5.2.1.1 if the target point on either side of the dummy's head is below a horizontal plane tangent to the top of the standard seat assembly when the dummy is positioned in the system and the system is installed on the assembly in accordance with S6.1.2.

S5.2.2 *Torso impact protection.* Each child restraint system other than a car bed shall comply with the applicable requirements of S5.2.2.1 and S5.2.2.2.

S5.2.2.1(a) The system surface provided for the support of the child's back shall be flat or concave and have a continuous surface area of not less than 85 square inches.

(b) Each system surface provided for support of the side of the child's torso shall be flat or concave and have a continuous surface of not less than 24 square inches for systems recommended for children weighing 20 pounds or more, or 48 square inches for systems recommended for children weighing less than 20 pounds.

(c) Each horizontal cross section of each system surface designed to restrain forward movement of the child's torso shall be flat or concave and each vertical longitudinal cross section shall be flat or convex with a radius of curvature of not less than 3 inches.

S5.2.2.2 Each forward facing child restraint system shall have no fixed or movable surface directly forward of the dummy and intersected by a horizontal line parallel to the SORL and passing through any portion of the dummy, except for surfaces designed to restrain the dummy when the system is tested in accordance with S6.1.

S5.2.3 *Head impact protection.*

S5.2.3.1 Each child restraint system, other than a child harness, which is recommended under S5.5.2(f) for children weighing less than 20 pounds shall comply with S5.2.3.2.

S5.2.3.2 Each system surface which is contactable by the dummy head when the system is tested in accordance with S6.1 shall be covered with slow recovery, energy absorbing material with the following characteristics:

(a) A thickness of not less than ¾ inch; and

(b) A 25 percent compression-deflection resistance of not less than 5 and not more than 9 pounds per square inch when tested in accordance with S6.3.

S5.2.4 *Protrusion limitation.* Any portion of a rigid structural component within or underlying a contactable surface, or any portion of a child restraint system surface that is subject to the requirements of S5.2.3 shall, with any padding or other flexible overlay material removed, have a height above any immediately adjacent restraint system surface of not more than ⅜ inch and no exposed edge with a radius of less than ¼ inch.

S5.3 *Installation.*

S5.3.1 Each child restraint system shall have no means designed for attaching the system to a vehicle seat cushion or vehicle seat back and no component (except belts) that is designed to be inserted between the vehicle seat cushion and vehicle seat back.

S5.3.2 When installed on a vehicle seat, each child restraint system, other than child harnesses, shall be capable of being restrained against forward movement solely by means of a Type I seat belt assembly (defined in S571.209) that meets Standard No. 208 (S571.208), or by means of a Type I seat belt assembly plus one additional anchorage strap that is supplied with the system and conforms to S5.4.

S5.3.3 *Car beds.* Each car bed shall be designed to be installed on a vehicle seat so that the car bed's longitudinal axis is perpendicuir to a vertical longitudinal plane through the longitudinal axis of the vehicle.

S5.4 *Belts, belt buckles, and belt webbing.*

S5.4.1 *Performance requirements.* The webbing of belts provided with a child restrain system and used to attach the system to the vehicle or to restrain the child within the system shall—

(a) After being subjected to abrasion as specified in S5.1(d) or S5.3(c) of FMVSS No. 209 (S571.209), have a breaking strength of not less than 75 percent of the strength of the unabraided webbing when tested in accordance with S5.1(b) of FMVSS No. 209.

(b) Meet the requirements of S4.2 (e) through (h) of MFVSS No. 209 (S571.209); and

(c) If contactable by the test dummy torso when the system is tested in accordance with S6.1, have a width of not less than 1½ inches when measured in accordance with S5.4.1.1.

S5.4.1.1 *Width test procedure.* Condition the webbing for 24 hours in an atmosphere of any relative humidity between 48 and 67 percent, and any ambient temperature between 70° and 77° F. Measure belt webbing width under a tension of 5 pounds applied lengthwise.

S5.4.2 *Belt buckles and belt adjustment hardware.* Each belt buckle and item of belt adjustment hardware used in a child restraint system shall conform to the requirements of S4.3(a) and S4.3(b) of Standard No. 209 (S571.209).

S5.4.3 *Belt Restraint.*

S5.4.3.1 *General.* Each belt that is part of a child restraint system and that is designed to restrain a child using the system shall be adjustable to snugly fit any child whose height and weight are within the ranges recommended in accordance with S5.5.2(f) and who is positioned in the system in accordance with the instructions required by S5.6.

S5.4.3.2 *Direct restraint.* Each belt that is part of a child restraint system and that is designed to restrain a child using the system and to attach the system to the vehicle shall, when tested in accordance with S6.1, impose no loads on the child that result from the mass of the system or the mass of the seat back of the standard seat assembly specified in S7.3.

S5.4.3.3 *Seating systems.* Except for child restraint systems subject to S5.4.3.4, each child restraint system that is designed for use by a child in a seated position and that has belts designed to restrain the child shall, with the test dummy specified in S7 positioned in the system in 'accordance with S6.1.2.3, provide:

(a) Upper torso restraint, including belts passing over each shoulder of the child;

(b) Lower torso restraint in the form of a lap belt assembly making an angle between 45° and 90° with the child restraint seating surface at the lap belt attachment points;

(c) In the case of each seating system recommended for children over 20 pounds, a crotch strap connectable to the lap belt.

S5.4.3.4 *Harnesses.* Each child harness shall:

(a) Provide upper torso restraint, including belts passing over each shoulder of the child;

(b) Provide lower torso restraint by means of lap and crotch belt; and

(c) Prevent a child of any height for which the restraint is recommended for use pursuant to S5.5.2(f) from standing upright on the vehicle seat when the child is placed in the device in accordance with the instructions required by S5.6.

S5.4.3.5 *Buckle Release.* Any buckle in a child restraint system belt assembly designed to restrain a child using the system shall, when tested in accordance with S6.2—

ALTERNATIVE PROPOSALS

Proposal A. (a) Not release when a force of not more than 12 pounds is applied before the test specified in S6.1, and (b) Release when a force of not more than 20 pounds is applied after the test specified in S6.1.

Proposal B. (a) Not release when a force of not more than 2.25 pounds is applied before the test specified in S6.1, and (b) Release when a force of not more than 13.5 pounds is applied after the test specified in S6.1.

Proposal C. Release when a force of not more than 20 pounds is applied before and after the test specified in S6.1.

S5.5 *Labeling.*

S5.5.1 Each child restraint system shall be permanently labeled with the information specified in S5.5.2 (a) through (k).

S5.5.2 The information specified in paragraphs (a)-(k) of this section shall be stated in the English language and lettered in block letters and numbers that are not less than 3/32 inch high and are on a contrasting background.

(a) The model name or number of the system.

(b) The manufacturer's name. A distributor's name may be used instead if the distributor assumes responsibility for all duties and liabilities imposed on the manufacturer with respect to the system by the National Traffic and Motor Vehicle Safety Act, as amended.

(c) The statement: "Manufactured in ——," inserting the month and year of manufacture.

(d) The place of manufacture (city and State, or foreign country). However, if the manufacturer uses the name of the distributor, then it shall state the location (city and State, or foreign country) of the principal offices of the distributor.

(e) The statement: "This child restraint system conforms to all applicable Federal motor vehicle safety standards."

(f) The following statement, inserting the manufacturer's recommendations for the maximum weight and height of children who can safely occupy the system:

THIS CHILD RESTRAINT IS DESIGNED FOR USE ONLY BY CHILDREN WHO WEIGH BETWEEN — AND — POUNDS AND ARE BETWEEN — AND — INCHES IN HEIGHT.

(g) The statement:

TO PROTECT YOUR CHILD IN A CRASH, THIS RESTRAINT MUST BE SECURED TO THE VEHICLE WITH A VEHICLE BELT AS SPECIFIED IN THE MANUFACTURER'S INSTRUCTIONS.

(h) In the case of each child restraint system that has belts designed to restrain children using them:

WARNING: TO PROTECT YOUR CHILD, USE AND SNUGLY ADJUST THE BELTS PROVIDED WITH THIS RESTRAINT TO RESTRAIN YOUR CHILD.

(i) In the case of each child restraint system which is not intended for use in motor vehicles at certain attitude or adjustment positions, the following statement, inserting the manufacturer's attitude or adjustment restrictions:

WARNING: TO PROTECT YOUR CHILD IN A CRASH, DO NOT USE THE —— ADJUSTMENT POSITION(S) OF THIS CHILD RESTRAINT IN A MOTOR VEHICLE.

(j) In the case of each child restraint system equipped with an anchorage strap, the statement:

WARNING: TO SAFELY RESTRAIN YOUR CHILD, THE ANCHORAGE BELT PROVIDED WITH THIS CHILD RESTRAINT *MUST* BE SECURED AS SPECIFIED IN THE MANUFACTURER'S INSTRUCTIONS.

(k) An installation diagram showing the child restraint system installed in a vehicle as specified in the manufacturer's instructions.

S5.5.3 The information specified in S5.5.2 (f)-(j) shall be located on the child restraint system so that it is visible when the system is installed as specified in S5.6.

S5.6 *Installation instructions.* Each child restraint system shall be accompanied by printed instructions in the English language that provide a step-by-step procedure, including diagrams, for installing the system in motor vehicles, securing the system in the vehicles, positioning a child in the system, and adjusting the system to fit the child.

S5.6.1 The instructions shall state that the rear center seating position is the safest seating position in most vehicles for installing a child restraint system.

S5.6.2 The instructions shall specify in general terms the types of vehicles, seating positions, and vehicle lap belts with which the system can or cannot be used.

S6 *Test Conditions and Procedures.*

S6.1 *Dynamic Systems Test.*

S6.1.1 *Test Conditions.*

S6.1.1.1 The test device is the standard seat assembly specified in S7.3. It is mounted on a dynamic test platform so that the center SORL of the seat is parallel to the direction of the test platform travel and so that movement between the base of the assembly and the platform is prevented. The platform is instrumented with an accelerometer and data processing system having a frequency response of 60Hz channel class as specified in Society of Automotive Engineers Recommended Practice J211a, "Instrumentation for Impact Tests." The accelerometer sensitive axis is parallel to the direction of the test platform travel.

S6.1.1.2 The tests are frontal barrier impact simulations and for—

(a) Test configuration I specified in S6.1.2.1.1, are at a velocity change of 30 mph with the acceleration of the test platform wholly within the shaded area in figure 2.

(b) Test configuration II specified in S6.1.2.1.2, are at a velocity change of 20 mph with the acceleration of the test platform wholly within the shaded area in figure 3.

S6.1.1.3 Type I seat belt assemblies meeting the requirements of Standard No. 209 (S571.209) and having webbing with a width of not more than 2 inches are attached, without the use of retractors or reels of any kind, to the seat belt anchorage points (illustrated in Figure 1B) provided on the standard seat assembly.

S6.1.1.4 Performance tests under S6.1 are conducted at any ambient temperature from 66° to 78° F and at any relative humidity from 10 percent to 70 percent.

S6.1.2 *Dynamic Test Procedure.*

S6.1.2.1 *Test Configuration.*

S6.1.2.1.1 *Test Configuration I.* In the case of each child restraint system, install a new child restraint system at the center seat position of the standard seat assembly in accordance with the manufacturer's instructions provided in accordance with S5.6 with the system.

S6.1.2.1.2 *Test Configuration II.* In the case of each child restraint system, other than a child harness, which is equipped with an anchorage belt, install a new child restraint system at the center seat position of the standard seat assembly in accordance with S6.1.2.1, using only the standard seat lap belt to secure the system to the standard seat.

S6.1.2.2 Tighten all belts used to attach the child restraint system to the standard seat assembly to a tension of not less than 12 pounds and not more than 15 pounds, as measured by a load cell used as specified in S7.3 on the webbing portion of the belt.

S6.1.2.3 Place in the child restraint any dummy specified in S7 for testing systems for use by children of the heights and weights for which the system is recommended in accordance with S5.6.

S6.1.2.3.1 When placing the 3-year-old test dummy in child restraint systems other than car beds, position the test dummy according to the instructions for child positioning provided by the manufacturer with the system in

MY 18 78 UMI

V 4 3 | 9 7

accordance with S5.6 while conforming to the following:

(a) Place the test dummy in the seated position within the system with the midsagittal plane of the test dummy head coincident with the center SORL of the standard seating assembly, holding the torso upright until it contacts the system's design seating surface.

(b) Extend the arms of the test dummy as far as possible in the upward vertical direction. Extend the legs of the dummy as far as possible in the forward horizontal direction, with the dummy feet perpendicular to the centerline of the lower legs.

(c) Using a flat square surface with an area of 4 square inches, apply a force of 40 pounds, perpendicular to the plane of the back of the standard seat assembly, first against the dummy crotch and then at the dummy thorax in the midsagittal plane of the dummy.

(d) After the steps specified in paragraph (c) of this section, rotate each dummy limb downwards in the plane parallel to its midsagittal plane until the limb contacts a surface of the child restraint system or the standard seat. Position the limbs, if necessary, so that limb placement does not inhibit torso or head movement in tests conducted under S6.

S6.1.2.3.2 When placing the 6-month-old dummy in child restraint systems other than car beds, position the test dummy according to the instructions for child positioning provided with the system by the manufacturer in accordance with S5.6 while conforming to the following:

(a) With the dummy in the supine position on a horizontal surface, and while preventing movement of the dummy torso by placing a hand on the center of the torso, rotate the dummy legs upward by lifting the feet until the legs contact the upper torso and the feet touch the head, and then slowly release the legs but do not return them to the flat surface.

(b) Place the dummy in the child restraint system s that the back of the dummy torso contacts the back support surface of the system, and tape the dummy head against the front of the seat back surface of the system by means of a single thickness of ¼-inch-wide paper masking tape placed across the center of the dummy face.

(c) Position the dummy arms veticaly upwards and then rotate each arm downward toward the dummy's lower body until it contacts a surface of the child restraint system or the standard seat assembly, ensuring that no arm is restrained from movement in other than the downward direction, by any part of the system or the belts used to anchor the system to the standard seat assembly.

S6.1.2.3.3 When placing the 6-month-old dummy or 3-year-old dummy in a car bed, place the dummy in the car bed in the supine position with its midsagittal plane perpendicular to the center SORL of the standard seat assembly and position the dummy within the car bed in accordance with instructions for child positioning provided with the car bed by its manufactuer in accordance with S5.6.

S6.1.2.4 If provided, shoulder and pelvic belts that directly restrain the dummy shall be adjusted as follows:

Tighten the belts until a 2-pound force applied (as illustrated in figure 5) to the webbing at the top of each dummy shoulder and to the pelvic webbing two inches on either side of the torso vertical certerline pulls the webbing ¼ inch from the dummy.

S6.1.2.5 Accerlerate the test platform to simulate frontal impact in accordance with S6.1.1.2(a) or S6.1.1.2(b), as appropriate.

S6.1.2.6 Measure dummy excursion and determine conformance to the requirements specified in S5.1 as appropriate.

S6.2 *Buckle release test procedure.* The buckles on the belts of each child restraint system equipped with buckled belts shall be tested in accordance with S6.2.1 through S6.2.5.

S6.2.1 Install the child restraint system on a standard seat assembly and place the appropriate test dummy in the system in accordance with S6.1.2.1 through S6.1.2.4.

S6.2.2 Tie a self-adjusting sling to each ankle and wrist of the dummy in the manner illustrated in figure 4.

S6.2.3 Pull the sling horizontally in the manner illustrated in figure 4 and parallel to the center SORL of the seat assembly and apply a force of 20 pounds in the case of a system tested with a 6 month-old dummy and 45 pounds in the case of a system tested with a 3 year-old dummy.

S6.2.4 While applying the force specified in S6.2.3, operate the buckle release mechanism in the manner specified in S5.2(d) of Standard No. 209 (S571.209).

S6.2.5 Measure the force required to release the buckle.

S6.3 *Head impact protection—energy absorbing material test procedure.*

S6.3.1 Prepare test specimens of the energy absorbing material used to comply with S5.2.3 in accordance with section 14 of the American Society for Testing and Materials (ASTM) Standard D1056-73, "Standard Specification for Flexible Cellular Materials—Sponge or Expanded Rubber."

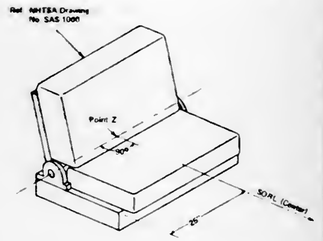
S6.3.2 Subject the prepared test specimens to the 25 percent compression-deflection test described in sections 17, 19, and 20 of that ASTM standard.

S7 *Test dummies.*

S7.1 *Six-month-old dummy.* An unclothed "Six-month-old Size Manikin" conforming to Subpart D of Part 572 of this chapter is used for testing a child restraint system that is recommended by its manufacturer in accordance with S5.6 for use by children in a weight range that includes children weighing not more than 20 pounds.

S7.2 *Three-year-old dummy.* A three-year-old dummy conforming to Subpart C of Part 572 of this chapter is used for testing a child restraint that is recommended by its manufacturer in accordance with S5.6 for use by children in a weight range that includes children weighing more than 20 pounds.

S7.2.1 Before being used in testing under this standard, the dummy is conditioned at any ambient temperature from 66° F to 78° F and at any relative humidity from 10 percent to 70 percent for at least 4 hours.

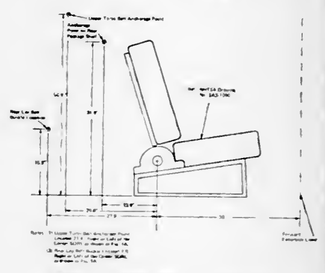


S7.2.2 When used in testing under this standard, the dummy is clothed in thermal knit waffle-weave polyester and cotton underwear, a size 4 long-sleeved shirt weighing 0.2 pounds, a size 4 pair of long pants weighing 0.2 pounds and cut off just far enough above the knee to allow the knee target to be visible, and size 7M sneakers with rubber toe caps, uppers of dacron and cotton or nylong and a total weight of 1 pound. Clothing other than the shoes is machine-washed in 160° F to 180° F water and machine-dried at 120° F to 140° F for 30 minutes.

S7.3 *Standard seat assembly.* The standard seat assembly used in testing under this standard is a simulated vehicle bench seat, with three seating positions, which is described in Drawing Package SAD-100-1000 and consists of drawings and a bill of materials.

(Secs. 103, 112, 114, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1401, 1403, 1407); delegations of authority at 49 CFR 1.50 and 501.8.)

Issued on May 10, 1978.



MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

[49 CFR Part 572]

[Docket No. 78-09; Notice 1]

ANTHROPOMORPHIC TEST DUMMIES REPRESENTING SIX MONTH OLD AND THREE YEAR OLD CHILDREN

Proposed Specifications and Performance Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice is being issued in conjunction with a proposal to require that child restraint systems be dynamically tested using anthropomorphic test dummies representing 6-month-old and 3-year-old children. Specifications and performance requirements for those dummies are proposed in this notice.

DATES: Comments must be received on or before December 1, 1978. Proposed effective date: Date of publication of the final rule on test dummies in the FEDERAL REGISTER.

ADDRESS: Comments should refer to the docket number and be submitted to Room 5108, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Vladislav Radovich, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street NW., Washington, D.C. 20590, 202-426-2264.

SUPPLEMENTARY INFORMATION: This proposal supplements a separate proposal being published today elsewhere in this issue of the FEDERAL REGISTER that would amend Federal Motor Vehicle Safety Standard No. 213, relating to child restraint systems, to expand the applicability of that standard and to require that child restraints be tested in simulated crashes. The measurements to be made in dynamically testing the child restraints would be made by placing child test dummies in the child restraints and subjecting the dummies and restraints to specified acceleration sled tests. Two sorts of dummies would be used in those tests. One would represent a 6 month old infant (infant dummy) and the other, a 3-year-old child (3-year-old child dummy). That proposal would require that, during the dynamic tests, the dummies be retained within the child restraints and that child restraints designed for children weighing more than 2 pounds (those restraints would typically be tested using the 3-year-old child dummy) limit the acceleration levels at specified locations in the dummy's head and chest.

The use of similar test dummies for evaluating child restraint systems in simulated crashes was initially proposed in the agency's March 1, 1974, notice of proposed rulemaking on the dynamic testing of child restraints (39 FR 7959). Three classes of dummies were proposed in that notice. For testing restraints recommended for children weighing 17 pounds or less, the notice proposed using a dummy representing a 6 month old child and made of sail cloth, filled with plastic pellets and lead shot. For the 17 to 43 pound range, the agency proposed use of either the Sierra 3 year old P/N 492-03 or the Alderson Model No. VIP-3C. For the over 43 pound range, the candidate dummies were the Alderson Model No. VIP-6C and the Sierra 6 year old P/N 492-106.

In the several months following the March 1, 1974, proposal, the 6 month old dummy was dynamically tested, modified, and retested by the Federal Aviation Administration in infant carriers of three manufacturers. The modified dummy represented an advance in the state-of-the-art and was vastly superior to the former version of the dummy. Notice of availability of detailed specifications for the modified 6-month-old dummy was published by NHTSA on May 22, 1974 (39 FR 18287).

Further action on the March 1, 1974, notice was delayed pending completion of additional work in specifications and performance criteria for the dummies. Since that notice, the NHTSA has initiated and completed a number of programs to select and define the design and specifications for the most suitable dummies to be used for testing child restraints.

The infant dummy proposed in this notice would be specified by descriptive design specifications alone, while the 3-year-old child dummy would be specified not only by such specifications, but also in performance terms. Those specifications and performance requirements are similar in type, although generally not in magnitude, to those set forth in Part 572, Subpart B, for 50th percentile male dummies. Mechanical drawings would provide uniformity of construction and design details in dummies or dummy parts produced by suppliers. Performance criteria would also be provided, where appropriate, to serve as calibration checks and help to assure repeatability of performance.

The use of specifications and performance criteria is consistent with the statements by the U.S. Court of Appeals for the Sixth Circuit regarding the 50th percentile male dummy in its December 5, 1972, decision on petitions for review of Safety Standard No. 208, Occupant Crash Protection (*Chrysler v. Volpe*, 472 F. 2d 659 (6th Cir. 1972)). The Court upheld the validity of the standard in most respects, but remanded the proceeding to NHTSA on the ground that the test dummy specifications were inadequate and did not meet the statutory requirement that the standard be phrased in objective terms. The Court noted three specific respects in which it considered the specifications to be inadequate. The Court also noted with approval the statement made by the NHTSA in a previous rulemaking notice relating to Standard No. 208: "(S)ince the dummy is merely a test instrument and not an item of regulated equipment, it is not necessary to describe it in performance terms; its design could be legally 'frozen' by detailed, blue-print-type drawings and complete equipment specifications" (36 FR 19255; October 1, 1971).

The agency has tentatively selected the infant dummy whose specifications were announced in the agency's May 22, 1974, notice to be the infant dummy used for testing under the new child restraint proposal. The dummy is based on a very simple design which represents a 6 month old infant in dimensional and mass distribution characteristics. It will provide a reliable record of the dynamics of a child restraint occupant during simulated impact tests. When it was used by NHTSA in assessing the ability of infant carriers to retain their occupants and maintain structural integrity during such tests, it was found to provide a consistent and repeatable measure for this purpose. However, the dummy is not suitable because of its construction to be instrumented for measuring inertial forces.

Detailed design drawings and a construction manual for the infant dummy are available for examination in the NHTSA Docket Section at the address given above for comments. Copies of these materials may be obtained from the Keuffel and Esser Co., 1512 North Danville Street, Arlington, Va. 22201.

The tentatively selected 3-year-old child dummy is the NHTSA test dummy SA 103C. It is a slightly modified version of the Alderson Model VIP-3C. After comprehensive comparative testing by the agency, the SA 103C dummy was selected instead of the Sierra 492-03 for the following reasons: The SA 103C dummy has more complete design details; is more adequate for withstanding the test loads during impact testing and for installing instrumentation; has a more accurate anthropometry and mass distribution and has more childlike kinematic responses during impacts; and has more consistent head and chest acceleration measurements during impacts.

The specifications for the 3-year-old child dummy would consist of the following three elements: a drawing package containing all of the technical details of the dummy parts and dummy assembly; a set of master patterns for all molded and cast parts of the dummy which enable rapid reproduction of them; and a maintenance manual containing instructions for assembly, disassembly, use, adjustments, and maintenance of dummies. These elements would ensure that the dummies would vary little in their construction. Performance criteria would also be specified to serve as calibration checks and further assure the uniformity of dummy construction and the repeatability of performance in dynamic testing.

The dummies would be equipped with photographic targets attached to the head and knees. They would also be instrumented with accelerometers for measurement of accelerations in the head and chest during impacts. The rule would specify the manner and location of installation of accelerometers so that there would be no variability in their measurements resulting from different locations and mountings of the accelerometers. As a further safeguard, the calibration tests would ensure the absence of damage from previous use.

Data obtained from impact testing of several child restraints with 3-year-old child dummies in them revealed that the dummies' performance has adequate levels of repeatability. This establishes their reliability as a tool for measuring child restraint performance. The use of these dummies, therefore, would provide an objective measure of the effectiveness of child restraints in car crashes.

The agency emphasizes that the calibration for the 3-year-old dummy is still tentative and anticipates that the final rule may reduce the response ranges further. Testing regarding the appropriate calibrations for that dummy will continue after issuance of this notice. The results of those tests will be placed in the public docket as soon as possible after completion of the tests.

Drawings and specifications for the 3-year-old child dummy are available for examination in the NHTSA Docket Section. Copies of those materials and an operation and maintenance manual can be obtained from the Keuffel and Esser Co. In addition, patterns for all cast and molded parts are available on a loan basis from the NHTSA Office of Vehicle Safety Standards.

The cost of the infant dummy is estimated to be less than $500 and of the 3-year-old child dummy, about $3,600. The materials used in the dummies are commercially obtainable, and are similar to those used in the 50th percentile male dummy described in Subpart B of Part 572.

From the agency's point of view anyone is free to produce the dummies used for testing and in fact the availability of relevant mechanical drawings through the NHTSA designated supply sources is intended to make that possible. The negotiation or adjudication of any patent or other private claims that may arise should be dealt with by the commercial and legal processes of the private sector.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information is likely to result in substantial competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition, the commentor or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4) and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been released to the public.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

The agency has reviewed the impacts of this regulation and determined that it is not a significant regulation within the meaning of Executive Order 12044.

The principal authors of this notice are Mr. Vladislav Radovich, Office of Vehicle Safety Standards, and Mr. Stephen Wood, Office of the Chief Counsel.

In consideration of the foregoing, it is proposed that 49 CFR Part 572, Anthropomorphic Test Dummies, be amended by adding a new Subpart C—Three Year Old Child and new Subpart D—Six Month Old Infant immediately after Subpart B as follows:

Subpart C—Three Year Old Child

Sec.

572.15 General description.
572.16 Head.
572.17 Neck.
572.18 Thorax.
572.19 Lumbar, spine, abdomen and pelvis.
572.20 Limbs.
572.21 Test conditions and instrumentation.

Subpart C—Three Year Old Child

§ 572.15 General description.

(a)(1) The dummy consists of the component assemblies specified in drawing SA 103C 001, which are described in their entirety by means of approximately 114 drawings and specifications grouped by component assemblies under the following headings:

SA 103C 010	Head Assembly
SA 103C 020	Neck Assembly
SA 103C 030	Torso Assembly
SA 103C 041	Upper Arm Assembly Left
SA 103C 042	Upper Arm Assembly Right
SA 103C 051	Forearm Hand Assembly Left
SA 103C 052	Forearm Hand Assembly Right
SA 103C 061	Upper Leg Assembly Left
SA 103C 062	Upper Leg Assembly Right
SA 103C 071	Lower Leg Assembly Left
SA 103C 072	Lower Leg Assembly Right
SA 103C 081	Foot Assembly Left
SA 103C 082	Foot Assembly Right

The drawings and specifications are incorporated in this part by reference to the thirteen headings and are available for examination in Docket 78-09, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. Copies may be obtained from Keuffel & Esser Co., 1521 North Danville Street, Arlington, Va. 22201.

(2) The patterns of all cast and molded parts for reproduction of the molds needed in manufacturing of the dummies are incorporated in this part by reference. A set of the patterns can be obtained on a loan basis by manufacturers of the test dummies, or others if need is shown, from the Office of Vehicle Safety Standards, NHTSA, 400 Seventh Street SW., Washington, D.C. 20590.

MY 18 78 UMI

V 4 3 — 9 7

(3) An Operation and Maintenance Manual with instructions for the use and maintenance of the test dummies dated May 28, 1976, Contract No. DOT-HS-6-01294 is incorporated in the part by reference. Copies of the manual can be obtained from the Keuffel & Esser Co. All provisions of this manual are valid unless modified by this regulations. This document is available for examination in Docket 78-09.

(4) The drawings, specifications and the manual are subject to changes, but any change will be accomplished by appropriate administrative procedures and announced by publication in the FEDERAL REGISTER and be available for examination and copying as indicated in this paragraph.

(5) The drawings, specifications, patterns, and manual are on file in the reference library of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C.

(b) Adjacent segments are joined in a manner such that throughout the range of motion and also under simulated crash-impact conditions, there is no contract between metallic elements except for contacts that exist under static conditions.

(c) The structural properties of the dummy are such that the dummy conforms to this part in every respect both before and after being used in tests specified by Standard No. 213 (§ 571.213).

§ 572.16 Head.

(a) The head consists of the assembly shown in drawing SA 103C 001 by number SA 103C 010, and conforms to each of the drawings listed under this number on drawing SA 103C 002, sheet 8.

(b) When the head is impacted in accordance with paragraph (c) of this section by a test probe conforming to § 572.21(a) at 7 fps., the peak resultant accelerations measured at the location of the accelerometers mounted in the headform in accordance with § 571.21(b) shall be not less than 95g, and not more than 122g. The recorded acceleration-time curve for this test shall be unimodal and shall lie at, or above the 50g level for an interval not less than 2.0 and not more than 3.0 milliseconds. The lateral acceleration vector shall not exceed 5g.

(c) *Test Procedure:*

(1) Seat the dummy on a seating surface having a back support as specified in § 572.21(h) and orient the dummy in accordance with § 572.21(h) and adjust the joints of the limbs at any setting between 1g and 2g, which just supports the limbs' weight when the limbs are extended horizontally forward.

(2) Adjust the test probe so that its longitudinal centerline is at the forehead midsagittal plan 2.9±0.1 inches below the top of the head and coincides within 2 degrees with the line made by the intersection of horizontal and midsagittal planes passing through this point.

(3) Adjust the dummy so that the surface area on the forehead immediately adjacent to the projected longitudinal centerline of the test probe is vertical.

(4) Impact the head with the test probe so that at the moment of impact the probe's longitudinal centerline falls within 2 degrees of a horizontal line in the dummy's midsagittal plane.

(5) Guide the probe during impact so that it moves with no significant lateral, vertical, or rotational movement.

(6) Allow a time period of at least 20 minutes between successive tests of the head.

§ 572.17 Neck.

(a) The neck consists of the assembly shown in drawing SA 103C 001 as number SA 103C 020, and conforms to each of the drawings listed under this number on drawing SA 103C 002, sheet 9.

(b) When the head-neck assembly is tested in accordance with paragraph (c) of this section, the head shall rotate in reference to the pendulum's longitudinal centerline a total of 84 degrees ± 8 degrees about its center of gravity, rotating to the extent specified in the following table at each indicated point in time, measured from impact, with the chordal displacement measured at its center of gravity. The chordal displacement at time T is defined as the straight line distance between (1) the position relative to the pendulum arm of the head center of gravity at time zero, and (2) the position relative to the pendulum arm of the head center of gravity at time T as illustrated by figure 3. The peak resultant acceleration recorded at the location of the accelerometers mounted in the headform in accordance with § 572.21(b) shall not exceed 30g. The pendulum shall not reverse direction until the head's center of gravity returns to the original zero time position relative to the pendulum arm.

Rotation (degrees)	Plus or minus	Time	Chordal (inches ± 0.8)
0	0	2±.08t	0
30	21	2±.08t	2.2
60	36	2±.08t	4.3
Maximum	62	2±.08t	5.8
60	91	2±.08t	4.3
30	108	2±.08t	2.2
0	123	2±.08t	0

(c) *Test Procedure:*

(1) Mount the head and neck on a rigid pendulum as specified in Figure 4, so that the head's midsagittal plane is vertical and coincides with the plane of motion of the pendulum's longitudinal centerline. Mount the neck directly to the pendulum as shown in Figure 15.

(2) Release the pendulum and allow it to fall freely from a height such that the velocity at impact is 17.00 ± 1.0 feet per second (fps), measured at the center of the accelerometer specified in figure 4.

(3) Decelerate the pendulum to a stop with an acceleration-time pulse described as follows:

(i) Establish 5g and 20g levels on the a-t curve.

(ii) Establish t_1 at the point where the a-t curve first crosses the 5g level, t_2 at the point where the rising a-t curve first crosses the 20g level, t_3 at the point where the decaying a-t curve last crosses the 20g level, and t_4 at the point where the decaying a-t curve first crosses the 5g level.

(iii) t_3-t_1, shall be not more than 3 milliseconds.

(iv) t_3-t_2, shall be not less than 18 and not more than 21 milliseconds.

(v) t_4-t_3, shall be not more than 5 milliseconds.

(vi) The average deceleration between t_2 and t_3 shall be not less than 20g and not more than 36g.

(4) Allow the neck to flex without contact of the head or neck with any object other than the pendulum arm.

(5) Allow a time period of at least 1 hour between successive tests of the head and neck.

§ 572.18 Thorax.

(a) The thorax consists of the part of the torso shown in assembly drawing SA 103C 001 by number SA 103C 030 and conforms to each of the applicable drawings listed under this number on drawing Sa 103C 002, sheets 10 and 11.

(b) The thorax rib cage is constructed so as to permit the midpoint of the sternum to be depressed 1.5 inches without contact between the rib cage and other parts of the dummy.

(c) When impacted by a test probe conforming to § 572.21(a) at 10 fps. in accordance with paragraph (d) of this section, the peak resultant accelerations at the location of the accelerometers mounted in the chest cavity in accordance with § 572.21(c) shall be not less than 46g and not more than 78g. The acceleration-time curve for the test shall be unimodal and shall lie at or above the 30g level for an interval not less than 2.0 milliseconds and not more than 4.0 milliseconds. The lateral acceleration vector shall not exceed 5g.

(d) *Test Procedure:*

(1) With the dummy seated without back support on a surface as specified in § 572.21C(h) and oriented as specified in § 572.21(h), adjust the dummy arms and legs until they are extended horizontally forward parallel to the midsagittal plane. the joints of the limbs are adjusted at any setting between 1g and 2g, which just supports the limbs' weight when the limbs are extended horizontally forward.

(2) Place the longitudinal centerline of the test probe at the chest midsagittal plane so that it is 11.25 ± 0.1 inches below the tope of the head at impact.

(3) Align the test probe so that at impact its longitudinal centerline coincides within 2 degrees with the line formed by intersection of the horizontal and midsagittal planes passing through the designated impact point.

(4) Adjust the dummy so that the surface area on the thorax immediately adjacent to the projected longitudinal centerline of the test probe is vertical.

(5) Impact the thorax with the test probe so that at the moment of impact the probe's longitudinal centerline falls with 2 degrees of a horizontal line in the dummy midsagittal plane.

(6) Guide the probe during impact so that it moves with no significant lateral, vertical or rotational movement.

(7) Allow a time period of at least 20 minutes between successive tests of the chest.

§ 572.19 Lumbar spine, abdomen and pelvis.

(a) The lumbar spine, abdomen, and pelvis consist of the part of the torso assembly shown by number SA 103C 030 on drawing SA 103C 001 and conform to each of the applicable drawings listed under this number on drawing SA 103C 002, sheets 10 and 11.

(b) When subjected to continuously applied force in accordance with paragraph (c) of this section, the lumbar spine assembly shall flex by an amount that permits the rigid thoracic spine to rotate from its initial position in accordance with Figure 18 of this subpart by 40 degrees at a force level of not less than 43 pounds and not more than 83 pounds, and straighten upon removal of the force to within 5 degrees of its initial position.

(c) *Test Procedure:* (1) The dummy with lower legs removed is positioned in an upright seated position on a seat as indicated in Figure 18, ensuring that all dummy component surfaces are clean, dry and untreated unless otherwise specified.

(2) Attach the pelvis to the seating surface by a bolt C/328, modified as shown in Figure 18, and the upper legs at the knee axial rotation joints by the attachments shown in Figure 18. Tighten the mountings so that the pelvis-lumbar joining surface is horizontal and adjust the femur friction plungers at each hip socket joint to 50 inch pounds torque.

(3) Flex the thorax forward 50 degrees and then rearward as necessary to return to its initial position in accordance with Figure 18 unsupported by external means.

(4) Apply a forward force perpendicular to the thorax instrument cavity rear face in the midsagittal plane 11.2 inches vertically above the dummy's seating surface. Apply the force at any torso deflection rate between 0.5 and 1.5 degrees per second up to 40 degrees of flexion but no further; continue to apply for 10 seconds the force necessary to maintain 40 degrees of flexion, and record the highest applied force at that time. Release all force as rapidly as possible and measure the return angle 3 minutes after the release.

§ 572.20 Limbs.

The limbs consist of the assemblies shown on drawing SA 103C 001 as Nos. SA 103C 041, SA 103C 042, SA 103C 051, SA 103C 052, SA 103C 061, SA 103C 062, SA 103C 071, SA 103C 072, SA 103C 081, SA 103C 082, and conform to each of the applicable drawings listed under their respective numbers of the drawing SA 103C 002, sheets 12 through 21.

§ 572.21 Test conditions and instrumentation.

(a) The test probe used for head and thoracic impact tests is a cylinder 3 inches in diameter, 13.8 inches long and weights 10 lbs., 6 ozs. Its impacting end has a flat right face that is rigid and that has an edge radius of 0.5 inches.

(b) Accelerometers are mouted in the head on the mounting block (A/310) located on the horizontal transverse bulkhead shown in the drawings subreferenced under assembly SA 103C 010 so that their sensitive axes intersect orthogonally, except in the case of tri-axial accelerometers, at the axial intersection point located at the intersection of a line connecting the longitudinal centerlines of the transfer pins in the sides of the dummy head with the midsagittal plane of the dummy head. In the case of a tri-axial accelerometer, the intersection of two of the sensitive axes of the accelerometer can be located up to 1 inch from the axial intersection point and the third sensitive axis can be located up to 0.3 inches from the axial intersection point. One accelerometer is aligned with its sensitive axis parallel to the vertical bulkhead and midsagittal plane, and with its seismic mass center at the intersection of the midsagittal and horizontal planes passing through the axial intersection point at any distance up to 0.3 inches dorsal to the axial intersection point. another accelerometer is aligned with its sensitive axis in the horizontal plane and perpendicular to the midsagittal plane, and with its seismic mass center at any distance up to 0.2 inches seismic mass center at any distance up to 0.2 inches inferior to, 0.4 inches to the right of, and 1 inch dorsal to the axial intersection point (right side of dummy is the same as that of child). A third accelerometer is aligned with its sensitive axisparallel to the midsagittal and horizontal planes, and with its seismic mass center at any distance up to 0.2 inches inferior to, 0.5 inches dorsal to, and 0.4 inches to the right of the axial intersection point. In the case of a tri-axial accelerometer, its axes are aligned in the same way that the axes of three separate accelerometers are aligned.

(c) Accelerometers are mounted in the thorax on the mounting plate attached to the vertical transverse bulkhead shown in the drawings subreferenced under assembly No. SA 103C 030 in drawing SA 103C 001 so that their sensitive axes intersect orthogonally at the axial intersection point located in the midsagittal plane 3 inches above the top surface of the lumber spine and 0.3 inches dorsal to the accelerometer mounting plate surface. In the case of a tri-axial accelerometer, one sensitive axis of the accelerometer can be at any distance up to 0.9 inches from the axial intersection point. One accelerometer is aligned with its sensitive axis parallel to the vertical bulkhead and mid-sagittal planes, and with its seismic mass center at the intersection of transverse vertical and horizontal planes passing through the axial intersection point and at any distance up to 0.4 inches to the left of the axial intersection point. Another accelerometer is aligned with its sensitive axis in the vertical transverse plane and perpendicular to the midsagittal plane and with its seismic mass center at the intersection of the midsagittal and vertical transverse planes passing through the axial intersection point and at any distance up to 0.5 inches superior to the axial intersection point. A third accelerometer is aligned with its sensitive axis parallel to the midsagittal and horizontal planes and with its seismic mass center at any distance up to 0.5 inches superior, dorsal and to the right of the axial intersection point. In the case of a tri-axial accelerometer, its axes are aligned in the same way that the axes of three separate accelerometers are aligned.

(d) The outputs of accelerometers installed in the dummy, and of test apparatus specified by this part, are recorded in individual data channels that conform to the requirements of SAE Recommended Practice J211a, December 1971, with channel classes as follows:

(1) Head acceleration—Class 1000.

(2) Pendulum acceleration—Class 60.

(3) Thorax acceleration—Class 180.

(e) The mountings for accelerometers have no resonance frequency within a range of 3 times the frequency range of the applicable channel class.

M Y 1 8 — 7 8
UMI.

V 4 3 — 9 7

(f) Limb joints are set at the force between 1-2g, which just supports the limbs' weight when the limbs are extended horizontally forward. The force required to move a limb segment does not exceeed 2g throughout the range of limb motion.

(g) Performance tests are conducted at any temperature from 66° F to 78° F and at any relative humidity from 10 percent to 70 percent after exposure of the dummy to these conditions for a period of not less than 4 hours.

(h) For the performance tests specified in §§ 572.16, 572.18, and 572.19, the dummy is positioned in accordance with Figures 16, 17, and 18 as follows:

(1) The dummy is placed on a flat, rigid, clean, dry, horizontal surface of teflon sheeting with a smoothness of 10 microinches and whose length and width dimensions are not less than 16 inches, so that the dummy's midsagittal plane is vertical and centered on the test surface. For head tests, the seat has a vertical back support whose top is 12.4±0.2 inches above the seating surface. The rear surfaces of the dummy's shoulders and buttocks are touching the back support as shown in Figure 16. For thorax and lumbar spine tests, the seating surface is without the back support as shown in Figures 17 and 18, respectively.

(2) The shoulder yokes are adjusted so that they are at the midpoint of their anterior-posterior travel with their upper surfaces horizontal.

(3) The dummy is adjusted for head impact and lumbar flexion tests so that the rear surfaces of the shoulders and buttocks are tangent to a transverse vertical plane.

(4) The arms and legs are positioned so that their centerlines are in planes parallel to the midsagittal plane.

(i) The dummy's dimensions are specified in drawings No. SA 103C 002, sheets 22 through 26.

(j) Performance tests of the same component, segment, assembly or fully assembled dummy are separated in time by a period of not less than 20 minutes unless otherwise specified.

(k) Surfaces of the dummy components are not painted except as specified in this part or in drawings subtended by this part.

Subpart D—Six Month Old Infant

Sec.
572.25 General description.

Subpart D—Six Month Old Infant

§ 572.25 General Description.

(a) The infant dummy is specified in its entirety by means of 5 drawings (No. SA 100I 001) and a construction manual which describes in detail the materials and the procedures involved in the manufacturing of this dummy. The drawings and the manual are incorporated in this part by reference and are available for examination in Docket 78-09, Room 5108, 400 Seventh Street SW., Washington, D.C. Copies may be obtained from Keuffel & Esser Co., 1512 North Danville Street, Arlington, Va. 22201. The drawings and the manual are subject to changes, but any change will be accomplished by appropriate administrative procedures and announced by publication in the FEDERAL REGISTER and be available for examination and copying as indicated in this paragraph. The drawings and manual are on file in the reference library of the FEDERAL REGISTER, National Archives and Records Services, General Services Administration, Washington, D.C.

(b) The structural properties and dimensions of the dummy are such that the dummy conforms to this part in every respect, both before and after being used in tests specified by Standard No. 213 (571.213).

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 501.8.)

Issued on May 10, 1978.

CIVIL AERONAUTICS BOARD

[Docket 31821; Order 78-5-57]

DELTA AIR LINES, INC.

Order Setting Application for Hearing in Accordance With Subpart N Expedited Procedures

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 11th day of May, 1978.

On December 13, 1977, Delta Air Lines filed an application, pursuant to Subpart N of Part 302 of the Board's Procedural Regulations, for amendment of its certificates of public convenience and necessity for Routes 24 and 27 to authorize it to provide nonstop service between Atlanta and Hartford/Springfield.[1]

By order 78-2-80, February 15, 1978, the Board denied Eastern Air Lines' request that Delta's application be dismissed, and set the application for further proceedings under Rules 1406-1410 of Subpart N.

Answers in support of Delta's application were filed by the Atlanta parties[2] and the Hartford parties.[3] The Springfield parties[4] filed a "statement of position" in favor of Delta's request. No competing applications for the authority have been filed.

Eastern filed an answer again urging that Delta's application be dismissed. Eastern asserts, among other things, that the Atlanta-Hartford market is currently well-served by its five daily nonstop roundtrips. Accordingly, Eastern submits that there is no reason to give Delta's application for improved competitive authority hearing priority over more worthy applications, moreover, Eastern argues that it would suffer gross revenue diversion of over $3 million should Delta's proposal be implemented.

Delta filed a reply arguing that it has made a sufficient showing in support of its application to justify removal of its Atlanta-Hartford/Springfield operating restriction without the necessity of a hearing.

We have decided to set Delta's application for hearing in accordance with Subpart N expedited procedures.

We believe that there is merit to Delta's suggestion that its application be processed by non-oral hearing procedures. In view of our capacity at this moment, however, we believe that its request can be processed and resolved efficiently and rapidly under usual Subpart N procedures, and we will so proceed.

Accordingly, it is ordered that:

1. The application of Delta Air Lines, Inc., in Docket 31821, be set for hearing, under the procedures of Subpart N of Part 302 of the Board's Procedural Regulations, before an administrative law judge of the Board at a time and place to be designated later; and

2. This order shall be served upon all persons listed in the service list attached to the application of Delta Air Lines, Inc., in Docket 31821.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]
Secretary.

[FR Doc. 78-13546 Filed 5-17-78; 8:45 am]

[1] Delta is currently able to provide one-stop, single-plane service in the Atlanta-Hartford/Springfield market through combination of Routes 24 and 27, via the common junctions points of Philadelphia, Baltimore, Washington or New York.

[2] The City of Atlanta and the Atlanta Chamber of Commerce.

[3] The City of Hartford, the Hartford Chamber of Commerce and the Connecticut Department of Transportation.

[4] The City of Springfield and the Greater Springfield Chamber of Commerce.

[5] All Members concurred.

COMMISSION ON CIVIL RIGHTS

WISCONSIN ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a factfinding meeting of the Wisconsin Advisory Committee (SAC) of the Commission will convene at 9 a.m. and will end at 5 p.m. on June 1, 1978. State Capitol, Capitol Square Room 321 NE, Madison, Wis. 53702.

Persons wishing to attend this factfinding meeting should contact the Committee Chairperson, or the Midwestern Regional Office of the Commission, 230 South Dearborn Street, 32d Floor, Chicago, Ill. 60604.

The purpose of this meeting will be to discuss Redlining Issues; members of the insurance industry, community organizations, and State officials will be invited to make presentation.

This meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, D.C. May 16, 1978.

JOHN I. BINKLEY,
Advisory Committee Management Officer.

[3510-13]

DEPARTMENT OF COMMERCE

National Bureau of Standards

TFE—FLUOROCARBON RESIN FLEXIBLE HOSE

Intent To Withdraw Commercial Standard

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the intent to withdraw Commercial Standard CS 247-62, "TFE-Fluorocarbon (Potytetra- fluoroethylene) Resin Flexible Hose (Wire Braid Reinforced)." It has been tentatively determined that this standard is technically inadequate, no longer used by the industry, and no longer in the public interest to maintain.

Any comments or objections concerning this intended withdrawal of this standard should be made in writing to Standards Development Services, National Bureau of Standards, Washington, D.C. 20234, on or before June 19, 1978. The effective date of withdrawal will not be less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of withdrawal.

Dated: May 12, 1978.

ERNEST AMBLER,
Director.

[FR Doc. 78-13484 Filed 5-17-78; 8:45 am]

[3510-13]

TFE-FLUOROCARBON RESIN SHEET

Action on Proposed Withdrawal of Commercial Standard

In accordance with section 10.12 of the Department's "Procedures for the Development of voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the withdrawal of Commercial Standard CS 239-63, "TFE-Fluorocarbon (Polytetra- fluoroethylene) Resin Sheet."

This withdrawal action is being taken for the reason that CS 239-63 is adequately covered by the American Society for Testing and Materials' standard ASTM D3293-74, "Standard Specification for TFE-Fluorocarbon Resin Sheet," and duplication is inappropriate and not in the public interest. This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the *Federal Register* of March 7, 1978 (43 FR 9330), to withdraw this standard.

The effective date for the withdrawal of this standard will be on July 17, 1978. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce procedures.

Dated: May 12, 1978.

ERNEST AMBLER,
Director.

[FR Doc. 78-13485 Filed 5-17-78; 8:45 am]

[3510-13]

THERMAL CONDUCTANCE FACTORS FOR PREFORMED ABOVE-DECK ROOF INSULATION

Intent To Withdraw Simplified Practice Recommendation

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the intent to withdraw Simplified Practice Recommendation R 257-55, "Thermal Conductance Factors for Preformed Above-Deck Roof Insulation."

It has been tentatively determined that this standard is technically inadequate and that revision would serve no useful purpose because the subject matter of R 257-55 is adequately covered by the American Society for Testing and Materials' standard ASTM C 855-77, "Thermal Resistance Factors for Preformed Above-Deck Roof Insulation."

Any comments or objections concerning this intended withdrawal of this standard should be made in writing to Standards Development Services, National Bureau of Standards, Washington, D.C. 20234, on or before June 19, 1978. The effective date of withdrawal will not be less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of withdrawal.

Dated: May 12, 1978.

ERNEST AMBLER,
Director.

[3510-22]

National Oceanic and Atmospheric Administration

MARINE MAMMAL

Notice of Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protecion Act of 1972 (16 U.S.C. 1361-1407); and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:
   a. Name: V. J. A. Manton; The Zoological Society of London (P-169A).
   b. Address: Whipsnade Park, Dunstable Beds LU6 2LF, Whipsnade 872171.
2. Type of Permit:
   Public Display.
3. Name and Number of Animals:
   bottlenosed dolphin (*Tursiops truncatus*)—1.
4. Type of Activities;
   To capture and maintain in a permanent facility.
5. Location of Activities:
   Gulf of Mexico.
6. Period of Activities:
   2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammal involved.

As a request for a permit to take living marine mammals to be maintained in areas outside the jurisdiction of the United States, this application bas been submitted in accordance with National Marine Fisheries Service policy concerning such applications (40 FR 11614, March 12, 1975). In this regard, the application:

(a) Was submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, through the Department of the Environment of the United Kingdom, that Department being responsible, among other things, for ensuring the suitable care of animals in captivity;

(b) Includes:

i. A verification from the Ministry of Agriculture Fisheries and Food of the United Kingdom, of the information set forth in the application;

ii. A certification from the Department of the Environment that the Government of the United Kingdom is prepared to monitor compliance with the terms and conditions of the permit, and will do so, if and when necessary; and

iii. A statement that the Department of the Environment will have no objection to a NMFS decision to amend, suspend or revoke a permit.

In accordance with the above cited policy, the certification and statements of the Department of the Environment and the Ministry of Agriculture, Fisheries and Food of the United Kingdom have been found appropriate and sufficient to allow consideration of this permit application.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and—

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Fla. 33702.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and The Committee of Scientific Advisors.

Written data and views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before June 19, 1978. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: April 20,1978.

ROLAND FINCH,
Acting Deputy Assistant, Director for Fisheries Management, National Marine Fisheries Service.

Office of the Secretary

[Dept. Org. Order 25-5A, Amdt. 3]

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Statement of Organization, Functions and Delegation of Authority

This order effective May 5, 1978 further amends the material appearing at 42 FR 35672 of July 11, 1977, 43 FR

M Y 1 8 7 8 UMI

V 43 97

6127 of February 13, 1978 and 43 FR 6218 of February 13, 1978.

Department Organization Order 25-5A of June 3, 1977 is hereby further amended as shown below. The purpose of this amendment is to delete the requirement for the Administrator, NOAA to advise the Secretary before any final action is taken on the establishment of schedules of fees under paragraph 204(b)(10) of the Fishery Conservation and Management Act of 1976, yet retain the limitation upon subsequent redelegation of such final actions beyond an Assistant Administrator.

Section 3. *Delegation of authority.* a. In pen and ink at the end of subparagraph 3.01dd.2.(c) add the word "and" after the semicolon, delete subparagraph 3.01dd.2.(d), reletter subparagraph 3.01dd.2.(e) as 3.10dd.2.(d), and replace the semicolor at the end of the new 3.01dd.2.(d) with a period.

b. Subparagraph 3.01dd.3. is revised to read as follows:

3. The Administrator shall not redelegate beyond an Assistant Administrator any of the final actions to be taken under those provisions of the Act set forth in subparagraphs 3.01dd.2. (a) through (d) of this order, or the establishment of schedules of fees under paragraph 204(b)(10) of the Act."

Effective date: May 5, 1978.

ELSA A. PORTER,
Assistant Secretary for Administration.

[3510-17]

OFFICE OF EMERGENCY READINESS

Revocation Order

This order effective April 19, 1978 supersedes the material appearing at 41 FR 37829 of September 8, 1976.

Revocation. Department Organization Order 20-4, dated August 10, 1976 is hereby revoked.

Explanation. The functions, personnel, funds, property, and records of the Office of Emergency Readiness have been transferred to the Office of Organization and Management Systems (DOO 20-7).

Effective date: April 19, 1978.

ELSA A. PORTER,
Assistant Secretary for Administration.

[FR Doc. 78-13480 Filed 5-17-78; 8:45 am]

[3510-17]

[Dept. Org. Order 20-7, Amdt. 3]

OFFICE OF ORGANIZATION AND MANAGEMENT SYSTEMS

Statement of Organization, Functions, and Delegation of Authority

This order effective April 19, 1978 further amends the material appearing at 41 FR 50321 of November 15, 1976, 42 FR 11863 of March 1, 1977 and 43 FR 6132 of February 13, 1978.

Department Organization Order 20-7, dated November 1, 1976, is hereby further amended. The purpose of this amendment is to reflect the transfer of the functions and organization of the Office of Emergency Readiness to the Office of Organization and Management Systems and the establishment of the Emergency Planning and Coordination Division.

1. In Section 3. *Functions.* In pen and ink, change the designation of the existing subparagraph 3.01b. to 3.01c., and add the following new subparagraph 3.01b.:

"b. Serve as the principal staff component within the Department for coordinating and assisting in the development, implementation, and continuation of a Departmentwide emergency preparedness program, particularly as applicable to the requirements of Executive Order 11490."

2. In Section 4. *Organization.* Add a new paragraph 4.03, to read as follows:

".03 The *Emergency Planning and Coordination Division* shall coordinate and assist Departmentwide in complying with the requirements of Executive Order 11490; direct the development, coordination, testing, evaluation, and implementation of all emergency plans and programs in the fields of continuity of government, natural disaster recovery assistance, civil preparedness, and domestic crises; assist operating units in the development of their emergency plans and review these plans for adequacy in terms of assigned functions; administer the Department's National Defense Executive Reserve Program; prepare, maintain, and control emergency assignments for the Secretary, Secretarial Officers and others, as required, and brief these officials on the current status of the Department's emergency functions; establish and maintain an emergency alerting procedure for headquarters and field personnel, and plan, coordinate, and evaluate emergency tests and exercises conducted by the Department; coordinate the plans, procedures, and activities of the Department and its operating units in disaster assistance and crises management programs, including Departmental reports to the Federal Preparedness Agency (FPA/GSA) and other Federal agencies; develop and coordinate Department Administrative Orders pertaining to emergency preparedness plans, procedures, operations, and related programs; control approval of the obligation of funds for emergency activities charged against the Working Capital Fund, and evaluate budget requests of other units of the Department concerned with emergency actitivies; develop and administer, both at national and field levels, the Department's policies on continuity of essential functions, and the acquisition, maintenance, staffing, and operations of all emergency operating facilities. The head of the Division shall also perform the functions of Emergency Coordinator for the Department, as prescribed in Federal Preparedness Circular No. 10 of August 20, 1976, and issue instructions and guidance to the Department's Regional Emergency Coordinators, as provided for in Appendix A to this order."

All outstanding Department orders, delegations, memoranda, agreements, proceedings, investigations, or other such actions affecting the former Departmental Office of Emergency Readiness shall continue and remain in force until they expire, are amended, or are revoked by appropriate authority.

Effective date: April 19, 1978.

ELSA A. PORTER,
Assistant Secretary for Administration.

APPENDIX A

REGIONAL EMERGENCY COORDINATORS

Emergency programs at the field level shall be coordinated by the Bureau of Field Operations District Office Directors selected to represent the Secretary in each of the ten Federal Regional Council cities (e.g., Boston, New York, Philadelphia, Atlanta, Chicago, Dallas, Kanas City, Denver, San Francisco, and Seattle.)

The Bureau of Field Operations District Office Directors in the ten cities are hereby designated Regional Emergency Coordinators and as such they shall be the principal advisers and contact points for the Department in their respective regions, and shall provide staff liaison concerning activities of interest to the Department. Also, they shall maintain a list of specialists from other Commerce field elements whom they can call on for expertise related to a particular plan or program.

Acting in accordance with instructions and guidance issued by the Chief, Emergency Planning and Coordination Division, OOMS, through the Bureau of Field Operations, ITA, the Regional Emergency Coordinators shall:

1. Represent the Department on regional, State and local government committees, boards and working groups involved in emergency preparedness plans and programs, including continuity of essential functions, emergency management of resources, civil preparedness disaster assistance, and related activities;

2. Provide guidance and assistance to those elements of State governments charged with preparedness planning for the emergency management of resources for which the Department has been assigned responsibilities;

3. Serve as the Department's principal advisers to the Directors of the respective FPA/GSA Defense Civil Preparedness Agency (DCPA) regions on matters relating to the functions of the operating units of the Department;

4. Serve as liaison between the field installations of the Department and the FPA/GSA/DCPA Regional Directors in emergency preparedness matters;

5. Establish and maintain an emergency essential records file at the FPA/GSA/DCPA Federal Regional Centers, and provide guidance and advice to field installations on provisions for emergency essential records;

6. Establish and maintain a Regional Alerting Procedure for Commerce regional emergency cadres;

7. Participate, as directed by national headquarters, in planning and evaluating periodic regional, State and local government emergency preparedness tests and exercises;

8. Prepare, as necessary or required by the Emergency Planning and Coordination Division, OOMS, reports on the status of emergency preparedness plans, programs and operations; and

9. Inform the Emergency Planning and Coordination Division, OOMS of their activities and emergency programs to enable that Division to fulfill its Departmentwide liaison and coordinating role.

[6740-02]

[Docket Nos. G-12149, et al.]

APPLICATIONS FOR CERTIFICATES, ABANDONMENT OF SERVICE AND PETITIONS TO AMEND CERTIFICATES[1]

MAY 8, 1978.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before May 16, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER78-349]

ARIZONA PUBLIC SERVICE CO.

Filing of Supplemental Agreement

MAY 11, 1978.

Take notice that on May 2, 1978, Arizona Public Service Co. (APS) tendered for filing a Supplemental Agreement dated March 28, 1978 to the Wholesale Power Supply Agreement between Arizona Power Authority (APA) and APS respecively, previously designated APS-FPC Rate Schedule No. 59. APS indicates that this Supplement revises the maxium and minimum contract demands and also provides for the right to file a unilateral rate change.

APS requests waiver of the Commission's notice requirements to allow for an effective date of April 1, 1978.

[1]This notice does not provide for consolidation for hearing of the several matters covered herein.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426 in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to

MY 18 78 UMI

V 4 3 9 7

intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

Federal Energy Regulatory Commission

[Docket No. ER77-331]

CENTRAL POWER & LIGHT CO.

Order Accepting Service Agreements for Filing, Granting Intervention, Denying Motion for Consolidation and Waiving Notice Requirements

MAY 9, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR ——, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

The Central Power & Light Co. (CPL) on April 25, 1977, tendered for filing with the Commission[1] executed service agreements for electric service to ten (10) wholesale customers,[2] pursuant to section 35.12 of the Commission's Regulation.[3] CPL was informed by Commission letter dated May 24, 1977, that such filing was deficient. On July 11, 1977, CPL satisfied the Commission's Regulations with the submittal of additional cost data. CPL requests an effective date of May 4, 1976, and thus, seeks waiver of the Commission's notice requirements, section 35.11 of the regulations.

In the instant proceeding, CPL filed contracts for full requirements firm power service to its electric cooperative customers, with rates consisting of flat demand and energy charges subject to fuel adjustment.

CPL also tendered for filing interconnection and interchange agreements which pertained to the Lower Colorado River Authority, City of Brownsville, and South Texas Electric and Medina Electric Cooperatives, including fuel adjustment clauses.

Notice of the filing was issued on July 28, 1977, with comments, protests or petitions to intervene due on or before August 12, 1977. On August 9, 1977, the Magic Valley Electric Cooperative, Kimble Electric Cooperative and Rio Grande Electric Cooperative (hereinafter referred to as *Petitioners*) filed a petition to intervene in this proceeding. Petitioners urge this Commission to condition acceptance of CPL's initial rate schedules upon the requirement that the rate be made subject to refund. Petitioners contend that CPL's tardy filing of the rate schedule and dilatory response to the Commission's filing requirements cannot help but raise doubts as to the justness and reasonableness of those rates. Further, Petitioners request that the instant docket be consolidated with the proceeding in Docket No. ER77-514.

CPL, On August 19, 1977, answered Petitioners' pleading indicating that the rate schedules were filed in compliance with the Commission's order in Docket No. E-9558. CPL contends that due to the initial nature of the filing, the rates cannot be made subject to refund. CPL further asserts that the instant rate and service provisions were mutually agreed to between it and the wholesale customers.

DISCUSSION

In their petition to intervene, Petitioners merely alluded to the possibility of the unreasonableness of the filed rates based solely on CPL's "dilatory response" to the Commission's filing requirements. Petitioners did not indicate any specifics of the filing that could be used to test their contention of unreasonableness. Nevertheless, our review of the proposed filing indicate that the revenues collected from the ten wholesale customers pursuant to the instant rates are reasonable.

We further conclude that the fuel clauses contained in the electric cooperative agreements do not conform to section 35.14 of the Regulations. However, CPL on July 12, 1977, submitted a revised fuel adjustment clause which complied with section 35.14 of the Regulations and is applicable to the electric cooperative customers as part of its rate increase request filed in Docket No. ER 77-514.[4] Our review also indicates that the fuel clauses contained in the tendered interconnection rate schedules applicable to the city of Brownsville, and South Texas Electric and Medina Electric Cooperatives are not in agreement with the requirements of section 35.14 of the Regulations. CPL is hereby directed to file a fuel clause applicable to the aforementioned customers which conforms to section 35.14 of the Regulations within thirty days from the issuance of this order.

Moreover, in light of the fact that we have determined the rates contained herein to be reasonable and hearing procedures unwarranted, we conclude that consolidation of the proceedings in this docket with those in Docket No. ER77-514 is not in the public interest.

Petitioners are wholesale customers of CPL and their interests as well as the public interest may be served by permitting intervention in the instant case.

The Commission finds: (1) Good cause exists to deny Petitioners' Motion for Consolidation.

(2) CPL's fuel adjustment clauses applicable to the City of Brownsville and South Texas Electric and Medina Electric Cooperatives in the interconnection agreements do not conform to section 35.14 of the Regulations.

(3) Participation of Petitioners in this proceeding may be in the public interest.

(4) It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act that the service agreements tendered in this docket be accepted for filing to become effective May 4, 1976.

(5) Good cause exists to waive the requirements of section 35.11 of the Commission's Regulations.

The Commission orders: (A) The service agreements are hereby accepted for filing to become effective May 4, 1976.

(B) Petitioners are hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Commission; *Provided, however,* That the participation of the intervenors shall be limited to matters effecting the rights and interests specifically set forth in the petition to intervene, and *provided, further,* that the admission of such intervenor shall not be construed as recognition that it might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(C) This acceptance of filing does not constitute approval of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such rates or services provided for in the designations as shown on the attachment; nor shall such acceptance be deemed as recognition of any claimed contractual right or obligation affecting or relating to such services or rates; and such acceptance is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the parties.

(D) CPL shall within thirty (30) days from the date of issuance of this order file with the Commission fuel clauses applicable to the city of Brownsville and South Texas Electric and Medina Electric Cooperatives which conform to section 35.14 of the Regulations.

(E) The requirements of section 35.11 of the Regulations are hereby waived.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission. Chairman Curtis voted present.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13310 Filed 5-17-78; 8:45 am]

[1] The "Commission" when used in the context of an action taken prior to October 1, 1977 refers to the FPC: when used otherwise, the reference is to the FERC.

[2] The ten (10) wholesale customers are: Magic Valley Electric Cooperative, Inc., Nueces Electric Cooperative, Inc., Rio Grande Electric Cooperative, Inc., Kimble Electric Cooperative, Inc., Medina Electric Cooperative, Inc., Victoria County Electric Cooperative Co. (Refugio, Tex. and Goliad, Tex.), South Texas Electric and Medina Electric Cooperatives, city of Brownsville and Lower Colorado River Authority. See Attachment A for list of designations.

[3] By orders issued July 21, 1976 and September 17, 1976, in Docket No. E-9558, the FPC determined that Central Power & Light Co. is a "public utility" pursuant to section 201 of the Federal Power Act (16 U.S.C. § 824) and, therefore, subject to the jurisdiction of the Commission for having commenced the transmission of electric energy in interstate commerce and the sale of electric energy at wholesale in interstate commerce.

[4] On July 12, 1977, CPL tendered for filing with the Commission in Docket No. ER77-514, superseding rates applicable to the electric cooperative customers. The proposed increase in rates was supported by the same data that was submitted by CPL on July 11, 1977 to cure the deficiency in Docket No. ER77-331. Thereafter by orders dated August 3 and September 8, 1977, the Commission suspended the rates for the statutory maximum period until January 8, 1978, subject to refund.

[Project No. 2791]

CLARK-COWLITZ JOINT OPERATING AGENCY

Application for New Major License for Constructed Project

MAY 11, 1978.

Public notice is hereby given that application for a new major license was filed on February 18, 1977, and supplemented on December 13, 1977, under the Federal Power Act (16 U.S.C. 791a-825r) by Clark-Cowlitz Joint Operating Agency, (correspondence to: Harry G. Kelsey, President, Clark-Cowlitz Joint Operating Agency, P.O. Box 1279, Longview, Wash. 98632; with copies to: Robert W. Peery, Secretary, Clark-Cowlitz Joint Operating Agency, P.O. Box 1626, Vancouver, Wash. 98633; C. T. Mertsching, Walstead, Mertsching, Husemoen, Donaldson, and Barlow, P.O. Box 1174, Longview, Wash. 98632; John F. Wynne, Blair, Schaefer, Hutchinson, Wynne, Potter & Horton, P.O. Box 1148, Vancouver, Wash. 98660; Robert L. McCarty, McCarty & Noone, 1225 Connecticut Avenue NW., Wash. D.C. 20036), for the constructed Merwin Project, FERC Project No. 2791, located in Cowlitz and Clark Counties, Wash., near the town of Woodland, on the North Fork of the Lewis River. The project affects 138.18 acres of United States lands and navigable waters of the United States. The original project license (FERC No. 935), issued to Pacific Power & Light Co. will expire of December 11, 1979.

The constucted Merwin Project consists of: (1) A concrete arch dam 313 feet high, with an arch length of 728 feet; (2) a reservoir, 14.5 miles long, with a surface area of 4,040 acres at maximum operating pool elevation; (3) Three penstocks 15½ feet in diameter and 150 feet long; (4) a powerhouse containing 4 generating units, 3 rated at 45,000 kW and a 1,000 kW station service generating unit; (5) 9 single-phase 13.8/115-kV transformers located on the upper powerhouse deck and an adjacent switchyard; (6) two transmission lines, one which extends to the Cardwell substation and the other, to the dead-end tower on the north bank of the Columbia River near Portland; and (7) appurtenant facilities.

Power produced by this project would be used by the Applicant to meet its system load requirements and any excess would be sold on a "when and if available" basis.

The principal recreational features of the project are: Merwin Park, which can accommodate 3,000 people for picnics and swimming; Speelyai Bay Park, located 10 miles upstream from the dam, which provides swimming, boating and picnic facilities; and Woodland Park, consisting of private

MY 18 78

residential homesites. Potential recreational areas exist at Crescent Bay and Buncombe Hollow Creek.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 14, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP66-237]

NATURAL GAS PIPELINE CO. OF AMERICA

Further Exension of Time

MAY 11, 1978.

On May 8, 1978, Natural Gas Pipeline Co. of America filed a motion to suspend or to further extend the procedural dates established by Commission Order issued December 19, 1977, in the captioned proceeding. The procedural dates have been previously extended by Notices issued January 5, and March 23, 1978.

The instant motion states that the Commission has not yet acted upon the merits of the pending applications for rehearing of the December 19, 1977 Order. A tolling order granting rehearing for purposes of further consideration was issued on February 17, 1978.

Upon consideration, notice is hereby given that the procedural dates in this proceeding are further extended as follows:

Filing and service on all parties, the Presiding Administrative Law Judge, and Commission Staff of the direct case of Natural, including testimony on the issue raised by the December 19, 1977 Order—July 14, 1978.

Filing of testimony and exhibits comprising the case-in-chief of supporting intervenors—July 21, 1978.

Filing of testimony of opposing intervenors and Staff Counsel—August 7, 1978.

Rebuttal testimony of Natural and supporting intervenors—August 18, 1978.

Prehearing Conference—August 28, 1978.

Any further procedural dates will be established by the Presiding Administrative Law Judge.

KENNETH F. PLUMB.
Secretary.

[FR Doc. 78-13495 Filed 5-17-78; 8:45 am]

[6740-02]

[Docket No. CP78-302]

NATURAL GAS PIPELINE CO. OF AMERICA AND COLUMBIA GULF TRANSMISSION CO.

Pipeline Application

MAY 11, 1978.

Take notice that on April 24, 1978, Natural Gas Pipeline Co., of America, 122 South Michigan Avenue, Chicago, Ill. 6060 (Natural), and Columbia Gulf Transmission Co., 3805 West Alabama, Houston, Tex., 77027 (Columbia) (Collectively applicants), filed in docket No CP78-302 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of up to 39,900 Mcf per day of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Natural has contracted to purchase or has preferential rights to purchase volumes of gas from East Cameron block 34, offshore Louisiana. A joint application by Natural and others has been made at docket No. CP78-71 to construct facilities to get gas from block 34 onshore to a new point of connection to Tennessee Gas Pipeline Co. in Cameron Parish, La. Tennessee has filed at docket No. CP78-197 to transport up to 39,900 Mcf per day for Natural and to deliver such volumes to Columbia for Natural's account at an existing interconnection near Chalkley, La.

Columbia Gas Transmission Corp., an affiliate of Columbia, own or control certain reserves in High Island area, offshore Texas, which will be transported to shore first through facilities of High Island Offshore System then through facilities owned by U-T Offshore System (UTOS).

Applicants propose to exchange up to 39,900 Mcf of natural gas with Columbia receiving gas for Natural's account from Tennessee near Chalkley, Cameron Parish, La. Natural will receive thermally equivalent volumes for Columbia's account at the existing interconnection between Natural and UTOS, Cameron Parish, La, or at existing interconnections of Natural and Columbia at the Mobile Oil Corp.'s Cameron Meadows plant, Cameron Parish, La, or Texaco, Inc.'s Henry plant located in Vermilion Parish, La.

Any person desiring to be heard or to make any protest with reference to said application, on or before June 2, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13496 Filed 5-17-78; 8:45 am]

[6740-02]

[Project No. 77]

PACIFIC GAS & ELECTRIC CO. (POTTER VALLEY PROJECT)

Extension of Time

MAY 12, 1978.

On May 2, 1978, the Humboldt County Board of Supervisors and Cal-

Trout (intervenors) filed a request for a 240-day extension of time to review and comment on Commission staff's draft environmental impact statement (DEIS) on the referenced project, the availability of which was announced by notice issued March 22, 1978. Intervenors state that, of the 240-day requested extension, 180-days are required to complete indepth feasibility studies and acquire more data on the effects on spawning and nursery habitats of various operation practices at Potter Valley project. It the DEIS is deficient, the intervenors should so state in their comments, but good cause has not been shown to delay this proceeding substantially by granting the full 8-month extension requested for commenting on the DEIS.

Upon consideration, notice is herby given that an extension of time is granted to and including June 30, 1978, within which to file comments on staff's DEIS in this proceeding.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-13497 Filed 5-17-78; 8:45 am]

[6740-02]

[Docket No. CP76-362]

TEXAS EASTERN TRANSMISSION CORP.

Petition To Amend

MAY 11, 1978.

Take notice that on April 24, 1978, Texas Eastern Transmission Corp. (Texas Eastern), P.O. Box 2521, Houston, Tex. 77001 (petitioner), filed in docket No. CP76-362 a petition to amend Commission order, issued August 31, 1976, to authorize the inclusion of an additional point of receipt for the transportation of natural gas.

Petitioner, pursuant to the terms of the March 23, 1976, agreement and the authorization issued at docket No. CP76-362, initiated a transportation arrangement involving volumes produced and sold to Transco in West Cameron block 480 and delivered to East Cameron block 245, offshore Louisiana, for transportation onshore by Texas Eastern with a total obligation to transport up to 54,000 Mcf of gas per day.

Transco has secured the rights to purchase gas volumes produced from block 436, West Cameron area, offshore Louisiana, and has filed with the Commission jointly with Texas Eastern and Natural Gas Pipeline Co. of America (Natural) an application at docket No. CP78-236 for authorization to construct the necessary pipeline facilities required to connect West Cameron 436 production to Texas Eastern's existing subsea tap on its offshore pipeline system located in block 286, West Cameron area. Petitioner seeks authorization to add the new point to the March 23, 1976, agreement. The total 54,000 Mcf/d obligation will not be increased.

Any person desiring to be heard or to make any protest with reference to said application, on or before June 2, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-568]

TEXAS EASTERN TRANSMISSION CORP. AND NATURAL GAS PIPELINE CO. OF AMERICA

Petition to Amend

MAY 11, 1978.

Take notice that on April 21, 1978, Texas Eastern Transmission Corp. (Texas Eastern), P.O. Box 2521, and Natural Gas Pipeline Co. of America (Natural), 122 South Michigan Avenue, Chicago, Ill. 60603 (petitioners), filed in docket No. CP77-568 a petition to amend Commission order issued November 29, 1977, to authorize an increase in the exchange volumes previously authorized for and between the petitioners.

Petitioners seek authorization to increase the quantity of natural gas to be transported and exchanged by said parties for each other from 15,000 Mcf per day up to a maximum of 25,000 Mcf per day, and for the inclusion of an additional point of receipt for the transportation and exchange of natural gas.

Volumes of gas available to Texas Eastern from West Cameron block 593 have increased to a volume in excess of 15,000 Mcf per day. Natural has also secured the right to purchase gas volumes produced from block 437 West Cameron area, and has filed jointly with Texas Eastern and Transcontinental Gas Pipe Line Corp. (Transco) to the Commission for a certificate of public convenience and necessity at docket No. CP78-236 seeking authorization to construct the necessary pipeline facilities required to connect West Cameron 437 production to Texas Eastern's offshore Louisiana system at a point in block 286 West Cameron, offshore Louisiana. Petitioners herein seek authorization to increase the firm quantity of natural gas to be exchanged, as provided by the amendment of April 4, 1978, from 15,000 Mcf per day to 25,000 Mcf per day and establish the West Cameron block 286 point as a new exchange point under the November 29, 1977, agreement.

Any person desiring to be heard or to make any protest with reference to said application, on or before June 2, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal

[6740-02]

[Docket No. CP76-35]

WESTERN TRANSMISSION CORP.

Petition To Amend

MAY 10, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a) (1) or (2) of the DOE Act.

Take notice that on May 2, 1978, Western Transmission Corp. (petitioner), 2700 Fidelity Union Tower, Dallas, Tex. 75201, filed in docket No. CP75-35 a petition to amend the order of October 7, 1975 (54 FPC ——) issued by the Federal Power Commission (FPC) in the instant docket so as to provide for the transportation of natural gas for Colorado Interstate Gas Co. (CIG) from additional acreage within the Blue Gap II area of Carbon County, Wyo., which acreage is at present largely undeveloped, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of October 7, 1975, petitioner was authorized to transport natural gas for CIG from said Blue Gap II area to a point of delivery on CIG's existing system in Sweetwater County, Wyo., pursuant to a gas transportation agreement dated July 15, 1975, between the two companies.

By an amendment dated March 27, 1978, petitioner and CIG have amended the July 15, 1978, agreement to provide for the additional acreage.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 31, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT (FIFRA) SCIENTIFIC ADVISORY PANEL

Open Meeting—Change in Agenda

On Friday, May 5, 1978, notice of the May 25-26, 1978 open meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel was published in the FEDERAL REGISTER (43 FR 19449). Agenda item number 2 under SUPPLEMENTARY INFORMATION is changed to read as follows:

2. A briefing will be given to the Scientific Advisory Panel on the principal decision options which are being considered by the Agency to conclude the chlorobenzilate RPAR (rebutable presumption against registration).

AUTHORITY: Sec. 25(d) of FIFRA, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.) and Sec. 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 94-463; 86 Stat. 770).

Dated: May 15, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

GRANTS FOR CONSTRUCTION OF TREATMENT WORKS

Program Requirements Memorandum

This notice is published to advise that a Program Requirements Memorandum from the Administrator has been distrubuted to the Environmental Protection Agency Regional Offices and became effective May 11, 1978. This Program Requirements Memorandum provides a warning on the use of certain chemical grouts used for sewer rehabilitation. As indicated in the memorandum additional information on this matter will be issued as soon as it becomes available.

FOR FURTHER INFORMATION CONTACT:

Alan B. Hais, Chief, Municipal Technology Branch, Municipal Construction Division (WH-547), Environmental Protection Agency, Washington, D.C. 20460, 202-426-8976.

Dated: May 15, 1978.

THOMAS C. JORLING,
Assistant Administrator, Water and Hazardous Materials.

[PRM No. 78-11]

Subject: Toxicity of Chemical Grouts for Sewer Rehabilitation
From: John T. Rhett, Deputy Assistant Administrator for Water Program Operations (WH-546)
To: Regional Administrators, Regions I thru X

PURPOSE

This Program Requirements Memorandum provides an alert on the potential health hazards associated with the field application of a major chemical grout used in correcting sewer infiltration. The grouting material is AM-9 manufactured by American Cyanamid. Your immediate action is requested in distributing this memorandum and the attached materials to all Construction Grant Program grantees.

DISCUSSION

In applying the AM-9 grout, a catalyst containing dimethyl amino propionitrile (DMAPN) is used. On April 7, 1978, OSHA issued a health hazard alert concerning DMAPN. It stated, "There is no current permissible exposure limit. It is unknown at the present time if there is any safe limit for human exposure to ESN (a trademark name for DMAPN). The use of the material has been discontinued in plants in both Maryland and Massachusetts. Accordingly, based on serious and immediate adverse human health effects already evident *it is imperative that worker exposure to ESN and its components be completely avoided.*" (Emphasis added)

The OSHA alert was based on operations involved in the manufacture of polyurethane foam. However, on the basis of this alert, the Washington Metropolitan Transit Authority recently requested that all future use of this product (DMAPN) be stopped immediately and the product be removed from all of its subway construction sites. DMAPN had previously been used in grouting operations in subway tunnels.

ACTION

1. Distribute this memorandum and the attached OSHA alert to the State Agencies in your region and to all grantees who are or may potentially be using the above chemical grouts in sewer rehabilitation projects.

2. There are already underway to continue grouting with AM-9 using a different catalyst agent. However, we understand that the production of AM-9 will be discontinued as

of July 31, 1978. In view of this and the health related concerns discussed above, please assess the impact of these events on the infiltration/inflow program as it relates to the overall management of the Construction Grant Program. You will be notified as soon as additional information becomes available. Please keep me advised of your findings and conclusions.

ATTACHMENT TO PROGRAM REQUIREMENTS MEMORANDUM

OSHA HEALTH HAZARD ALERT: NIAX CATALYST ESN

It has come to OSHA's attention that your firm has used and may still be using NIAX catalyst ESN (registered TM, Union Carbide). ESN is composed of two chemicals: (1) Dimethyl amino propionitrile, and (2) BIS-2, dimethyl amino ethyl ether. The material is chiefly used as a catalyst in certain polyurethane foam production operations.

There have been documented reports on serious adverse health effects among male and female employees exposed to ESN in plants in both Maryland and Massachusetts. The most striking symptoms uniformly reported by afflicted workers are those of urinary dysfunction. In one Maryland plant 69 of 101 workers questioned complained of difficulty starting urination, pain and burning on voiding, incomplete emptying of the bladder, slowness in expelling urine, and other urinary problems. There have also been employee reports of impotence and sexual difficulties. A few individuals have received urological surgery. There is evidence that for a smaller number of employees toxic effects of ESN include damage to the nervous system (peripheral neuropathy) with symptoms of muscule weakness, loss of balance and coordination, numbness, tingling, and loss of feelings. ESN exposure may also cause liver dysfunction.

Employees have reported symptoms of toxic effects after as few as three of ESM exposure. In addition to these immediate urinary and neurological effects, exposure to ESN can lead to serious and permanent health damage to the afflicted worker.

The material has moderate to severe toxicity by the skin, inhaltion, and oral routes of administration in acute animal studies. OSHA has not found any animal toxicology data on long-term or chronic effects of ESN exposure.

There is no current permissible exposure limit. It is unknown at the present time if there is any safe limit for human exposure to ESN. The use of the material has been discontinued in plants in both Maryland and Massachusetts. Accordingly, based on the serious and immediate adverse human health effects already evident, it is imperative that worker exposure to ESN and its components be completely avoided. It is also essential that employers take the following actions regarding ESN:

(1) Inform all employees of the possible adverse health effects of exposure.

(2) Provide all employees with a copy of this telegram.

(3) Advise all employees with symptoms described in this notice to see a physician and show him/her this message. The physician should be made aware that the urological complaints have been mistaken for non-occupationally caused prostatic or bladder disease.

(4) Urge all employees with symptoms to report them to OSHA, to their bargaining agent if there is one, and to the corporate medical department if any.

(5) Advise the corporate medical department or other designated physician to inform OSHA promptly of all employee reports of symptoms described above.

Those involved contact the OSHA regional administrator to convey all employee reports of symptoms. A complete list of OSHA regional administrators is attached as an appendix to this document. Physicians and others seeking more technical or medical information on health effects of ESN should call the OSHA regional administrator for referral. Further, since serious physicial harm to employees has taken place after short periods of exposure to ESN, OSHA compliance officers have been directed to institute imminent danger proceedings where appropriate measures have not been taken to eliminate this exposure.

Workers exposed to the individual components of ESN, alone or in combination with other chemical compounds, should be investigated for similar adverse health effects, with particular reference to urinary tract symptoms.

EULA BINGHAM,
Assistant Secretary for Occupational Safety and Health.

APRIL 7, 1978.

OSHA REGIONAL ADMINISTRATORS

1. Region I—Gilbert Saulter, 617-223-5535 (Connecticut, Maine, Massachusetts, Rhode Island, Vermont).

REGISTRY OF PESTICIDE PRODUCTS CONTAINING NEW ACTIVE INGREDIENTS

Receipt of Applications

Applications have been submitted to the Environmental Protection Agency (EPA) to register pesticide products containing active ingredients which have not been included in any previously registered pesticide products. Applications were made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.), and the regulations thereunder (40 CFR 162). Notice of receipt of these applications does not indicate a decision by the Agency on the applications.

Interested persons are invited to submit written comments on any applications referred to in this notice to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St. SW, Washington, DC 20460. The comments must be received on or before June 19, 1978 and should bear a notation indicating the EPA File Symbol number of the application to which the comments pertain. Comments received within the specified time period will be considered before a final decision is made with respect to the pending application. Comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning these applications and the data submitted should be directed to the Product Managers (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address or appropriate telephone number cited. The labels furnished by each applicant as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Notice of approval or denial of the applications to register pesticide products listed will be announced in the FEDERAL REGISTER. Except for such material protected by section 10 of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available for approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the FEDERAL REGISTER if an application is approved.

Dated: May 10, 1978.

MARTIN H. ROGOFF,
Acting Director, Registration Division.

WATER QUALITY CRITERIA

Request for Comments

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: EPA is soliciting public comments on technical guidelines which set forth a methodology for deriving water quality criteria. Under the Clean Water Act, water quality criteria may form the basis for enforceable water quality standards. EPA is considering using the guidelines, as refined in response to comments, to develop proposed water quality criteria for 65 toxic pollutants in compliance with a Court order.

DATES: Written public comments should be submitted to the person listed immediately below by July 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Kenneth M. Mackenthun, Director, Criteria and Standards Division (WH-585), Office of Water Planning and Standards, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, telephone 202-755-0100.

SUPPLEMENTARY INFORMATION: Section 304(a) of the Clean Water Act, as amended, 33 U.S.C. 1251 et seq., requires EPA to publish and periodically update national water quality "criteria" for use by the States in the development of water quality standards under section 303. These criteria are to reflect the latest scientific knowledge on the identifiable effects of various pollutants on public health and welfare, aquatic life, and recreation.

Under Paragraph 11 of the Settlement Agreement in *Natural Resources Defense Council et al.* v. *Train* 8 ERC 2120 (D.D.C. 1976), the Agency must publish criteria for 65 specified toxic pollutants. For each of the 65 pollutants, the criteria are to state maximum recommended concentrations consistent with the protection of aquatic life and human health. The Agency is now in the process of developing criteria documents for these 65 pollutants for proposal in the FEDERAL REGISTER in the latter half of this year.

During the process of developing information under § 304 and the Settlement Agreement, EPA has revised and refined the methodology for deriving aquatic-based criteria which it has used in the past. In this notice, EPA is publishing guidelines which set forth this refined methodology. (Criteria for the protection of human health are being developed separately from an essentially different data base.) Members of the interested public are invited to submit comments on the validity and accuracy of the guidelines to assist the agency in determining whether further refinements are needed.

In its previous publications under § 304(a)[1] the Agency used the following general procedures for interpreting available data and deriving criteria. Data on the acute, long term, and bioaccumulative effects of individual pollutants were surveyed. For many constituents, a criterion was derived by reducing the lowest concentration known to have acute lethal effects on half of an aquatic species (the LC50 value) by a factor intended to protect against chronic effects. Where data showed a substance to be bioaccumulative or to have other significant long-term effects, a factor was used to reduce the indicated concentrations to a criterion presumed to be protective.

The guidelines appearing below provide a more formalized, systematic approach to deriving criteria from scientific data. It is not expected that the numbers derived using the guidelines will be very different from those which would be derived from the less formalized method EPA has used in the past. It is expected, however, that the systematic treatment of all appropriate aquatic data will make the rationale for the criteria more obvious.

The guidelines are also intended to provide a basis for deriving criteria specific to different water characteristics for pollutants whose toxicity varies significantly under different water conditions. A heavy metal such as cadmium, for instance, may be considerably less toxic in hard water than in soft because of precipitation, complexation, and antagonism. Differentiation between fresh and marine species may also be appropriate. Should such factors prove to be fundamental and provide a rational basis for differentiation, separate criteria will be developed for specific variables. This approach could assist States in adopting numbers more appropriate to their individual waters and help avoid overly restrictive national numbers.

Public comment is invited on all aspects of the methodology presented in the guidelines. Comments should be sent (preferably in triplicate) to the address noted in the introduction to this Notice no later than [45 days after FEDERAL REGISTER publication].

EPA is particularly interested in comments on the following issues relating to the guidelines appearing below:

1. Is the degree of conservatism or species coverage too protective, adequate or not protective enough?

2. Should maximum and average concentrations be established as criteria?

3. Are toxicological principles correctly used?

4. Is the statistical treatment of the data scientifically sound? For instance, are correction factors appropriately defined (as geometric means) and derived (as ratios)? Has data variability been adequately addressed?

EPA expects to propose criteria for the 65 toxic pollutants in the latter half of 1978. All comments received during the public comment period on today's notice will be considered before that proposal. The proposal will be accompanied by a full explanation of the methodology adopted, and a response to major substantive comments received on today's notice.

Dated: May 9, 1978.

THOMAS C. JORLING,
Assistant Administrator for Water and Hazardous Materials.

GUIDELINES FOR DERIVING WATER QUALITY CRITERIA FOR THE PROTECTION OF AQUATIC LIFE

PREFACE

The guidelines are intended to provide a systematic means of interpreting a variety of data in an objective, consistent and scientifically valid manner and should be modified only if sound scientific evidence for an individual pollutant indicates the need to do so. They provide uniform rules for deriving criteria from data bases of varying degrees of adequacy and supply rules for estimating some effects for which data are unavailable. The guidelines are not intended to be used where certain minimum data are unavailable, for instance, where no final fish or invertebrate chronic value can be obtained. In these cases another approach may be employed to develop criteria.

The guidelines provide a means of estimating the limiting concentrations which produce no observable effects on a specified percent of aquatic species. (For some pollutants, these limiting values may be based on bioconcentration or tainting). For example the guidelines might show that, to protect 95 percent of the species in an aquatic ecosystem, the concentration of nickel should be no more than x mg/l, while to protect 90 percent, the concentration should not exceed 2x mg/l, and so on. The guidelines therefore serve as a mechanism for building any desired degree of safety into all criteria and the policy decision as to how protective the criteria should be can be reached separately and applied consistently.[1]

The guidelines are based on aquatic toxicity data from laboratory tests on individual species. A broad range of aquatic toxicity data was used to provide a representative data base for developing the guidelines. (Tables 1-10).

The guidelines are designed to be applied to all available aquatic toxicity data for individual pollutants, after screening for reliability, to calculate concentration levels for each pollutant which can be expected to protect a desired percentage of the species of an aquatic ecosystem. For this purpose data showing the following effects are addressed separately: (1) acute toxicity to fish; (2) acute toxicity to invertebrates; (3) chronic toxicity to fish; (4) chronic toxicity to invertebrates; (5) toxicity to plant life; and (6) bioconcentration. Provision is also made to consider any data that do not fit in the above categories but which indicate a need to provide greater protection.[2]

The application of the guidelines to data for an individual substance involves the following three steps: (1) standardization of data where appropriate; (2) derivation of values within categories; and (3) derivation of criteria.

STANDARDIZATION OF ACUTE TOXICITY DATA

Most tests of acute toxicity to aquatic life involve observing what concentration of a pollutant will kill half of a test species in a given amount of time. For instance, a test may show that exposure to x mg/1 of a substance for 96 hours is fatal to 50 percent of the guppies in the test population, while the corresponding number for trout is y mg/1, and for fathead minnows z mg/1. These figures are commonly expressed as median lethal concentrations of LC50's.

LC50 values are not always comparable, however, since aquatic toxicologists employ a variety of techniques. The three major variables in lethal concentration testing are the following:

(1) *Exposure.* The length of exposure varies. Typical exposures are 24, 48, 72, and 96 hours, although some LC50 data reflect much longer exposure periods.

(2) *Static/flow-through.* Some experiments employ flows of water containing specified concentrations of the test substance, while in other tests the water is not renewed. The flow-through test is regarded as more accurate since the concentration of the pollutant can be maintained and metabolites removed.

(3) *Calculated/Measured.* Some data reflect how much of a substance was presumed to be added to the water (calculated concentration), while other data reflect a measurement of how much was actually added (measured concentration).

The guidelines apply "correction factors" to standardize acute toxicity data for fish and invertebrates. These factors are calculated from the data in published references for each of the variables noted above.

Fish. "Correction factors" for estimating 96-hour LC50 values from toxicity tests of shorter duration were reached by comparing 308 24-hour LC50 tests with corresponding 96-hour data. This comparison showed that the geometric mean of the ratio of the 96-hour LC50 to the 24-hour LC50 is 0.66. The corresponding number for 48-hour tests is 0.81, and for 72-hour tests, 0.92.

The relationship of static to flow-through results from fish tests was calculated in a similar fashion. A comparison of 24 pairs of tests on twelve toxicants showed that the geometric mean of the static test LC50's was on the average 71 percent that of the flow-through tests. The guidelines adjust for the test discrepancy by multiplying static data by .71. This adjustment also reflects more closely the toxicity of the chemicals being tested.

Calculated concentration data are similarly standardized to measured concentration. For fish, this correction factor was developed from a comparison of 89 tests on 39 pollutants which reveals that the geometric mean of the measured concentration is 77 percent of the calculated value. This correction factor is applied to all test data based on unmeasured values so that the toxicity expressed more nearly reflects the true exposure concentration.

Invertebrates. Acute toxicity data for invertebrates are standardized in the same manner as those for fish. The correction factors for invertebrates are different from those used for fish because invertebrate data exhibit relationships somewhat different from those observed among fish. in addition, 48-hour LC50 data for certain species (daphnia, cladocera, midges, copepods and mollusc bivalve and barnacle larvae) are not corrected to the 96-hour level because the standard tests on these species are 48-hour tests.

STANDARDIZATION OF FISH CHRONIC VALUES

The only chronic data that must be adjusted to compensate for differences in test methods are those derived from embryo-larval tests.

A comparison of 75 sets of chronic data shows that in only five instances were the results of a life cycle test more than a factor of two lower than the results of a comparable embryo-larval test. The guidelines therefore reduce embryo-larval toxicity figures by a factor of two to allow for the possibility that the embryo-larval chronic estimate is too high.

DERIVATION OF VALUES WITHIN CATEGORIES

Specific procedures have been developed to obtain concentration values for each of the six categories. These procedures are described below.

Fish Acute Values. After LC50 data on acute toxicity to fish are standardized, concentration limits necessary to protect against acute toxicity are calculated. A geometric mean LC50 is calculated from all LC50 data on a given pollutant. A factor based on the varying sensitivities of different species to different pollutants is then applied to adjust that figure to the desired degree of protectiveness. A preliminary estaimate of the sensitivity factor for freshwater fish is 1 divided by 3.9. The product of the geometric mean LC50 and the sensitivity factor is the "final fish acute value."

Invertebrate Acute Values. A final invertebrate acute value is derived from standardized acute data for invertebrates in the same manner as for fish.

Fish Chronic Values. Chronic toxicity data are usually measured as the maximum acceptable toxicant concentration or MATC. The MATC is the highest concentration of a pollutant that would have no measurable adverse effect on survival, growth, or reproduction of a species. A life cycle or partial life cycle test establishes limits within which the MATC must lie. The guidelines employ life cycle or partial life cycle data wherever available.

Since such data do not always exist, short term tests have been developed to estimate the results of these tests. The guidelines employ one of these substitutes, the embryolarval test, adjusted as described above (see Standardization of Fish Chronic Values), which has been demonstrated to give a good estimate of MATC values where long term data are lacking.

The geometric mean of all the chronic values for fish for a given pollutant is then calculated and multiplied by a sensitivity factor to reach an estimate of the concentration that will provide protection against chronic effects for a given percentage of the species. A preliminary estimate of the sensitivity factor for fish is 1 divided by 6.7. The geometric mean MATC times the sensitivity factor provides a first estimate of the fish chronic value.

To estimate chronic toxicity for untested species, existing LC50 data are used to determine "calculated" chronic values. Application factors are calculated for all matching pairs of MATC limits and 96-hour LC50's. The mean application factor is then calculated and employed to determine the MATC for species where such data are lacking. As set out in II.C.3.c., the mean application factor times the square root of the geometric mean of the LC50 values multiplied by the final fish acute value from I.G., gives the estimated MATC. This formula is based on analysis of data for ten toxicants for which application factors were estimated for more than one species of fish.

In order to provide consistent and reasonable estimates, these two MATC calculations are performed to the extent that data allow, and the lowest value is selected as the "final fish chronic value." If any individual chronic value is lower it is used instead.

Invertebrate Chronic Values. The calculation of invertebrate chronic toxicity is similar to that for fish. The geometric mean of all MATC values is reduced by a sensitivity factor calculated to produce the desired degree of protection. Analysis of nine sets of invertebrate MATC data shows that division by 5.1 will give the concentration level expected to protect 95% of the species.

Substitutes for life cycle or partial life cycle tests are not used in these calculations. Since the biochemistry and physiology of invertebrates is highly diverse, the guidelines do not employ application factors to estimate invertebrate MATC values. Nor have short term tests for invertebrates proven adequate substitutes for long term tests.

Plant Values. Relatively few tests exist for aquatic vascular plants. For algae, growth inhibition has been used to estimate effects, but no commonly accepted way of determining lethal concentrations has been developed. Since testing of toxicity to plants has not been standardized as for fish and invertebrates, the lowest available plant toxicity values are used as an indication of toxicity to plants.

---

[1] The most recent of these publications is the "Quality Criteria for Water" issued in July, 1976. Notice of this document's availability appeared in 41 FR 32947, August 1978.

[1] In reviewing the guidelines, therefore, the reader should distinguish between the validity of the data treatment and application, and the policy decisions regarding coverage and safety.

[2] Examples of such data might include increased incidence of tumors of other adverse effects which may occur at lower concentrations than would be indicated by bioconcentration of other chronic toxicity tests.

MY 18 78
UMI

V 43 97

BIOCONCENTRATION VALUES OR RESIDUE LIMITED TOXICITY

Concentrations (RLTC). Bioconcentration data reflect the capacity of a toxicant to accumulate in organisms. The capacity of a substance to bioconcentrate can be determined in whole animal tests, or from the measured or estimated octanol/water partition coefficient. Bioconcentration may produce unacceptable residue levels in organisms, even though the concentration in the water is not directly toxic.

The water concentration which would not result in an unacceptable residue can be calculated by dividing the bioconcentration potential of a given substance into the permissible residue concentration determined from FDA action levels or from animal feeding studies. This water concentration is called the residue limited toxicant concentration (RLTC). Where no acceptable residue levels are known, no RLTC is calculated.

DERIVATION OF CRITERIA

After values are obtained in each of the categories for which adequate data exist (see *Derivation of Values within Categories*, above), the lower of the two actue values is taken to represent the "final acute value." Likewise the lowest value obtained from calculations based on chronic effects is selected as the "final chronic value."

A two-fold criterion is then recommended consisting of an instantaneous maximum based on the final acute value and a 24-hour average based on the final chronic value.

The use of a 24-hour average departs from the previous custom of setting a criterion that is irrespective of time. It is suggested here because experimental evidence indicates that chronic effect limits can safely be exceeded for brief periods so long as the 24-hour average is maintained.

For certain pollutants, the acutely toxic concentration may be very close to the "no effect" chronic concentration. In these cases the 24-hour average concentration indicated by the final chronic value may not afford adequate protection.

The guidelines therefore provide that where 0.44[3] of the final acute value is lower than the indicated chronic value, the former figure should be used as the permissible average concentration limit to protect against acute toxicity to more sensitive species or during more sensitive periods in the life cycle.

[3]The figure of 0.44 is an "adjustment factor" applied to LC50 data to determine the concentration likely to be lethal to be between 0 percent and 10 percent. It is based on 219 acute toxicity tests which showed that the mean concentration lethal to 0-10 percent of the test population was 0.44 times the LC50.

GUIDELINES

I. FINAL FISH ACUTE VALUE (DO SEPARATELY FOR FRESHWATER AND SALT WATER)

A. EC50 values based on immobilization are used as LC50 values. If no acceptable 24-, 48-, 72-, or 96-hr LC50 values are available for fish, no final fish acute value is derived. If LC50 values are available from one test for more than one of these time periods, use only the one for the longest duration. For use of LC50 values for other time periods and for durations longer than 96 hours, see Section VII.

B. Multiply all values based on unmeasured concentrations by a correction factor of 0.77 to simulate results based on measured concentrations (a).[4]

C. Multiply all 24-, 48-, and 72-hr LC50 values by correction factors of 0.66, 0.81, and 0.92, respectively, to simulate 96-hr values (b).

D. Multiply all values from static and renewal tests by a correction factor of 0.71 to simulate values from flow-through tests (c).

E. For each species calculate the geometric mean of all of the (corrected when necessary) LC50 values.

F. Calculate the geometric mean of the geometric means of all the species.

G. Obtain the final fish acute value by selecting the lower of 1 and 2:

1. Divide the geometric mean LC50 by 3.9 for freshwater fish and by 3.7 for saltwater fish (d).

2. Select the lowest (corrected when necessary) LC50 value based on *measured* concentrations and obtained using *flow-through* procedures comparable to those in Methods for Acute Toxicity Tests with Fish, Macroinvertebrates and Amphibians (12975, EPA-660/3-75-009).

II. FINAL FISH CHRONIC VALUE (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. Chronic values are calculated as the geometric mean of the MATC limits obtained from a life-cycle test or a partial life-cycle test, or one-half the geometric mean of the limits obtained from an embryo-larval test (e).

NOTE.—Some authors report "MATC limits" that are not MATC limits as defined herein.

B. If no acceptable chronic values are available for fish, no final fish chronic value is derived.

C. Obtain the final fish chronic value by selecting the lowest value obtained from 1, 2, and 3:

1. Select the lowest chronic value.

2. a. For each species calculate the geometric mean of all the chronic values.

b. Calculate the geometric mean of the geometric means of all the species.

c. Divide the geometric mean chronic value by 6.7 (f).

3. a. For each matched pair of MATC limits and 96-hr LC50 values from flow-through tests with measured concentrations, calculate an application factor by dividing the geometric mean of the MATC limits by the 96-hr LC50.

b. Calculate the geometric mean of all of the AF values.

c. Obtain a calculated chronic value from:

$$X\sqrt{YZ}, \text{ where (g)}$$

X=geometric mean AF

[4]Small letters in parentheses refer to the footnotes.

Y=geometric mean of the LC50 values used in calculation of X

Z=final fish acute value from I. G

III. FINAL INVERTEBRATE ACUTE VALUE (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. 48-hr LC50 and EC50 values for mollusc bivalve and barnacle larvae, daphnia and other cladocera, midges, and copepods are used as 96-hr values. For use of LC50 and EC50 values for time periods other than 48 hours for these species, see Section VII.

B. EC50 values based on shell deposition for oysters or based on immobilization for other invertebrates are used as LC50 values. If no acceptable 24-, 48-, 72-, or 96-hr LC50 values are available for invertebrates, no final invertebrate acute value is derived. If LC50 values are available from one test for more than one of these time periods, use only the one for the longest duration. For use of LC50 values for other time periods and for durations longer than 96 hours, see Section VII.

C. Multiply all values based on unmeasured concentrations by a correction factor of 0.77 to simulate results based on measured concentrations (a).

E. Multiply all values from static and renewal tests by a correction factor of 1.1 to simulate values from flow-through tests (i).

F. For each species calculate the geometric mean of all the (corrected when necessary) LC50 values.

G. Calculate the geometric mean of the geometric means of all the species.

H. Obtain the final invertebrate acute value by selecting the lower value obtained from 1 and 2:

1. Divide the geometric mean LC50 by 21 for freshwater invertebrates and by 49 for saltwater invertebrates (j).

2. Select the lowest (corrected when necessary) LC50 value based on *measured* concentrations and obtained using *flow-through* procedures comparable to those in Methods for Acute Toxicity Tests with Fish, Macroinvertebrates, and Amphibians (1975, EPA-660/3-75-009).

IV. FINAL INVERTEBRATE CHRONIC VALUE (DO SEPARATELY FOR FRESHWATER AND SLATWATER)

A. Chronic values are calculated as the geometric mean of the MATC limits obtained from a life-cycle test or a partial life-cycle test.

B. If no acceptable chronic values are available for invertebrates, no final invertebrate chronic value is derived.

C. Obtain the final invertebrate chronic value by selecting the lower value obtained from 1 and 2:

1. Select the lowest chronic value.

2. a. For each species calculate the geometric mean of all the chronic values.

b. Calculate the geometric mean of the geometric means of all the species.

c. Divide the geometric mean chronic value by 5.1 (k).

V. FINAL PLANT VALUE (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. A plant value can be obtained from a toxicity test on algae, duckweed or other aquatic plant.

B. If no values are available for plants, no final plant value is derived.

Select the lowest plant value as the final plant value.

MAY 18 78 UMI

VI. RESIDUE LIMITED TOXICANT CONCENTRATION (RLTC) (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. A MAXIMUM PERMISSIBLE TISSUE CONCENTRATION CAN BE (1) OBTAINED FROM AN FDA ACTION LEVEL OR FROM ANIMAL FEEDING STUDIES, OR (2) CALCULATED FROM ORAL DOSE DATA IN THE REGISTRY OF TOXIC EFFECTS OF CHEMICAL SUBSTANCES PUBLISHED BY THE NATIONAL INSTITUTE FOR OCCUPATIONAL SAFETY AND HEALTH.

B. IF NO MAXIMUM PERMISSIBLE TISSUE CONCENTRATION IS AVAILABLE, NO RLTC CAN BE DERIVED.

C. AN ARITHMETIC AVERAGE BIOCONCENTRATION FACTOR (BCF) SHOULD BE CALCULATED FROM MEASURED EQUILIBRIUM OR GREATER-THAN-27-DAY BCF VALUES AVAILABLE FOR FISH, OR FROM COMPARABLE VALUES FOR OTHER AQUATIC ORGANISMS IF THEY ARE HIGHER THAN THE AVERAGE FOR FISH OR IF NO VALUES ARE AVAILABLE FOR FISH. BCF VALUES SHOULD BE CALCULATED USING WET WEIGHT OF EITHER EDIBLE PORTION, MUSCLE TISSUE, OR WHOLE BODY. TO CONVERT VALUES EXPRESSED ON A DRY WEIGHT BASIS TO WET WEIGHT, MULTIPLY THE DRY WEIGHT VALUE BY 0.1 FOR PLANKTON AND BY 0.2 FOR FISH AND OTHER INVERTEBRATES (L). USE BCF VALUES FROM FIELD SITUATIONS ONLY WHEN CERTAIN OF THE EXPOSURE CONDITIONS.

D. For organic chemicals, if no BCF values is available for aquatic organisms, a BCF can be obtained (m) from Log (BCF) = 0.542 Log P + 0.124, where P is the octanol/water partition coefficient and can either be measured directly or obtained from the retention time on a calibrated reverse phase liquid chromatography system (n). As a last resort, an empirically derived partition coefficient can be used (o).

E. Calculate the RLTC by dividing the lowest maximum permissible tissue concentration by the measured or calculated bioconcentration factor

VII. OTHER DATA (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. For some substances acceptable pertinent information that cannot be used in Sections I-VI will be available concerning adverse effects on aquatic organisms and their uses.

B. Especially for organic compounds, data on closely related materials may be useful in the absence of similar data on the substance of concern.

C. For some substances data on other obviously important adverse effects, such as flavor impairment, fish avoidance, reduction in swimming speed, fish coughing, reproductive impairment, or loss in weight may be used.

D. Sometimes LC50 values for durations of longer than 96 hours, such as 7 or 30 days, on a sensitive species may be lower than the final chronic value, if chronic values are only available for insensitive species.

E. Data from behavioral, microcosm, field, and physiological studies may be available.

VIII. FINAL VALUES (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. The "final acute value" is obtained from the final fish acute value and the final invertebrate acute value by selecting the lower available value.

B. The "final chronic value" is obtained from the final fish chronic value, the final invertebrate chronic value, the final plant value, and the RLTC by selecting the lowest available value, unless other data (see Section VII) exist to show that a lower value should be used.

IX. CRITERION (DO SEPARATELY FOR FRESHWATER AND SALTWATER)

A. No criterion is developed by this guideline unless either a final fish chronic value is available from Section II, or a final invertebrate chronic value is available from Section IV, or a good substitute is available from Section VII for either the final fish or final invertebrate chronic value.[3]

B. The maximum concentration should never exceed the final acute value (p). The 24-hr average concentration should never exceed (select the lower of 1 and 2):

1. 0.44 times the final acute value (q) from Section VIII A.

2. The final chronic value from Section VIII B.

FOOTNOTES

(a) The value of 0.77 is the geometric mean of values from 89 tests on 39 toxicants (see Table 1).

(b) The values of 0.66, 0.81, and 0.92 are geometric means of 308, 197, and 104 comparisons of 24-, 48-, and 72-hr LC50 values, respectively, with 96-hr LC50 values for fish (see Table 2).

(c) The value of 0.71 is the geometric mean of values for 24 pairs of tests on 12 toxicants (see Table 3).

(d) The value of 3.9 is the antilog of the product of 1.645 times the square root of the average of logarithmic variances calculated from 62 sets of fish LC50 values (see Table 4). The value of 1.645 is the t-value for p=0.05 for a one-tailed test so that 95% of the distribution will be above the lower limit. The value of 3.7 is derived similarly for saltwater fish.

(e) The value of one-half is used since in only 5 of 75 comparisons were the results of a life cycle test more than a factor of two lower than the results of a comparable embryo-larval test. See:

Macek, K. J. and B. H. Sleight, III, 1977. In *Aquatic Toxicology and Hazard Evaluation*, ASTM STP 634, F. L. Mayer and J. L. Hamelink, eds. American Society for Testing and Materials, Philadelphia, PA. pp. 137-146.

McKim, J. M., 1977. Jour. Fish. Res. Bd. Canada, 34:1148-1154.

Hansen, D., Personal Communication, Environmental Research Laboratory, Sabine Island, Gulf Breeze, Florida.

(f) The value of 6.7 is the antilog of the product of 1.645 times the square root of the average of logarithmic variances calculated from 14 sets of freshwater fish chronic values (see Table 5). No comparable data are available for saltwater fish, but 6.7 is probably reasonable since the available chronic values for saltwater fish are in the same range as those for freshwater fish.

(g) See: Andrew, R. W. *et al.*, Evaluation of an Application Factor Hypothesis, manuscript.

(h) The values of 0.26, 0.43, and 0.61 are geometric means of 400, 238, and 29 comparisons of 24-, 48-, and 72-hr LC50 values, respectively, with 96-hr LC50 values for invertebrates (see Table 6).

(i) The value of 1.1 is the geometric mean of values for 12 pairs of tests on 8 toxicants (see Table 7).

(j) The values of 21 and 49 are the antilogs of the products of 1.645 times the square roots of the averages of the logarithmic variances calculated from 25 and 34 sets of acute values for freshwater and saltwater invertebrates, respectively (see Table 8).

(k) The value of 5.1 is the antilog of the product of 1.645 times the square root of the average of logarithmic variances calculated from 9 sets of freshwater invertebrate chronic values (see Table 9). No comparable data are available for saltwater invertebrates, but 5.1 is probably reasonable since the available chronic values for saltwater invertebrates are in the same range as those for freshwater invertebrates.

(l) The values of 0.2 and 0.1 were derived from data published in:

McDiffett, W. F., 1970. Ecology 51:975-988.

Brocksen, R. W. *et al.*, 1968. J. Wildlife Management 32:51-75.

Cummins, K. W. *et al.*, 1973. Ecology 54:336-345.

Pesticide Analytical Manual, Volume I, Food and Drug Administration, 1969.

Love, R. M., 1957. In The Physiology of Fishes, Vol. I, M. E. Brown, ed. Academic Press, New York. p. 411.

Ruttner, F., 1963. Fundamentals of Limnology. 3rd ed. Trans. by D. G. Frey and F. E. J. Fry. Univ. of Toronto Press, Toronto.

Some additional values can be found in:

Sculthorpe, C. D., 1967. The Biology of Aquatic Vascular Plants. Arnold Publishing Ltd., London.

(m) Neely, W. B., *et al.*, 1974. Environ. Sci. and Tech. 8:1113-1115.

(n) Veith, G. D., and R. T. Morris. A Rapid Method for Estimating Log P for Organic Chemicals, manuscript.

(o) Leo, A. J., 1975. In *Symposium on Structure-Activity Correlations in Studies of Toxicity and Bioconcentration with Aquatic Organisms*. G. D. Veith and D. E. Konasewich, eds. International Joint Commission, Windsor, Ontario, pp. 151-176.

(p) Tests with copper, zinc, diazinon, simazine, TFM and 2,4-D have shown that exposures to some concentrations above the MATC for short periods of time do not adversely effect survival, growth or reproduction.

(q) The value of 0.44 is the geometric mean of the quotients of the highest concentration that killed 0-10% of the organisms divided by the LC50 in 219 acute toxicity tests (see Table 10).

GLOSSARY

1. LC50: the concentration of a toxicant in water which is lethal to 50 percent of the organisms of a particular species under a given set of conditions in a specified length of time (i.e., 24-, 48-, 96-hours).

2. EC50: the concentration of a toxicant in water required to produce a defined effect in 50 percent of the organisms of a particular species in a specified length of time.

3. Maximum Acceptable Toxicant Concentration (MATC): the highest concentration of toxicant that has no adverse effect on survival, growth or reproduction of a species based on the results of a life-cycle or partial life-cycle toxicity test. A life-cycle or partial life-cycle test cannot produce a value for the

[3]As mentioned in the preface above, the Agency may employ other methods for deriving criteria where minimum data are not available for criterion derivation using the guidelines.

V 43 97

MATC; a test can only produce limits within which the MATC must fall.

4. Life-Cycle Toxicity Test: consists of exposing several groups of individuals of one species to different concentrations of a toxic agent throughout a life cycle in order to study the effect of the toxic agent on the survival, growth and reproduction of the species. To insure that all life stages and life processes are exposed, the test begins with embryos or newly hatched larvae less than 48 hours old, continues through maturation and reproduction, and with fish ends not less than 30 days (90 days for salmonids) after the hatching of the next generation.

5. Partial Life-Cycle Toxicity Test: consits of exposing several groups of individuals of one species to different concentrations of a toxic agent through part of a life-cycle in order to study the effect of the toxic agent on survival, growth and reproduction. Partial life-cycle tests are conducted with fish species that require more than a year to reach sexual maturity, so that the test can be completed in less than 15 months, but still expose all major life stages to the toxicant. With fish, exposure to the toxic agent begins with immature juveniles at least 2 months prior to active gonad development, continues through maturation and reproduction, and ends not less than 30 days (90 days for salmonids) after the hatching of the next generation.

6. Application Factor (AF): for fish, the quotient of the maximum acceptable toxicant concentration (MATC) divided by the 96-hour LC50 (AF=MATC/96-hr LC50).

7. Embryo-Larval Toxicity Test: a 28-day (60-90 days for salmonids) toxicity test involving exposure during the early life stages of a fish from fertilization through embryonic, larval, and early juvenile development. The biological effects measured are hatchability, survival, growth and deformities.

8. Bioconcentration Factor (BCF): quotient of the concentration of a chemical in the tissue of an aquatic organism divided by the concentration in the water in which the organism resides.

9. Equilibrium Bioconcentration Factor: a BCF that is constant over a period of time such as one week.

10. Partition Coefficient: the quotient of the solubility of a compound in octanol divided by its solubility in water.

11. Empirically Derived Partition Coefficient: partition coefficient that is calculated from measured partition coefficients for structures which contain the important 'interactive' fragments of the chemicals for which partition coefficients must be calculated.

12. Maximum Permissible Tissue Concentration: the maximum concentration of a substance in aquatic organism tissue that causes no toxic effects when consumed by man or other animals.

13. FDA Action Level: the concentration of a substance in edible materials considered by FDA to be unacceptable for human or animal consumption.

14. Residue Limited Toxicant Concentration (RLTC): the highest toxicant concentration in water that will not produce a tissue residue in aquatic organisms that is above a maximum permissible tissue concentration.

15. In the *static* technique test solution and test organisms are placed in test chambers and kept there for the duration of the test.

16. The *renewal* technique is like the static technique except that the test organisms are periodically exposed to fresh test solution of the same composition, usually once every 24 hours, either by transferring the test organisms from one test chamber to another or by replacing the test solution.

17. In the *flow-through* technique test solutions flow into and out of the test chambers on a once through basis for the duration of the test. Two procedures can be used. In the first large volumes of the test solutions are prepared before the beginning of the test and these flow through the test chambers. In the second and more common procedure fresh test solutions are prepared continuously or every few minutes in a toxicant delivery system.

18. The geometric mean of N numbers is obtained by taking the Nth root of the product of the N numbers. Alternatively, the geometric mean can be calculated by adding the logarithms of the N numbers, dividing the sum by N, and taking the antilog of the quotient. The geometric mean of two numbers can also be calculated as the square root of the product of the two numbers. The geometric mean of one number is that number.

The logarithmic variance of a set of numbers is the variance of the logarithms of the numbers. Either natural (base e) or common (base 10) logarithms can be used to calculate geometric means and logarithmic variances as long as they are used consistently within each set of data, i.e. the antilog used must match the logarithm used.

TABLE 1.—*Quotients of measured and nominal toxicant concentrations obtained from acute and chronic flow-through toxicity tests with both marine and freshwater fish and invertebrates*

Toxicant	Measured/ nominal[a]	Number of tests	Reference[b]

TABLE 7.—*Quotients of 96-hr LC50 values from flow-through and static tests with invertebrates*

Toxicant	LC50 (flow-through)	LC50 (static)	Flow-through/static
Malathion	0.50	0.9	0.56
DDT	.80	1.8	.44
Parathion	4.5	2.1	2.14
Endrin	5.5	1.3	4.23
Azinphosmethyl	1.2	.2	6.00
DDT	3.5	2.3	1.52
Parathion	5.0	1.5	3.33
Endrin	.5	3.2	.16
Zectran	83	12	6.92
Chlordane	4	10	.40
Penthion	5.8	10	.58
Malathion	12	90	.13

NOTE.—Geometric Mean = 1.1; N = 12.
All data from Sanders, H. O., 1972. Technical Papers of the Bureau of Sport Fisheries and Wildlife, No. 66. 19 pp.

FEDERAL COMMUNICATIONS COMMISSION

WARC ADVISORY COMMITTEE FOR AMATEUR RADIO

Meeting Announcement

Date: June 5, 1978.
Time: 9:30 a.m.
Location: Room 8210, Federal Communications Commission, 2025 M Street NW., Washington, D.C. 20554.

Agenda: Introductions; Status of WARC-79 preparations; Overview of International preparations related to the Amateur Radio Service; Critique of ACAR comments, 5th NOI, Docket 20271; Discussion of 7th and 8th NOI, Docket 20271; Future tasks for ACAR; Other discussion to be determined; Closing remarks.

PUBLIC PARTICIPATION

Public representatives who desire to make a presentation at this meeting should coordinate their request with the Executive Secretary, WARC Advisory Committee for Amateur Radio: Peter M. Hurd, 6425 Cygnet Drive, Alexandria, Va. 22307, telephone 202-695-7181 or 703-768-9535. Required information includes: Name, mailing address, and telephone number of person making the presentation; outline of material to be presented; duration of presentation; and audio/visual aids required. Written statements should be addressed to John B. Johnston, Chairman, WARC Advisory Committee for Amateur Radio, Room 5114, Federal Communications Commission, Washington, D.C. 20554.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

Correction

In FR Doc. 78-12606 appearing at page 19921 of the issue of Tuesday, May 9, 1978, an agreement was left out. Please insert the following after the summary text for Agreement No. T-3645:

Agreement No. 2846-36.
Filing party: Stanley O. Sher, Esquire, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street NW., Washington, D.C. 20006
Summary: Agreement No. 2846-36 has been entered into by the member lines of the West Coast of Italy, Sicilian, and Adriatic Ports/North Atlantic Range Conference (WINAC) to amend Article 9a) of the basic agreement to provide that each member present at an ordinary principals' meeting does not carry more than one proxy.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

Application for Pipeline Right-of-Way AA-16453

MAY 11, 1978.

Notice is hereby given that pursuant to sec. 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by Pub. L. 93-153, approved November 16, 1973 (87 Stat. 575), the Alaska Pipeline Co., P.O. Box 6288, Anchorage, Alaska 99502, has applied for a ten (10) foot wide permanent pipeline right-of-way across the following public lands:

T. 8 N., R. 4 W., Seward Meridian,
Secs. 4, 5, 8, 17, 18, and 19.
T. 9 N., R. 4 W., Seward Meridian,
Secs. 1, 2, 11, 15, 21, 22, 27, 28, and 33.
T. 10 N., R. 4 W., Seward Meridian,
Secs. 24, 25, 35, and 36.
T. 10 N., R. 3 W., Seward Meridian,
Secs. 19 and 30.

The proposed pipeline is located within an existing natural gas pipeline right-of-way to Alaska Pipeline Co. (A-051647), and is located southwest of Anchorage, Alaska.

The 16-inch buried pipeline will convey natural gas across approximately 15 miles of public lands traversing the Kenai Moose Range and the Chugach National Forest in part.

The purpose of this notice is to inform the public that the U.S. Department of the Interior, Bureau of Land Management, will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send them to the State Director, Alaska State Office, Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510.

CURTIS V. MCVEE,
State Director.

[NM 33337, 33388, and 33339]

NEW MEXICO

Applications

MAY 11, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso natural Gas Co. has applied for four 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 18 S., R. 25 E.,
Sec. 5, S½SE¼.
T. 23 S., R. 25 E.,
Sec. 15, lots 9, 10, and 16.

These pipelines will convey natural gas across 0.728 miles of public lands in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Applications

MAY 11, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for two 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 26 N., R. 8 W.,
Sec. 35, NE¼SW¼.
T. 31 N., R. 13 W.,
Sec. 1, NE¼SE¼.

These pipelines will convey natural gas across 0.174 miles of public lands in Rio Arriba and San Juan Counties, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Application

MAY 11, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Phillips Petroleum Co. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 18 S., R. 33 E.,
Sec. 20, N½SE¼ and SE¼SE¼.

This pipeline will convey natural gas across 0.452 miles of public land in Lea County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

National Park Service

[Order No. 7]

ADMINISTRATIVE OFFICER, ET AL., EVERGLADES NATIONAL PARK, FLA.

Delegation of Authority

SECTION 1. *Administrative Officer and Supervisory Contract Specialist.* The Administrative Officer and Supervisory Contract Specialist, Everglades National Park, may execute, approve, and administer contracts and issue purchase orders not in excess of $500,000 for equipment, supplies, and services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds. This authority may be exercised by the Administrative Officer and Supervisory Contract Specialist in behalf of any coordinated area.

SEC. 2. *Purchasing Agent.* The Purchasing Agent, Everglades National Park, may issue purchase orders not in excess of $10,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds. This authority may be exercised by the Purchasing Agent in behalf of any coordinated area.

SEC. 3. *District Park Ranger, Everglades City.* The District Park Ranger, Everglades City, Everglades National Park, may issue field purchase orders not in excess of $300 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds.

SEC. 4. *Chief of Maintenance, Maintenance Facility Manager, and Maintenance Foreman Park General.* The Chief of Maintenance, Maintenance Facility Manager, and Maintenance Foreman Park General, Everglades National Park, may issue field purchase orders not in excess of $300 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds.

SEC. 5. *Park Manager, Park Ranger, and Captain-Engineer, Fort Jefferson National Monument.* The Park Manager, Park Ranger, and Captain-Engineer, Fort Jefferson National Monument, may issue field purchase orders not in excess of $300 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds.

SEC. 6. *Park Manager, Big Cypress National Preserve.* The Park Manager, Big Cypress National Preserve, may: (a) Execute, approve, and administer contracts and issue purchase orders not in excess of $2,000 for equipment, supplies, and services in conformity with applicable regulations and statutory authority and subject to the availability of appropriated funds; (b) issue revocable special use permits having a term of 5 years or less.

SEC. 7. *Revocation.* This order supersedes Everglades National Park Order No. 6 dated May 3, 1972, and published in 37 FR July 25, 1972, in its entirety.

(National Park Service Order No. 77 (38 FR 7478) as amended; Southeast Region Order No. 6 (42 FR 59428).)

Dated: March 2, 1978.

JOHN GOOD,
Superintendent, Everglades National Park.

NATIONAL COMMISSION ON NEIGHBORHOODS

MEETING; CORRECTION

ACTION: Correction of notice of meeting.

SUMMARY: This notice, required under the Federal Advisory Committee Act (5 U.S.C. Appendix I), corrects a notice of meeting announced in the FEDERAL REGISTER on May 8, 1978, at page 19726. Prior notice indicated time, place, and agenda of meeting would be announced as soon as known.

TIME AND DATE: 2:00 p.m. (Pacific standard time) on Friday, May 19, 1978; 1:30 p.m. and 4:00 p.m. (Pacific standard time) on Saturday, May 20, 1978.

PLACE: (Meetings of May 19 and May 20 at 1:30 p.m.): Hotel Biltmore, 515 South Olive Street, Los Angeles, CA. (Meeting of May 20 at 4:00 p.m.): 1000 Grattan Street (corner of Tenth and Grattan), Los Angeles, CA.

AGENDA: (meetings of May 19 and May 20 at 1:30 p.m.): Business sessions to consider interim report. (Meeting of May 20 at 4:00 p.m.): Public hearing to analyze different approaches to economic development.

JONATHAN STEIN,
Administrative Officer.

[4910-58]

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 78-20]

STATISTICAL CHART; SAFETY RECOMMENDATIONS AND RESPONSES

Availability and Receipt

Chart of 1977 Transporation Fatalities.—The transportation death toll in the United States rose by nearly 4 percent in 1977—the first significant upturn in 5 years, according to preliminary statistics released May 13 by the National Transportation Safety Board.

Spurred by an increase of 1,357 in highway deaths and a record toll in air travel, total fatalities in all modes of transporatation rose from 50,208 in 1976 to 52,154 in 1977. This total had risen only 1 percent in 1976 after 3 years of decline.

Highway fatalities, which historically account for more than 90 percent of all U.S. transportation deaths, last year increased from 45,523 to 46,880. It was the second successive year of increased highway fatalities after 2 years of decline. The highway toll had dropped nearly 20 percent in 1974 and 2 percent in 1975 before turning upward by 2 percent in 1976 and 3 percent in 1977.

Four of the Board's seven other statistical categories also registered fatality increase in 1977. Airline deaths, swollen by the 327 United States and 248 foreign carrier fatalities in the ground collision of two wide-body jetliners in the Canary Islands, rose from 45 in 1976 to 654 last year. Railroad fatalities increased from 590 to 653, an increase of 11 percent. Recreational boating and general aviation each showed a 4 percent increase.

Other categories registered decreases, with pipelines down from 82 to 43 (48 percent); commercial marine from 269 to 216 (20 percent); and railhighway grade crossings from 1,174 to 1,001 (15 percent).

The Safety Board's statistics were issued in the form of its annual pie chart of transportation fatalities, attached to press release SB 78-34.

SAFETY RECOMMENDATIONS

Aviation.—The crash last December 11 of an Air Indiana DC-3 shortly after takeoff from Dress Regional Airport, Evansville, Ind., has been investigated by the Safety Board. The airplane was on an IFR charter flight to transport the Evansville University basketball team to Nashville, Tenn. The 27 passengers and 2 flight crewmembers were killed.

Investigation disclosed that Evansville Tower personnel who were working the combined local/ground position and the flight data position were not aware of the new weather observation being displayed on the Electrowriter in the tower cab. As a result, incorrect weather information was transmitted to aircraft under tower jurisdiction. Although neither this misinformation nor other air traffic control services contributed to the accident, the Safety Board believes that it illustrates a potentially serious shortcoming in the system for dissminating current weather information to flightcrews and warrants corrective action.

Accordingly, the Safety Board on May 11 recommended that the Federal Aviation Administration—

Install an alerting feature on all existing and new equipment used for disseminating essential weather information in all air traffic control facilities, at positions that require timely information and at positions that are required to issue current weather information as a part of their air traffic control functions. (Class II Priority Action) (A-78-34)

Highway.—Six recommendations were issued May 9 by the Safety Board following investigation of a truck-automobile collision on July 6, 1977, near Vincentown, N.J. The truck, with a gross weight of 52,000 pounds, struck the automobile at the intersection of U.S. Route 206 and County Road Route 616. The truckdriver and six of the seven occupants of the automobile were killed.

Board investigation revealed that the truckdriver was exceeding the speed limit. The truck's brakes were in good condition, but there was no evidence of preimpact braking.

The Board noted that the truckdriver had been issued a New Jersey "basic driver license" which allows operation of all vehicles except motorcycles, omnibuses, schoolbuses, and certain other vehicles that weigh more than 18,000 pounds. He had been driving for his employer, a private intrastate carrier, intermittently for more than 5 years. During that time he was convicted of driving while under the influence of an intoxicating liquor, had his operator license suspended, and was involved in two accidents. During the 3 years before his employment, he had been convicted of careless driving, speeding, and driving while impaired. His employer was not required to and had not checked his driving record either before hiring him or during his employment.

As a result of its investigation of this accident, the Safety Board has issued the following recommendations:

To the State of New Jersey—

Develop and implement a classified driver licensing system, which conforms to the National Highway Traffic Safety Administration Highway Safety Program Standard No. 5, "Driver Licensing." (H-78-27)

Develop and implement regulations that require employers to make preemployment investigations and inquiries into the driving record of each truckdriver it employs. The requirements should be similar to those found in 49 CFR 391.23 and 391.25 of the Federal Motor Carrier Safety Regulations. (H-78-28)

To the National Highway Traffic Safety Administration—

Actively encourage the State of New Jersey to develop and implement a classified driver licensing system which conforms to Highway Safety Program Standard No. 5, "Driver Licensing." (H-78-29)

In cooperation with the Bureau of Motor Carrier Safety, actively encourage the State of New Jersey to develop and implement regulations that require employers to make preemployment investigations of the driving record of each truckdriver applicant. The requirements should be similar to those found in 49 CFR 391.23 and 391.25 of the Federal Motor Carrier Safety Regulations. (H-78-30)

To the State of New Jersey Department of Transportation—

Maintain surveillance of the intersection of U.S. Route 206 and County Road Route 616 through careful monitoring of traffic volumes and accidents. Use this information to determine the need for further corrective action to improve the safety of the intersection. (H-78-31)

Install a Junction Assembly and Directional Marker Assembly on the approaches of County Road Route 616 that directs drivers to U.S. Route 206. (H-78-32)

M Y 1 8 7 8 UMI

Each of the above recommendations is designated "Class II, Priority Action."

RESPONSES TO SAFETY RECOMMENDATIONS

AVIATION

A-72-23.—The Federal Aviation Administration's letter of March 31 advises of completed action with respect to this recommendation which called for review of the design and certification criteria of FAR Part 23 applicable to fire protection of powerplant installations for adequacy and effect of appropriate regulatory changes if deemed necessary. FAA advises that Amendment 23-18 added two new rules directly relating to the recommendation. Part 23, paragraph 23.1193(f), adds a rule for nacelles on multiengine airplanes. Paragraph 23.123 adds a requirement for fire detectors. A copy of Amendment 23-18 is attached to FAA's letter.

HIGHWAY

H-76-15.—The Federal Highway Administration on February 28 provided a followup to its July 8, 1977, letter regarding this recommendation which asked FHWA, in cooperation with the States, to perform a sufficient quantity of skid tests on timber roadway surfaces to establish if such surfaces can normally meet the recommended skid numbers values contained under Highway Safety Program Standards 12—Highway Design Construction and Maintenance.

FHWA reports that three bridges were tested in Jamestown National Historical Site, the results indicating that exposed timber surfaces have marginal skid resistance qualities at best and can be very hazardous when wet. FHWA field offices have been advised of the recommendation and the tests. Field offices have also been advised that any new bridges on paved roads which incorporate a timber deck should also include some type of skid-resistant surface. A copy of the memorandum sent to FHWA Regional Administrators is attached to FHWA's letter.

H-77-6.—The National Highway Traffic Safety Administration's letter of March 9 responds to the Safety Board's inquiry of February 8 concerning the penetration of bus wheel well covers into the total production of buses. NHTSA reports that letters of inquiry have been sent to the three largest manufacturers of intercity buses (General Motors, American Motors Corp., and Fixible). The Safety Board will be notified further after the responses are received and analyzed.

H-77-10.—The State of Nebraska's Department of Roads on March 2 responded to the Safety Board's inquiry of February 14 regarding this recommendation, resulting from investigation into the accident which occurred August 8, 1976, at the Beaver Avenue crossing of the Burlington Northern Railroad in Stratton, Nebr.

The Department reports that a letter has been received from the Chairman of the Village Board of Trustees of Stratton making application for the use of Federal Off-System railroad crossing funds. The Department states that the crossing is so located that it appears the 10 percent local funding must be a joint venture between the Village of Stratton and Hitchcock County. Both of these local entities will be contacted and advised of the necessity for their commitment to the 10 percent funding. The Department will prepare the necessary program documents to be submitted to the Federal Highway Administration and the required agreements for the railroad. The Safety Board on March 14 acknowledged receipt of the Department's letter and asked to be kept informed of the progress relating to implementation of the recommendation.

H-77-16.—The California Department of Transportation (Caltrans) on March 8 answered the Safety Board's report of January 25 to the initial response letter dated November 28, 1977. This recommendation resulted from investigation of the May 21, 1976, accident involving a charter bus which vaulted over the Marina Vista off-ramp of Interstate 680 near Martinez, Calif. The recommendation asked Caltrans to erect at the approach to the Marina Vista off-ramp an exit sign that incorporates a diagram of the curvature of the ramp to illustrate its severity and relocate or supplement the advisory exit speed sign to improve its warning to approaching drivers.

The Board's reply to Caltrans' initial response reiterated the conclusion that the curve radius of the ramp in question was under the minimum specified radius defined in the roadway geometric design handbook published by the American Association of State Highway and Transportation officials, which manual is accepted as a standard for design by the Federal Highway Administration. The Board said that this fact places the ramp in the category of "substandard" as defined by the "Exit Speed Sign Review—State of California," page 4, conclusion B. The Board further stated that its continued opinion is that this "substandard" ramp (Item IV-B, California Study) requires an overhead diagramatic exit sign and an additional speed reduction warning sign to make it operationally safe for future users.

Caltrans' March 8 response states that the Board based its recommendation for the addition of a curved arrow sign on the inference that the subject ramp is "substandard" because its radius is less than 230 feet. Caltrans further states, "Your definition of substandard would include virtually every loop ramp in the State of California. The document you referred to is talking about California standards. Almost all loop ramps in the State have less than 200' radius. It would be wasteful and destroy the effectiveness of this special sign if it were erected in advance of every loop off-ramp in California. That's why it's use is limited to special cases, such as ramps containing hidden curvature or ramps with a history of accidents. The gore and curvature of the subject ramp are clearly visible."

With reference to FHWA's most recent policy on ramp signing (Official Rulings on Requests for Interpretations, Changes, and Experimentations; Volume VIII—December 1977), Caltrans said that no mention is made of the supplemental speed advisory sign suggested by the Board. According to Caltrans, the December policy states, "When geometrics of the exist ramp are such to cause a significant speed reduction, the exit speed sign should be posted along the deceleration lane or along the ramp such that it is visible to the driver in time to make a safe slowing and exiting maneuver." It further notes, "Use and placement of these signs (W13-2) should be based on an engineering study."

Caltrans also stated that California policy specifies that a W13-2 (CA No. W72/W72A) shall be used on freeway off-ramps. "As we have repeatedly informed the Board, this sign, optional under Federal signing policies, is further supplemented with a W4, symbolized curve alignment sign where standard curve warning signs have not proven adequate," Caltrans stated.

Caltrans finds no historical accident data to support installation of the supplemental W4 sign.

H-77-17 through 19.—Also with reference to the Martinez bus accident is a letter dated March 6, 1978, from the Department of California Highway Patrol, addressee of these recommendations. Attached to the response letter are copies of documents providing the status of the Department's actions on these recommendations and draft changes to the Department's regulations representing requirements to be adopted following their review by the affected industry and the necessary formal public hearings on or about June 30, 1978.

The proposals for Title 13 CAC, to assure public awareness of safety regulations, include adoption of section 1212(e) concerning Motor Carrier Ratings—Buses, and a regulation to ensure driver proficiency.

MARINE

M-72-16.—Letter dated February 28, 1978, from Radio Technical Commis-

V 43 97

sion for Marine Services (RTCM) provides in response to this recommendation three documents in addition to those forwarded to the Safety Board with letters of February 25 and September 27, 1977. The recommendation issued in connection with the 1972 Board study, "Collisions within Navigable Waters of the United States," asked that RTCM's Special Committee 65 (SC-65) continue its work on developing general standards or specifications for shipboard collision avoidance systems so that the standards may be used by the marine industry for evaluting the effectiveness of the various systems available or currently under development.

The documents recently developed by SC-65 are:

1. Equipment Reliability Specification for Design and Production of Radar, Collision Avoidance, and Marine Radar Interrogator-Transponder Equipment (RTCM Paper 265-77/EC-240/SC 65-259).

2. Performance Specification for a General Purpose Navigational Radar Set for Ocean-going Ships of 1,600 Tons Gross Tonnage and Upwards, For New Radar Installations (RTCM Paper 14-78/EC-245/SC 65-264). (This specification is an updating and replacement of RTCM Paper 104-74/EC-140.)

3. Resources Necessary for On-Board Preventive and Corrective Maintenance of Radar, Collision Avoidance and Marine Radar Interrogator-Transponder Equipment (RTCM Paper 266-77/EC-241/SC 65-260). (This paper is an extension (and replacement) of RTCM Paper 139-77/EC-229/SC 65-246.)

M-74-29.—United States Coast Guard's letter of March 21 is in response to the Safety Board's inquiry of February 3. Coast guard has reevaluated this recommendation which was issued as a result of investigation into the death of three ship's officers aboard the SS *William T. Steele* on November 18, 1972. The recommendation asked Coast Guard to require that a written cargo loading plan be made and posted each time cargo is to be transferred aboard chemical tankers, and further, that a check procedure be developed to assure the desired rating is achieved.

Coast Guard reports development of an advance notice of proposed rulemaking addressing tank entry procedures that is now undergoing in-house clearance. Additionally, Coast Guard has published a notice of proposed rulemaking concerning tankermen qualifications. Coast Guard considers that these tow efforts coupled with the existing regulations are adequate for assuring the safety of the vessel and the crew. A step-by-step check-off list for cargo handling operations is not considered necessary.

M-74-36.—In response to the Safety Board's request of December 7, 1977, for a copy of Coast Guard's "policy change" relative to Citizen's Band radio service, Coast Guard on January 10 forwarded a copy of its August 31, 1977, ALDIST. The recommendation, issued as a result of loss on August 16, 1972, of numerous vessels during heavy weather in the vicinity of Chetco River, Oreg., asked Coast Guard to use all available means of communications, including Citizen's Band radio in situations where a more rapid rescue could be provided.

M-77-15 through 30.—Coast Guard's letter of February 17 is in response to recommendations issued by the Board in connection with the sinking of the *Pearl C* near Astoria, Oreg., on September 13, 1976.

In answer to M-77-15, which asked Coast Guard to conduct field investigations to determine the causes of vessel equipment failures which require assistance from Coast Guard Station Cape Disappointment and implement a program of corrective actions which includes publishing maintenance and repair guidelines for the operators of charter boats to reduce the number of assistance cases. Coast Guard states that the need for some type of mechanical information pamphlet to be distributed to operators of charter fishing boats in the Thirteenth Coast Guard District is not disputed. Coast Guard needs further study to develop specific areas of information to reduce search and rescue (SAR) work generated by these vessels.

Regarding M-77-16, Coast Guard will draft proposed regulations requiring operators of inspected charter boats to keep a log of service and repairs made to their vessels as recommended.

Recommendation M-77-17 asked Coast Guard, in cooperation with the States of Oregon and Washington, to establish a program of safety education for the operators of charter boats to include training in preventive maintenance and in at-sea repair of machinery and equipment necessary for safe operation. Coast Guard's response states that establishment of qualification standards for licensed operators of inspected vessels is a statutory responsibility of the Coast Guard not jointly shared with the individual States; further, the need to establish a training program addressing preventive maintenance and machinery repairs has not been demonstrated. Coast Guard considers that a licensed applicant's demonstration of knowledge through examination is adequate, particularly when one considers that most operators of small passenger vessels are the vessels' owners. However, the Coast Guard will review existing examination materials to insure that the prospective operator's knowledge of the propelling machinery is adequately tested.

With reference to M-77-18, which recommended the Coast Guard evaluate the effectiveness of its motor lifeboats in search operations offshore in comparison with its aircraft and establish criteria for selecting specific boats and aircraft according to existing SAR conditions. Coast Guard states that information concerning the capability of surface craft and aircraft and the criteria for selecting specific types to respond to SAR cases is contained in paragraphs 310 to 314 of the National SAR manual and this information is considered adequate.

In answer to M-77-19, which asked Coast Guard to institute at Cape Disappointment an equipment failure reporting and maintenance program to provide for early detection and repair of SAR equipment problems and insure higher management provides support for corrective action required which is beyond the station's capability, Coast Guard states that such a reporting system is currently in effect at Cape Disappointment and published in Annex E, the Operational Readiness section of the Thirteenth Coast Guard District Operational Plan (Op Plan). This annex requires Cape Disappointment to inform Group Astoria and, as an information addressee, the District Commander, by priority message of all material shortages, and casualties that have reduced, or are expected to reduce, a unit's operational readiness. This District Op Plan also provides a maintenance program for early detection and repair of SAR equipment problems.

Recommendation M-77-20 asked Coast Guard, in conjunction with the Federal Communications Commission, to expedite the dedication (allocation) of Channel 15 VHF for the sole purpose of emergency location. Coast Guard states that the FCC has concurred with the dedication of Channel 15 VHF for the sole purpose of emergency location and that initial implementing Federal regulations are being drafted on an expedited basis.

The Coast Guard is presently developing a checklist of procedures necessary for safe towing operations to be mounted near the operator steering station of Coast Guard boats used in such operations, this in response to M-77-21.

Recommendation M-77-22 asked Coast Guard to determine the feasibility of increasing the assignment periods for military personnel or, in lieu thereof, using civilian employee rescue personnel as an alternative to give the station more continuity and higher capability.

Coast Guard states that it can assign regular service personnel to provide the necessary experience, expertise,

MY 18 78 UMI

and continuity required at Thirteenth District coastal SAR stations. The following assignment policies have been established for these stations: (a) Career enlisted personnel will be assigned for a 3-year tour of duty barring unforeseen circumstances (e.g., humanitarian reassignments, hardship discharges, incompetence) career enlisted personnel are in the rating E-6 or above or one who has 6 or more years of active service (subsequent enlistment); (b) first enlistment petty officers will be assigned with the intention that they will complete their enlistments at the one duty station; (c) nonrated personnel who advance to petty officer status while at a coastal search and rescue station will complete 3 or more years at that unit (combined nonrated and rated status) prior to transfer; and (d) boatswain's mate billets (E-7 and above) will be filled with personnel with previous Thirteenth District coastal SAR station experience.

Coast Guard adds that the use of civilian employees to perform rescue functions at a Coast Guard station has not been explored sufficiently to determine the feasibility of such action. This will be explored further in conjunction with ongoing efforts aimed at improving efficiency and effectiveness of the station.

In answer to recommendation M-77-23, for establishment of a comprehensive checklist to insure that personnel evaluate important SAR circumstances and carry out established safety procedures, Coast Guard states that the National SAR Manual describes SAR mission checklists to insure that a step-by-step course of action is followed in prosecuting SAR missions. The types of checklists and the extent of their use is discretionary with the SAR coordinator. Coast Guard is examining the overall application of these checklists and will attempt to resolve any specific problems.

Recommendation M-77-24 asked Coast Guard to require the operators of inspected charter boats to instruct their passengers in the location and use of personal flotation devices before getting underway, and to both notify the Coast Guard of the situation and distribute these devices to their passengers before crossing a bar or waterway when conditions are determined by the Coast Guard to be hazardous. In response, Coast Guard states that it will initiate a regulatory change to 46 CFR 185.25-5 by changing the title from "Recommended Emergency Check-off Lists" to "Emergency Check-off Lists" and to 46 CFR 185.25-1 by requiring operators of inspected charter boats to instruct their passengers in the use and location of personal flotation devices prior to getting underway. As to the second part of this recommendation, the response letter states that having the Coast Guard determine whether conditions are hazardous removes the burden of safe navigation and operating from the master/operator of the vessel who knows best the operating characteristics of his vessel and the operating conditions he is in at that moment in time.

Recommendation M-77-25 asked Coast Guard to require inspected passenger vessels to have a means to alert the operator at his control station, by both visual and audible signals, of unsafe water levels in each decked-over compartment which, if flooded, would have a significant effect on stability. Coast Guard reports that analysis of foundering, capsizing, and swamping casualties for inspected vessels less than 65 feet in length and less than 100 gross tons has indicated that a significant number of casualties occur where early warning of bilge flooding may have reduced the severity of the casualty. Coast Guard will initiate proposed changes to 46 CFR 182, Subchapter T, to require bilge alarms.

M-77-26 recommended that Coast Guard determine whether electric bilge pumps which are activated automatically by water in the bilges and which have an independent energy source should be required to be installed in each compartment of inspected small passenger vessels. Coast Guard states that the *Pearl C* was more than adequately equipped for flooding situations other than those of a catastrophic nature. Installation of dewatering equipment of a capacity that would theoretically handle a catastrophic flooding situation on this class of vessel is not considered feasible from an engineering design point of view.

In response to M-77-28, asking Coast Guard to advise operators of the possible adverse effects of cross-connections between fuel and other liquid tanks on a vessel's stability when wind or other forces heel the vessel and identify corrective measures, Coast Guard will initiate a regulatory change to 46 CFR 185.25-5 to include the requirement for closing cross-connections between fuel tanks.

Coast Guard will amend the Marine Safety Manual, advising Coast Guard inspectors to strictly enforce regulations regarding watertightness of weather decks, including the requirements for securing devices and means of attachment as requested by recommendation M-77-28.

Recommendation M-77-29 asked Coast Guard to designate the Columbia River Bar as a specially hazardous area per 46 CFR 178.05-15(a) and require vessels which operate across it to have the maximum degree of seaworthiness afforded by the Small Passenger Vessel Regulations. Coast Guard states that it will fully evaluate the economic impact of this recommendation to the affected charter boat industry prior to making a full response.

Coast Guard does not contemplate establishing a comprehensive regulation requiring deckhands on all inspected charter boats, as requested by recommendation M-77-30. Coast Guard states that evaluation of this recommendation has reaffirmed our present policy that it is a proper function of Coast Guard district and local field offices to determine the manning requirements for vessels of this class certificated and operating in their areas due to the many diverse elements involved (i.e., vessel construction characteristics, route, nature of operating area, number of passengers, etc.)

Pipelines

P-77-24 and 25.—The Connecticut National Gas Corp. (CNG) on February 1 responded to the Safety Board's request of January 24 for revised written procedures to implement the Board's recommendations issued following the natural gas explosion at Greenwich, Connecticut, May 25, 1977.

The CNG letter states that after the accident, all hot tap insulator work was stopped until adoption on July 11, 1977, of new guidelines for installation of hot tap insulator fittings. A copy of these guidelines, together with a checklist and a sample procedure, are attached to CNG's letter. CNG states that copies of those records used to review the project must be attached to the checklist.

P-77-38 through 40.—The Pennsylvania Gas & Water Co. (Penn Gas) on January 16 supplemented its December 15 response to recommendations issued as a result of investigation into the January 25, 1977, pipeline explosion near Williamsport, Pa. The recommendations asked Penn Gas to initiate an effective general public and gas customer information program about the nature, characteristics, and hazards of natural gas and what to do when it is encountered; to test the effectiveness of the emergency procedure training of all operating personnel; and to verify the location of all high-pressure shutoff valves shown on gas main atlases and change maps where necessary.

Penn Gas reports that it is now investigating ideas for more general "public" distribution of information. the company believes that the best test of its emergency procedure training is in evaluating its normal daily response to emergency calls. Penn Gas continually checks its response times and methods on emergency classifications complaint calls, and agrees to provide additional instruction when problem areas are discovered.

Penn Gas cannot agree to the Board's proposal to "verify the loca-

V 43 | 97

tion of all high pressure shut off valves shown on gas main atlases"; most of the valves in its system were installed primarily to facilitate construction and not as emergency system control valves. As a result, most of the valves are buried and not in roadway covers. To verify the location would require digging up municipal streets all over the system for no apparent cost-benefit advantage. Penn Gas does not feel that this specific request is consistent with the intent of the Pipeline Safety Act.

NOTE.—The above notice summarizes Safety Board documents recently released and recommendation response letters received. The safety recommendation letters in their entirety are available to the general public; single copies are obtainable without charge. Copies of the full text of responses to recommendations may be obtained at a cost of $4 for service and 10 cents per page for reproduction.

Single copies of the Chart of 1977 Transportation Fatalities are also available without charge.

All requests to the Board for copies must be in writing, identified by recommendation number and date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 4, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

NATIONAL SCIENCE FOUNDATION

Exploratory Study of Scientific Activities of Science and Engineering Faculty at a Large, Public Nondoctoral College, single time, 230 science faculty at a college, Warren Topelius and Laverne V. Collins, 395-6132.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

Certification of State/Territorial Delegates/Alternates to the White House Conference on Library and Information Service, single time, 1,061 delegates/alternates to White House Conference, Lowry, R. L., 395-3772.

DEPARTMENT OF AGRICULTURE

Forest Service, Camping Market Trends—National Survey, single time, active-potential and inactive camper, Clearance Office, 395-4529.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration, Beach Characteristics Questionnaire, single time, Conservation Commissioners, Cape Cod, Martha's Vineyard, Nantucket, Louis Kincannon, 395-3211.

CIVIL SERVICE COMMISSION

Personnel Research Questionnaire 78-5, CSC 1334, single time, applicants for employment in the District of Columbia Police Department, Clearance Office, 395-4529.

U.S. INTERNATIONAL TRADE COMMISSION

Importers Questionnaire on Certain Fishing Tackle, single time, importers of fishing tackle, Louis Kincannon, 395-3211.

Questionnaire for Producers of Certain Fishing Tackle, single time, producers of certain fishing tackle, Louis Kincannon, 395-3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration, Multipurpose Consumer Food Information Study, single time, 38 large primary sampling units, 25 large metro areas included, Office of Federal Statistical Policy and Standard, 673-7959.

National Institute of Education, Cities in Schools Demonstration/Pilot Test, NIE 194, single time, students/caseworkers, Laverne Collins, 395-3214.

REVISIONS

U.S. CIVIL SERVICE COMMISSION

Qualification Inquiry For Testing Personnel, CSC 1164, on occasion, Former employers, 10,000 responses, 2,500 hours, Clearance Office, 395-3772.

VETERANS ADMINISTRATION

Monthly Report on Number of Inspection, Approval, and Supervisory Visits to Schools and Training Establishments Furnishing Courses, 22-7398, monthly, State approving agencies, 900 responses, 225 hours, Caywood, D. P., 395-3443.

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Food and Drug Administration, Drug Product, Medical Device, and Laboratory Product Problem Reporting Program, FD-2519, FD-2519A, FD-2519F, FD-2822, on occasion, practicing physician, pharmacist, etc., 2,000 responses, 666 hours, Clearance Office, 395-3772.

EXTENSIONS

DEPARTMENT OF AGRICULTURE

Economics, Statistics, and Cooperatives Service-Statistics, Potato Stocks Inquiry (Growers), other (see SF-83), potato storage operators, 10,750 responses, 1,340 hours, Clearance Office, 395-3772.

Economics, Statistics, and Cooperatives Service-Statistics, Onion Stocks and Dispositions, semiannually, onion growers, 350 responses, 90 hours, Clearance Office, 395-3772.

DEPARTMENT OF COMMERCE

Industry and Trade Administration, Agent/Distribution Application Service, ITA424P, on occasion, exporters, 5,000 responses, 2,083 hours, Clearance Office, 395-3772.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration, a Followup Study of Persons Exposed to 131/Iodine for Diagnosis of Thyroid Disease, FDABRH0319, single time, exposed and unexposed groups, 90 responses, 45 hours, Richard Eisinger, 395-3214.

National Institute of Education, Research Grants Application and Project Data Form, NIE-10, on occasion, educational researchers, 5,000 responses, 1,250 hours, Laverne V. Collins, 395-3214.

DEPARTMENT OF LABOR

Bureau of Labor Statistics, Survey of Union Wage Rates and Hours in Grocery Stores, BLS 1150.86, other (see SF-83), union officials, 340 responses, 170 hours, Office of Federal Statistical Policy and Standard, 673-7959.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

NUCLEAR WASTE MANAGEMENT TECHNICAL ADVISORY GROUP

Establishment

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), it is hereby determined that the establishment of the Nuclear Waste Management Technical Advisory Group is necessary, appropriate, and in the public interest in connection with the performance of the duties imposed upon the Director, Office of Science and Technology Policy (OSTP) by the National Science and Technology Policy, Organization and Priorities Act of 1976. This determination follows consultation with the Office of Management and Budget (OMB), pursuant to Section 9(a)(2) of the Federal Advisory Committee Act and OMB Circular A-63, Revised.

1. Name of group. Nuclear Waste Management Technical Advisory Group.

2. Purpose and function. On March 13, 1978, the President created the Interagency Nuclear Waste Management Task Force, under the chairmanship of the Secretary of Energy, for the purpose of formulating recommendations for establishment of an Administration policy with respect to long-term management of nuclear wastes and supporting programs to implement this policy. As a component of the work of this Task Force, OSTP is chairman of a subgroup responsible for the description and analysis of alternative technology strategies. The objectives of this subgroup are:

To identify and delineate viable alternative technology strategies or planning approaches to the problem of disposal and isolation of all nuclear waste other than that categorized as low level;

For each strategy, to analyze benefits and risks and scheduling implications and formulate in general terms an adequate program of knowledge acquisition; and

To produce a document for interagency and public discussion of the preferred technology strategy.

An important requirement for meeting these objectives is an accurate assessment of the current state of knowledge relevant to nuclear waste disposal and isolation.

In order to provide a source of advice and expertise on the issues involved in this subtask, the Advisory Group will be established to draw together experts from industry, academia, and public interest groups. The Advisory Group will serve as a critical review group and, to some extent, participate in the drafting of the written products of the subgroup's work and will advise the Director of OSTP and the Director of the Office of Energy Research on the technical matters pertinent to the effort.

3. Effective date of establishment and duration. The Advisory Group is established to provide advice to the Director of the Office of Science and Technology Policy and to the Special Assistant to the President for Budget and Organization, and is established for 6 months from the date the charter is filed with the standing committees of Congress having legislative jurisdiction for the Office of Science and Technology Policy. Due to the urgency of the Presidentially imposed schedule of the Interagency Nuclear Waste Management Task Force, the Committee Management Secretariat, GSA, has waived the requirement for a 15 day waiting period between publication of the notice of establishment and the filing of the charter.

4. Membership. The Advisory Group will be comprised of approximately ten individuals from industry, academia and public interest groups having qualifications for providing expert knowledge in the fields of geology, hydrology, risk assessment, geochemistry, and other scientific and technical fields pertinent to nuclear waste disposal and isolation.

5. Advisory group operation. The Advisory Group will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92-463), OSTP policy and procedures, OMB Circular No. A-63, Revised, and other directives and instructions issued in implementation of the Act.

FRANK PRESS,
Director.

POSTAL SERVICE

NATIONAL ZIP CODE DIRECTORY

Licensing of Publishers

The U.S. Postal Service in 1974 copyrighted the "National ZIP Code Directory, Publication 65" in order to protect the accuracy and integrity of the ZIP Code information being distributed to the public. In addition, the term "ZIP Code" has been registered as a trademark and service mark.

The U.S. Postal Service licenses publishers on a nonexclusive basis to publish the complete National ZIP Code Directory or portions thereof so long as the portions cover a complete state or a combination of states and all multi-ZIP Coded cities within each state are included.

Licenses may be renewed annually. Some of the more significant terms of the license agreements are as follows:

1. Licensee must publish only the most current ZIP Code information furnished by the U.S. Postal Service. Licensee must print from reproducibles furnished by the U.S. Postal Service.

2. Licensee must submit all manuscripts and proposed promotional materials to the U.S. Postal Service for review prior to publishing.

3. All directories must clearly bear an expiration date consistent with the expiration date of the material reproduced (normally the end of the calendar year).

4. Licensee will pay the licensor a royalty on retail sales negotiated at the time the license is granted.

5. The licensee must submit quarterly reports relating to sales and volume and make available records and accounts for inspection or audit at any time.

The U.S. Postal Service continues to make the National ZIP Code Directory available through the Government Printing Office for $7.50 a copy and is currently testing a procedure for selling it in local post offices.

Application for obtaining a license can be obtained by contacting:

Chairman, Intellectual Property Rights Board, U.S. Postal Service Headquarters, Room 1312, Washington, D.C. 20260.

ROGER P. CRAIG,
Deputy General Counsel.

[8025-01]

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 06/06-0199]

ALLIANCE CAPITAL CORP.

Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1977)), under the name of Alliance Capital Corp., 602 South East First Street, Mineral Wells, Tex. 76067, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders, and their percentages of ownership are as follows:

Melva R. Heath, 620 North Hampton Road, Dallas, Tex. 75208, Chairman of the Board, 9 percent.

Harold A. Jones, 4342 Woodhollow Drive, Dallas, Tex. 75237, President, Director.

Dr. Jack A. Richey, 1011 Greenwood Place, Duncanville, Tex. 75137, Vice President, Director, 9 percent.

Sue D. Gravett, 3500 Mt. Barker Drive, Austin, Tex. 78731, Secretary, Director, 9 percent.

Richard A. Martin, 5201 Bryce, Fort Worth, Tex. 76107, Director, 9 percent.

There is to be only one class of stock with 100,000 shares of common stock authorized. Initially, only 50,000 shares will be issued to twelve shareholders, none of whom will own 10 percent or more of the shares.

The Applicant Licensee proposes to commence operations with private capital of $500,000. Applicant proposes to conduct its operations principally within the States of Texas, Louisiana, Oklahoma and New Mexico.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and manage-

MAY 18 78
UMI

V 43 | 97

ment, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than June 2, 1978, submit to SBA, in writing, comments on the proposed licensing of this company. Any such comments should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice will be published by the applicant in a newspaper of general circulation in Mineral Wells, Tex.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: May 11, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[Docket No. Pet 75-9W, Notice 1]

TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE

Petition for Waiver

The Panhandle Eastern Pipe Line Co. has petitioned the Materials Transportation Bureau (MTB) for a waiver from compliance with section 192.611(c) of the Federal gas pipeline safety standards (49 CFR part 192) for 11 transmission line segments installed in 1962 in the following localities: Liberal, Greensburg, Haven, Olpe, and Louisburg, Kans.; Houstonia and Centralia, Mo.; Pleasant Hill and Tuscola, Ill.; and Montezuma and Zionsville, Ind.

The segments form part of a pipeline known as "Line 400." Almost all the segments are in a class 1 location (see § 192.5) with 1.4 miles in a class 2 location and 2 miles in a class 3 location. The segments total approximately 370 miles in length and consist of grade X-60, 30-inch outside diameter, 0.312 inch wall thickness steel pipe with grade X-46, 30.375-inch outside diameter, 0.500 inch wall thickness steel pipe at road crossings. The maximum allowable operating pressure (MAOP) (see § 192.619) for the 0.312 inch wall thickness pipe in a class 1 location is 898 psig and for the 0.500 inch wall thickness pipe in a class 2 location is 920 psig.

Since Line 400 was constructed, the population along the route has increased. Some sections of the 11 segments are now in higher class locations, and additional changes in class location are anticipated. Under these circumstances, section 192.611(e) requires that the established MAOP be confirmed or revised within 18 months of the change in class location. Under section 192.611(a), if a pipeline has been previously tested to at least 90 percent of its specified minimum yield strength (SMYS) for at least 8 hours, it may be operated at a pressure which produces a corresponding hoop stress no higher than 72 percent of SMYS in class 2, 60 percent of SMYS in class 3, and 50 percent of SMYS in class 4. This MAOP is not otherwise permissible unless the pipeline is retested as required by section 192.611(c).

Approximately 390 miles of Line 400, including the 11 segments for which a waiver is sought, were originally tested using a specially developed cyclic procedure rather than by holding a minimum test pressure for 8 hours. This procedure consisted of 4 cycles of hydrostatically pressuring a test section to at least 95 percent of SMYS and then reducing the pressure to a stress level of 60 percent of SMYS. The total time at 90 percent of SMYS was approximately 2½ hours. As a result, in accordance with section 192.611(c), this portion of the line would have to be retested in order to maintain its established MAOP in areas of changed class locations.

In 1974, about 20 miles of the pipeline were retested as required by section 192.611(c). The fact that no failures occurred is offered as evidence of the integrity of the remaining 11 cyclically tested segments. The petitioner estimates that the cost of retesting the 11 segments would be over $444,000 and that the amount of natural gas lost would be 486,000 MCF.

The petitioner requests that it be allowed to operate the 11 segments of Line 400 as if they were tested as set forth in section 192.611(a). The petitioner argues that retesting is unnecessary because the pipeline's design, construction, testing, and operating history (no operational failures) qualify it for safe operation at the stress levels permitted by section 192.611(a).

In support of this contention, the petitioner particularly relies on the severity of the cyclic testing procedure. It states that the cyclic testing was more likely to produce test failures than if a single test pressure had been held for 8 hours. This conclusion is based on research performed by the Battelle Memorial Institute in Columbus, Ohio, which shows that cyclically induced strains cause more material defects to reach their failure stress level sooner than strains induced by static loading. Also, the petitioner states that because of the higher stress level attained during testing (95 versus 90 percent), any defects remaining in the pipeline are smaller than would have been the case if the pipeline had been tested to only 90 percent of SMYS.

MTB has reviewed the history of this pipeline and the petitioner's arguments and is considering granting the requested waiver on the basis that retesting as required by section 192.611(c) is, in this instance, not necessary for public safety.

Interested persons are invited to comment on the proposed waiver by submitting in quadruplicate such data, views, or arguments as they may desire. Communications should identify the regulatory docket and notice numbers and be submitted to:

Chief, Docket Section, Materials Transportation Bureau, Room 6500, Trans Point Building, 2100 Second Street SW., Washington, D.C. 20590.

All comments received before June 19, 1978, will be considered before final action is taken. Late filed comments will be considered so far as practicable. All comments will be available for examination and copying at Docket Room 6500, Trans Point Building, before and after the closing date for comments. No hearing is contemplated, but one may be held at a time and place set in a later notice in the FEDERAL REGISTER if requested by an interested person desiring to comment at a public hearing and raising a genuine issue.

(49 U.S.C. 1672; 49 CFR 1.53(a), app. A. of pt. 1, and app. A. of pt. 102.)

Issued in Washington, D.C., on May 12, 1978.

CEASAR DELEON,
Acting Director, Office of Pipeline Safety Operations.

INTERSTATE COMMERCE COMMISSION

[Notice No. 662]

ASSIGNMENT OF HEARINGS

MAY 15, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MAY 18 1978 UMI

MC 56679 (Sub-No. 102), Brown Transport Corp., is now assigned for prehearing conference July 11, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 105813 (Sub-No. 229), Belford Trucking Co., Inc., is now assigned for hearing July 19, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 133689 (Sub-No. 167), Overland Express, Inc., is now assigned for hearing July 13, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 143769, Kannapolis Transit Co., Inc., is assigned for hearing June 26, 1978, at Concord, NC, and will be held at Courtroom No. 3, Cabarrus County Courthouse South Union Street.

MC 63417 (Sub-No. 122), Blue Ridge Transfer Co., Inc., is now assigned for hearing June 28, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 143059 (Sub-No. 7), Mercer Transportation Co., is now assigned for hearing July 6, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 144128, Elliott, Inc., of Clarksville, is now assigned for hearing July 6, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 140484 (Sub-No. 27), Lester Coggins Trucking, Inc., is now assigned for hearing July 6, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 27817 (Sub-No. 139), H. C. Gabler, Inc., is now assigned for hearing July 12, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

EXPANSION IN USE OF THE "FEDERAL REGISTER" REGARDING PERMANENT AUTHORITY MATTERS AND RULEMAKINGS

MAY 18, 1978.

The Commission has traditionally published notices of permanent authority matters and rulemakings in the FEDERAL REGISTER on the fourth working day each week. It now intends to expand the use of the FEDERAL REGISTER for these notices, proposals, and final rules to include the second working day each week.

All persons relying on the FEDERAL REGISTER for notice of Commission permanent authority and rulemaking proceedings should refer to FEDERAL REGISTER volumes on both the second and fourth working day each week effective May 18, 1978.

H. G. HOMME, Jr.,
Acting Secretary.

[Forty-Third Revised Exemption No. 90]

EXEMPTION UNDER PROVISION OF RULE 19 OF THE MANDATORY CAR SERVICE RULES ORDERED IN EX PARTE NO. 241

To all railroads: It appearing, That certain of the railroads named below own numerous 50-ft. plain boxcars; that under present conditions, there are substantial surpluses of these cars on their lines; that return of these cars to the owners would result in their being stored idle; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of these cars, resulting in unnecessary loss of utilization of such cars; and

It further appearing, That there are substantial shortages of 50-ft. plain boxcars throughout the country; that the carriers identified in this exemption by the symbol ( ) have 150 percent or more of their ownership of these cars on their lines; and that such a disproportionate use of the total supply of such cars causes shippers served by other lines to be deprived of their proper share of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, 50-ft. plain boxcars described in the Official Railway Equipment Register, ICC-RER No. 407, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", and bearing reporting marks assigned to the railroads named below, shall be exempt from provisions of Car Service Rules 1, 2(a), and 2(b).

[Volume No. 90]

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

MAY 10, 1978.

The following applications are governed by Special Rule 247 of the Commission's general rule of practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(e)(3) of the rules of practice which requires that it set forth specifically the gounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use a such authority to provide all or part of the service proposed), and shall specify with particularly the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protest not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if not representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(e)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 5470 (Sub-No. 142F), filed March 28, 1978. Applicant: TAJON, INC., R.D. 5, Mercer, PA 16137. Applicant's representative: Brian L. Troiano, 918 16th Street, NW., Washington, DC 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alloys, ores, and pig iron*, in dump vehicles, from Chicago, IL to points in IN, KY, MD, MI, NY, OH, and PA. (Hearing site: Washington, DC or New York, NY.)

No. MC 26396 (Sub-No. 170F), filed March 27, 1978. Applicant: POPELKA TRUCKING CO., d.b.a. THE WAGGONERS, P.O. Box 990, Livington, MT 59047. Applicant's representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Materials, equipment, and supplies* utilized in the manufacture, sales, and distribution of office furniture and equipment, from Bend, OR and points in MO, IL, and IN to Muscatine, IA; and (2) *returned and rejected shipments* of commodities named in (1) above, from Muscatine, IA to points in MO, IL, and IN. Restriction: Restricted against the transportation of commodities in bulk, and further restricted to traffic originating at the named origins and destined to the named destinations. (Hearing site: Chicago, IL or Omaha, NE.)

No. MC 28956 (Sub-No. 20F), filed March 27, 1978. Applicant: McKAY'S TRUCK LINE, INC., 908 N. Pacific Highway, P.O. Box 634, Albany, OR 97321. Applicant's representative: Lawrence V. Smart, Jr., 419 NW. 23rd Avenue, Portland, OR 97210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *magnesium flux*, in bags and barrels, from the facilities of S.R.C. Corp. at Millersburg, OR, to points in WA, NV, UT, and CA. (Hearing site: Portland, OR.)

No. MC 29079 (Sub-No. 93F), filed March 28, 1978. Applicant: BRADA MILLER FREIGHT SYSTEM, INC., 1210 S. Union Street, Kokomo, IN 46901. Applicant's representative: Chandler L. van Orman, 1729 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Automobile parts and related items*, between Danville and Kankakee, IL, and points in IN, OH, and those in MI on and south of a line beginning at Ludington, MI and extending along U.S. Hwy 10 to junction Business Route 10 to Midland, MI, then along MI Hwy 20 to Saginaw River to Saginaw, and then along the Saginaw River to Saginaw Bay on the one hand, and, on the other, the facility of American Motors Corp. at or near Kenosha, WI, and points in Racine County, WI. (Hearing site: Chicago, IL.)

No. MC 29886 (Sub-No. 338), filed December 22, 1977. Applicant: DALLAS & MAVIS FORWARDING CO., a corporation, 4200 39th Ave., Kenosha, WI 53142. Applicant's representative: Paul Sullivan, 711 Washington Bldg. NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Air compressors, and earth drilling machinery and equipment*, between Claremont, NH, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: Washington, DC.)

NOTE.—Common control may be involved.

No. MC 41406 (Sub-No. 67F), filed March 27, 1978. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., 7105 Kennedy Avenue, Hammond, IN 46323. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, DC 20001. Authority

MAY 18 1978
UMI

sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paint*, in drums, from Delaware, OH, to Portage, IN. (Hearing site: Chicago, IL.)

No. MC 42261 (Sub-No. 135F), filed March 27, 1978. Applicant: LANGER TRANSPORT CORP., Box 305, Jersey City, NJ 07303. Applicant's representative: W. C. Mitchell, 370 Lexington Ave., New York, NY 10017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid wax*, in bulk, in tank vehicles, from points in the New York, NY and Philadelphia, PA commercial zones to points in ME, NH, and VT. (Hearing site: New York, NY or Newark, NJ.)

No. MC 42261 (Sub-No. 136F), filed March 28, 1978. Applicant: LANGER TRANSPORT CORP., Box 305, Jersey City, NJ, 07303. Applicant's representative: W. C. Mitchell, 370 Lexington Avenue, New York, NY, 10017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages and related advertising materials*, from Eden, NC, to points in NJ, NY and PA; and (2) *Materials, supplies* and *equipment* used in the manufacture, sale, and distribution of malt bererages, and returned empty malt beverage containers, (except commodities in bulk), from points in NJ, NY and PA to Eden, NC. (Hearing site: New York, NY or Washington, DC.)

No. MC 59725 (Sub-No. 2F), filed March 13, 1978. Applicant: MACK AVENUE MOVING & STORAGE, INC., 7740 Gratiot, Detroit, MI 48213. Applicant's representative: Robert B. Simon, (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods and baggage*, between points in Wayne, Oakland and Macomb Counties, MI, in non-radial movement. (Hearing site: Detroit, MI, or Washington, DC.)

No. MC 60014 (Sub-No. 84F), filed April 3, 1978. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, PA 15146. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, OH 43215. Applicant seeks authority as a *common carrier*, over irregular routes, transporting: *Pipe, fittings, fire hydrants, values* and *accessories* used in the installation thereof (except commodities in bulk) from the facilities of Clow Corp. located at or near Birmingham and Pell City, AL, to points in CT, DE, IL, IN, IA, KY, ME, MD, MA, MI, MN, MO, NH, NJ, NY, OH, PA, RI, VT, VA, WV, WI, and DC. (Hearing site: Chicago, IL.)

No. MC 63417 (Sub-No. 146F), filed March 28, 1978. Applicant: BLUE RIDGE TRANSFER CO., INC., P.O. Box 13447, Roanoke, VA 24034. Applicant's representative: William E. Bain, P.O. Box 13447 Roanoke, VA 24034. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *metal containers*, from Salisbury, NC, to points in the United States (except AK and HI) and refused or rejected shipments of metal containers on return. (Hearing site: Roanoke or Richmond VA.)

No. MC 73688 (Sub-No. 79F), filed March 27, 1978. Applicant: SOUTHERN TRUCKING CORP., 1500 Orenda Avenue, Memphis, TN 38107. Applicant's representative: James N. Clay, III, 2700 Sterick Building, Memphis, TN 38103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from Memphis, TN, to points in KS and MO. (Hearing site: Memphis, TN.)

No. MC 82842 (Sub-No. 223F), filed March 2, 1978. Applicant: HUNT TRANSPORTATION, INC., 10770 I Street, Omaha, NE 68127. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, NE 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Plastic pipe, conduit, fittings, valves, accessories and supplies* used in the installation thereof, from points in Geneva County, AL to points in AZ, CA, CO, IA, ID, KS, MO, NE, NM, OK, TX, UT, and WY; and (2) *Materials, equipment and supplies* used in the manufacture and distribution of the commodities named in (1) above, from points in the above named States to Geneva County, AL, restricted against the transportation of commodities in bulk. (Hearing site: Atlanta, GA.)

No. MC 95540 (Sub-No. 1009F), filed March 27, 1978. Applicant: WATKINS MOTOR LINES, INC., 1144 West Griffin Road, P.O. Box 1636, Lakeland, FL 33802. Applicant's representative: Benjy W. Fincher, 1144 West Griffin Road, P.O. Box 1636, Lakeland, FL 33802. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products, and articles* distributed by meat packinghouses, as described in section A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from Chicago, IL, to Jackson, MS. (Hearing site: Chicago, IL, or Washington, DC.)

NOTE.—Common control may be involved.

No. MC 95876 (Sub-No. 233F), filed March 27, 1978. Applicant: ANDERSON TRUCKING SERVICE, INC., 203 Cooper Avenue North, St. Cloud, MN 56301. Applicant's representative: Robert S. Lee, 1000 First National Bank Building, Minneapolis, MN 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hardwood flooring, hardwood flooring systems and accessories therefore*, from Dollar Bay, MI, to points in CT, DE, IL, IA, KS, KY, ME, MD, MA, MI, MO, NH, NJ, IN, NY, OH, OK, PA, RI, TX, VT, VA, WV, and WI. (Hearing site: Chicago, IL.)

NOTE.—Common control may be involved.

No. MC 99749 (Sub-No. 5F), filed March 27, 1978. Applicant: BOURNE'S TRANS., INC., 1254 Belmont Street, Brockton, MA 02401. Applicant's representative: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th Street NW., Washington, DC 20004. Authority sought to operate in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: *Boots and shoes and boot and shoe factory supplies, materials, and equipment*, used in the manufacture of footwear (except commodities in bulk and those requiring special equipment), (a) from Windsor, VT, and points in ME and NH, to facilities used by Consolidator's Warehouse, Inc., in Brockton, MA; and (b) from Brockton, MA to points in ME and NH. (Hearing site: None specified.)

No. MC 100666 (Sub-No. 388F), filed March 27, 1978. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, LA 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Building, Oklahoma City, OK 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Copper articles*, from Pulaski, TN to points in the United States in and east of CO, NE, ND, OK, SD, and TX; and (2) *scrap copper*, from points in and east of CO, NE, ND, OK, SD, and TX to Pulaski, TN. (Hearing site: Nashville, TN.)

No. MC 100666 (Sub-No. 389F), filed March 27, 1978. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, LA 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Building, Oklahoma City, OK 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Metal and metal articles*, between points in AR, KS, LA, OK, TN, and TX in a nonradial movement. (Hearing site: Dallas, TX.)

No. MC 103051 (Sub-No. 437F), filed April 3, 1978. Applicant: FLEET TRANSPORT CO., INC., 934—44th Avenue, North, Nashville, TN 37209.

V 4 3 | 9 7

Applicant's representative: Russell E. Stone, P.O. Box 90408, Nashville, TN 37209. Authority sought to operate as a *common carrier*, over irregular routes, by motor vehicle, transporting: *Vegetable oils and vegetable oil products*, in bulk, in tank vehicles, between points in NC, SC and VA, on the one hand, and, on the other, points in the United States in and east of ND, SD, NE, KS, OK, and TX. [Notice No. 43]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment re-

V 43 | 97

sulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before June 19, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77625, filed April 10, 1978. Transferee: ZIRKEL TRUCKING, INC., 118 West 19th Street, P.O. Box 1090, Fort Scott, KS 66701. Transferor: J. H. Ware Trucking Inc., 909 Brown Street, P.O. Box 398, Fulton, MO 65251. Applicant's representative: Larry D. Knox, 600 Hubbell Building, Des Moines, IA 50309. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC 139973 (Sub-No. 11), issued April 28, 1978, as follows: *Iron and steel articles* (except commodities the transportation of which because of their size or weight require the use of special equipment), from the facilities of Keystone Steel & Wire Division, Keystone Consolidated Industries, Inc., at or near Peoria, IL, to points in NE, UT, ID, CA, AZ, OR and WA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77629, filed April 14, 1978. Transferee: PITTSBURGH-FAYETTE EXPRESS, INC., 1101 Dormont Avenue, Pittsburgh, PA 15216. Transferor: Pittsburgh-Brownsville Express, Inc. (Debtor-in-Possession), P.O. Box 716, Connellsville, PA 15425. Applicant's representative: Stanley E. Levine, Attorney at Law, 2310 Grant Building, Pittsburgh, PA 15219. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates No. MC 4242 and MC 4242 (Sub-No. 6) and Certificate of Registration No. MC 4242 (Sub-No. 5), issued July 27, 1965, September 8, 1965, and July 27, 1965, respectively as follows: *General commodities* between specified points in PA. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under section 210a(b).

No. MC-FC-77639, filed April 21, 1978. Transferee: SOUTHWEST DELIVERY SERVICE, INC., 4423 South Hawthorne Avenue, Los Angeles, CA 90058. Transferor: Astor Truck-Rite, Inc., 4423 South Hawthorne Avenue, Los Angeles, CA 90058. Applicant's representative: Barry Kiek, P.O. Box 58303, Los Angeles, CA 90058. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC 120961 (Sub-No. 1), issued February 11, 1964, as follows: *General commodities* with exceptions between points in the specified Los Angeles, CA basin region. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77642, filed April 26, 1978. Transferee: EQUIPMENT EXPRESS LTD., 8105 Don Mills Road, Markham, Ontario, Canada L3R 2P1. Transferor: Barney Kosofsky, d.b.a. Barney's Cartage Co., 23300 Providence Drive, Southfield, MI 48076. Applicants' representatives: Thomas E. Acey, Jr., Attorney for Equipment Express Ltd., Suite 1000, 1660 L Street NW., Washington, DC 20036; Ronald J. Mastej, Attorney for Possessor, 900 Guardian Building, Detroit, MI 48226; Wallace M. Handler, Attorney for Trustee in Bankruptcy, 1800 Travelers Tower, 26555 Evergreen Road, Southfield, MI 48076; Stanley Weingarden, Attorney for Barney's Cartage Co., 1100 Fisher Building, Detroit, MI 48202. Authority sought for purchase by transferee of a portion of the operating rights of transferor as set forth in Certificate No. MC 82951, issued by the Commission August 7, 1944, as follows: *Heavy machinery and boilers*, and the following dismantled, commodities: *Machinery, electrical equipment, contractors equipment, and store, office, factory, hospital, art gallery and museum fixtures, and equipment*, over irregular routes, between points and places in the Lower Peninsula of MI. Transferee holds no authority from this Commission. Application has been filed for temporary authority under section 210a(b).

No. MC-FC-77647, filed May 1, 1978. Transferee: B.G.M. TRUCKING, INC., 12634 East Freeway, Houston, TX 77015. Transferor: Mims Meat Co., Inc., 12634 East Freeway, Houston, TX 77015. Applicant's representative: Timothy Mashburn, Attorney at Law, P.O. Box 2207, 1806 Rio Grande, Austin, TX 78768. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 143066, issued March 3, 1978, as follows: (1) *Bananas*, and (2) *agricultural commodities* otherwise exempt from economic regulation under section 203(b)(6) of the Interstate Commerce Act, when transported in mixed loads with bananas, from Galveston, TX, Gulfport, MS, and Mobile, AL, to points in ID, OR, and WA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

[Notice No. 77]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 12, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 16903 (Sub-No. 56TA), filed April 17, 1978. Applicant: MOON FREIGHT LINES, INC., P.O. Box 1275, 120 W. Grimes Lane, Bloomington, IN 47401. Applicant's representative: Donald W. Smith, Suite 945, 9000 Keystone Crossing, Indianapolis, IN 46240. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roof insulation*, from the facilities of The Celotex Corp. at Elizabethtown, KY, to points in CT, ME, MA, RI, NH, and VT, for 120 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The Celotex Corp., 1500 North Dale Mabry, Tampa, FL 33607. Send protests to: Beverly J. Williams, Transportation Assistant, Interstate Commerce Commission, Federal Building and U.S. Courthouse, 46 East Ohio Street, Room 429, Indianapolis, IN 46204.

No. MC 28088 (Sub-No. 35TA), filed April 17, 1978. Applicant: NORTH & SOUTH LINES, INC., 2710 S. Main Street, P.O. Box 49, Harrisonburg, VA 22801. Applicant's representative: John R. Sims, Jr., 915 Pennsylvania Bldg., 425 13th St. NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, between the facilities of Pet, Inc., at Frankfort, MI on the one hand and, on the other, its facilities of Allentown and Chambersburg, PA, for 180 days. Supporting shipper(s): Pet, Inc., St. Louis, MO 63166. Send protests to: Interstate Commerce Commission, Bureau of Operations, P.O. Box 210, Roanoke, VA 24011.

No tack or interline. Supporting shipper(s): Atlanta Corp., 17 Varick Street, New York, NY 10013. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 721 19th Street, 492 U.S. Customs House, Denver, CO 80202.

No. MC 140033 (Sub-No. 47TA), filed April 6, 1978. Applicant: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, TX 75220. Applicant's representative: E. Larry Wells, Winkle and Wells, Suite 1125, Exchange Park, P.O. Box 45538, Dallas, TX 75245. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the Report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk, in tank vehicles), from Mansfield, TX, to points in AZ, CA, FL, ID, IL, NV, NJ, OR, PA, UT, VA, and WA and Kansas City, MO for 180 days. Supporting shipper(s): Portion-Trol Foods, Inc., 812 South Fifth Avenue, Mansfield, TX 76063. Send protests to: Opal M. Jones, Transportation Assistant, Interstate Commerce Commission, 1100 Commerce Street, Room 13C12, Dallas, TX 75242.

No. MC 140581 (Sub-No. 27TA), filed April 7, 1978. Applicant: TOMMY HAGWOOD, d.b.a. HAGWOOD ENTERPRISES, Route 1, Box 222-A, Trafford, AL 35172. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Boulevard, P.O. Box 1240, Arlington, VA 22210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used motor vehicles*, in truckaway service, between Los Angeles, CA, and points within its commercial zone, on the one hand, and, on the other, points in OH, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Southwest Motor Car Co., 8850 Wilshire Boulevard, Beverly Hills, CA 90210. Send protests to: Mabel E. Holston, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, Room 1616, 2121 Building, Birmingham, AL 35203.

No. MC 141938 (Sub-No. 3TA), filed April 1, 1978. Applicant: S & S TRUCKING & WAREHOUSING, INC., 7100 Northwest 12th Street, Miami, FL 33126. Applicant's representative: John P. Bond, 2766 Douglas Road, Miami, FL 33133. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk, classes A and B explosives, household goods, as defined by the Commission, commodities requiring special handling and cement), between points in Dade County, FL, all shipments having a prior or subsequent movement by water, under a continuing contract, or contracts, with Foreign Forwarding, Inc., for 180 days. There is no evenironmental impact involved in this application. Supporting shipper(s): Foreign Forwarding, Inc., 6501 Northwest 36th Street, Suite 440, Miami, FL 33166. Send protests to: Donna M. Jones, Transportation Assistant, Interstate Commerce Commission, Monterey Building, Suite 101, 8410 Northwest 53rd Terrace, Miami, FL 33166.

No. MC 142848 (Sub-No. 6TA), filed April 6, 1978. Applicant: JAMES R. POSHARD & SON, INC., P.O. Box 69, Mt Vernon, IN 47620. Applicant's representative: Norman R. Garvin, 815 Merchants Bank Bldg., Indianapolis, IN 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer* (in bulk, in dump vehicles), (1) from the Southwind Maritime Centre, located at or near Mt. Vernon, Posey County, IN, to points in IL, IN, and KY, and (2) from Vincennes, IN, to points in IL and KY, restricted to traffic which has either: (1) an immediate prior movement by water or rail, or (2) which originates at and is destined to the above points, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Triple T, Inc., R.R. 1, Vincennes, IN 47591. Send protests to: Beverly J. Williams, Transportation Assistant, Interstate Commerce Commission, Federal Building and U.S. Courthouse, 46 East Ohio Street, Room 429, Indianapolis, IN 46204.

No. MC 143552 (Sub-No. 1TA), filed April 17, 1978. Applicant: CELEWEND ASSOCIATES, INC., 1 Whitfield Street, Caldwell, NJ 07006. Applicant's representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. Authority sought to operate as a *contract carrier*, by motor vehicles, over irregular routes, transporting: (1) *Steel strapping and strapping machinery and parts thereof*, from Woodside, NY; New Britain, CT; Pittsburgh, CA, to points in the United States (except AK and HI; (2) *materials, equipment, and supplies* used in the manufacture and sale of the commodities in (1) (except commodities in bulk), from points in the United States (except AK and HI), to Woodside, NY; New Britain, CT; Pittsburgh, CA, under a continuing contract, or contracts, with Delta Strapping Industries, for 180 days. Supporting shipper(s): Delta Strapping Industries, 58-50 52nd Street, Woodside, NY 11377. Send protests to: Joel Morrows, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 9 Clinton Street, Newark, NJ 07102.

No. MC 144261 (Sub-No. 1TA), filed April 17, 1978. Applicant: JULIUS KOLESAR, INC., 135 Brownway, Benton Harbor, MI 49022. Applicant's representative: Barry Kolesar, 135 Brownway, Benton Harbor, MI 49022. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs, frozen meats, frozen vegetables, pasta products, and pallets*, between Napoleon, OH, and Camden, NJ; from Clayton, DE, and Philadelphia, PA, to Napoleon, OH, under a continuing contract, or contracts with Campbell Soup Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Campbell Soup Co., Campbell Place, Camden, NJ 08101. Send protests to: C. R. Flemming, District Supervisor, Bureau of Operations, 225 Federal Building, Lansing, MI 48933.

No. MC 144347 (Sub-No. 2TA), filed March 27, 1978. Applicant: B & L TRUCK LINES, INC., 339 East 34th Street, Lubbock, TX 79404. Applicant's representative: Richard Hubbert, P.O. Box 10236, Lubbock, TX 79408. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: *Plastic pipe and fittings, and materials* used in the installation of plastic pipe, from the plantsite of Johns-Manville Sales Corp., at or near Wilton, IA, to AR, LA, MS, OK, and TX, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Johns-Manville Sales Corp., 2222 Kensington Court, Oak Brook, IL 60521. Send protests to: Haskell E. Ballard, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Box H-4395, Herring Plaza, Amarillo, TX 79101.

No. MC 144522 (Sub-No. 1TA), filed April 6, 1978. Applicant: PETERSEN & FOGO, INC., Route 1, Box 22, Byron, NE 68325. Applicant's representative: Gailyn L. Larsen, Box 81849, Lincoln, NE 68501. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: *Metal buildings*, knocked down and in sections, *building sections and building panels, metal prefabricated components, and parts, materials, supplies* used in the construction of metal buildings, from the facilities of Superior Manufacturing Co., at or near Mattoon, IL, and the facilities of Soukup Manufacturing Co., at or near Sheffield, IA, to points in KS and NE, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Don's Agri Service, Don Gunn, President, P.O. Box 38, Superior, NE 68978. Send protests to: Max H. Johnston, District Supervisor, 285 Federal Building and Court House, 100 Centennial Mall North, Lincoln, NE 68508.

No. MC 144532 (Sub-No. 1TA), filed April 6, 1978. Applicant: ANDERSON POTATO CO., INC., 2179 Route 112, Medford, NY 11763. Applicant's representative: John L. Alfano, Alfano & Alfano, 550 Mamaroneck Avenue, Harrison, NY 10528. Authority sought to operate as a *contract carrier* by motor vehicle, over irregular routes, transporting: *Bakery products and such ingredients* used in the production of bakery products, between Bay Shore, NY, on the one hand, and, on the other, Miami, FL, and points in MI, restricted to commodities transported in vehicles equipped with mechanical refrigeration, under a continuing contract, or contracts, with Entenmann's Bakery, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Entenmann's Bakery, Inc., 1724 Fifth Avenue, Bay Shore, NY 11706. Send protests to: Maria B. Kejss, Transportation Assistant, Interstate Commerce Commission, 26 Federal Plaza, New York, NY 10007.

No. MC 144569TA, filed April 5, 1978. Applicant: RANDALL A. WARD, d.b.a. SWEETFINGERS FRUIT & PRODUCE, P.O. Box 9134, Yakima, WA 98909. Applicant's representative: Randall A. Ward or Mary M. Ward, Rt. 3, Box 657A, No. 35, Yakima, WA 98901. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Office furniture, i.e., desks, tables, study carrels, (library desk), chairs, stools, table tops, table legs, flat benches, sewing tables, sewing desks, and related items*, from the facilities of Northwest Sales Corp., Missoula, MT, to all points in States of MT, ID, WA, OR, CA, NV, UT, CO, and WY, under a continuing contract, or contracts, with Northwest Sales & Manufacturing Corp., for 180 days. Supporting Shipper(s): Northwest Sales & Mfg., Corp., P.O. Box 7427, Missoula, MT 59807. Send protests to: R. V. Dubay, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 114 Pioneer Courthouse, Portland, OR 97204.

No. MC 144597TA, filed April 7, 1978. Applicant: BMW INTERSTATE, INC., 6028 Ellison Road, Fort Wayne, IN 46804. Applicant's representative: James M. Prickett, Third Floor, Lincoln Bank Tower, Fort Wayne, IN 46802. [Volume No. 91]

PETITIONS FOR MODIFICATION, INTERPRETATION OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

May 12, 1978.

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

All pleadings and documents must clearly specify the suffix (e.g. M1 F, M2 F) numbers where the docket is so identified in this notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this notice. Such protests shall comply with Special Rule 247(e) of the Commission's General Rules of Practice (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

No. MC 108460 (Sub-Nos. 20 and 42) (M1F) (Notice of filing of a petition to renew certificated authority), filed April 17, 1978. Petitioner: PETROLEUM CARRIERS CO., a corporation, P.O. Box 762, 5104 W. 14th Street, Sioux Falls, SD 57101. Petitioner's representative: Gary Mundhenke, (Same address as petitioner). Petitioner seeks to renew motor *common carrier* certificates in No. MC 108460 (Sub-Nos. 20 and 42), issued November 22, 1972 and April 27, 1970, respectively. In No. MC 108460 (Sub-No. 20), which expired March 31, 1977, service was authorized to transport, *Liquefied petroleum gas*, over irregular routes, (1) from the terminal facilities of the Mid-American Pipeline Co. at or near Mankato, MN, to points in IA, ND, SD; and (2) from Aberdeen, SD, (except the terminal facilities of the Kaneb Pipe Line Co.), to points in ND and MN; and in No. MC 108460 (Sub-No. 42) which expired April 27, 1975, service was authorized to transport *Liquefied petroleum gas*, in bulk, in tank vehicles, over irregular routes, from the storage facilities of Farmers Union Central Exchange, Inc., at Glenwood, MN, to points in ND and SD. By the instant petition, petitioner seeks to reinstate the above certificates.

No. MC 113678 (Sub-No. 331) (M1F) (Notice of filing of a petition to modify a certificate by adding a facility), filed March 20, 1978. Petitioner: CURTIS, INC., 4810 Pontiac Street, Commerce City, CO 80022. Petitioner's representative: Gailyn L. Larsen, 521 South 14th Street, P.O. Box 81849, Lincoln, NE 68501. Petitioner holds a motor *common carrier* certificate in No. MC 113678 (Sub-No. 331), issued July 9, 1973, authorizing transportation, over irregular routes, of: *Meats, meat products*, and *meat by-products*, and *articles distributed by meat packinghouses*, as described in sections A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61MCC 209 and 766 (except hides and skins and commodities in bulk), from Wichita, KS, to points in NY, NJ, PA, MD, MA, RI, CT, DE, VA, OH, KY, TN (except Memphis, TN, and points within its commercial zone, as defined by the Commission), CO, UT, and NV. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the facilities of Dubuque Packing Co., Inc., located at or near Wichita, KS. By the instant petition, petitioner seeks to modify the restriction to read: The operations authorized herein are restricted to the transportation of traffic originating at the facilities of Dubuque Packing Co., Inc., and Sunflower Beef, Inc., located at or near Wichita, KS.

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

No. MC 114552 (Sub-Nos. 75 and E-2) (M1F) (Notice of filing of a petition to modify commodity description), filed March 9, 1978. Petitioner: SENN TRUCKING CO., a corporation, P.O. Drawer 220, Newberry, SC 29108. Petitioner's representative: William P. Jackson, Jr., 3426 North Washington Boulevard, P.O. Box 1240, Arlington, VA 22210. Petitioner holds a motor *common carrier* certificate in No. MC 114552 (Sub-No. 75), issued March 22, 1974; and a letter notice in No. MC 114552 (Sub-No. E-2), published August 15, 1974. No. MC 114552 (Sub-No. 75) authorizes transportation, over irregular routes, of *Plywood and composition board*, from Camden, NJ, to points in VA, NC, SC, and GA. No. MC 114552 (Sub-No. E-2) authorizes transportation, over irregular routes, as pertinent, of (1) *Composition board*, from Camden, NJ, to points in TN, and points in KY on, west, and south of a line beginning at the IN-KY State line and extending along U.S. Hwy 150 to its intersection with U.S. Hwy 25, then along U.S. Hwy 25 to its intersection with U.S. Hwy 25E, and then along U.S. Hwy 25E to the KY-TN State line, restricted against the transportation of commodities in bulk; and (2) *Composition board and plywood*, from Camden, NJ to points in FL, AL, MS, AR, LA, and TX. By the instant petition, petitioner seeks to add insulation and insulation materials, and materials, equipment and supplies used in the installation or distribution of insulation and insulation materials (except in bulk), to each of the above commodity descriptions.

No. MC 119789 (Sub-No. 252) (M2F) (Notice of filing of a petition to modify certificate by adding origin point), filed March 24, 1978. Petitioner: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, TX 75222. Petitioner's representative: James K. Newbold, Jr. (same address as applicant). Petitioner holds a motor *common carrier* certificate in No. MC 119789 (Sub-No. 252), issued March 21, 1978, authorizing transportation, over irregular routes, of *Electrical equipment and parts* (except new household appliances), from West Union and Pickens, SC, to Kansas City, KS, and points in AZ, AR, CA, CO, ID, IN, MN, MS, MO, MT, NM, OK, OR, TX, UT, WA, WI, and WY. By the instant petition, petitioner seeks to add the origin point of Westminster, SC.

No. MC 138438 (Sub-No. 4) (M1F) (Notice of filing of a petition to modify a certificate by deleting restrictions), filed March 3, 1978. Petitioner: D. M. BOWMAN, INC., 15 East Oak Ridge Drive, Route 9, Box 26, Hagerstown, MD 21740. Petitioner's representative: Charles E. Creager, 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, MD 21740. Petitioner holds a motor *common carrier* certificate in No. MC 138438 (Sub-No. 4), issued February 2, 1976, authorizing transportation, over irregular routes, of: (1) *Plastic pipe, conduit, couplings, fittings, and accessories* necessary for the installation of the foregoing commodities, in vehicles equipped with mechanical unloading devices (except commodities in bulk), from the facilities of Certain-Teed Products Corp., Williamsport, MD, to points in CT, DE, IL, IN, KY, ME, MA, MI, NH, NJ, NY, NC, OH, PA, RI, SC, TN, VT, WV, and DC; and (2) *Vinyl siding and accessories* necessary for the installation of vinyl siding, in vehicles equipped with mechanical unloading devices, from the facilities of Certain-Teed Products Corp. at Williamsport, MD, to points in CT, DE, IN, KY, ME, MA, MI, NH, NJ, NY, NC, OH, PA, RI, SC, TN, VT, VA, WV, and DC. By the instant petition, petitioner seeks to eliminate the restriction in (1) and (2) above which reads: in vehicles equipped with mechanical unloading devices.

No. MC 142906 (Sub-No. 1) (M1F) (Notice of filing of a petition to modify a permit by adding two contracting shippers), filed February 6, 1978. Petitioner: SUNWARD TRUCKING, INC., 808 South 14th, Worland, WY 82401. Petitioner's representative: Calvin A. Calton, Suite 201 Hedden Empire Building, 208 North 29th Street, Billings, MT 59101. Petitioner holds a motor *contract carrier* permit in No. MC 142906 (Sub-No. 1), issued March 17, 1978, authorizing transportation over irregular routes, of: (1) *Unassembled steel buildings* and *component parts of steel buildings*, from Jamestown, ND, to points in the United States (except AK, HI); and (2) *Materials* and *supplies* used in the manufacture of steel buildings, from points in the United States (except AK, HI), to Jamestown, ND. Restriction: The authority granted herein is limited to a transportation service to be performed under a continuing contract or contracts with Marvel Brute Steel Buildings, Inc., at Jamestown, ND. By the instant petition, petitioner seeks to add (a) Sunward Corp. of Jamestown, ND; and (b) Sunward International Marketing Corp. of Denver, CO as additional shippers.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. All pleadings and documents must clearly specify the "F" suffix where the docket is so identified in this notice. Such pleading shall comply with Special Rule 247(e) of the Commission's General Rules of Practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

No. MC 114457 (Sub-No. 297), (Republication), filed March 18, 1977, published in the FEDERAL REGISTER issue of May 12, 1977, and republished this issue. Applicant: DART TRANSIT CO., a corporation, 2102 University Avenue, St. Paul, MN 55114. Applicant's representative: James H. Wills, (Same address as applicant). An Order of the Commission, by the initial decision, served December 23, 1977, effective February 24, 1978, finds that the present and future public convenience and necessity require operation, by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned and preserved foodstuffs*, (except dairy products, frozen foodstuffs and commodities in bulk), from the facilities of Geo. A. Hormel & Co., at Austin, MN, and the facilities of Midwest Foods Corp., at Owatonna, MN, to points in AR and OK, restricted to traffic originating at the named facilities at Austin and Owatonna, MN, and destined to points in AR and OK; that applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. The purpose of this republication is to indicate the broadening of the commodity description, and the addition of a restriction.

No. MC 135231 (Sub-No. 25) (Republication), filed May 26, 1977, published in the FEDERAL REGISTER issue of July 21, 1977, and republished this issue. Applicant: NORTH STAR TRANSPORT, INC., Route 1, Hwys. 1 and 59 West, Thief River Falls, MN 56701. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, MN 55118. An Order of the Commission, by the initial decision, served November 29, 1977, effective January 24, 1978, finds that the present and future public convenience and necessity require operation, by applicant, in interstate or foreign commerce, as a

V 43 | 97

common carrier, by motor vehicle, over irregular routes, transporting: *Snowmobiles, parts and accessories thereof*, from Lancaster County, NE, to points in the United States (except AL and HI), including ports of entry between the United States and Canada, located in WA, ID, MT, ND, MN, MI, and NY, restricted to traffic originating at facilities utilized by Kawasaki Motors Corp., U.S.A., at the named origins; that applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. The purpose of this republication is to modify the commodity and territorial description.

No. MC 140786 (Sub-No. 2) (2nd Republication), filed January 21, 1977, published in the FEDERAL REGISTER issue of March 10, 1977; republished as corrected June 30, 1977, and republished this issue. Applicant: THE UNITED STATES CARGO & COURIER SERVICE INC., P.O. Box 1169, Columbus, OH 43216. Applicant's representative: Boyd B. Ferris, 50 West Broad Street, Columbus, OH 43215. An Order of the Commission, by the initial decision, served February 9, 1978, effective March 28, 1978, finds that the present and future public convenience and necessity require operation, by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Mining machinery parts, and equipment and supplies* used in the manufacture or repair of mining machinery, between Columbus, OH, and points in AL, AR, CO, GA, IL, IN, KY, MI, NJ, NC, ND, PA, SC, TN, UT, VA, WV, and WY, in non-radial movement, under a continuing contract, or contracts, with Jeffrey Mining Machinery Co., a division of Dresser Industries, Inc., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate that an appropriate permit will be issued, subject to the condition or prior or coincidental cancellation, at applicant's request, if its contract carrier authority held under No. MC 140786 (Sub-No. 1).

No. MC 142977 (Republication) (Correction), filed February 22, 1977, published in the FEDERAL REGISTER issues of April 21, 1977, and April 13, 1978, and republished this issue. Applicant: HOOSIER FREIGHT LINES, INC., 4906 Imperial Court, Louisville, KY 40216. Applicant's representative: James K. Stayton, 216 Atkinson Square, Louisville, KY 40218. An Order of the Commission, Review Board No. 1, decided February 13, 1978, and served February 17, 1978, finds that the present and future public convenience and necessity require operations by applicant in interestate or foreign commerce as a *common carrier*, over regular routes, in the transportation of *general commodities*, (except household goods, commodities in tank vehicles, commodities requiring special handling because of size and weight, building and excavating contractors and mining machinery and equipment, and road building equipment and machinery): Between Pekin, IN, and Louisville, KY, with service to and from the intermediate point to Borden, IN, (1) from Pekin over IN Hwy 60 to junction of Interstate Hwy 65, then over Interstate Hwy 65 to Louisville, and return over the same route; (2) from Pekin over IN Hwy 60 to junction U.S. Hwy 31E (also portion of Interstate Hwy 65), then over U.S. Hwy 31E (also portion of Interstate Hwy 65), to Louisville, and return over the same route, as an alternate route for operating convenience only; and (3) from Pekin over Interestate Hwy 60 to the junction of Interstate Hwy 65, then over Interstate Hwy 65 to junction Interstate Hwy 264, then over Interstate Hwy 264 to junction Interstate Hwy 64, then over Interstate Hwy 64 to Louisville, and return over the same route, as an alternate route for operating convenience only, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the rephrasal of the commodity description; the redescribed proposed routes (1) an (2); and the elimination of proposed route (3).

NOTE.—The purpose of this correction is to indicate the addition of "the rephrasal of the commodity description," which was inadvertently omitted.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

The following applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use a such authority to provide all or part of the service proposed), and shall specify with particularly the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protest not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if not representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(e)(4) of the special rules, and shall include this certification required therin.

Section 247(f) further provides, in part, that an applicant who does not intent timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing. Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC1936 (Sub-No. 45F), filed March 29, 1978. Applicant: B & P MOTOR EXPRESS, INC., 720 Gross Street, Pittsburgh, PA 15224. Applicant's representative: John A. Vuono, 2310 Grant Building, Pittsburgh, PA 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: General commodities (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment):

(1) Between Mansfield, OH, and East Liverpool, OH: From Mansfield, over OH Hwy 39 to East Liverpool, and return over the same route.

(2) Between Mansfield, OH, and Conneaut, OH: From Mansfield, over U.S. Hwy 42 to Cleveland, OH, then over U.S. Hwy 20 to Conneaut, OH, and return over the same route.

MAY 18 78 UMI

(3) Between Mansfield, OH, and Port Clinton, OH: From Mansfield, over OH Hwy 39 to Shelby, OH, then over OH Hwy 61 to Norwalk, OH, then over U.S. Hwy 250 to Sandusky, OH, then over OH Hwy 2 to Port Clinton, OH, and return over the same route.

(4) Between Mansfield, OH, and Toledo, OH: From Mansfield, OH, over U.S. Hwy 30 to Upper Sandusky, OH, then over U.S. Hwy 23 to Toledo, OH, and return over the same route.

(5) Between Mansfield, OH, and the OH-IN State line: From Mansfield, OH, over U.S. Hwy 30 to the OH-IN State line, and return over the same route.

(6) Between Mansfield, OH, and the OH-MI State line: From Mansfield, OH, over U.S. Hwy 30 to its junction with OH Hwy 65, then over OH Hwy 65 to Ottawa, OH, then over OH Hwy 15 to its junction with OH Hwy 108, and then over OH Hwy 108 to the OH-MI State line, and return over the same route.

(7) Between Mansfield, OH, and the OH-MI State line: From Mansfield, OH, over U.S. Hwy 30 to Delphos, OH, then over OH Hwy 66 to Defiance, OH, then over OH Hwy 15 to its junction with U.S. Hwy 127, and then over U.S. Hwy 127 to the OH-MI State line, and return over the same route.

(8) Between Mansfield, OH, and Bridgeport, OH: From Mansfield, OH, over OH Hwy 39 to New Philadelphia, OH, and then over U.S. Hwy 250 to Bridgeport, OH, and return over the same route.

(9) Between Mansfield, OH, and Ironton, OH: From Mansfield, OH, over OH Hwy 13 to New Lexington, OH, and then over OH Hwy 93 to Ironton, OH, and return over the same route.

(10) Between Mansfield, OH, and the OH-IN State line: From Mansfield, OH, over OH Hwy 309 to Lima, OH, and then over OH Hwy 81 to the OH-IN State line, and return over the same route.

(11) Between Mansfield, OH, and Portsmouth, OH: From Mansfield, OH, over U.S. Hwy 42 to Delaware, OH, and then over U.S. Hwy 23 to Portsmouth, OH, and return over the same route.

(12) Between Cincinnati, OH, and the OH-MI State line: From Cincinnati, OH, over U.S. Hwy 127 to the OH-MI State line, and return over the same route.

(13) Between Cincinnati, OH, and Toledo, OH: From Cincinnati, OH, over Interstate Hwy 75 to Toledo, OH, and return over the same route.

(14) Between Cincinnati, OH, and Toledo, OH: From Cincinnati, OH, over U.S. Hwy 42 to Xenia, OH, then over U.S. Hwy 68 to Findlay, OH, and then over Interstate Hwy 75 to Toledo, OH, and return over the same route.

(15) Between Cincinnati, OH, and Sandusky, OH: From Cincinnati, OH, over OH Hwy 4 to Sandusky, OH, and return over the same route.

(16) Between Cincinnati, OH, and the OH-PA State line: From Cincinnati, OH, over Interstate Hwy 71 to its junction with U.S. Hwy 62, and then over U.S. Hwy 62 to the OH-PA State line, and return over the same route.

(17) Between Cincinnati, OH, and Steubenville, OH: From Cincinnati, OH, over U.S. Hwy 22 to Steubenville, OH, and return over the same route.

(18) Between Cincinnati, OH, and Bridgeport, OH: From Cincinnati, OH, over Interstate Hwy 71 to its junction with U.S. Hwy 40, and then over U.S. Hwy 40 to Bridgeport, OH, and return over the same route.

(19) Between Cincinnati, OH, and Belpre, OH: From Cincinnati, OH, over U.S. Hwy 50 to Belpre, OH, and return over the same route.

(20) Between Cincinnati, OH, and the OH-WV State line: From Cincinnati, OH, over U.S. Hwy 52 to the OH-WV State line, and return over the same route.

(21) Between Dayton, OH, and Columbus, OH: From Dayton, OH, over OH Hwy 4 to its junction with U.S. Hwy 40, and then over U.S. Hwy 40 to Columbus, OH, and return over the same route.

(22) Between Mansfield, OH, and Pomeroy, OH: From Mansfield, OH, over OH Hwy 13 to Mt. Vernon, OH, then over OH Hwy 661 to Granville, OH, then over OH, then over OH Hwy 37 to Lancaster, OH, and then over U.S. Hwy 33 to Pomeroy, OH, and return over the same route.

(23) Between Mansfield, OH, and Cincinnati, OH: From Mansfield, OH, over U.S. Hwy 42 to Cincinnati, OH, and return over the same route.

(24) Between Mansfield, OH, and the OH-IN State line: From Mansfield, OH, over U.S. Hwy 42 to Delaware, OH, then over U.S. Hwy 36 to Marysville, OH, then over OH Hwy 4 to Dayton, OH, and then over U.S. Hwy 35 to the OH-IN State line, and return over the same route.

(25) Between Mansfield, OH, and the OH-KY State line: From Mansfield, OH, over U.S. Hwy 42 to Delaware, OH, then over U.S. Hwy 23 to Columbus, OH, and then over U.S. Hwy 62 to the OH-KY State line, and return over the same route.

(26) Between Mansfield, OH, and the OH-IN State line: From Mansfield, OH, over OH Hwy 309 to Marion, OH, then over OH Hwy 4 to its junction with OH Hwy 47 and then over OH Hwy 47 to the OH-IN State line, and return over the same route.

(27) Between Mansfield, OH, and Marietta, OH: From Mansfield, OH, over OH Hwy 13 to Mt. Vernon, OH, then over U.S. Hwy 36 to Warsaw, OH, and then over U.S. Hwy 60 to Marietta, OH, and return over the same route.

(28) Between Dayton, OH, and Gallipolis, OH: From Dayton, OH, over U.S. Hwy 35 to Gallipolis, OH, and return over the same route.

(29) Between Kenton, OH, and McConnelsville, OH: From Kenton, OH, over OH Hwy 31 to Marysville, OH, then over U.S. Hwy 33 to its junction with OH Hwy 37, and then over OH Kwy 37 to McConnelsville, OH, and return over the same route.

(30) Between Springfield, OH, and the OH-IN State line: From Springfield, OH, over U.S. Hwy 40 to the OH-IN State line, and return over the same route.

(31) Between Toledo, OH, and Columbus, OH: From Toledo, OH, over U.S. Hwy 23 to Columbus, OH, and return over the same route.

(32) Between Cleveland, OH, and Columbus, OH: From Cleveland, OH, over Interstate Hwy 71 to Columbus, OH, and return over the same route. From Cleveland, OH, over OH Hwy 3 to Columbus, OH, and return over the same route.

(33) Between Cleveland, OH, and the junction of Interstate Hwy 77 and U.S. Hwy 36: From Cleveland, OH, over Interstate Hwy 77 to its junction with U.S. Hwy 36, and return over the same route.

(34) Between Conneaut, OH, and Proctorville, OH: From Conneaut, OH, over OH Hwy 7 to Proctorville, OH, and return over the same route.

(35) Between Ashtabula, OH, and Cadiz, OH: From Ashtabula, OH, over OH Hwy 46 to its junction with OH Hwy 82, then over OH Hwy 82 to its junction with OH Hwy 45, then over OH Hwy 45 to its junction with OH Hwy 9, and then over OH Hwy 9 to Cadiz, OH, and return over the same route.

(36) Between Steubenville, OH, and Canton, OH: From Steubenville, OH, over U.S. Hwy 22 to its junction with OH Hwy 43, and then over OH Hwy 43 to Canton, OH, and return over the same route.

(37) Between Dennison, OH, and Columbus, OH: From Dennison, OH, over U.S. Hwy 36 to its junction with OH Hwy 83, then over OH Hwy 83 to its junction with OH Hwy 16, and then over OH Hwy 16 to Columbus, OH, and return over the same route.

(38) Between Mansfield, OH, and Marietta, OH: From Mansfield, OH, over OH Hwy 13 to Mt. Vernon, then over U.S. Hwy 36 to its junction with Interstate Hwy 77, and then over Interstate Hwy 77 to Marietta, OH, and return over the same route.

(39) Between Mansfield, OH, and the OH-MI State line: From Mansfield, OH, over OH Hwy 13 to its junction with U.S. Hwy 224, then over U.S. Hwy 224 to Findlay, OH, and then over OH Hwy 15 to the OH-MI State line, and return over the same route.

(40) Between Mansfield, OH, and the OH-IN State line: From Mans-

V 4 3 | 9 7

field, OH, over OH Hwy 309 to Marion, OH, then over OH Hwy 4 to Hamilton, OH, and then over OH Hwy 129 to the OH-IN State line, and return over the same route.

(41) Between Mansfield, OH, and the OH-IN State line: From Mansfield, OH, over OH Hwy 309 to Kenton, OH, then over OH Hwy 67 to Wapakoneta, OH, then over U.S. Hwy 33 to its junction with OH Hwy 29, and then over OH Hwy 29 to the OH-IN State line, and return over the same route.

(42) Between Mansfield, OH, and the OH-KY State line: From Mansfield, OH, over OH Hwy 13 to its junction with Interstate Hwy 71, then over Interstate Hwy 71 to its junction with U.S. Hwy 68, and then over U.S. Hwy 68 to the OH-KY State line, and return over the same route.

(43) Between Mansfield, OH, and the OH-PA State line: From Mansfield, OH, over U.S. Hwy 30 to Wooster, OH, then over OH Hwy 3 to its junction with U.S. Hwy 224, and then over U.S. Hwy 224 to the OH-PA State line, and return over the same route.

(44) Between Mansfield, OH, and the OH-WV State line: From Mansfield, OH, over U.S. Hwy 30 to Canton, OH, and then over OH Hwy 800 to the OH-WV State line, and return over the same route.

(45) Between Mansfield, OH, and the OH-PA State line: From Mansfield, OH, over U.S. Hwy 30 to its junction with OH Hwy 44, then over OH Hwy 44 to its junction with OH Hwy 5, and then over OH Hwy 5 to the OH-PA State line, and return over the same route.

(46) Between Mansfield, OH, and East Liverpool, OH: From Mansfield, OH, over U.S. Hwy 30 to East Liverpool, OH, and return over the same route.

(47) Serving all points in OH as intermediate or off-route points in connection with carrier's regular-route operations authorized above. (Hearing site: Pittsburgh, PA, or Washington, DC.)

NOTE.—Common control may be involved. Applicant holds irregular route authority at Docket No. MC 1936 (Sub-No. 44) to serve all points in OH. The purpose of this application is to convert the irregular route authority to regular route authority.

No. MC 2229 (Sub-No. 202F), filed March 29, 1978. Applicant: RED BALL MOTOR FREIGHT, INC., 3177 Irving Boulevard, Dallas, TX 74247. Applicant's representative: Jackie Hill (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building materials and particle board*, from the plantsite of McKnight Plywood, Inc., at West Helena, AR, to points in TX, LA, MS, AL, TN, OK, KS, MO, and GA. (Hearing site: Memphis, TN, or Washington, DC.)

NOTE.—Common control may be involved.

No. MC 4405 (Sub-No. 577F), filed March 29, 1978. Applicant: DEALERS TRANSIT, INC., 522 South Boston Avenue, Tulsa, OK 74103. Applicant's representative: Alan Foss, 502 First National Bank Building, Fargo, ND 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles;* (2) *materials, equipment, and supplies* (except commodities in bulk) used in the manufacture, fabrication, and processing of iron and steel articles, between Muskogee, OK, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: Tulsa or Oklahoma City, OK.)

NOTE.—Common control may be involved.

No. MC 25869 (Sub-No. 139F), filed April 14, 1978. Applicant: NOLTE BROS. TRUCK LINE, INC., 6217 Gilmore Avenue, P.O. Box 7184, Omaha, NE 68107. Applicant's representative: Donald L. Stern, Suite 530, Univac Building, 7100 West Center Road, Omaha, NE 68106. Authority sought to operate as a motor *common carrier*, by motor vehicle, over irregular routes transporting: *Meats, meat products, meat byproducts, dairy products, and articles distributed by meat packing houses* as described in sections A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk in tank vehicles), from:

(a) Omaha, NE, to points in AL, AR, CT, FL, GA, IA, IL, IN, KS, KY, LA, MA, MD, ME, MI, MO, MS, NJ, NY, NC, OH, PA, SC, TN, VA, WV, and WI;

(b) Norfolk, NE, to points in DE, GA, IL, IN, IA, KS, KY, MD, MI, MN, MO, NJ, NC, OH, PA, SC, TN, WI, VA, and WV;

(c) St. Joseph, MO, to points in DE, GA, IL, IN, KY, MD, MI, NJ, NY, NC, OH, PA, SC, TN, WI, VA, and WV; and

(d) Oakland, IA, to points in AL, FL, GA, KY, MS, NC, SC, TN, and VA. (Hearing site: Omaha, NE.)

No. MC 26396 (Sub-No. 172F), filed March 27, 1978. Applicant: POPELKA TRUCKING CO., INC., d.b.a. THE WAGGONERS, P.O. Box 990, Livingston, MT 59047. Applicant's representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Acoustical materials and accessories*, from Plainfield, IL, to points in AL, AZ, CA, CO, FL, ID, IA, KS, OR, NV, WY, OK, MI, MO, MN, MT, NE, NM, ND, SD, TX, UT, and WA; and (2) *materials, accessories, and supplies* used in the manufacture of acoustical materials and accessories, from points in destinations named in (1) above, to the origin point named in (1) above. (Hearing site: Chicago, IL.)

No. MC 60014 (Sub-No. 83F), filed April 3, 1978. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, PA 15146. Applicant's representative: A. Charles Tell, Suite 1800, 100 East Broad Street, Columbus, OH 43215. Applicant seeks authority as a *common carrier*, over irregular routes, transporting: *Cooling towers, cooling tower parts and accessories* for such towers, *materials and supplies* used in the installation of cooling towers and heat exchangers, from the facilities of E. D. Goodfellow, Inc., located at Tulsa, OK, to points in the United States (except AK and HI). (Hearing site: Oklahoma City, OK, or Washington, D.C.)

No. MC 65802 (Sub-No. 64F), filed April 2, 1978. Applicant: LYNDEN TRANSPORT, INC., P.O. Box 433, Lynden, WA 98264. Applicant's representative: Charles H. Ruby, 5615 West Marginal Way SW., Seattle, WA 98106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Molten sulphur*, in bulk, in tank vehicles, between points in Whatcom County, WA, on the one hand, and, on the other, ports of entry on the United States-Canada international boundary at or near Blaine, Lynden, and Sumas, WA. (Hearing site: Seattle, WA.)

No. MC 95876 (Sub-No. 234F), filed April 3, 1978. Applicant: ANDERSON TRUCKING SERVICE, INC., 203 Cooper Avenue North, St. Cloud, MN 56301. Applicant's representative: Robert D. Gisvold, 1000 First National Bank Building, Minneapolis, MN 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wrought iron pipe*, from points in Beaver County and Lawrence County, PA, Mahoning County, OH, and Chippewa County, MI, to Seattle, WA. (Hearing site: Minneaplis, MN or Dallas, TX.)

NOTE.—Common control may be involved.

No. MC 100666 (Sub-No. 390F), filed March 31, 1978. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, LA 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Building, Oklahoma City, OK 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Plastic pipe and plastic products and materials and supplies* used in the manufacture thereof (except commodities in bulk and those which because of size and weight require the use of special equipment), between points in Geneva County, AL, on the one hand, and, on the other, points in the United States including AK (except HI); and, (2) *materials, equipment, and supplies* used in the manufacture, distribution or installation of commodities named in (1) above (except in bulk), from points in the United States including AK (but excluding HI), to points in Geneva County, AL. (Hearing site: Birmingham, AL.)

No. MC 100666 (Sub-No. 396F), filed April 3, 1978. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, LA 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Building, 3535 Northwest 58th Street, Oklahoma City, OK 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles* from the facilities of Tubular Steel Inc., at or near Hazelwood, MO and Staunton, IL, to points in AR, CO, KS, LA, MS, NM, OK, and TX. (Hearing site: Kansas City, MO.)

No. MC 108341 (Sub-No. 96F), filed April 3, 1978. Applicant: MOSS TRUCKING CO., INC., 3027 North Tryon Street, P.O. Box 8409, Charlotte, NC 28208. Applicant's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pre-cut log buildings, knocked down or in sections, and materials, equipment, or supplies* used in the construction and distribution of such commodities (except commodities in bulk), from the facilities of Beaver Log Homes of Florida, Inc., at or near Blountstown, FL, to points in the United States in and east of MN, IA, IL, KY, TN, and MS. (Hearing site: Panama City, FL or Washington, DC.)

NOTE.—Common control may be involved.

No. MC 109397 (Sub-No. 404F), filed March 27, 1978. Applicant: TRI-STATE MOTOR TRANSIT CO., A corporation, P.O. Box 113, Joplin, MO 64801. Applicant's representative: A. N. Jacobs (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, lumber products, and wood products*, from points in AL, FL, GA, SC, NC, AR, LA, MS, OK, TN, and TX, to points in and east of MN, IA, NE, KS, OK, and TX. (Hearing site: June 12, 1978 (1 week), at 9:30 a.m. local time at Atlanta, GA, in a hearing room to be later designated.)

NOTE.—Common control may be involved.

No. MC 111310 (Sub-No. 30F), filed April 1, 1978. Applicant: BEER TRANSIT, INC., P.O. Box 352, Black River Falls, WI 54615. Applicant's representative: Wayne W. Wilson, 150 East Gilman Street, Madison, WI 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages and related advertising materials and malt beverage dispensing equipment* from Peoria, IL, to points in WI and MN; (2) *rejected shipments and empty malt beverage containers* from points in MN and WI to Peoria, IL. (Hearing site: Madision or Milwaukee, WI.)

No. MC 114457 (Sub-No. 379F), filed April 2, 1978. Applicant: DART TRANSIT CO., a corporation, 2102 University Avenue, St. Paul, MN 55114. Applicant's representative: James C. Hardman, 33 North LaSalle Street, Chicago, IL 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers, container closures, glassware, packaging products, container components and scrap materials, and material, equipment, and supplies* used in the manufacture, sale, and distribution of the foregoing commodities (except commodities in bulk, in tank vehicles, and those which because of size and weight require the use of special equipment), between points in the United States (except AK, HI, WA, OR, ID, CA, NE, and UT), in non-radial movement. Restriction: The above authority is restricted to movements from, to or between the facilities utilized by Owens-Illinois, Inc. (Hearing site: Minneapolis, MN or Chicago, IL.)

No. MC 114608 (Sub-No. 33F), filed March 20, 1978. Applicant: CAPITAL EXPRESS, INC., 5535 Clay SW., Grand Rapids, MI 49508. Applicant's representative: Wilhelmina Boersma, 1600 First Federal Building, 1001 Woodward Avenue, Detroit, MI 48226. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Commercial and household appliances and home equipment and materials, equipment and supplies* used in the manufacture, sale, or distribution thereof (except commodities in bulk), between points in OH, IL, IN, MI, MN, TN, PA, NY, WV, KY, WI, MD, VA, MO, IA, NJ, and KS, under continuing contract or contracts with Kelvinator, Inc. and Gibson Products Corp. (Hearing site: Chicago, IL or Washington, DC.)

NOTE.—Common control may be involved.

No. MC 115311 (Sub-No. 273F), filed March 29, 1978. Applicant: J & M TRANSPORTATION CO., INC., P.O. Box 488, Milledgeville, GA 31061. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, GA 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the facilities of Armco Steel Corp. at Ashland, KY, to points in AL, AR, GA, FL, LA, MS, NC, SC, TN, TX, and VA, restricted to traffic originating at Ashland, KY. (Hearing site: Columbus, OH or Atlanta, GA.)

No. MC 115841 (Sub-No. 623F), filed March 29, 1978. Applicant: COLONIAL REFRIGERATED TRANSPORTATION, INC., 9041 Executive Park Drive, Suite 110, Building 100, Knoxville, TN 37919. Applicant's representative: E. Stephen Heisley, 666 11th Street NW., 805 McLachlen Bank Building, Washington, DC 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except in bulk), from the facilities of Welch Foods, Inc., at or near Lawton, MI, to points in AK, KS, NE, MO, NM, OK, and TX. (Hearing site: Buffalo, NY.)

NOTE.—Common control may be involved.

No. MC 115904 (Sub-No. 89) (Amendment), filed November 28, 1977, published in the FEDERAL REGISTER issue of January 26, 1978, and republished as amended, this issue. Applicant: GROVER TRUCKING CO., a corporation, 1710 West Broadway, Idaho Falls, ID 83401. Applicant's representative: Irene Warr, 430 Judge Building, Salt Lake City, UT 84111. Authority sourght to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Masonry articles and supplies*, between Idaho Falls, ID, on the one hand, and, on the other, points in the United States located on and west of a line beginning at the mouth of the Mississippi River and extending along the Mississippi River to its junction with the western boundary of Itasca County, MN; then northward along the western boundaries of Itasca and Koochiching Counties, MN, to the international boundary line between the United States and Canada. Restriction: Restricted against the transportation of commodities which by reason of their size and weight require the use of special equipment, commodities in bulk, and those commodities falling within the category described in Mercer Extension—Oil Field Commodities, 74 MCC 459. (Hearing site: Boise, ID or Salt Lake City, UT.)

NOTE.—Common control may be involved. The purpose of this republication is to amend the territorial description and eliminate the restriction "to the account of Rocky Mountain Supply."

No. MC 115931 (Sub-No. 61F), filed March 29, 1978, Applicant: BEE LINE TRANSPORTATION, INC., P.O. Box 3987, Missoula, MT 59801. Applicant's representative: Gene P. Johnson, P.O. Box 2471, Fargo, ND 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Buildings, building panels, building parts, and materials, accessories, and supplies* used in

the installation, erection, and construction of buildings, building panels, and building parts, from the facilities of Butler Manufacturing Co., located at or near Galesburg, IL, to points in ID, OR and WA. (Hearing site: Minneapolis or St. Paul, MN.)

No. MC 116763 (Sub-No. 412F), filed April 3, 1978. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, OH 45380. Applicant's representative: H. M. Richters, North West Street, Versailles, OH 45380. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except frozen, and commodities in bulk), from the facilities of Curtice-Burns, Inc., located at or near Alton, Leicester, LeRoy, Oakfield, Phelps, Shortsville, South Dayton, NY to points in AL, FL, GA, LA, MS, NC, SC, and TN. Restricted to the transportation of traffic originating at and destined to the named points. (Hearing site: Rochester, NY.)

No. MC 117574 (Sub-No. 298F), filed March 20, 1978. Applicant: DAILY EXPRESS, INC., P.O. Box 39, 1076 Harrisburg Pike, Carlisle, PA 17013. Applicant's representative: James W. Hagar, P.O. Box 1166, 100 Pine Street, Harrisburg, PA 17108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities as are dealt in or used by agricultural equipment and industrial equipment dealers and manufacturers* (except commodities in bulk), between points in the United States (included AK, but excluding HI), restricted to movements from, to, or between the facilities of AVCO New Idea Farm Equipment Division, AVCO Corp., and its dealers. (Hearing site: June 8, 1978, at Columbus, OH, on a consolidated basis with MC 95084 (Sub-No. 118); MC 119641 (Sub-No. 141); and MC 114211 (Sub-No. 344F.)

NOTE.—Common control may be involved.

No. MC 117574 (Sub-No. 302F), filed March 29, 1978. Applicant: DAILY EXPRESS, INC., P.O. Box 39, 1076 Harrisburg Pike, Carlisle, Pa. 17013. Applicant's representative: James W. Hagar, P.O. Box 1166, 100 Pine Street, Harrisburg, PA 17108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood, paneling, and composition board*, from Camden, NJ, to points in the United States in and east of ND, SD, NE, KS, OK, and TX. (Hearing site: Philadelphia, PA or Washington, DC.)

No. MC 117589 (Sub-No. 49F), filed: February 15, 1978. Applicant: PROVISIONERS FROZEN EXPRESS, INC., 3801 7th Ave. So., Seattle, WA 98108. Applicant's representative: Michael D. Duppenthaler, 607 3rd Ave., 515 Lyon Bldg., Seattle, WA 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Frozen human blood, blood plasma*, in vehicles equipped with mechanical refrigeration; and *materials, equipment and supplies* related thereto, between points in WA and OR on the one hand and, on the other, points in CA, (2) *frozen foods*, in vehicles equipped with mechanical refrigeration, from Albuquerque, NM, to points in WA, OR, ID, and MT; and (3) *meats, meat products and meat byproducts and articles* distributed by meat packinghouses, in vehicles equipped with mechanical refrigeration from points in WA (except Seattle), to point in NM. (Hearing site: Seattle, WA.)

No. MC 117786 (Sub-No. 13F), filed March 28, 1978. Applicant: RILEY WHITTLE, INC., P.O. Box 19038, Phoenix, AZ 85009. Applicant's representative: Thomas F. Kilroy, Suite 406, Executive Building, 6901 Old Keene Mill Road, Springfield, VA 22150. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Charcoal; charcoal briquettes, fireplace logs* (compressed sawdust wax impregnated); *charcoal lighter fluid*, in cans in cartons; *hickory chips* (not charred) for flavoring purposes; and *vermiculite* (other than crude) from Belle, MO, to points in WA, OR, CA, NV, UT, AZ, NM, and CO. (Hearing site: Louisville, KY.)

No. MC 119789 (Sub-No. 441F), filed March 29, 1978. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, TX 75222. Applicant's representative: James K. Newbold, Jr., P.O. Box 6188, Dallas, TX 75222. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale, retail, and chain grocery and food business houses, from Cincinnati and Lima, OH, to points in AZ, CA, CO, LA, OR, TX, and WA. (Hearing site: Cincinnati, OH.)

No. MC 123069, filed March 30, 1977. Petitioner: ALLER & SHARP, INC., 817 West Fifth Avenue, Columbus, OH 43212. Petitioner's representative: Charles W. Singer, 327 South LaSalle Street, Chicago, IL 60604. Petitioner seeks to modify its irregular route authority for transporting: *Army subsistence, clothing, equipage, and supplies*, between points in OH, KY, IN, and WV. This authority had been granted based on the same authority previously held as a contract carrier in permit No. MC 18124. Petitioner intends to demonstrate that the commodity description supported by the evidence in the "grandfather" proceeding should have been *general commodities* instead of *Army subsistence, clothing, equipage, and supplies.* (Hearing site: Columbus, OH.)

No. MC 123255 (Sub-No. 160F), filed March 30, 1978. Applicant: B. & L. MOTOR FREIGHT, INC., 140 Everett Avenue, Newark, OH 43055. Applicant's representative: C. F. Schnee, Jr., 140 Everett Avenue, Newark, OH 43055. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pet food*, from Muscatine, IA to points in CT, DE, IL, IN, KY, MD, MA, NJ, NY, OH, PA, RI, VA. WV, and DC. (Hearing site: Columbus, OH.)

NOTE.—Common control may be involved.

No. MC 123872 (Sub-No. 84F), filed March 29, 1978. Applicant: W. & L. MOTOR LINES, INC., P.O. Box 2607, Hickory, NC 28601. Applicant's representative: Allen E. Bowman, P.O. Box 2607, Hickory, NC 28601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* (except commodities in bulk), from Plover, WI to points in AL, FL, GA, KY, LA, MS, NC, OK, SC, TN, TX, VA, and WV. Restricted to traffic originating at the facilities of, or used by Ore-Ida Foods, Inc. and Terminal Ice and Cold Storage Co., at or near Plover, WI, and further restricted to traffic destined to named States. (Hearing site: Washington, DC or Boise, ID.)

NOTE.—Applicant holds contract carrier authority under MC 142483 therefore, dual operations may be involved.

No. MC 123872 (Sub-No. 85F), filed March 28, 1978. Applicant: W. & L. MOTOR LINES, INC., P.O. Box 2607, Hickory, NC 28601. Applicants representative: Allen E. Bowman, P.O. Box 2607, Hickory, NC 28601. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Meats, meat products, meat byproducts* and *articles* distributed by meat packing houses, as described in sections A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk): from: Kenosha, WI to points in GA, NC, SC, KY, VA, and TN. Restricted to traffic originating at named origin and destined to named destinations. (Hearing site; Milwaukee, WI or Washington, DC.)

No. MC 124078 (Sub-No. 795F), filed April 4, 1978. Applicant: SCHWERMAN TRUCKING CO., a corporation, 611 South 28 Street, Milwaukee, WI 53215. Applicant's representative: Richard H. Prevette, P.O. Box 1601, Milwaukee, WI 53201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soybean oil*, in bulk, in tank vehicles, from the facilities of Cargill, Inc., at or near Sidney, OH to points in GA, IL, IN, KY, MD, MA, MI, NJ, NY, NC, OH, PA, TN, and VA. (Hearing site: Minneapolis, MN.)

NOTE.—Authority is sought to serve points in Ontario and Quebec, CD via international border ports of entry in MI and NY. Dual operations may be involved.

No. MC 124887 (Sub-No. 52F), filed March 29, 1978. Applicant: SHELTON TRUCKING SERVICE, INC., Route 1, Box 230, Altha, FL 32421. Applicant's representative: Sol H. Proctor, 1101 Blackstone Bldg., Jacksonville, FL 32202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Heads cut, tall oil, fatty acids, and rosin* (except commodities in bulk), from Port St. Joe, FL to points in AL, FL, GA, MS, LA, NC, SC and TN. (Hearing site: Jacksonville or Tallahassee, FL, or Atlanta, GA.)

No. MC 124896 (Sub-No. 51F), filed March 29, 1978. Applicant: WILLIAMSON TRUCK LINES, INC., P.O. Box 3485. Wilson, NC 27893. Applicant's representative: Jack H. Blanshan, Suite 200, 205 West Touhy Avenue, Park Ridge, IL 60068. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by lawn and garden care centers (except commodities in bulk), from the facilities of O. M. Scott & Sons Co., at or near Marysville, Columbus, and Vermilion, OH, to points in AL, DC, DE, FL, GA, LA, MD, MS, NC, SC, TN, and VA, restricted to the transportation of shipments originating at the named origins and destined to the named States. (Hearing sites: Columbus, OH, Chicago, IL.)

No. MC 124896 (Sub-No. 52F), filed March 23, 1978. Applicant: WILLIAMSON TRUCK LINES, INC., P.O. Box 3485, Wilson, NC 27893. Applicant's representative: Jack H. Blanshan, Suite 200, 205 West Touhy Avenue, Park Ridge, IL 60068. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bananas and agricultural commodities* exempt from economic regulation when moving in mixed shipments with bananas, from Charleston, SC, to points in IA, KS, MN, MO, NE, NC, ND, SD, VA, and WI. (Hearing site: New Orleans, LA, or Washington, DC.)

No. MC 125010 (Sub-No. 17F), filed March 20, 1978. Applicant: GIBCO MOTOR EXPRESS, INC., 3405 North 33rd Street, Terre Haute, IN 47805. Applicant's representative: Norman R. Garvin, 815 Merchants Bank Building, Indianapolis, IN 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Coal and coke*, in bulk, from points in Clay, Greene, Sullivan, and Vigo Counties, IN, to points in IL; (2) *Ferroalloys*, in dump vehicles and in containers, from Calvert City, KY, to Danville, IL; (3) *coke, scrap and iron, and steel*, from Danville, IL, to Calvert City, KY; (4) *fly ash*, in bulk, in tank or hopper-type vehicles, from points in Vigo County, IN, to points in IL, IA, KY, MI, MO, OH, and WI; (5) *ferroalloys*, from Calvert City, KY, to Saginaw, MI; (6) *scrap metal*, between Kokomo, IN, on the one hand, and, on the other, points in Vermilion County, IL; (7) *coke*, in bulk, from points in Vigo County, IN, to points in MI, OH, KY, MO, and IA; and (8) *ferroalloys*, from Calvert City, KY, to Flat Rock, MI, and Defiance, OH. (Hearing site: Indianapolis, IN, or Chicago, IL.)

NOTE.—Applicant presently holds authority to perform and the proposed service under its permit No. MC 125010 and subnumbers thereunder. The purpose of this application is to convert that authority into a certificate of public convenience and necessity.

No. MC 125551 (Sub-No. 15F), filed March 29, 1978. Applicant: K & W TRUCKING CO., INC., 101 Cooper Avenue North, P.O. Box 1415, St. Cloud, MN 56301. Applicant's representative: Robert D. Gisvold, 1000 First National Bank Building, Minneapolis, MN 55402. (Hearing site: Portland, OR.)

NOTE.—Applicant holds water contract carrier authority in No. W 435, and subs thereunder, therefore dual operations may be involved. Common control may also be involved.

FINANCE APPLICATIONS

The following applicatons seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, or rail carriers or motor carriers pursuant to Sections 5(2) or 210a(b) of the Interstate Commerce Act.

An Original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

No. MC-F-11380 (Cancellation) (OVERNITE TRANSPORTATION COMPANY — Purchase — TIDEWATER EXPRESS LINES INC.) This notice is being published pursuant to a decision of the Commission, served May 2, 1978 in No. MC-F-12715, which reopened the proceeding in No. MC-F-11380 for the limited purpose of cancelling the conditions imposed in regular route authority held by Kent Freight Lines, Inc., in Certificate No. MC-49117, by report and order served February 28, 1974, (1) restricting service between Denton, MD, and Baltimore, MD, and between Washington, DC, and Stevensville (Kent Island), MD, to transportation of traffic moving by the carrier to or from points in MD east of Chesapeake Bay and south of the Chesapeake-Delaware Canal, (2) restricting service at off-route points in Anne Arundel and Prince Georges Counties, MD, to transportation of traffic moving by the carrier to or from points in MD east of Chesapeake Bay and south of the Chesapeake-Delaware Canal, and (3) restricting the regular routes between Denton and Baltimore, and between Washington and Stevensville against joinder with each other except at Stevensville. Any person having an interest in who would be prejudiced by cancellation of the restrictions as determined in the report may file an original and six copies of a petition or other pleading within 30 days from the date of publication of this notice. Such petitions shall set forth the precise manner in which the party has been prejudiced by the cancellations of the restriction. Applicants shall file their replies to the petitions within 50 days from the date of publication of this notice.

No. MC-F-13345. (Supplemental) (CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE—Pooling—CREITES TRANSFER, ET AL.), published in the October 14, 1977, issue of the FEDERAL REGISTER, erroneously as MC-F-13245. This supplemental notice reflects the decision of Review Board Number 5, as specified in its decision of May 8, 1978, to permit applicant to amend its application. Under the amended application, the agreement between Consolidated Freightways Corporation of Delaware and Nelson's Express, Inc., will include the following points in MD: Berkley, Cardiff, Dublin, Greenmount, Hereford, Jarrettsville, Lineboro, Long Green, Manchester, Maryland Line, Melrose, Millers, Parkton, Poole, Prospect, Pylesville, Rocks, Shawsville, Silver Run, Street, Union Mills, Whiteford, White Hall.

No. MC-F-13507 (Correction) (SPECIALIZED PARTS DISTRIBUTION, INC., (non-carrier)—Control—SENTINAL STAR EXPRESS CO.), published in the February 24, 1978 issued of the FEDERAL REGISTER. Prior notice inadvertently did not described all of the active authority of Sentinal Star Express Co. Notice should have also included the following authority: (A) *Express and newspapers*, as a *common carrier* over regular routes; (1) Beginning and ending at Orlando, FL, in circuitous routes, serving all intermediate points; from Orlando, FL, over combined U.S. Hwys 17 and 92 to Kissimmee, FL, then over combined U.S. Hwys 192 and 441 to St. Cloud, FL, then returning over combined U.S. Hwys 192 and 441 to Kissimmee, FL, then over combined U.S. Hwys 17 and 92 via Intercession City and Davenport, FL, to Haines City, FL, then over U.S. Hwys 92 via Lake Alfred and Auburndale, FL, to Lakeland, FL, then returning over U.S. Hwys 92 to Auburndale, FL, then over FL Hwy 544 to junction FL Hwy 557, then over FL Hwy 557 to Winter Haven, FL, then over FL Hwy 540 to junction U.S. Hwy 27, then over FL Hwy 27 to Lake Wales, FL, then over Alternates U.S. Hwy 27 via Waverly, Dundee and Lake Hamilton, FL, to Haines City, FL, and then over combined U.S. Hwys 17 and 92 to Orlando. From Orlando over U.S. Hwy 441 to Apopka, FL, then over FL Hwy 437 via Ocoee, FL, to Winter Garden, FL, then over country road and FL Hwy 50 to junction U.S. Hwy 27, then over U.S. Hwy 27 to Mineola, FL, then over FL Hwy 561 to Clermont, FL, then over FL Hwy 50 to Groveland, FL, and then returning over FL Hwy 50 via Clermont, FL, to Orlando. From Orlando over combined U.S. Hwys 17 and 92 to Sanford, FL, then over FL Hwy 415 via Osteen, FL, to junction FL Hwy 44, then over FL Hwy 44 to New Smyrna, FL, then over U.S. Hwy 1 to Daytona, FL, then over U.S. Hwy 92 to DeLand, FL, and then over combined U.S. Hwys 17 and 92 via Orange City, FL, to Orlando. From Orlando over U.S. Hwy 441 via Plymouth, Zellwood, and Mount Dora, FL, to junction FL Hwy 19, then over FL Hwy 19 to Eustis, FL, then returning over FL Hwy 19 to junction U.S. Hwy 441, then over U.S. Hwy 441 via Tavares, FL, to Leesburg, FL, then over FL Hwy 44 to Wildwood FL, then returning over FL Hwy 44 to Leesburg, FL, and then over U.S. Hwy 441 to Orlando. From Orlando over FL Hwy 50 to Indian River City, FL, then over U.S. Hwy 1 via Titusville, FL, to Mims, FL, then over FL Hwy 46 to junction FL Hwy 426, then over FL Hwy 426 via Oviedo, FL to Winter Park, FL, then over combined U.S. Hwys 17 and 92 to junction FL Hwy 50, and then over FL Hwy 50 to Orlando. From Orlando over FL Hwy 50 to junction FL Hwy 406, then over FL Hwy 406 to Titusville, FL, then over U.S. Hwy 1 via New Smyrna, FL, to Dayton, FL, then returning over U.S. Hwy 1 to New Smyrna, FL, then over FL Hwy 44 to Samsula, FL, then over FL Hwy 415 to Sanford, FL, and then over combined U.S. Hwys 17 and 92 to Orlando. From Orlando over FL Hwy 50 to junction FL Hwy 520, then over FL Hwy 520 via Cocoa and Merritt Island, FL, to junction FL Hwy A1A, then over FL Hwy A1A to junction FL Hwy 401, then over FL Hwy 401 via Port Canaveral, FL, to Cape Kennedy, FL, then returning over FL Hwy 401 to junction FL Hwy A1A, then over FL Hwy A1A via Cocoa Beach, Patrick Air Force Base, Canova Beach and Indialantic, FL, to Melbourne Beach, FL, then returning over FL Hwy A1A to junction FL Hwy 520, then over FL Hwy 520 to Junction FL Hwy 50, and then over FL Hwy 50 to Orlando. From Orlando over FL Hwy 50 to junction U.S. Hwy 27, then over U.S. Hwy 27 via Minneola, FL, to Leesburg, FL, then over FL Hwy 44 to Wildwood, FL, then over U.S. Hwy 301 to Belleview, FL, then over U.S. Hwy 27 to Ocala, FL, then returning over U.S. Hwy 27 to Belleview, FL, then over combined U.S. Hwys 27 and 441 to Leesburg, FL, and then over U.S. Hwy 441 to Orlando.
